is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, A. Ichihara, the aforesaid national of a designated enemy country (Japan);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Japan).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in Section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[Vesting Order 15696, Amdt.]

TOKUMON AOKI AND HISAKO KURIYAMA AOKI

In re: Stock and safe deposit lease and contents owned by Tokumon Aoki and Hisako Kuriyama Aoki, also known as Hisa Aoki and as Mrs. Hisako Aoki.

Vesting Order 15696, dated November 15, 1950, is hereby amended as follows and not otherwise: By deleting from subparagraph 2 (c) of the aforesaid Vesting Order 15696 the number "NC 2093" relating to a certificate for 50 shares of common stock of Southern Pacific Company and substituting therefor the number "NC 20923".

All other provisions of said Vesting Order 15696 and all actions taken by or on behalf of the Attorney General of the United States in reliance thereon, pursuant thereto and under the authority thereof are hereby ratified and confirmed.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[F. R. Doc. 51-3916; Filed, Mar. 30, 1951, 8:53 a. m.]

[Vesting Order 17552]

MARY JUNGWIRTH

In re: Claim owned by Mary Jungwirth, also known as Mary Jungwirth Kage, Maria Jungwirth and as Maria Kage. F-28-31382.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Mary Jungwirth, also known as Mary Jungwirth Kage, Maria Jungwirth and as Maria Kage, whose last known address is 77 Johannes-strasse, Stuttgart, W. Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the property described as follows: That certain claim for redemption against the Michigan State Board of Escheats and the State of Michigan, arising by reason of the collection or receipt by said Board of Escheats pursuant to orders of the Circuit Court in Chancery of the County of Oakland (Files numbered 24,009 and 16,720) in accordance with the provisions of Michigan Statutes, Title 26, Chapter 263 (escheated estates) of the following: Those sums of money previously on deposit in dormant accounts maintained with the First State Bank of Royal Oak, Michigan, in the name of Mary Jungwirth; and any and all rights to file with said Michigan State Board of Escheats, demand, enforce and collect the aforesaid claim for redemption,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Mary Jungwirth, also known as Mary Jungwirth Kage, Maria Jungwirth and as Maria Kage, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[F. R. Doc. 51-3915; Filed, Mar. 30, 1951; 8:53 a. m.]

[Return Order 912]

MAURICE HENRI LEMAIRE

Having considered the claim set forth below and having issued a determination allowing the claim, which is incorporated by reference herein and filed herewith,

It is ordered, That the claimed property, described below and in the determination, including all royalties accrued thereunder and all damages and profits recoverable for past infringement thereof, be returned after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Notice of Intention To Return Published, and Property

Maurice Henri Lamaire, Paris, France; Claim No. 41772; February 9, 1951 (16 F. R. 1292); property described in Vesting Order No. 666 (8 F. R. 5047, April 17, 1943), relating to United States Letters Patent Nos. 1,899,874; 1,922,895; 1,927,178; 2,004,051 and 2,057,400. This return shall not be deemed to include the rights of any licensees under the above patents.

Appropriate documents and papers effectuating this order will issue.

Executed at Washington, D. C., on March 26, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[F. R. Doc. 51-3917; Filed, Mar. 30, 1951; 8:53 a. m.]

[Return Order 919]

EMMA ZIMLICK EBELER

Having considered the claim set forth below and having issued a determination allowing the claim, which is incorporated by reference herein and filed herewith,

It is ordered, That the claimed property, described below and in the determination, be returned, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Notice of Intention To Return Published, and Property

Emma Zimlick Ebeler, Philadelphia 19, Pa.; Claim No. 7749; February 16, 1951 (16 F. R. 1662); $596.62 in the Treasury of the United States. A gold bracelet set with precious stones. All right, title, and interest of Emma Zimlick Ebeler in and to the trust created under the will of Arthur J. Zimlick, a/k/a Arthur John Zimlick, deceased. All right, title, and interest of Emma Zimlick Ebeler in and to the Estate of Arthur J. Zimlick, a/k/a Arthur John Zimlick, deceased.

Appropriate documents and papers effectuating this order will issue.

Executed at Washington, D. C., on March 26, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[F. R. Doc. 51-3919; Filed, Mar. 30, 1951; 8:53 a. m.]

[Return Order 920]

EMILE CHARLES ROBERT DIEDERICHS

Having considered the claim set forth below and having issued a determination allowing the claim, which is incorporated by reference herein and filed herewith,

It is ordered, That the claimed property, described below and in the determination, including all royalties accrued thereunder and all damages and profits recoverable for past infringement thereof, be returned after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Notice of Intention To Return Published, and Property

Emile Charles Robert Diederichs, Isere, France; Claim No. 29555; February 16, 1951 (16 F. R. 1661); property described in Vesting Order No. 667 (8 F. R. 4936, April 17, 1943) relating to United States Letters Patent No. 2,281,561. This return shall not be deemed to include the rights of any licensees under the above patent.

Appropriate documents and papers effectuating this order will issue.

Executed at Washington, D. C., on March 26, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

Equipment:
Electrical systems and equipment:
Batteries 3211
Installation 3292
Lights:
Instrument 3292
Position 3211, 3292
Switch, master 3292
Radio equipment; installation 3292
Safety equipment; life rafts and life preservers 3292
Flight requirements:
Flight characteristics:
Spinning 3284
Stability 3284
Stalls 3284
Trim 3284
Performance requirements:
Climb 3283
Landing 3284
Stalling speed of "not to exceed 70 miles per hour"; revocation 3283
Take-off 3283
Weight range and center of gravity 3282
Operating limitations and information:
Airplane flight manual 3293
Markings and placards 3292
Control markings 3293
Instrument markings 3293
Power-plant installations; reciprocating engines:
Components; reverse-thrust propellers, revocation 3291
Cooling; tests 3291
Engines and propellers 3291
Fire wall and cowling 3292
Fuel system; fuel tanks installation 3291
Induction system; de-icing and anti-icing provisions 3292
Strength requirements:
Control surface loads:
Ailerons, wing flaps, tabs, etc 3288
General 3286
Tail surfaces:
Horizontal 3286
Vertical 3287
Control system loads; primary flight controls and systems 3288
Flight loads; symmetrical and unsymmetrical flight conditions 3284
Ground loads:
Ground loads 3288
Landing cases and attitudes 3288
Skiplanes 3288
Proof of structure 3284
Water loads; general 3288
Transport categories, equipment; position light system installation, red passing lights (CAA policies) 3211
Rotocraft airworthiness; structure:
Loads, control surface and system; life of auxiliary rotor assemblies (CAA interpretations) 3405
Main component requirements; service life of main rotors (CAA policies) 3405
Certificates and ratings:
Air agencies:
Airman agency certificates; requirements (CAA rules), proposed rule making 3232
Certificates; application (CAA rules), proposed rule making 3237
Flying school curriculums (CAA rules), proposed rule making 3233
Graduation certificates (CAA rules); proposed rule making 3237
Ground school curriculum (CAA rules), proposed rule making 3232
Mechanic school certificates; proposed revision 3663

Defense Mobilization Board. *See* Defense Mobilization, Office of.
Migratory Labor, President's Commission on, termination date; Executive order respecting. *See* Presidential documents.
Navy Physical Evaluation Board. *See* Navy Department.
Railway Wage Panel, Temporary Emergency; appointment, etc. *See* Economic Stabilization Agency.

COMMITTEES, BOARDS, ETC.—Continued Page

Veterans' Education Appeals Board. *See* Veterans' Education Appeals Board.

COMMODITY CREDIT CORPORATION:

Chairmen of PMA county committees in Oklahoma and Texas; appointment as contracting officers, and delegation of authority respecting production and harvesting of castor beans 3311
Food commodities acquired through price support operations:
Pricing policy for commodities available for sale (including Mexican canned meats acquired under other programs); sales of certain commodities at fixed prices pursuant to. *See* Sales of certain commodities at fixed prices.
Sales of certain commodities at fixed prices:
Domestic price list, for April 3366
Export price list, for April 3367
Price control, for sales of agricultural commodities. *See main heading* Price Stabilization, Office of.
Loans, purchases, and other operations:
Corn. *See* Grains.
Cotton; American-Egyptian cotton purchase program, 1951 (Amsak and Pima 32 varieties) 3207
Grain sorghums. *See* Grains.
Grains, certain, and related commodities; price support programs, various commodities:
Corn loan and purchase agreement program, 1950; basic support rates, for Milwaukee County, Wis 3425
Flaxseed; Texas flaxseed purchase program, 1951 3425
Grain sorghums, loan and purchase agreement program, 1950; county support rates, for Lincoln County, S. Dak 3027
Rye; loan and purchase agreement program, 1951 3427
Seeds:
See also Flaxseed.
Hay and pasture grass:
Loan and purchase agreement program, 1950:
Delivery of seed to CCC 3631
Schedule of basic specifications and rates 3025, 3631
Reseal loan program, 1950-crop 3151
Hay and pasture grass seeds. *See* Grains.
Mohair; price support purchase program, 1951 3429
Rye. *See* Grains.
Seeds. *See* Grains.
Tobacco loan program, 1950; Maryland tobacco:
Type 32, in loose leaf form; advance schedule 3327
Type 32b, in loose leaf form; advance schedule 3327
Wool; price support purchase program, 1951 3430

COMMUNIST PARTY, registration; hearing respecting. *See* Subversive Activities Control Board.

COMPENSATION. *See* Pay, compensation, allowances, etc.; *and* Wages and hours.

CONSTRUCTION:

CUSTOMS BUREAU: Page
Customs regulations; customs ports of entry, changes effected by Executive Order 10238:
See also main heading Presidential documents.
Alaska, Pelican; designation 3627
Connecticut, New London; extension 3627
Delaware, Lewes; revocation 3627
Massachusetts, Provincetown; revocation 3627
Mail, foreign, involving customs revenue; joint regulations with Post Office Department. *See main heading* Post Office Department.
Personnel, exemption of Howell Cone from compulsory retirement for age; Executive order respecting. *See main heading* Presidential documents.

D

DANGER AREAS AND ZONES:
Airspace restricted areas over military installations, etc. *See* Civil Aeronautics Board.
Danger zones. *See* Engineers, Corps of.
DAYS OF OBSERVANCE; proclamations respecting. *See* Presidential documents.
DECORATIONS, MEDALS, ETC.; military personnel. *See* Army Department.
DEFENSE DEPARTMENT:
See Air Force Department.
Army Department.
Munitions Board.
Navy Department.
Authority, delegations of. *See* Secretary of Defense, *below.*
Contract Finance Committee, composition and functions of; defense contract financing policy, regulations 3554
Secretary of Defense, Office of:
Authority, delegations of, to Secretary:
By General Services Administrator, to represent Government agencies with respect to electric rates of listed companies:
California Electric Power Co 3601
Public Service Electric and Gas Co., New Jersey 3319
By National Production Authority, to apply priority (DO) ratings to direct Government contracts and purchase orders to meet authorized procurement and construction programs (Delegation 1); aluminum and magnesium forms and products, authority to reschedule deliveries (Supplement 1) 2941
Defense contract financing policy 3554
DEFENSE ELECTRIC POWER ADMINISTRATION:
Delegation of authority with respect to exercise of functions and powers under NPA Order M-50:
Maintenance, Repair and Operating Requirements Branch, Chief, authority as to establishment and adjustment of MRO quotas, and of program material quotas for minor requirements, and as to quantity adjustments or exceptions to inventory restrictions 3197
Materials and Equipment Division, Chief 3197
Materials and Equipment Requirements Branch, Chief, authority to use and order program materials for major plant additions 3197
Plant additions:
Information to be filed, revision 3301
Program materials for major plant additions; authority of Chief, Materials and Equipment Requirements Branch to use and order 3197
DEFENSE MINERALS ADMINISTRATION:
Critical and strategic minerals and metals, exploration for sources of; procedures for obtaining Government aid 3183
Defense exploration projects, Government aid in, regulations 3183
Manganese ore; substitution of "Form MF" for "DMA Form" 3408
Mines and mineral processing plants, serialization. *See* Serialization of mines, smelters, and mineral processing plants.
Scheelite. *See* Tungsten ore.
Serialization of mines, smelters, and mineral processing plants, for purpose of providing priority and allocation assistance 3344

DEFENSE MINERALS ADMINISTRATION—Continued Page
Smelters, serialization. *See* Serialization of mines, smelters, and mineral processing plants.
Toll agreements for processing zinc ore, authorization 3217
Tungsten:
Tungsten concentrates; revocation 3013
Tungsten ore; conservation and distribution 3012
Zinc ore; toll agreements for processing, authorization 3217
DEFENSE MOBILIZATION, OFFICE OF:
Defense Mobilization Board; designation of Secretary of State as member of 3094
DEFENSE PETROLEUM ADMINISTRATION. *See* Petroleum Administration for Defense.
DEFENSE PRODUCTION ACT; economic stabilization under, Executive order respecting. *See* Presidential documents.
DEFENSE PRODUCTION ADMINISTRATION:
Voluntary plans; companies requested to participate in various plans:
Optical fire control, Army Ordnance Integration Committee on; supplemental list of members 3315
Tanker capacity, contribution of; additional companies 3315
DEFENSE SOLID FUELS ADMINISTRATION:
Coal mines, coke plants, and coal and coke preparation and processing plants:
Report on Form DSFA-1 3439
Serialization or classification of 3439
Shipments of solid fuels; directives for 3655
DEFENSE TRANSPORT ADMINISTRATION:
Authority, delegation of by Administrator, respecting preference and priority in port terminal storage and handling of bulk grain for export:
To Port Utilization Division director 3367
To Warehousing and Storage Division director; revocation 3367
Preference and priority in port terminal storage and handling of bulk grain for export (or for domestic sale or use):
Delegation of authority. *See* Authority.
General order; revision 3254
Limited temporary grain port handling permit respecting storage and handling of bulk grain for domestic sale or use, on hand or loaded for movement on or before April 16, 1951 3011
DISASTER LOANS:
Farm property. *See* Farmers Home Administration.
Real estate construction credit, for reconstruction of property destroyed by flood, fire, etc. *See* Federal Reserve System, Board of Governors.
DISCRIMINATION, against Government employees, on account of race, color, etc., fair employment program respecting. *See* Loyalty Review Board.
DISPLACED PERSONS COMMISSION:
Selection and eligibility; subversives and undesirables 3031

E

ECONOMIC STABILIZATION AGENCY:
See Price Stabilization, Office of.
Wage Stabilization Board.
Railroad wage adjustments (WAO 1); payments of certain wages, salaries and other compensation permitted 3559
Railroad Wage Panel, Temporary Emergency; appointment, functions, etc 3239
Seal, official; establishment by Executive order. *See main heading* Presidential documents.
EDUCATION, OFFICE OF:
Financial assistance to local education agencies, hearing in connection with 3515
Grants to States for school surveys; hearings in connection with 3515
School construction, financial assistance to local education agencies, and school survey grants to States; hearings in connection with 3515
EDUCATION APPEALS BOARD, VETERANS'. *See* Veterans' Education Appeals Board.

EDUCATIONAL FACILITIES: Page
Civil defense training schools and staff colleges, establishment, etc. *See* Federal Civil Defense Administration.
Price regulations, exception of education services from. *See* Price Stabilization, Office of.
Regulations of Office of Education respecting. *See* Education, Office of.
Vocational rehabilitation and education. *See* Veterans' Administration.
ELECTRIC POWER ADMINISTRATION. *See* Defense Electric Power Administration.
EMPLOYEES' COMPENSATION BUREAU:
Civilian American citizens detained by or in hiding from the Imperial Japanese Government, compensation for injury, disability or death:
General provisions 2933
Procedures. *See* Procedures.
Employees of contractors with United States, compensation for injury, disability, death or enemy detention; administrative provisions:
Deductions from benefits, exclusions; time of detention otherwise collected 2933
General provisions, compensation payable 2933
Procedures, statement of; compensation for injury, disability or death of civilian American citizens incurred while detained by or in hiding from the Imperial Japanese Government 2932
ENGINEERS, CORPS OF; DEPARTMENT OF THE ARMY:
Authority, delegation of, to Chief of Engineers by Secretary of Army, with respect to release of information from records. *See main heading* Army Department.
Chief Joseph Dam Project, Washington; withdrawal of public land for use in construction of. *See main heading* Land Management Bureau.
Regulations:
Danger zone regulations:
Delaware coast, Atlantic Ocean off; antiaircraft artillery firing areas, Second Army 3408
North Carolina; Albemarle and Pamlico Sounds and adjacent waters, danger zones for naval operations 3131
Ohio; west end of Lake Erie north of Erie Ordnance Depot, Lacarne (area for seasonal antiaircraft firing from Camp Perry and Locust Point, by National Guard) 3408
Navigation regulations, Biscayne Bay, Coconut Grove, Miami, Fla.; seaplane restricted area, Coast Guard Air Station 3047
ENTOMOLOGY AND PLANT QUARANTINE BUREAU:
Regulations; white-fringed beetles, domestic quarantine notice respecting:
Cotton and cottonseed, forest products, building materials, and containers, exemption of, from certification requirements; proposed rule making 2973
Disinfecting vehicles, machinery, etc.; proposed rule making 2973
Regulated areas; proposed rule making 2972
Regulated articles, movement of; proposed rule making 2972
EXECUTIVE OFFICE OF THE PRESIDENT:
See Defense Mobilization, Office of.
EXECUTIVE ORDERS. *See* Presidential documents.
EXPLOSIVES, shipping regulations. *See* Coast Guard.
EXPORT CONTROL. *See* International Trade, Office of.
EXPORTS. *See* Imports and exports.

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Rules and regulations, etc.:
- Common carrier regulations:
  - Accounts, uniform system of:
    - Class A and Class B telephone companies; classification of companies, proposed rule making 2938
    - Class C telephone companies; proposed rule making:
      - Classifications of companies 2939
      - Definitions 2939
      - Records 2939
  - Organization, delegations of authority, etc.:
    - Engineer in charge at each local headquarter office; authority to act upon applications for temporary permission to operate standard and FM broadcast stations with licensed operators of lesser grade than normally required 3319
    - Engineers in charge of port offices; deletion of provisions 3264
    - Motions Commissioner, designation of, for April 1951 2947
    - Safety and Special Radio Services Bureau; unit to carry on enforcement functions 3198
    - Secretary, authority delegated to, upon securing approval of Bureaus of Law and Engineering: requests for temporary operation of radio stations with licensed operators of lesser grade than normally required 3319
  - Practice and procedure; radio licenses, applications and proceedings affecting:
    - Application for renewal of license, broadcast and nonbroadcast, proposed 2973
    - Applications for temporary permission to operate standard and FM broadcast stations with licensed operators of lesser grade than normally required 3309
  - Radio regulations:
    - Aeronautical services; posting station licenses and transmitter identification cards 3190
    - Antenna towers, construction, marking and lighting of; form to be used to describe proposed structures 3190
    - Commercial radio operators; licenses:
      - Renewal requirements 3306
      - Temporary limited radiotelegraph second class operator license 3305
    - Frequency allocations:
      - Class B FM broadcast stations; amendment of revised tentative allocation plan for, proposed 3263
      - Radiolocation service, use of frequencies in 1750–1800 kc band by; proposed rule making 2516
    - Industrial radio services:
      - Radiolocation service, proposed rule making 3516
      - Relay stations, proposed rule making 3194
      - Special service; eligibility 3256
    - Land transportation radio services; relay stations, proposed rule making 3194

APR 6 '51

FEDERAL REGISTER

VOLUME 16 NUMBER 64

Washington, Tuesday, April 3, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10229

EXEMPTION OF HUGH H. BENNETT FROM COMPULSORY RETIREMENT FOR AGE

WHEREAS Hugh H. Bennett, Chief of the Soil Conservation Service of the U. S. Department of Agriculture, will, during the month of April 1951 become subject to compulsory retirement for age under the provisions of the Civil Service Retirement Act of May 29, 1930, as amended, unless exempted therefrom by Executive order; and

WHEREAS, in my judgment, the public interest requires that the said person be exempted from such compulsory retirement as provided below;

NOW, THEREFORE, by virtue of and pursuant to the authority vested in me by section 204 of the act of June 30, 1932, 47 Stat. 404 (5 U. S. C. 715a), I hereby exempt the said Hugh H. Bennett from compulsory retirement for age for a period of one year ending April 30, 1952.

HARRY S. TRUMAN

THE WHITE HOUSE,
March 30, 1951.

[F. R. Doc. 51-4006; Filed, Mar. 30, 1951; 3:18 p. m.]

TITLE 7—AGRICULTURE

Subtitle A—Office of the Secretary of Agriculture

[Amdt. 2]

PART 5—DETERMINATION OF PARITY PRICES

CIGAR-FILLER AND CIGAR-BINDER TYPES OF TOBACCO

Part 5, Determination of Parity Prices (15 F. R. 837) as amended (15 F. R. 8374) is amended as follows:

1. Section 5.4 is amended by deleting the following under the paragraph headed "Basic Commodities, Tobacco"—"and cigar filler and binder, types 42–46 and 51–56." The calendar year price for type 46 shall be combined with season average prices for the other types in arriving at the average price for cigar filler and binder types 42–46 and 51–56." and adding "and cigar filler and binder, types 42–44 and 51–55."

2. Section 5.5 is amended by adding "For Puerto Rican filler tobacco, type 46, the price data for each calendar year shall be the season average price of type 46 for the previous year's crop."

3. Section 5.7 is amended by deleting from the paragraph headed "Basic Commodities" the following "and cigar filler and binder, types 42–46 and 51–56. The calendar year price for type 46 shall be combined with season average prices for the other types in arriving at the average price for cigar filler and binder types 42–46 and 51–56," and adding "cigar filler and binder, types 42–44 and 51–55; and Puerto Rican filler, type 46."

(Sec. 301, 52 Stat. 38, as amended; 7 U. S. C. 1301)

Done at Washington, D. C., this 29th day of March 1951.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 51-3942; Filed, Apr. 2, 1951; 8:46 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 7, Amdt. 68]

PART 60—AIR TRAFFIC RULES

DANGER AREA ALTERATIONS

The danger area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required. Title 14, § 60.13–1 is amended as follows:

1. The Carrizzo Valley, California, area, published on April 21, 1949, in 14 F. R. 1913, amended on June 23, 1949, in 14 F. R. 3393, and on November 30, 1949, in 14 F. R. 7198, is further amended by changing the "Designated Altitude" column to read: "Surface to unlimited".

Chapter I—Federal Trade Commission

[Docket 5686]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

DON N. CARNERIE ET AL.

Subpart—*Advertising falsely or misleadingly:* § 3.15 *Business status, advantages or connections; Government connection—Unique or special status or advantages;* § 3.115 *Jobs and employment service:* § 3.205 *Scientific or other relevant facts.* Subpart—*Misrepresenting oneself and goods; Business status, advantages or connections:* § 3.1425 *Government connection;* § 3.1520 *Personnel or staff;* § 3.1570 *Unique status or advantages—Goods;* § 3.1670 *Jobs and employment;* § 3.1740 *Scientific or other relevant facts;* § 3.1770 *Unique nature or advantages.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 3.1995 *Job guarantee and employment.* Subpart—*Securing signatures wrongfully:* § 3.2175 *Securing signatures wrongfully.* Subpart—*Using misleading name—Vendor:* § 3.2380 *Government connection.* In connection with the offering for sale, sale and distribution in commerce, of courses of study and instruction intended for preparing students thereof for examination for civil service positions under the United States Government, or any similar courses of study (1) representing, directly or by implication, that respondent has any connection with the United States Government, or any branch or agency thereof, through the use of the term Civil Preparation Service, or any other term of similar import or meaning, as a trade name, or as a part thereof; (2) representing through the use of official publications of the United States Government, or other books or publications resembling or simulating them, that respondent or his agents are connected with the United States Government, or any branch thereof; (3) representing in any manner, directly or by implication, that respondent has any connection with the Government of the United States, or any branch thereof; (4) representing, directly or by implication, that the number of positions available or vacant in the United States Civil Service, or any branch thereof, is greater than is actually the fact; (5) representing, directly or by implication, that positions in the United States Civil Service can be obtained through respondent or by completing respondent's courses of study, or that it is necessary to take such courses in order to qualify for such positions, or that respondent can guarantee a position if such courses are completed; (6) representing, directly or by implication, that students who complete respondent's courses of study can or will be placed by respondent in whatever position or location such student may select; (7) representing, directly or by implication, that respondent has advance information, or information not generally available to the public, with respect to positions available in the United States Civil Service; (8) representing, directly or by implication, that persons employed in United States Civil Service positions are pensioned after twenty years of service, or that such persons may retire in any given number of years or at any designated pension, when such is not the fact; or, (9) soliciting, procuring or accepting executed applications or contracts for respondent's courses without permitting prospect to read same over fully and thoroughly without interruption; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 46) [Cease and desist order, Don N. Carnerie trading as Civil Preparation Service, etc., Docket 5686, January 13, 1951]

In the Matter of Don N. Carnerie, Individually and Doing Business Under the Names and Styles of Civil Preparation Service, and American Extension Service

This proceeding was heard by Frank Hier, trial examiner, theretofore duly designated by the Commission, upon the complaint of the Commission, the answer of the respondent, and certain hearings at which testimony and other evidence in support of the complaint were introduced, which testimony and other evidence were duly recorded and filed in the office of the Commission, and the case was subsequently formally closed, following the failure of respondent—who attended only one hearing, to which he was subpenaed as a witness, and retained no counsel—to advise the trial examiner of an intention or desire to offer evidence by way of defense to the complaint, after indicating he would not do so.

Thereafter the proceeding regularly came on for final consideration by said trial examiner on the complaint, the answer thereto, and other evidence, and said trial examiner, having duly considered the record in the instant matter, found said proceeding in the interest of the public, and made his initial decision, comprising certain findings as to the facts, conclusion drawn therefrom, and order to cease and desist.

No appeal having been filed from said initial decision of said trial examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII, became the decision of the Commission January 13, 1951.

The said order to cease and desist is as follows:

It is ordered, That respondent Don N. Carnerie, his representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of courses of study and instruction intended for preparing students thereof for examination for civil service positions under the United States Government, or any similar courses of study, do forthwith cease and desist from:

1. Representing, directly or by implication, that respondent has any connection with the United States Government, or any branch or agency thereof, through the use of the term Civil Preparation Service, or any other term of similar import or meaning, as a trade name, or as a part thereof.

2. Representing through the use of official publications of the United States Government, or other books or publications resembling or simulating them, that respondent or his agents are connected with the United States Government, or any branch thereof.

3. Representing in any manner, directly or by implication, that respondent

has any connection with the Government of the United States, or any branch thereof.

4. Representing, directly or by implication, that the number of positions available or vacant in the United States Civil Service, or any branch thereof, is greater than is actually the fact.

5. Representing, directly or by implication, that positions in the United States Civil Service can be obtained through respondent or by completing respondent's courses of study, or that it is necessary to take such courses in order to qualify for such positions, or that respondent can guarantee a position if such courses are completed.

6. Representing, directly or by implication, that students who complete respondent's courses of study can or will be placed by respondent in whatever position or location such students may select.

7. Representing, directly or by implication, that respondent has advance information, or information not generally available to the public, with respect to positions available in the United States Civil Service.

8. Representing, directly or by implication, that persons employed in United States Civil Service positions are pensioned after twenty years of service, or that such persons may retire in any given number of years or at any designated pension, when such is not the fact.

9. Soliciting, procuring or accepting executed applications or contracts for respondent's courses without permitting prospect to read same over fully and thoroughly without interruption.

By "Decision of the Commission and order to File Report of Compliance", Docket 5686, January 13, 1951, which announced fruition of said initial decision, report of compliance with the order was required as follows:

It is ordered, That the respondent herein shall, within sixty (60) days after service upon him of this order, file with the Commission a report in writing setting forth in detail the manner and form in which he has complied with this order.

Issued: January 12, 1951.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

[Docket 5812]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

LARRY QUINN FASHIONS, INC., ET AL.

Subpart—*Misbranding or mislabeling:* § 3.1190 *Composition: Wool Products Labeling Act.* § 3.1325 *Source or origin: Wool Products Labeling Act.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1845 *Composition: Wool Products Labeling Act:* § 3.1900 *Source or origin: Wool Products Labeling Act.* In connection with the introduction or manufacture for introduction, into commerce, or the sale, transportation or distribution of ladies' suits or other wool products, as defined in and subject to the Wool Products Labeling Act of 1939, misbranding such products which contain, purport to contain or in any way are represented as containing "wool", "reprocessed wool" or "reused wool", as those terms are defined in said act, by failing to securely affix to or place on such products a stamp, tag, label or other means of identification showing in a clear and conspicuous manner, (a) the percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more and (5) the aggregate of all other fibers; (b) the maximum percentage of the total weight of such wool product of any nonfibrous loading, filling or adulterating matter; (c) the percentages in words and figures plainly legible by weight of the wool contents of such wool product where said wool product contains a fiber other than wool; and, (d) the name of the manufacturer of the wool product or the name of one or more persons subject to section 3 of the Wool Products Labeling Act of 1939 with respect to such wool product, or the registered identification number of such person or persons, as provided for in Rule 4 of the regulations to such act, as amended; prohibited, subject to the provision, however, that the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939; and to the further provision that nothing contained in the order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

(Sec. 6, 38 Stat. 722, sec. 6, 54 Stat. 1131; 15 U. S. C. 45, 68d. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Larry Quinn Fashions, Inc., et al., Docket 5812, January 12, 1951]

In the Matter of Larry Quinn Fashions, Inc., et al.

This proceeding was heard by Frank Hier, trial examiner, upon the complaint of the Commission, the answer of the respondents, and an initial hearing at which respondents' motion to withdraw said original answer and to substitute an answer accompanying said motion was granted by said trial examiner.

Thereafter the proceeding regularly came on for final consideration by said trial examiner, theretofore duly designated by the Commission, upon said complaint and said substitute answer thereto, in which respondents admitted all of the material allegations of fact set forth in said complaint and waived all intervening procedure and further hearing as to the said facts, and said trial examiner, having duly considered the record, found said proceeding in the interest of the public, and made his initial decision, comprising certain findings as to the facts, conclusion drawn therefrom, and order to cease and desist.

No appeal having been filed from said initial decision of said trial examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII, became the decision of the Commission January 12, 1951.

The said order to cease and desist is as follows:

It is ordered, That the respondents, Larry Quinn Fashions, Inc., a corporation, and its officers, and Lawrence I. Cohen, individually and as an officer of said corporation, their agents, representatives and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the sale, transportation or distribution of such products in commerce, as "commerce" is defined in the aforesaid acts, do forthwith cease and desist from misbranding ladies' suits or other "wool products," as defined in and subject to the Wool Products Labeling Act of 1939, which contain, purport to contain or in any way are represented as containing "wool," "reprocessed wool" or "reused wool," as those terms are defined in said act, by failing to securely affix to or place on such products a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool products, exclusive of ornamentation not exceeding five percentum of said total fiber weight of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool product of any non-fibrous loading, filling or adulterating matter;

(c) The percentages in words and figures plainly legible by weight of the wool contents of such wool product where said wool product contains a fiber other than wool;

(d) The name of the manufacturer of the wool product or the name of one or more persons subject to section 3 of the Wool Products Labeling Act of 1939 with respect to such wool product, or the registered identification number of such person or persons, as provided for in Rule 4 of the regulations to such act, as amended;

Provided, That the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939: *And provided further*, That nothing contained in this order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

By "Decision of the Commission and Order to File Report of Compliance", Docket 5812, January 12, 1951, which announced fruition of said initial decision, report of compliance with the order was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: January 12, 1951.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

[F. R. Doc. 51-3954; Filed, Apr. 2, 1951; 8:50 a. m.]

TITLE 24—HOUSING AND HOUSING CREDIT

Chapter VIII—Office of Housing Expediter

[Controlled Housing Rent Reg., Amdt. 362]

[Controlled Rooms in Rooming Houses and Other Establishments, Rent Reg., Amdt. 357]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

CALIFORNIA, ILLINOIS, MICHIGAN, MINNESOTA AND NEW JERSEY

Amendment 362 to the Controlled Housing Rent Regulation (§§ 825.1 to 825.12) and Amendment 357 to the Rent Regulation for Controlled Rooms in Rooming Houses and Other Establishments (§§ 825.81 to 825.92). Said regulations are amended in the following respects:

1. Schedule A, Item 33a, is amended to describe the counties in the Defense-Rental Area as follows:

Monterey County, except the City of Salinas; and in Santa Cruz County, the Township of Watsonville.

This decontrols the City of Salinas in Monterey County, California, a portion of the Monterey Bay, California, Defense-Rental Area.

2. Schedule A, Item 83, is amended to describe the counties in the Defense-Rental Area as follows:

Cook County, except the City of Des Plaines; Du Page, Kane, and Lake Counties.

This decontrols the City of Des Plaines in Cook County, Illinois, a portion of the Chicago, Illinois, Defense-Rental Area.

3. In Schedule A, all of Item 150, which pertains to Kent County, Michigan, is deleted.

This decontrols that portion of Kent County, Michigan, not heretofore decontrolled, said County being a portion of the Grand Rapids-Muskegon, Michigan, Defense-Rental Area, on the Housing Expediter's own initiative in accordance with section 204 (c) of said act.

4. Schedule A, Item 160c, is amended to read as follows:

(160c) [Revoked and decontrolled.]

This decontrols (1) the City of Winona in Winona County, Minnesota, a portion of the Winona, Minnesota, Defense-Rental Area, and all unincorporated localities in said Defense-Rental Area, based on a resolution submitted in accordance with section 204 (j) (3) of the Housing and Rent Act of 1947, as amended, said City of Winona being the major portion of said Defense-Rental Area, and (2) the remainder of said Defense-Rental Area, consisting of the remainder of Winona County, on the Housing Expediter's own initiative in accordance with section 204 (c) of said act.

5. Schedule A, Item 188a, is amended to describe the counties in the Defense-Rental Area as follows:

Camden County, except the Boroughs of Audubon, Haddonfield and Merchantville; Gloucester County; and Burlington County, except the Townships of Bass River, Tabernacle, Shamong, Woodland and Washington, and the Borough of Medford Lakes in Medford Township.

In Cape May County, the Borough of Woodbine; and in Cumberland County, the City of Millville.

This decontrols the Borough of Audubon in Camden County, New Jersey, a portion of the Southern New Jersey Defense-Rental Area.

All decontrols effected by this amendment, except Items 3 and 4 thereof, are based entirely on resolutions submitted in accordance with section 204 (j) (3) of the Housing and Rent Act of 1947, as amended.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

This amendment shall be effective March 30, 1951.

Issued this 29th day of March 1951.

TIGHE E. WOODS,
Housing Expediter.

[F. R. Doc. 51-3972; Filed, Apr. 2, 1951; 8:55 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

MISCELLANEOUS AMENDMENTS TO CHAPTER

The following amendments are issued to this chapter:

Subchapter A—Aid of Civil Authorities and Public Relations

PART 805—SAFEGUARDING MILITARY INFORMATION

DISSEMINATION; FOREIGN NATIONALS

Paragraph (c) of § 805.7 is changed as follows:

§ 805.7 *Dissemination.* • • •

(c) *Foreign nationals*—(1) *General.* Exchanges of classified or unclassified military information with foreign nationals or governments will be made only through or with the express permission of the Chief of Staff, United States Air Force. Except as otherwise authorized in specific instructions furnished to interested commands or offices, requests received from foreign nationals or governments for military information, and all proposals originating within the Department of the Air Force to disclose military information to them, will be forwarded for necessary action through military channels to the Director of Intelligence, Headquarters United States Air Force. Requests so forwarded will include specific comments and recommendations by each commander as to whether the information should be disclosed.

(2) *Attachment and official visits.* Only the Chief of Staff, United States Air Force is authorized to make commitments to receive foreign nationals at Air Force installations, facilities, or other activities as visitors for official purposes, as observers or students, or for training or liaison purposes. The Chief of Staff, United States Air Force, will issue the necessary letter orders or other instructions in writing to the commander concerned attaching foreign nationals' to specific courses or units or authorizing officials visits as may be appropriate. Personnel attached to an installation may visit another installation whenever necessary in the authorized course of instruction or performance of assigned duty upon approval of the commander of the installation to be visited.

(3) *Disclosure of information by commanders.* Authority to disclose military information to accomplish the purpose of the attachment or visit of each foreign national will be included in detail in the orders or other written instructions to commanders concerned. Such instructions will be as specific as possible concerning security classification category and subject matter. Commanders will take positive measures to restrict access to military information by foreign nationals to that specifically authorized.

(4) *Release of documents to students.* Commandants of Air Force schools may permit foreign nationals attached to their commands for instructional purpose to retain permanently unclassified matter and documents classified Restricted which are used by them as a part of the course of instruction.

[AFR 205-1C] (R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22 and Sup., 171a)

Subchapter B—Aircraft

PART 822—USE OF CONTINENTAL AIR FORCE BASES BY OTHER THAN AIR FORCE AIRCRAFT

POLICY; LANDING AND PARKING FEES; INSURANCE

1. Section 822.1 is amended by changing the fourth sentence as follows:

§ 822.1 *Policy.* • • • Commanding officers are authorized to permit the landing at active airfields under their jurisdiction of aircraft which are exempt from the payment of landing fees specified in § 822.12 without reference to Headquarters United States Air Force, provided such aircraft are not housed or based at the installation for a protracted period (one week or longer). • • •

2. Paragraphs (c) (4) and (5) of § 822.12 are changed as follows:

§ 822.12 *Landing and parking fees.*

• • • • •

(c) *Fees not to be charged.* Landing fees will not be charged for the following aircraft:

• • • • •

(4) Private aircraft owned and operated by military and auxiliary (Civil Air Patrol, United States Air Force Auxiliary, Reserve Forces, National Guard, Reserve Officers' Training Corps) personnel on active duty and not for any business or air commerce purpose.

(5) Private or executive aircraft operated by contractors to the Government or by persons or firms having legitimate official business with Government activities in the immediate vicinity of the installation, including but not limited to charter flights to transport military traffic by contract or on transportation requests.

3. Paragraph (c) (1) of § 822.14 is changed as follows:

§ 822.14 *Insurance.* Aircraft owners or operators, except those exempted from landing fees as outlined in § 822.12, making frequent use (more than one landing a month) of Air Force aviation facilities will be required to keep in force at their own cost and expense aircraft liability insurance as follows:

• • • • •

(c) All policies will provide specifically, by indorsement or otherwise:

(1) Waiver of any right of subrogation the insurance company may have against the United States by reason of any payment under this policy on account of damage or injury in connection with the insured's use of any Air Force base or facility or the insured's purchase of services or supplies from the Air Force.

• • • • •

[AFR 87-7B] (R. S. 161. Sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22 and Sup., 171a. Interpret or apply sec. 5, 44 Stat. 570, as amended; 49 U. S. C. 175)

Subchapter G—Personnel

PART 885—APPOINTMENT OF SECOND LIEUTENANTS FROM DISTINGUISHED MILITARY GRADUATES, AIR FORCE RESERVE OFFICERS TRAINING CORPS

APPLICATION; FIELD PROCESSING; PROCESSING BY HEADQUARTERS UNITED STATES AIR FORCE; SELECTION AND NONSELECTION

1. Paragraph (b) of § 885.6 is changed as follows:

§ 885.6 *Application.* • • •

(b) *Completion of application.* Each distinguished military student desiring appointment in the Regular Air Force will submit to the professor of air science and tactics a formal application on Air Force Form 17, "Application for Commission in the USAF," in duplicate, with a photograph of himself, not less than three by five inches in size with his and the institution's name on back. He also will submit a loyalty statement in accordance with the provisions of Part 886 of this chapter (14 F. R. 6979-80; 32 CFR, 1949 Supp., 886; 15 F. R. 6357-63) and attach to the application a copy of the letter designating him a distinguished military student and a transcript of college credits earned prior to submission of application. In instances where the policy of the institution is not to give a transcript of credits to the student, he will take the necessary action to have the transcript forwarded direct to Headquarters United States Air Force, Director of Training, Attention: Officer Initial Procurement Branch, Personnel Procurement Division, Washington 25, D. C., to arrive not later than 15 days after the close of the application period. Each applicant will indicate under "Remarks" (item 17 of Air Force Form 17), the career training option being pursued. (Example: Administration and Logistics). Applicants may select as second choice, service in the Department of the Army. Applicants desiring to make a second choice will indicate this fact and will show, under "Remarks" (item 17 of Air Force Form 17), the arm or service in which they desire to serve.

• • • • •

2. Section 885.7 is changed as follows:

§ 885.7 *Field processing—(a) Biographical test and evaluation reports.* Prior to the processing of applicants by the interview board, the professor of air science and tactics will supervise the execution of the biographical test by each applicant, and obtain three completed forms WD AGO PRT 708, "ROTC Evaluation Report, Answer Sheet," for each applicant. Two of the evaluation reports will be accomplished by members of the Air Force Reserve Officers' Training Corps detachment and will clearly indicate in item D, Section V, the specific accomplishments of the cadet which warrant the designation "Distinguished" as cited in paragraph (a) (3) and (4) of § 885.3. The other evaluation report will be accomplished by the Air Force Reserve Officers' Training Corps summer camp commander or his representative. If the student is designated subsequent to his attendance at summer camp, or does not attend summer camp until after completing the second year of the advanced course, Air Force Reserve Officers' Training Corps, the third copy of the evaluation report will be submitted by a member of the Air Force Reserve Officers' Training Corps detachment. If practicable, the professor of air science and tactics will submit one of the evaluation reports; however, all rating personnel must have had an adequate opportunity to observe the applicant.

(b) *Appointment and composition of the interview board.* The appropriate Air Force commander will appoint boards of officers to interview the applicants. Each board will be composed of a minimum of three Air Force field grade officers, a majority of whom will be commissioned in the Regular component. The professor of air science and tactics and members of the military staff of a particular institution will not be utilized as members of the board appointed to interview candidates from that institution.

(c) *Forwarding of screening materials.* Upon completion of the processing of applicants by the interview board, the professor of air science and tactics will forward, for each applicant processed, the applications and allied papers direct to the Headquarters United States Air Force, Director of Training, Attention: Officer Initial Procurement Branch, Personnel Procurement Division, Washington 25, D. C. The material will be forwarded by letter of transmittal listing each applicant in order of professor of air science and tactics preference, to reach the Director of Training not later than November 15 for applications submitted during the period of 1 to 15 October and not later than 30 April for applications submitted during the period of 15 to 30 March.

(d) *Forwarding of disqualifying information.* Prior to the execution of the Oath of Office by an approved applicant, the professor of air science and tactics will transmit to the Director of Training, Headquarters United States Air Force, by the most expeditious means, any information which might disqualify the applicant for appointment in the Regular Air Force.

(e) *Physical examination.* Each approved applicant will be notified of his selection and of the time and place to report for physical examination. Determination of physical qualification or disqualification will be made by Headquarters United States Air Force.

3. Section 885.8 is changed as follows:

§ 885.8 *Processing by Headquarters United States Air Force.* Upon receipt of applications and screening materials, the Director of Training will compute a composite score for each applicant and transmit the documents to the Air Force Personnel Board for final selection as follows:

(a) Not later than December 15 for applications submitted during the period of October 1 to 15.

(b) Not later than May 30 for applications submitted during the period of March 15 to 30.

4. Section 885.9 and the heading thereof is changed to read as follows:

§ 885.9 *Selection and nonselection—(a) General.* The distinguished military students selected for appointment will be those applicants considered best qualified to meet the needs of the Air Force. The most pressing requirement at this time, is for persons trained in the following academic fields:

(1) Engineering.

(2) Basic sciences, such as mathematics, physics and chemistry.

(3) Management and its related fields.

(b) *Notification of selection.* The Director of Training will transmit the names of those applicants selected for Regular appointment by the Air Force Personnel Board to the appropriate Air Force commander, as follows:

(1) On or about January 30 for applications submitted during the period of October 1 to 15.

(2) On or about June 30 for applications submitted during the period of March 15 to 30.

If for any reason an application does not reach the Director of Training, Headquarters United States Air Force, by the established deadline (§ 885.7 (c)) or if an application is incomplete upon arrival at Headquarters United States Air Force, such application will be processed after the complete applications submitted prior to the deadline have been processed. Notification of selection of these applicants will be made as early as possible but will be later than the dates shown in subparagraphs (1) and (2) of this paragraph.

(c) *Notification of nonselection.* Candidates who have not been selected for appointment will be notified through the appropriate Air Force commander and the professor of air science and tactics.

[AFR's 36-15; 36-15A; 36-15B] (R. S. 161, Sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22 and Sup., 171a. Interpret or apply Secs. 502, 506, 61 Stat. 883, 890; 10 U. S. C. Sup., 506, 506C)

[SEAL] K. E. THIEBAUD,
Colonel, U. S. Air Force,
Air Adjutant General.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 9, Amdt. 1]

CPR 9—TERRITORIES AND POSSESSIONS

MISCELLANEOUS AMENDMENTS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6165), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 1 to Ceiling Price Regulation 9 is hereby issued.

STATEMENT OF CONSIDERATIONS

Since the issuance of Ceiling Price Regulation 9, it has become apparent that certain features of the regulation need to be modified in order to clarify its intent, to close certain gaps, and to extend the time limits of certain of its recording requirements.

The revision of section 3 is in the nature of a clarification. It more definitely ties in the delivery or offer, on which the markup to be used in arriving at your ceiling price for a commodity is determined, with the most recent direct cost on which a delivery or offer of that commodity was made during the base period. This was the intent and purpose of section 3 as originally issued.

The revision of section 4 follows the pattern of revised section 3 and more definitely ties in the delivery on which the markup to be used in arriving at your ceiling price is determined with the most recent direct cost on which a delivery was made during the calendar year 1950, and prior to December 19, 1950. This was the intent and purpose of section 4 as originally issued.

The amendment to section 5 tightens up the method by which a seller selects the comparison commodity from a category. Under section 5 of CPR 9 the requirement that the comparison commodity must be the commodity "customarily bearing the same markup" has proved to be loose and not sufficiently definite. This amendment provides that the comparison commodity must be the "one which has a direct cost most nearly approximating that of the commodity being priced."

This amendment extends the deadline on certain reporting requirements in section 9 from April 1, 1951, to April 30, 1951. This extension became necessary because of the difficulty in staffing the Territorial Offices and the resulting inability of those offices to make the proper distribution to sellers of the regulation and to publicize its record keeping requirements.

In section 15, the definitions "average dollar-and-cents markup" and "dollar-and-cents markup" have been deleted. These definitions are no longer necessary in view of the revision of sections 3 and 4.

AMENDATORY PROVISIONS

Ceiling Price Regulation 9 is amended in the following respects:

1. Section 3 is amended to read as follows:

SEC. 3. *Ceiling prices for commodities sold in the base period.* Your ceiling price for the sale of a commodity is your direct cost of the commodity plus a dollar-and-cents markup, which is equivalent to the difference between your latest direct cost prior to January 26, 1951, as reflected in a base period delivery price to purchasers of the same class and that delivery price. If you reflected the latest direct cost prior to January 26, 1951, in base period deliveries of the commodity to purchasers of the same class at more than one price, your dollar-and-cents markup is the average of the dollar-and-cents markups received by you on such deliveries.

If you did not deliver the commodity during the base period but did offer it for delivery during that period, your ceiling price is your direct cost of the commodity plus a dollar-and-cents markup equivalent to the difference between your most recent direct cost prior to January 26, 1951 as reflected in a base period offer to purchasers of the same class and that offer. If you reflected the latest direct cost prior to January 26, 1951 in base period offers of delivery of the commodity to purchasers of the same class at more than one price, your dollar-and-cents markup is the average of the dollar-and-cents markups included in such offers.

2. Section 4 is amended to read as follows:

SEC. 4. *Ceiling prices for commodities customarily handled by sellers but not sold in the base period.* If you wish to determine a ceiling price for a commodity which you customarily handle in the course of your business, but which you did not deliver or offer for delivery during the base period, you may determine your ceiling price by adding to your direct cost of a commodity a dollar-and-cents markup which is equivalent to the difference between your latest direct cost prior to December 19, 1950 as reflected in the price at which the commodity was delivered during the calendar year 1950 and that delivery price. If you reflected the latest direct cost prior to December 19, 1950 in deliveries of the commodity made in the calendar year 1950, to purchasers of the same class, at more than one price your dollar-and-cents markup is the average of the dollar-and-cents markups received by you on such deliveries.

3. Section 5 is amended to read as follows:

SEC. 5. *Ceiling prices for new commodities falling within categories dealt in during the base period.* Your ceiling price for a commodity you did not deliver or offer for delivery in the base period, and for which you do not choose to determine your ceiling price under section 4 of this regulation, which falls within a "category" in which you dealt during the base period, is determined by adding to your direct cost the dollar-and-cents markup you are currently receiving on a "comparison commodity."

The comparison commodity must be in the same category as the commodity being priced; must be a commodity for which your ceiling price was determined under section 3 of this regulation; and must be, of the commodities in that category, the one which has a direct cost most nearly approximating that of the commodity being priced.

4. Section 9 is amended as follows:

a. In section 9 (a) (2), strike out the date April 1, 1951 and substitute therefor April 30, 1951.

b. In section 9 (a) (3), strike out the date April 1, 1951 and substitute therefor April 30, 1951.

5. In section 15, delete the definitions of "average dollar-and-cents markup" and "dollar-and-cents markup".

(Sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR 1950 Supp.)

Effective date: This amendment, except as otherwise herein stated, shall become effective on the 1st day of April 1951.

Dated: March 31, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

[F. R. Doc. 51-4063; Filed, Apr. 2, 1951; 11:57 a. m.]

[Distribution Regulation 1, Amdt. 3]

DR 1—FAIR DISTRIBUTION OF LIVESTOCK AND MEAT

QUOTAS ON CATTLE AND MISCELLANEOUS AMENDMENTS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 5 (16 F. R. 1273), this Amendment 3 to Distribution Regulation 1[1] (16 F. R. 1273) is hereby issued.

Preamble. At the time Distribution Regulation 1 was issued it was intended that quotas on all livestock covered by

[1] Formerly designated Distribution Order 1.

the regulation would be effective April 1, 1951. Because of the shortage of personnel in the Office of Price Stabilization all of the data necessary to establish quotas on all species of livestock could not be gathered. However, sufficient data was collected to establish quotas on cattle. The amendment establishes quotas on cattle and postpones to April 29, 1951, the establishment of quotas on calves, sheep and lambs, and swine. The quota on cattle for each Class 1 and Class 2 slaughterer is set at 100 percent of the amount of cattle he slaughtered during the corresponding period in 1950. Class 1A and 2A slaughterers are permitted to have cattle slaughtered for them on the same basis. Slaughterers who began business after April 1, 1950, and before February 9, 1951, are given a quota based on their average monthly slaughter of cattle during that period.

As a result of the shortage of personnel and the delay in distribution of some of the registration forms the date of issuance of registration numbers by OPS is postponed to April 15, 1951. This postponement will leave some Class 2 slaughterers without a registration number with which to mark their meats. To remedy this situation the Class 2 slaughterers marking requirements are amended to require marking of all meats on and after April 1, 1951, or as soon thereafter as the Class 2 slaughterers receive their registration numbers. On and after April 15, 1951, the marking requirement will be in effect for all Class 2 slaughterers. Beginning on that date Class 1 and Class 2 slaughterers may not slaughter livestock unless they have received their registration numbers.

The amendment also continues to April 29, 1951, the provisions pertaining to "Club" livestock, limits the applicability of the regulation to the forty-eight States and the District of Columbia, and makes minor technical changes in the regulation.

Distribution Regulation 1 is amended in the following respects.

1. Section 1 is amended by adding the following paragraph to the end thereof:

This regulation applies to the forty-eight states of the United States and the District of Columbia.

2. Section 2 is amended to read as follows:

SEC. 2. *Prohibitions against slaughtering.* (a) Between February 9, 1951, and April 29, 1951, you may not slaughter cattle, calves, sheep and lambs, or swine unless you were engaged in the business of slaughtering that species of livestock during the period from January 1, 1950, to February 9, 1951, or unless you are a resident operator of a farm who comes within the definition of a Class 3 slaughterer contained in section 5 of this regulation, or a livestock raiser as defined in section 6 of this regulation.

(b) On and after February 9, 1951, you may not have cattle, calves, sheep and lambs, or swine slaughtered for you unless you had that species of livestock slaughtered for you during the period from January 1, 1950, to January 1, 1951, or unless you are a resident operator of a farm or a livestock raiser mentioned in paragraph (a) of this section.

(c) After April 15, 1951 unless you have been registered by the Office of Price Stabilization, or unless you are a resident operator of a farm or a livestock raiser as defined, you may not slaughter cattle, calves, sheep and lambs, or swine.

(d) After April 1, 1951, if you are a Class 1 or Class 2 slaughterer you may not slaughter cattle in excess of your quota.

(e) After April 29, 1951, if you are a Class 1 or Class 2 slaughterer, you may not slaughter cattle, calves, sheep and lambs, or swine in excess of your quota.

(f) Violation of the regulation will subject you to the penalties of the Defense Production Act of 1950, including a fine of $10,000 and imprisonment up to one year.

3. Section 3 (b) is amended by substituting the date April 15, 1951, for the date April 1, 1951, wherever it appears.

4. Section 3 (c) is amended by substituting the date April 29, 1951, for the date April 1, 1951, appearing in the first sentence and adding before the first sentence the following sentences: "For the period beginning April 1, 1951, and ending April 28, 1951, you will have a quota on cattle. The quota will be the same number of pounds live weight of cattle you slaughtered during the period from April 3, 1950, to April 29, 1950, inclusive. If you received an adjustment on your slaughter of cattle for the quarter beginning April 3, 1950, and ended July 1, 1950, you may use 31 percent of the adjusted amount as the number of pounds live weight of cattle you may slaughter during the period beginning April 1, 1951, and ending April 28, 1951. If you began slaughtering cattle after April 1, 1950, you may determine the amount of cattle you may slaughter during the period beginning April 1, 1951, and ending April 28, 1951, by dividing the total live weight of cattle slaughtered between April 1, 1950, and February 9, 1951, by the number of months in which you slaughtered cattle."

5. Section 3 (d) is amended by substituting the numeral "5" for the numeral "6" and the numeral "15" for the numeral "14".

6. Section 4 (b) is amended by substituting the date April 15, 1951, for the date April 1, 1951, wherever it appears.

7. Section 4 (c) is amended by substituting the date April 29, 1951, for the date April 1, 1951, appearing in the first sentence and adding before the first sentence the following sentences: "For the period beginning April 1, 1951, and ending April 28, 1951, you will have a quota on cattle. The quota will be the same number of pounds live weight of cattle you slaughtered during the period from April 3, 1950, to April 29, 1950, inclusive. If you received an adjustment on your slaughter of cattle for that period you may use the adjusted amount as your slaughter of cattle for the 1950 period. If you began slaughtering cattle after April 1, 1950, you may determine the amount of cattle you may slaughter during the period beginning April 1, 1951, and ending April 28, 1951, by dividing the total live weight of cattle slaughtered between April 1, 1950, and February 9, 1951, by the number of months in which you slaughtered cattle."

8. Section 4 (f) is amended by substituting the word "number" for the word "name" appearing in the last sentence and by deleting the first sentence and substituting therefor the following sentence: "On and after April 1, 1951, or as soon thereafter as you receive your registration number from the Office of Price Stabilization, you are required to stamp or mark your registration number on each carcass so that it appears on every accessible wholesale cut."

9. Section 4 (i) is amended by substituting the numeral "5" for the numeral "6" and the numeral "15" for the numeral "14".

10. Section 7 (a) is amended by substituting the date April 29, 1951 for the date April 1, 1951, wherever it appears.

11. Section 8 (a) is amended by substituting the date April 29, 1951 for the date April 1, 1951, appearing in the last sentence.

12. Section 8 (b) is amended by deleting the third sentence and substituting therefor the following: "There will be a quota on the amount of cattle he may slaughter for you for the period beginning April 1, 1951, and ending April 28, 1951. The quota will be the same number of pounds live weight of cattle he slaughtered for you during the period from April 3, 1950 to April 29, 1950, inclusive. Beginning April 29, 1951 there will be a quota on the different species of livestock he may slaughter for you."

(Sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.)

Effective date. This amendment is effective March 31, 1951.

MARCH 30, 1951.

[SEAL] MICHAEL V. DISALLE,
Director of Price Stabilization.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-8, as Amended Apr. 2, 1951]

M-8—TIN

This order which amends and supersedes NPA Order M-8, dated March 12, 1951, is found necessary and appropriate to promote the national defense and is issued pursuant to the authority of section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with industry representatives in advance of the issuance of this order as amended has been rendered impracticable due to the necessity for immediate action and the fact that the amendment affects a large number of different trades and industries.

NPA Order M-8 is amended by effecting a change in the punctuation of section 4 (b); by making additions in section 8 (a) and in the footnote to section 8 (a); by adding a new phrase (8) at the end of section 8 (b); by inserting a new provision in column 2 of item 8 of Schedule IV; by adding a new sentence to the second column of item 4 of Schedule VII; and by making certain substitutions in item 14 of Schedule VII. As so amended NPA Order M-8 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Application of order.
4. Restrictions on use of pig tin and alloys and other materials containing tin.
5. Limitations on use of pig tin.
6. Maintenance, repair, and operating supplies.
7. Allocation of pig tin.
8. Certification.
9. Defense orders for items containing tin.
10. Exemption.
11. Inventories.
12. Export certificates.
13. Importation of pig tin.
14. Reports and records.
15. Application for adjustments.
16. Communications.
17. Violations.

AUTHORITY: Sections 1 to 17 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order amends and supersedes NPA Order M-8. The purpose of this order is to describe how tin remaining after allowing for the requirements of national defense may be distributed and used in the civilian economy. It restricts the use of pig tin in manufacture, processing and construction. It prohibits all uses of pig tin, secondary tin and certain tin-bearing products not expressly set forth in the attached Schedules I through VII. In addition, many of the permissible uses included in the Schedules I through VII are prohibited in connection with the manufacture of the items or for the purposes set forth in List A. The order also sets forth limitations on inventories or pig tin and alloys and other materials containing tin and explains the conditions under which reports are required in connection with the production, distribution, importation, use, and inventories of pig tin. In addition, it covers the conditions under which reporting is required in connection with the customs entry of tin importation. It is the intent of this order that other materials which are not in short supply will be substituted for tin and alloys and other materials containing tin wherever possible. It prohibits the private importation of pig tin after a specified date and places pig tin under allocation by prohibiting, subject to limited exceptions, any deliveries not covered by allocation authorizations to be issued monthly by the National Production Authority.

SEC. 2 *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association or any other organized group of persons and includes any agency of the United States or any other government.

(b) "Base period" means the 6-month period ending June 30, 1950.

(c) "Manufacture" means to melt, put into process, machine, fabricate, cast, roll, turn, spin, coat, extrude, or otherwise alter pig tin, alloys containing tin, or other materials containing tin, by physical or chemical means and includes the use of tin and alloys and other materials containing tin in plating, and in chemical compounding and processing. It does not include the use of tin contained in any "in process" materials or any other materials not actually to be incorporated into the items to be manufactured, such "in process" materials and other materials being included under paragraphs (d) and (e) of this section.

(d) "Maintenance" means the minimum upkeep necessary to continue a building, machine, piece of equipment, or facility in sound working condition, and "repair" means the restoration of a building, piece of equipment, or facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like: *Provided, however,* Neither maintenance nor repair includes the improvement of any such item with material of a better kind, quality or design.

(e) "Operating supplies" means any tin or alloy or other material containing tin normally carried by a person as operating supplies according to established accounting practice and not included in his finished product, except that materials included in such product which are normally chargeable to operating expense may be treated as operating supplies.

(f) "Import" means to transport in any manner into the continental United States from any foreign country or from any territory or possession of the United States. It includes shipments into a U. S. foreign trade zone, or bonded custody of any United States Collector of Customs (bonded warehouse) in the continental United States and shipments into the continental United States for processing or manufacture in bond for exportation. "Import" does not include shipments in transit in bond through the continental United States without processing or manufacture to Canada, Mexico, or any other foreign country, or shipments through U. S. foreign trade zones to a foreign country without processing or manufacture. However, if any material in such shipments in transit in bond is, because of a change in plans, to be sold or used in the continental United States, or subjected to processing or manufacture in the continental United States, it becomes an "import" for the purposes of this order and requires the reports specified in section 14 of this order.

(g) "Pig tin" means metal containing 95 percent or more by weight of the element tin, in shapes current in the trade, including anodes, small bars, and ingots, but excluding the products specifically listed in Section IV of report Form NPAF-7.

(h) "Secondary tin" means any alloy, produced from scrap, which contains less than 95 percent but not less than 1.5 percent by weight of the element tin.

(i) For the purpose of the reporting requirements relating to imports stated in section 14 (b): "Tin" means pig tin and tin in any raw, semi-finished, or scrap form, and any alloys, compounds, or other materials containing tin (where tin is of chief value) in any raw, semi-finished or scrap form. This includes, but is not limited to, the following:

Babbitt metal and solder	6506.100
Alloys and combinations of lead, not in chief value lead (including lead, antimony, and white metal)	6506.900
Type metal	6507.000
Tin bars, blocks, pigs, grained or granulated	6551.300
Tin metallic scrap (except alloyed scrap)	6551.500
Tin alloys, chief value tin n. s. p. f. (including alloyed scrap)	6551.900
Tin dross, skimmings and residues	6740.170
Tin foil less than 0.006 inch thick	6790.710
Tin powder, flitters and metallics	6790.720
Tin bichloride, tin tetrachloride and other chemical compounds, mixtures, and salts, tin chief value (including tin oxide)	8380.920

NOTE: The numbers listed in the second column are commodity numbers taken from Schedule A, Statistical Classification of Imports into the United States, issued by the U. S. Department of Commerce (August 1, 1950 edition).

(j) "Copper-base alloy" for the purpose of this order means any alloy containing tin in the composition of which the percentage of copper metal by weight equals or exceeds 40 percent of the total weight of the alloy.

(k) "Scrap" means all materials or objects which are the waste or by-products of industrial fabrication or which have been discarded for obsolescence, failure, or other reason, and which contain tin or alloys or other materials containing tin in a form making such scrap suitable for industrial use.

(l) "Soldering" means joining with solder. This term does not include dipping or solder-coating in which the joining operation is not performed simultaneously with such dipping or coating. (For dipping or coating see Schedule IV and Schedule VII, item 13).

(m) "Low grade" secondary tin-bearing drosses, residues and scrap metal means such material having a tin content not over 10 percent and an impurity content too high for use in the production of other items for which secondary low grade tin-bearing materials are permitted in the attached schedules.

(n) "Implements of war" means combat end products, complete for tactical operations (including, but not limited to aircraft, ammunition, armaments, weapons, ships, tanks, military vehicles, and radio and radar equipment), and any parts, assemblies, or materials to be incorporated in any of these items. This term does not include facilities or equipment used to manufacture the items described above nor does it include any "in process" or any other materials not actually to be incorporated into the items described above.

SEC. 3. *Application of order.* Subject to the exemptions stated in section 10, this order applies to all persons who produce tin or alloys or other materials containing tin, or who use tin or alloys or other materials containing tin, in manufacture, processing, or construction, or for maintenance, repair, or operating supplies. In addition, the reporting provisions stated in section 14 of this order apply to persons who produce, distribute, or hold in their possession pig tin, or who import tin.

SEC. 4. *Restrictions on use of pig tin and alloys and other materials containing tin.* Subject to the exemption in section 10 of this order, or unless specifically directed by the National Production Authority:

(a) No person shall use pig tin for any purpose where secondary tin can be used.

(b) Commencing on March 1, 1951, no person shall use any pig tin, secondary tin, solder, babbitt, copper-base alloy or other alloy containing 1.5 percent or more tin, or other materials containing 1.5 percent or more tin in the manufacture, treatment, installation, construction of any item or product, or in any process, or for any purpose, except those set forth in the attached schedules and to the extent permitted thereby. Uses not expressly authorized by said schedules are prohibited.

(c) During February 1951, no person shall use in the manufacture of any item or in any process set forth in the attached List A a total quantity by weight of tin in any form specified in paragraph (b) in excess of 80 percent of his average monthly use of such materials for said purposes during the base period. Commencing on March 1, 1951, no person shall use tin in any form specified in paragraph (b) in the manufacture of any item or in any process set forth in List A, even though such use might otherwise be permissible under paragraph (b): *Provided, however,* That this prohibition will not apply to the use of solder for joining purposes to the extent permitted in attached Schedule II.

(d) In addition to the restrictions set forth in the attached schedules, commencing on March 1, 1951, no person shall use: (1) In the manufacture of any product or for any purpose as to which the attached schedules limit tin content, any alloys or other materials having a tin content greater than that being used by such person in such manufacture or for such purpose on January 27, 1951; (2) in the coating of any item, a heavier coating in terms of tin content than that being used by such person for such purpose on January 27, 1951; or (3) any metal to which pig tin has been added to produce any product or perform any process for which the use of pig tin is not permitted in the schedules.

(e) Paragraphs (b) and (c) of this section do not apply to the use of tin in any form specified in paragraph (b) of this section prior to May 1, 1951, in the completion of any item that was in the process of manufacture or production on March 1, 1951.

SEC. 5. *Limitations on use of pig tin.* Subject to the restrictions of section 4 and to the exemption in section 10, or unless specifically directed by the National Production Authority:

(a) No person shall put into process or otherwise use in the manufacturing, treating, installation, or construction during the following months, a total quantity by weight of pig tin in excess of the percentages specified with respect to each month of his average monthly use of such forms of tin during the base period:

	Percent
January 1951	100
February 1951	80
March 1951	80

(b) No person shall put into process or otherwise use in manufacturing tin plate or terneplate during each of the months of April, May, and June, 1951 a total quantity by weight of pig tin in excess of 95 percent of his average monthly use of pig tin for this purpose during the base period; and no person shall put into process or otherwise use in manufacturing, treating, installation, or construction during each of these months for any other purpose or purposes, a total quantity by weight of pig tin in excess of 90 percent of his average monthly use of pig tin for such other purposes during the base period.

SEC. 6. *Maintenance, repair, and operating supplies.* Unless specifically directed by the National Production Authority during the calendar quarter commencing January 1, 1951, no person shall use for maintenance, repair, and operating supplies a quantity by weight of pig tin in excess of 100 percent of his average quarterly use of pig tin for such purposes during the base period: *Provided, however,* That such use is permissible only in connection with items, products, or processes included in the attached schedules and to the extent permitted thereby. No pig tin shall be used for such purposes where secondary tin can be used.

SEC. 7. *Allocation of pig tin.* (a) Commencing on May 1, 1951, no person shall deliver pig tin or accept delivery of pig tin for any purpose in any month except in accordance with the terms of an allocation authorization issued for such month by the National Production Authority. An allocation authorization will be sent by the National Production Authority to the appropriate supplier and the purchaser will be notified of the issuance thereof. The authorization will permit the supplier to make delivery pursuant to the purchaser's order within the limits of the authorization. The National Production Authority may specifically direct the purposes for which a person may process pig tin or otherwise use it in manufacturing, treating, installation, or construction, whether or not directly allocated to him.

(b) An application for an allocation authorization must be filed with the National Production Authority by the proposed purchaser on Form NPAF-7 not later than the 20th day of the month preceding the month in which delivery is sought.

(c) No person shall deliver any pig tin if he knows, or has reason to believe, that the person requesting delivery is not permitted to receive it under this order or will use it for purposes not permitted by this order.

(d) The provisions of paragraph (a) of this section shall not apply to any: (1) Delivery of pig tin to the Reconstruction Finance Corporation or the General Services Administration for the stockpile of strategic materials; (2) delivery of pig tin pursuant to specific directives of the National Production Authority; (3) delivery of pig tin to any person whose total receipts during the month in which such delivery occurs are and by such delivery will remain less than 5 long tons, and who has not received an allocation authorization for pig tin for that month, and who furnishes to the supplier a signed certification in substantially the following form:

> The undersigned hereby certifies, subject to statutory penalties, that receipt of this shipment of pig tin in the month requested is permitted by NPA Order M-8, that no allocation authorization for pig tin for that month has been issued to the undersigned by the National Production Authority and that the pig tin received pursuant to this order will be used only for resale as permitted by NPA Order M-8 or for (*specify end use*) in accordance with that order.
>
> (Schedule --------, item --------)

Any person who furnishes the foregoing certification shall not be required to furnish, with respect to pig tin, the certification required by section 8 of this order.

SEC. 8. *Certification.* (a) No person shall sell or deliver and no person shall purchase or accept delivery of any pig tin, secondary tin, solder, babbitt containing more than 10 percent of tin, copper-base alloys containing 3.5 percent or more tin, or other alloys containing 1.5 percent or more tin, or other materials containing 1.5 percent or more tin unless the purchaser furnishes a signed certification as follows:

> The undersigned certifies, subject to the penalties of Title 18, U. S. Code (Crimes), section 1001, that the tin or tin product herein ordered will be used only for the purposes permitted by NPA Order M-8 (Schedule----, item----) as follows: [1]
>
> ----------
> (Specify end use)

This certification constitutes a representation by the purchaser to the seller and to the National Production Authority that the tin or tin-bearing products or materials delivered will be used either for the purpose or purposes set forth in the attached schedules or for "implements of war," or for resale without change in form (other than packaging), and that such use is not prohibited by other applicable orders or regulations of the National Production Authority.

(b) This certification shall not be required in connection with the delivery of: (1) Tin to the General Services Administration for the stockpile of strategic materials; (2) tin or tin-bearing items or products pursuant to a specific author-

[1] In cases coming within the exemption stated in section 10, substitute the phrase "implements of war" for the reference to Schedule and item. Where the tin or tin products are purchased for resale without change in form (other than packaging), substitute the phrase "for resale upon proper certification."

ization of the National Production Authority; (3) solder in lots not exceeding 2 pounds, if in wire form, solid or cored, not over 5/32 inch in diameter, and containing no more than 40 percent tin by weight; (4) solder in lots not exceeding 5 pounds, if in any other form and containing not more than 35 percent tin by weight; (5) babbitt in lots not exceeding 5 pounds; (6) printing plates and type metal containing tin for use by the printing, publishing and related services industries; (7) liquor-finished wire; or (8) scrap containing not more than 6 percent tin by weight, when delivered to a scrap dealer or smelter.

(c) No person giving a certification under this section may receive, use or dispose of the materials obtained upon such certification contrary to its terms.

SEC. 9. *Defense orders for items containing tin.* Notwithstanding the provisions of NPA Reg. 2 which establishes a priorities system, rated orders calling for items containing tin are subject to the provisions of sections 4, 5, 6, and 8 of this order, unless within the exemption provided in section 10 or unless otherwise directed by the National Production Authority.

SEC. 10. *Exemption.* The restrictions of sections 4 and 5 of this order shall not apply to the manufacture of "implements of war" produced for the Department of Defense, Atomic Energy Commission, United States Coast Guard, and the National Advisory Committee for Aeronautics, provided that the use of tin contrary to these restrictions is required either by the latest applicable specifications or drawings, or by letter or contract issued by any such government agency for which the "implements of war" are being produced.

SEC. 11. *Inventories.* In addition to the inventory provisions of NPA Reg. 1, it is considered that a more exact requirement applying to users of pig tin or alloys or other materials containing tin (excluding ores and concentrates) is necessary.

(a) No person obtaining any such materials for use in manufacture, processing, or construction, or for maintenance, repair, or operating supplies, shall receive or accept delivery of a quantity of the materials listed in Column A below from domestic sources, if his inventory of such materials is, or by such receipt would become, more than the smallest quantity which will be required by his scheduled method and rate of operation to be put into use for such purposes during the next succeeding period specified in the corresponding section of Column B below, or (except for pig tin) in excess of a "practicable minimum working inventory" as defined in NPA Reg. 1, whichever is less:

Column A	*Column B*
1. Pig tin.	1. 120 days (for manufacture of tin plate); 60 days (for any other use).
2. Copper-base alloys (containing 1.5 percent or more tin).	2. 60 days.
3. Solder, babbitt, and other alloys containing 1.5 percent or more tin (except copper-base alloys).	3. 60 days.
4. All other materials containing tin.	4. 60 days.

For the purpose of this section, any such materials in which only minor changes or alterations have been effected shall be included in inventory.

(b) Section 10.11 of NPA Reg. 1, entitled "Imported materials" will continue to apply. The other provisions of this regulation will continue to apply except as modified by this section.

(c) No scrap dealer shall accept delivery of any form of scrap defined in section 2 of this order, unless, during the 60 days immediately preceding the date of such acceptance, he shall have made delivery or otherwise disposed of scrap to an amount at least equal in weight to his scrap inventory on the date of such acceptance, exclusive of the delivery to be accepted.

SEC. 12. *Export certificates.* Any purchaser of an item included in the attached schedules who intends to export such item from the United States, its territories or possessions, or from Canada, shall include in the certification required under section 8 of this order the words "for export" as well as the number of the export license applicable to such item. No item may be produced for export unless its manufacture is permitted under the provisions of section 4 of this order.

SEC. 13. *Importation of pig tin.* Commencing on the effective date of this order, no person other than the Reconstruction Finance Corporation, acting for and in behalf of the General Services Administration, shall import into the United States, its territories or possessions any quantity of pig tin in bars, blocks, pigs, grain or granulated (Item 6551.300 Statistical Classification of Imports into the United States, dated August 1, 1950) except as specifically authorized in writing by the National Production Authority: *Provided, however,* That this prohibition shall not apply to any private importation pursuant to a contract executed prior to the effective date of this order, which is reported to and approved by the National Production Authority on or before March 23, 1951. The report of such contracts shall be by letter in duplicate addressed to the National Production Authority, Washington 25, D. C. (Ref: M-8), stating the date of execution of the contract, the parties thereto, the approximate date or dates of arrival, the quantity and brand or brands of the material to be imported.

SEC. 14. *Reports and records.* (a) Reports on pig tin:

(1) Any person using 1,000 pounds or more of pig tin in any calendar month must complete and file report Form NPAF-7 with the National Production Authority on or before the 20th day of November 1950, and on or before the 20th day of each succeeding month with respect to such use during the preceding month.

(2) Any person who on any day of any calendar month has in his possession or under his control 1,000 pounds or more of pig tin must complete and file report Form NPAF-7 with the National Production Authority on or before the 20th day of November 1950, and on or before the 20th day of each succeeding month with respect to such possession or control on the last day of the preceding month.

(3) Any person who produces, imports, or distributes any pig tin must report his production, entries, receipts, deliveries, inventories, balance of entries, and all other transactions in pig tin either by completing and filing report Form NPAF-7, or by letter in triplicate with the National Production Authority, on or before the 20th day of November 1950, with respect to all such operations and transactions during October 1950, and on or before the 10th of December and on or before the 10th day of each succeeding month with respect to all such operations and transactions during the preceding month.

(b) Reports on Customs Entry: No tin including, without limitation, tin imported by or for the account of the Reconstruction Finance Corporation, U. S. Commercial Company, or any other United States governmental department, agency, or corporation, shall be entered through the United States Collectors of Customs unless the person making the entry shall complete and file with the Collector of Customs Form NPAF-8. The filing of such form a second time shall not be required upon any subsequent entry of the same material through the United States Collectors of Customs; nor shall the filing of such form a second time be required upon the withdrawal of such material from bonded custody of the United States Collectors of Customs, regardless of the date when such material was first transported into the continental United States. Form NPAF-8 will be transmitted by the Collectors of Customs to the National Production Authority.

(c) Records: (1) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(2) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(3) Persons subject to this order shall make such records and submit such other reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

(d) All reports required by this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–8, together with such number of copies as may be specified in the report form.

SEC. 15. *Application for adjustments.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 16. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–8.

SEC. 17. *Violations.* Any person who wilfully violates any provision of this order, or any other order or regulation of the National Production Authority, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by a fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act.

This order, as amended, shall take effect, except as otherwise specifically stated, on April 2, 1951.

Dated: March 29, 1951.

[SEAL] NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

LIST A

(See Section 4)

1. Advertising specialties.
2. Art objects.
3. Britannia metal, pewter metal, or other similar tin bearing alloys.
4. Buckles.
5. Buttons.
6. Chimes and bells.
7. Coated paper.
8. Emblems and insignia.
9. Fasteners as follows: book match clips and staples, paper clips, spiral binders, office staples, and paper fasteners.
10. Jewelry.
11. Novelty souvenirs and trophies.
12. Ornaments and ornamental fittings.
13. Hollowware.
14. Plating and coating for decorative purposes.
15. Powder for decorative purposes.
16. Refrigerator trays or shelves (all types).
17. Seals and labels.
18. Slot, game and vending machines.
19. Tin oxide (except for the purposes and to the extent set forth in Schedule VI).
20. Toys and games.
21. Zinc galvanizing.
22. All other ornamental or decorative purposes.

SCHEDULES

(See section 4)

SCHEDULE I—BRASS AND BRONZE

A. CAST COPPER-BASE ALLOYS

Alloys containing 3.5 percent or more by weight of tin may be cast for the following purposes only	*Maximum permissible tin content of alloys (percent by weight)*
(1) Piston rings for locomotives and for airbrake equipment.	(1) 20.
(2) Bridge trunnion bearings, bridge bearing plates, railroad and bridge turntable bearing discs, mill stand screw down nuts	(2) 18.
(3) High ratio worm gears, fire engine pump gears, jack nuts, feed nuts, elevating nuts, thrust washers or discs, machine tool spindle bearings	(3) 12.
(4) Hydraulic pump bodies and ends for gear pumps, grinder spindle sleeve bearings, step bearings, internal parts of industrial centrifugal pumps and injectors, collector rings, bearings and bushings	(4) 10.
(5) Bearings produced by the process of powder metallurgy	(5) 10.
(6) Steam industrial and aircraft valves, fittings and specialties	(6) 9.
(7) Tablets, markers, and memorials	(7) 3.5.
(8) All other castings	(8) 6.

B. WROUGHT ALLOYS

Pig or secondary tin may be used to make wrought alloys, but the tin content of such alloys must be limited to the amount essential for the particular purpose.

C. COPPER NICKEL ALLOYS

(1) Seats, discs, and bearing surfaces of steam and industrial valves	(1) 12.

SCHEDULE II—SOLDERS

Pig or secondary tin may be used to make solder to be used for the following purposes only: (See definition of "soldering" in section 2. Solder coating is covered by Schedule IV, and item 13, Schedule VII.)	*Maximum permissible tin content of solder (percent by weight)*
(1) For soldering side seams in the manufacture of cans made with either lock or lap side seams with a combination of lock or lap seams.	(1) 5.
(2) For soldering end seams of all solder seam cans	(2) 26.
(3) For the sealing of milk cans	(3) 21.
Pig or secondary tin may be used to make solder to be used for the following purposes only. (See definition of "soldering" in section 2. Solder coating is covered by Schedule IV, and item 13, Schedule VII.)	*Maximum permissible tin content of solder (percent by weight)*
(4) For a filler or smoother for automobile or truck bodies or fenders or for similar purposes.	(4) 20.
(5) Radiators	(5)
(i) All cellular type radiators (average per radiator)	(i) 21.
(ii) All fin and tube type radiators for military and civilian use (average per radiator).	(ii) 30.
(6) For all soldering on the following: railroad car and truck refrigeration; refrigeration equipment inside refrigeration compartments; aluminum refrigeration condensers; aircraft motors; diesel and electric generators; electric-traction motors; generators for railroads, street cars, mine locomotives, railway locomotives and busses (including the dipping of commutator segments); electrical precision instruments; meters, recording and indicating; dairy equipment; food processing equipment; and hospital and sterilizing equipment.	(6) Unlimited.
(7) For other hand soldering operations done either with a soldering iron or with a torch and wiping.	(7) 40.
(8) For any other soldering operations	(8) 35.

SCHEDULE III—BABBITT

Pig or secondary tin may be used to make babbit metal or alloys used as babbit for the following purposes only	*Maximum permissible tin content of babbit (percent by weight)*
(1) For manufacture, repair, maintenance or replacement of multibank crosshead linings in locomotives or for lining aluminum crossheads and for bonding of precision bearings and all bearings included under items (2) and (3) below.	(1) Unlimited.
(2) For manufacture, repair, maintenance or replacement of connecting rods or main engine bearings for trucks, tractors, bulldozers or busses.	(2) 90.
(3) For manufacture, repair, maintenance or replacement of Diesel engines; turbines; locomotive connecting rod or coupling rod bearings; irrigation water pumping engines and equipment; industrial engines, generators, and motors; compressors; pumps; vessels or other ship facilities; electric locomotives; electric traction motor and generator bearings; stone crusher bearings; saw mill, planing mill, and paper mill machinery.	(3) 90.
(4) For any other bearing purpose	(4) 10.

SCHEDULE IV—PLATING AND COATING

Pig tin or alloys containing tin may be used to plate or coat solely for protective or functional purposes in the following items only	*Permitted use of pig tin or alloys containing tin*
(1) Dairy equipment, including fluid milk shipping containers, ice cream cans, strainers, pails, and other dairy equipment.	(1) Plate, coat or retin.
(2) Equipment for preparing and handling food, including kitchen utensils, galley and mess equipment.	(2) Coat or retin only such parts as are designed to come in actual contact with food.
(3) Cutlery and flatware.	(3) Plate or coat.
(4) Copper or brass pipe and fittings:	(4)
(i) Tubing or fittings to dispense beverages or distilled water.	(i) Coat.
(ii) Tubing or fittings used as refrigeration tubing or in contact with beverages or drinking water in beverage or drinking water equipment.	(ii) Electro tin or chemically tin.
(5) Snap fasteners and hooks and eyes	(5) Tin or tin chemicals may be used for barrel plating or chemical plating.
(6) Copper and copper-base alloy wire and strip:	(6)
(i) Wire 0.032" nominal diameter or finer.	(i) Coat.
(ii) Wire—larger than 0.032" nominal diameter.	(ii) Coat with alloy containing not more than 12 percent tin by weight.
(iii) Strip 0.0250" thick or thinner where solderable coating is required for electrical conductivity.	(iii) Coat. Coating limited to .0004" in thickness.
(iv) Strip otherwise solderable coating is required for toasters and heat exchangers.	(iv) Coat with an alloy containing not more than 15 percent tin by weight.
(7) Wire, for following purposes:	(7) Coat for purposes indicated.
(i) Liquor finishing process of fine steel bright wire.	
(ii) Armature binder wire and wire for all electrical equipment and aircraft parts including aircraft wire and cable.	
(iii) Wire having ultimate tensile strength of 100,000 lbs. per sq. in. for the manufacture of stranded cable (not including picture wire, cabling beaders and like items) but including musical instrument strings.	
(iv) Steel wire, for following purposes—Continued	
(iv) Spring steel wire for use as springs where prime function of the wire is a spring and alternative coatings cannot be used (this does not include wire for spiral binding and like applications).	
(v) Wire for use in manufacture of equipment for the production of textiles.	
(vi) Wire for manufacture of pin tickets and tag wire in direct contact with garments and other textiles and including dry cleaning and laundry tag use, for pin type card holders and brake strand.	
(vii) Beekeepers' wire for comb construction.	
(viii) Wire for packaging or marking food where wire comes into actual contact with edible portions of the food.	
(ix) Bookbinders wire or preformed staple wire to be used in foot or power operated stitching machines using wire in coils or spools or preformed staples for the following:	
(a) Stitching of magazines, books, booklets and pamphlets, other than those used solely for advertising purposes.	
(b) Preformed containers for dairy products and other foods and for pull-up tabs for bottles and tubs only where the wire comes into direct contact with the food.	
(x) Stitching wire and wire for staples to be used in hand, foot or power operated stitching machines using wire in coils or spools or preformed staples for the following:	
(a) Attaching tabs and tickets to garments, other textiles, leather and imitation leather, and sheet plastics, and for attaching these items to other items or materials;	
(b) Stitching and stapling in industrial manufacturing operations where tinned stitching wire or staples are required for penetration and alternative coatings cannot be used (this does not include wire for office staples, staples for tea bags, book matches or box and carton construction).	
(8) Tin plate and terneplate	(8) Pig or secondary tin may be used to coat tin plate. Only secondary tin may be used to produce terne metal for coating terneplate. Terne metal containing not more than 15 percent tin may be used for coating terneplate. Terne metal containing not more than 10 percent tin may be used for coating all other long ternes. All uses of tin plate and terneplate shall be in accordance with the provisions stated in NPA Order M–24.

SCHEDULE VII—MISCELLANEOUS—Continued

Items	Permitted use
Pig tin or alloy containing tin may be used to plate or coat solely for protective or functional purposes in the following item only	Permitted use of pig tin or alloys containing tin is limited to the extent that manufacture is specifically authorized in writing by NPA.
(2) Tin pipe, sheet tin and fittings to repair or maintain beverage dispensing units and their parts, including soda fountain carbon dioxide tanks.	(2) May be made from pig or secondary tin provided the purchaser returns to the supplier a quantity of scrap tin with the same tin content as that supplied.
(3) Tin pipe or tubes	(3) Where required, for conducting chemically pure distilled water.
(4) Bolster metal	(4) In the manufacture of surgical instruments if the tin content of the bolster metal does not exceed 35 percent of tin by weight. For all other cutlery, if the tin content of the bolster metal does not exceed 10 percent of tin by weight and provided such bolster metal is produced from secondary tin only.
(5) Pipe organs for religious and educational institutions.	(5) May be manufactured, rebuilt or repaired with secondary tin taken from the inventories of organ builders or acquired from old organs.
(6) Dental amalgam alloys	(6) No restriction on tin content.
(7) Detonators and blasting caps (including electric blasting caps).	(7) Pig or secondary tin may be used to make the detonators and blasting caps and all necessary parts and accessories.
(8) Collapsible tubes	(8) Pig or secondary tin may be used in accordance with the specification limits stated in NPA Order M-27.
(9) Printing plates and type metal containing tin	(9) May be made for use by the printing, publishing and related services industries without certification.
(10) Terne metal	(10) Terne metal containing not more than 15 percent of tin may be produced if made from secondary tin only.
(11) Fusible alloys for safety purposes only	(11) —
(i) Dry pipe seat rings	(i) Pig or secondary tin may be used to the extent required to meet performance specifications.
(ii) Fusible alloys for safety purposes only	(ii) Pig or secondary tin may be used to the extent required to meet minimum code requirements with respect to the operation of the product in which the alloy is to be contained.
(12) Linings for chromium plating tanks and lead anodes for chromium plating.	(12) Lead base alloys containing not more than 4 percent tin may be used if the alloys are derived from secondary tin only.
(13) Secondary tin bearing dresses, residues, and scrap metal containing not more than 10 percent tin.	(13) May be used for any purpose except to make items included in List "A."
(14) Bismuth alloys. Pig or secondary tin may be used for the production of bismuth alloys.	(14) (a) For items permitted by both order M-49 and the schedules attached to order M-8, the tin content is limited to that set forth in the schedules for the particular item and use. (b) For all other items permitted by order M-49 and not included in the schedules attached to order M-8, the tin content is limited to the minimum required for the particular use under order M-49.
(15) Clutch and brake facings when produced by the process of powder metallurgy wholly from metals.	(15) Not more than 10 percent by weight of tin powder.

[F. R. Doc. 51-4027; Filed, Mar. 30, 1951; 4:36 p. m.]

SCHEDULE IV—PLATING AND COATING—Continued

Pig tin or alloys containing tin may be used to plate or coat solely for protective or functional purposes in the following item only	Permitted use of pig tin or alloys containing tin
(4) Sheet copper with tin plate, trimmings of tin plate, bell plate, tubing, wire, laundry chaplets, etc.	(4) Pig or secondary tin may be used to the extent that manufacture is specifically authorized in writing by NPA.
(5) Steel bearing shells	(5) Pig or secondary tin may be used to electro-plate, electrotype shells only where such installations were operating on or before January 27, 1951.
(6) Electrotype shells	(6) Pig or secondary tin may be used to electro-plate, electrotype shells only where such installations were operating on or before January 27, 1951.

SCHEDULE V—FOIL

Pig or secondary tin may be used to make foil for the following purposes only	Maximum permissible tin content of foil (percent by weight)
(1) Electrolytic foil	(1) 30.
(2) Soft babbitt for the preparation of industrial metallic packing	(2) 1 2.
(3) Condenser foil of dimensions .00035" by 1 inch or less	(3) 70.
(4) Condenser foil for all other condensers	(4) 15.
(5) Foil for aircraft magnetos	(5) 50.
(6) Cap liner foil for packing medicinal, pharmaceutical, and biological preparations containing chloroform or other highly volatile chemicals; and preparations containing an equivalent alcohol content in excess of 50%, and for which other types of liners cannot be used.	(6) Unlimited.
(7) Dental foil	(7) Unlimited
(8) Lead-base foil for burglar alarm systems	(8) 4½.

SCHEDULE VI—TIN CHEMICALS AND TIN OXIDE

A. TIN CHEMICALS

Types of tin chemicals	Permitted use
(1) Pig tin or tin chemicals (excluding tin oxide).	(1) May be used only as or for: Laboratory reagents, medicinals, or plating (to the extent permitted in other schedules).
(2) Tin chemicals (excluding tin oxide) produced from "low-grade" secondary tin-bearing dresses, residues, or scrap metal (See definition in Section 2).	(2) May be used for any purpose except to make items included in List A.

B. TIN OXIDE

Production	Permitted use
Pig tin cannot be used to make tin oxide except when and to the extent that manufacture is specifically authorized in writing by NPA.	(1) Commencing on March 1, 1951, for the production of green, pink, yellow and red colors in amounts in any one month not in excess of 50 percent of the average monthly use for such purposes during the base period. (2) For the production of earthenware plumbing fixtures. (3) Laboratory agents and medicinals.

SCHEDULE VII—MISCELLANEOUS

Items	Permitted use
(1) Aluminum alloys containing tin where tin content does not exceed 7 percent by weight.	(1) For any purpose except to make items included in List A.

[NPA Order M-23 as amended Mar. 31, 1951]

M-23—CARDED COTTON SALES YARN

This order as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order as amended, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

This amendment affects NPA Order M-23 (January 12, 1951) as follows: It redesignates §§ 75.1 through 75.6 thereof, as sections 1 through 6, respectively, and redesignates §§ 75.7 through 75.11 thereof, as sections 8 through 12, respectively. It amends the renumbered sections 1, 5, 6, and 9 thereof, as hereinafter set forth, and adds a new section 7. The word "part" is changed to "order" wherever it appears therein. As so amended, NPA Order M-23 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Forms of carded cotton sales yarn to which this order applies.
4. Required delivery dates.
5. Rejection of rated orders.
6. Limitation for acceptance of rated orders.
7. Restrictions on spinning spindles.
8. NPA assistance in placing rated orders.
9. Adjustments or exceptions.
10. Communications.
11. Records, audit, inspection, and reports.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order applies particularly to producers of carded cotton sales yarn, and provides rules for placing, accepting, and scheduling rated orders therefor. Its purpose is to provide equitable distribution of rated orders among all carded cotton sales yarn producers of the particular types mentioned in section 3 of this order in order to make possible maximum production of such yarn and to reduce to a minimum disruption of its normal distribution. This order also places restrictions on the operation of spinning spindles. It supplements NPA Reg. 2, but only those provisions of Reg. 2 which are inconsistent with this order are superseded, and all other provisions of Reg. 2 continue to apply to the carded cotton sales yarn industry.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes agencies of the United States or any other government.

(b) "Producer" means any person engaged in the business of spinning carded cotton yarn produced for sale as such.

(c) "NPA" means National Production Authority in the Department of Commerce.

SEC. 3. *Forms of carded cotton sales yarn to which this order applies.* This order applies to carded cotton yarn produced for sale as such, regardless of count or ply or put-up and whether undyed, dyed, tinted, or otherwise treated, including all second quality yarns, and waste or waste content yarns.

SEC. 4. *Required delivery dates.* A rated order for carded cotton sales yarn must specify delivery on a particular date or in a particular month, which in no case may be earlier than required by the person placing the order. The producer of carded cotton sales yarn must schedule the order for delivery within the requested month as close to the requested delivery date as is practicable considering the need for maximum production.

SEC. 5. *Rejection of rated orders.* Unless specifically directed otherwise by NPA, a producer of carded cotton sales yarn need not accept a rated order that is (a) received less than 15 days prior to the first day of the month in which shipment is requested, or (b) for a yarn of a specification or put-up not normally made by such producer and of a type that would cause lack of balance in mill production.

SEC. 6. *Limitation for acceptance of rated orders.* Unless otherwise directed by NPA no producer shall be required to accept rated orders for the types of carded cotton sales yarn listed in this section for shipment in any month in excess of the following respective percentages by weight of his average monthly shipment of such types made by him during the period from July 1, 1950, through December 31, 1950:

Types of yarn:	Percentage by weight
Group 1—Coarser yarns than sixes in the single, and in any ply	20
Group 2—Yarns from sixes to twenty-twos inclusive in the single, and in any ply	30
Group 3—Finer yarns than twenty-twos in the single, and in any ply	20

SEC. 7. *Restrictions on spinning spindles.* No producer shall operate any spinning spindle which on March 12, 1951, he used for the manufacture of carded cotton sales yarn (or had in place and in operating condition for such use) in any of the three groups specified in section 6 of this order, except for the manufacture of carded cotton sales yarn in such group.

SEC. 8. *NPA assistance in placing rated orders.* Any person who is unable to place a rated order for carded cotton sales yarn due to the limitation imposed by section 6 of this order should apply to NPA, Ref: M-23, specifying the producers who refused to accept the order. NPA will arrange to assist him in locating other sources of supply.

SEC. 9. *Adjustments or exceptions.* Any person affected by any provision of this order may file with NPA a request for adjustment or exception upon the ground that such provision works an undue and exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interests of national defense or in the public interest. In considering requests for adjustment which claim that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each such request shall be in writing and shall set forth pertinent facts, the nature of the relief sought, and the justification therefor.

SEC. 10. *Communications.* All communications concerning this order shall be addressed to National Production Authority, Washington 25, D. C., Ref: M-23.

SEC. 11. *Records, audit, inspection, and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

(c) Persons subject to this order shall make such records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 12. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocaton control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect as amended March 31, 1951.

Dated: March 29, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[F. R. Doc. 51-4028; Filed, Mar. 30, 1951; 4:36 p. m.]

[NPA Order M-45, Schedule 1]

M-45—NAPHTHENIC ACID

This schedule is found necessary and appropriate to promote the national defense and is issued under NPA Order M-45 pursuant to the authority of section 101 of the Defense Production Act of 1950. In the formulation of this schedule there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

SECTION 1. *Definition.* "Naphthenic acid" means crude, processed, distilled, or refined acid (monobasic carboxylic acid of the general formula RCOOH, where R is a napthenic radical) having an acid value of 180 or higher on an oil included basis and containing not more than 20 percent of unsaponifiable matter by weight.

SEC. 2. *General provisions.* Naphthenic acid is hereby made subject to NPA Order M-45 as an Appendix B material. The initial allocation date is April 1, 1951. The allocation period is the calendar month. The small order exemption without use certificate is one drum of not in excess of 55 gallon capacity (approx. 440 pounds) per person per month.

SEC. 3. *Filing date and unit of measure.* The filing date is the 15th day of the month before the proposed delivery month. Applications relating to the allocation period commencing April 1, 1951, should be filed as soon as possible. The unit of measure is the pound.

SEC. 4. *Termination of NPA authorization to use.* An authorization by NPA to any person to use naphthenic acid shall terminate at the close of the calendar month immediately following the allocation period for which such use was authorized.

SEC. 5. *Limitation on inventory.* The provisions of NPA Reg. 1 shall apply to naphthenic acid.

SEC. 6. *Certified statement of proposed use.* Every person who purchases naphthenic acid from a supplier is required to enter on or attach to each purchase order a certified statement of proposed use as provided in section 7 of NPA Order M-45, and where more than one end-use is listed for a particular product, to specify a separate quantity for each such end-use. Such statement should specify:

(a) The following products:

Aluminum naphthenate.	Mineral concentrates.
Cobalt naphthenate.	Pigments.
Copper naphthenate.	Rubber compounding composition.
Crude oil demulsifier.	Sodium naphthenate.
Esters.	Zinc naphthenate.
Iron naphthenate.	Other.
Lead naphthenate.	
Manganese naphthenate.	

(b) The following end-uses:

Cutting oils and emulsifying agents.	Plasticizers.
Lubricants.	Resale.
Napalm.	Textile impregnants.
Paint driers.	Export.
	Other.

SEC. 7. *Supplier's application on Form NPAF-47.* Every supplier of naphthenic acid is required to apply on Form NPAF-47, for authorization to deliver, or to use, any quantity of naphthenic acid in excess of the small order exemption. General instructions on the preparation of Form NPAF-47 are set forth in Appendix D of NPA Order M-45. Fill out a separate Form NPAF-47 for each grade, i. e., crude, processed, distilled, or refined. The supplier is not required to list individual purchasers, but should show in column (2) of such form the total quantity ordered (and covered by end-use certificates) for each of the products and each of the end-uses set forth in section 6 of this schedule. Where more than one end-use is listed for a particular product, a separate quantity should be specified for each such end-use. A supplier who wishes to use any naphthenic acid which he has produced himself should list his own name as a customer on Form NPAF-47.

SEC. 8. *Communications.* All communications concerning this schedule shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-45, Schedule 1.

NOTE: All reporting requirements of this schedule have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This schedule shall take effect, except as otherwise provided herein, on March 31, 1951.

Dated: March 29, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[NPA Order M-50]

M-50—ELECTRIC UTILITIES

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority of section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

ARTICLE I—GENERAL PROVISIONS

Sec.
1. What this order does.
2. Definitions.
3. Applications for adjustment.
4. Records and reports.
5. Communications.
6. Violations.

ARTICLE II—MAINTENANCE, REPAIR, AND OPERATING SUPPLIES AND MINOR CAPITAL ADDITIONS

21. Modification of NPA Reg. 4 (MRO).
22. Quarterly MRO quotas.
23. Quantity restrictions.
24. Applications for increased MRO quotas.

ARTICLE III—PROGRAM MATERIALS

31. Procurement of program materials generally.
32. Major plant additions.
33. Minor requirements.
34. Form of certification.
35. Quarterly program material quotas for minor requirements.
36. Inventory restrictions.
37. Filing of forms.
38. Applications for increased program material quotas.

AUTHORITY: Sections 1 to 38 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

ARTICLE I—GENERAL PROVISIONS

SECTION 1. *What this order does.* (a) This order provides rules of special application to the procurement and use of materials by electric utilities.

(b) Article II modifies the application of NPA Reg. 4 to electric utilities and supersedes any conflicting provisions in NPA Reg. 4. All the provisions of NPA Reg. 4 apply to electric utilities except as modified by this order.

(c) Article III authorizes electric utilities to apply DO-43 ratings to orders for program materials to be used in major plant additions upon DEPA approval. In addition, it provides that electric utilities may not use any program materials in major plant additions after May 1, 1951, unless authorized by DEPA. The procurement of program materials for minor requirements, that is, requirements for all purposes except use in major plant additions, is governed by a self-rating procedure. Subject to certain inventory controls and quota limitations, each electric utility is authorized to apply DO-43 (Minor) ratings to certain orders for program materials for minor requirements.

SEC. 2. *Definitions.* (a) "Electric utility" means any individual, partnership, association, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not, located in the United States, its territories or possessions, supplying, or having facilities built for supplying electric power, directly or indirectly, for general use by the public or for use by its members. In the case of an electric utility engaged in the supply of electric power and in other activities, this order shall apply only to the procurement and use of materials required directly or indirectly for the supply of electric power.

(b) "DEPA" means the Defense Electric Power Administration.

(c) "Maintenance" means maintenance as defined in NPA Reg. 4 and "repair" means repair as defined in NPA Reg. 4. However, "maintenance" and "repair" include the replacement of any equipment regardless of its accounting classification, but neither "maintenance" nor "repair" includes the improvement of any plant, facility, or equipment or the replacement of material which is in sound working condition with material of a better kind, quality, design, or greater capacity.

(d) "Operating supplies" means material, other than fuel, which is consumed in the course of an electric utility's operations, except in maintenance, repair, and plant additions.

(e) "Plant addition" means the construction or installation of new facilities or the replacement of existing facilities with facilities of greater capacity. Single plant additions may not be combined or subdivided for purposes of affecting their classification as "major plant additions," as defined in this section. To assist in determining whether particular construction constitutes one, or more than one, plant addition, it shall be considered that a single plant addition consists of:

(1) Any construction of related facilities, excluding maintenance and repair work, which is completed during a continuous period of construction, not interrupted by periods of time such as months or years, except where such interruption is caused by uncontrollable forces, such as adverse weather conditions.

(2) In the case of line construction, a single continuous integrated system of lines, with necessary connected substations. (Thus, several sections of line emanating from different points on a utility's system would be several plant additions, not one plant addition.)

(f) "Major plant addition" means any plant addition constructed by an electric utility which involves one or more of the following:

(1) Line construction designed for operation at more than 15 kv where the plant addition requires more than 10,000 pounds gross weight of conductor, or

(2) Line construction designed for operation at 15 kv or less where the plant addition has a net material cost exceeding $50,000, or

(3) Non-line construction, including but not limited to construction or of additions to generating plant, sub-stations, or buildings, where the plant addition has a net material cost over $50,000, except that non-line construction shall not include construction for which specific NPA authorization is required under NPA Order M-4.

(g) "Minor requirements" means electric utility requirements of program materials for all purposes (including MRO) except use in major plant additions, and except use in construction for which specific NPA authorization is required under NPA Order M-4.

(h) "Gross weight of conductor" means, in the case of overhead lines, the weight of conductor as installed, including steel content in the case of conductor containing steel, without deduction for material salvaged; and in the case of underground lines the copper and aluminum content only, without deduction for material salvaged.

(i) "Line construction" means construction of both overhead and underground lines.

(j) "Net material cost" means the cost of all material, including any commodity, equipment, accessory, part, assembly, or product of any kind, incorporated in plant, less the cost of all material removed from plant, priced in accordance with the electric utility's regular accounting practice.

(k) "Inventory of program material" means all new or salvaged program material in the possession of an electric utility, unless physically incorporated in plant, without regard to its accounting classification, excluding, however:

(1) Program material specifically set aside on the effective date of this order for use in time of emergency and replacement thereof, and

(2) Program material set aside for use in any major plant addition. Program material set aside for use in such major plant addition which will not be used in such major plant addition shall be included in inventory.

(l) "Program material" means any material which is the subject of an appendix to this order.

SEC. 3. *Applications for adjustment.* (a) Any electric utility affected by any provision of this order may file a request for adjustment or exception on the ground that such provision works an undue or exceptional hardship upon such utility not suffered generally by other electric utilities, or that its enforcement against such utility would not be in the interest of national defense or in the public interest. Each request shall be in writing, shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

(b) Each such request shall be addressed to DEPA and, if approved, DEPA will grant an appropriate adjustment or exception.

SEC. 4. *Records and reports.* (a) Each electric utility participating in any transaction covered by this order shall retain in its possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met, including the amounts of quarterly quotas, the method of computation, factual justification, methods of figuring quotas and charges against them. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) Each electric utility shall make such further records and submit such further reports to DEPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (Pub. Law 831, 77th Cong., 5 U. S. C. 139-139F).

SEC. 5. *Communications.* All communications concerning this order and NPA Reg. 4, as modified by this order, and all requests for forms shall be addressed to the Defense Electric Power Administration, Department of the Interior, Washington 25, D. C.

SEC. 6. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

ARTICLE II—MAINTENANCE, REPAIR, AND OPERATING SUPPLIES AND MINOR CAPITAL ADDITIONS

SEC. 21. *Modification of NPA Reg. 4 (MRO).* This article modifies the application of NPA Reg. 4 (MR) to electric utilities and supersedes any conflicting provisions in NPA Reg. 4. All the provisions of NPA Reg. 4 and all other applicable orders and regulations of NPA apply to electric utilities except as modified by this order.

SEC. 22. *Quarterly MRO quotas*—(a) *Computation of quota.* Subject to the exclusions provided in paragraph (b) of this section, an electric utility, in computing its quarterly MRO quotas, may include all expenditures for operating supplies and for materials used for maintenance and repair, as those terms are defined in this order.

(b) *Exclusions from quota.* In computing its quarterly MRO quota, no electric utility shall include any expenditure for:

(1) Any electric utility program material subject to Article III of this order.

(2) Any item included in Schedule A of NPA Order N-44.

(3) Any other item costing more than $10,000.

SEC. 23. *Quantity restrictions*—(a) *Charges against quota.* No electric utility shall obtain by use of the DO-97 rating any material herein excluded from its quarterly MRO quota, nor shall any utility charge against its quarterly MRO quota any order or receipt of such material.

(b) *Emergency excess of quota.* Subject to the restrictions of paragraph (a) of this section, if an electric utility has so far exhausted its MRO quota that an insufficient quota remains in any quarter to procure necessary material for maintenance or repair of its equipment or property, other than buildings, which is damaged or destroyed by extraordinary cause such as explosion, fire, sabotage, act of the public enemy, flood, storm or similar catastrophe, the utility may exceed its quota for that quarter to the extent necessary to procure such emergency materials: *Provided however*, That any such excess of quota must be immediately reported, together with the reasons therefor, to DEPA.

SEC. 24. *Applications for increased MRO quotas.* An electric utility's application for an increased MRO quota, to be submitted as provided in section 3 of this order, shall show such utility's existing MRO quota, any prior adjustments thereof, the amount of increase requested, the necessity for such increase, such utility's output per quarter in kilowatt hours commencing with the first quarter of 1950, and any other information pertinent to proper evaluation of such application.

ARTICLE III—PROGRAM MATERIALS

SEC. 31. *Procurement of program materials generally.* Subject to the quantity restrictions provided by this article,

the ratings authorized by this article shall be applied to all orders for any program material including outstanding unrated orders, scheduled for delivery in or prior to a quarter for which a program material quota or authorization is effective, and no utility shall place unrated orders for any program material scheduled for delivery in such a quarter. Accordingly, all outstanding orders for any program material, except those calling for delivery in a subsequent quarter, shall be either rated or canceled within 15 days after such material becomes subject to the provisions of this order.

SEC. 32. *Major plant additions.* No electric utility may order any program material for use in any major plant addition unless specifically authorized by DEPA. For each program material approved by DEPA for use in a major plant addition, an electric utility is hereby authorized to apply the DO-48 rating to orders for the quantity of such program material specified by DEPA. After May 1, 1951, no electric utility may use any program material in a major plant addition unless such use is authorized by DEPA.

SEC. 33. *Minor requirements.* Subject to the restrictions contained in sections 36 and 37 of this order, each electric utility is hereby authorized to apply DO-48 (Minor) ratings to order any program material for its minor requirements: *Provided,* That no electric utility may exceed its quota for such program material.

SEC. 34. *Form of certificate.* The DO-48 or DO-48 (Minor) rating shall be applied by placing on the orders for any program material, or on a separate piece of paper attached thereto, the symbol "DO-48"[6] or "DO-48 (Minor)" together with the words "Certified under NPA Order M-50". Such certification shall be signed as prescribed in section 8 of NPA Reg. 2.

SEC. 35. *Quarterly program material quotas for minor requirements.* An electric utility may elect to use either a standard quota or an alternative quota but may not thereafter change from one quota to the other without the express approval of DEPA.

(a) *Standard quota.* An electric utility's standard quota for any program material for any calendar quarter is the percentage specified in the applicable appendix to this order of the quantity of such material which it used for minor requirements in the calendar year 1950 (or, if it operated on a fiscal year basis, in its fiscal year ending nearest to December 31, 1950).

(b) *Alternative quota.* An electric utility's alternative quota for any program material for any calendar quarter is the percentage specified in the applicable appendix to this order of the quantity of such material which it used in the corresponding calendar quarter of 1950 (or, if it operated on a fiscal year basis, in the corresponding quarter of its fiscal year ending nearest to December 31, 1950).

(c) *Quota where 1950 base inapplicable.* An electric utility not in operation throughout the year 1950 (calendar or fiscal) shall establish its standard or alternative program material quota in accordance with this section by adjusting, in direct proportion, its actual use of such program material for part of the year to an annual basis. To determine an alternative quota in such cases, the adjusted annual use may be unequally distributed among 4 quarters to reflect seasonal variations. An electric utility not in operation throughout 1950 shall report to DEPA the program material quota which it establishes in accordance with this section. If an electric utility was not in operation during any part of the year 1950 (calendar or fiscal) it may apply to DEPA for a program material quota, supplying in detail information pertinent to a proper evaluation of its application.

SEC. 36. *Inventory restrictions.* No electric utility shall order any program material if, after the receipt of such program material, its inventory of such program material would be or become in excess of 25 percent of the gross weight of such program material which it used for its minor requirements during the year 1950 (calendar or fiscal), except that an electric utility may order for delivery in any quarter a quantity of any particular item of such program material equal to the amount by which its required use of such item in such quarter exceeds the quantity of such items which it has or will have on hand at the beginning of such quarter. This provision shall not authorize any electric utility to exceed its quota for minor requirements.

SEC. 37. *Filing of forms.* Prior to its first application of the DO-48 (Minor) rating to an order for delivery of any program material in the second quarter of 1951 for use for minor requirements, each electric utility must file with DEPA the applicable form in the DEPA-4 series. Forms in the DEPA-4 series shall be deemed to be filed when addressed to DEPA and deposited for mailing in any United States post office.

SEC. 38. *Applications for increased program material quotas.* Each application for an increased program material quota shall contain the following information:

(a) Statement of the amount of any special authorization which the utility has received.

(b) Statement of the total amount of each program material requested to be authorized for use in minor requirements during each quarter, including the base period quota permitted by the applicable appendix to this order.

(c) Detailed statement of necessity for larger quota.

(d) Any additional information which may be pertinent to proper evaluation of the application.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order shall take effect on April 1, 1951.

Dated: March 29, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

APPENDIX A—ALUMINUM CONDUCTOR

1. *Definition.* "Aluminum conductor" means any wire, cable, or bus bar which contains aluminum.

2. *Standard aluminum conductor quota for minor requirements:* 20 percent.

3. *Alternative aluminum conductor quota for minor requirements:* 80 percent.

4. *Exemption from quantity restrictions.* The quantity restrictions applicable to aluminum conductor shall not apply to any electric utility which orders for delivery in any calendar quarter a gross weight of aluminum conductor which does not exceed 5,000 pounds.

5. *Applicable forms.* The form which an electric utility is required to file prior to its first application of the DO-48 (Minor) rating to an order for aluminum conductor as provided in section 37 of this order is Form DEPA-4A.

6. *Effect on NPA Order M-7.* The provisions of this order supersede NPA M-7 with respect to the procurement and use of aluminum conductor by electric utilities. The use by electric utilities of forms and shapes of aluminum listed in section 3 of NPA Order M-7, other than aluminum conductor and aluminum conductor accessories, remains subject to the restrictions of NPA Order M-7.

APPENDIX B—ALUMINUM CONDUCTOR ACCESSORIES

1. *Definition.* "Aluminum conductor accessories" means any accessories containing aluminum or steel, such as clamps, twisting sleeves, and armor rods, which are used for the installation of aluminum conductor.

2. *Aluminum conductor accessories quota.* There are no quotas applicable to the procurement of aluminum conductor accessories.

3. *Quantity restrictions.* No electric utility may order for delivery in any quarter a larger quantity of aluminum conductor accessories than necessary for use in connection with aluminum conductor which such utility is authorized to use or order for delivery in such quarter, and for such additional quantity of aluminum conductor accessories which it requires for use in such quarter in maintenance and repair.

4. *Effect on NPA Order M-7.* The provisions of this order supersede NPA Order M-7 with respect to the procurement and use of aluminum conductor accessories by electric utilities. The use by electric utilities of forms and shapes of aluminum listed in section 3 of NPA Order M-7, other than aluminum conductor and aluminum conductor accessories, remains subject to the restrictions of NPA Order M-7.

5. *Filing of forms not required.* No forms are required to be filed prior to application of the DO-48 (Minor) rating to orders for aluminum conductor accessories.

[NPA Order M-51]

M-51—GLASS CONTAINERS; SIMPLIFICATION AND USE

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable by the fact that the order affects a very substantial number of different trades and industries.

Sec.
1. What this order does.
2. Definitions.
3. Permitted manufacture of glass containers.
4. Establishment and use of simplified designs.
5. Time allowed for conversion to simplified designs.
6. Force and effect of schedules.
7. Exceptions.
8. Interchange of finishes.
9. Export.
10. Application for adjustment or exception.
11. Records and reports.
12. Communications.
13. Violations.

AUTHORITY: Sections 1 to 13 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to increase the supply of glass containers for packaging. To accomplish this purpose, the creation of new designs of glass containers is prohibited by limiting the manufacture and use of glass containers to designs in existence or to simplified designs of glass containers which are from time to time included in a schedule to be issued under this order. As a further means of accomplishing this purpose, the order provides that the National Production Authority (hereinafter called "NPA") may from time to time require the use of glass containers of simplified designs for the packaging of specified products.

SEC. 2. *Definitions.* For the purposes of this order and of any schedule issued hereunder: (a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government.

(b) "Glass Container" means any new machine-made bottle, jar, or tumbler which is made of glass and which is intended for packaging any product.

(c) "Closure" means any sealing or covering device affixed or to be affixed to a glass container for the purpose of retaining the contents within the container.

(d) "Finish" of a glass container means the configuration of the neck or opening which serves to engage specific parts of the closure in order to affix it to the glass container.

(e) The term "design" with respect to a glass container means the particular shape, weight, size, capacity, and contour of the body of such container (other than the finish), and includes any lettering or decoration molded thereon, except the identification marks of the container manufacturer.

(f) The term "design in existence" with respect to a glass container means a design which has been produced in one or more production runs on or before March 31, 1951.

(g) The term "simplified design" means the design of a glass container shown in any drawing and by the particular specifications set forth opposite a design number in the table of specifications accompanying such drawing in a schedule which will be issued under this order and designated as Schedule 1. Any applicable footnotes relating to individual drawings and tables of specifications are a part of such specifications.

(h) The letters "GCMI", when used in connection with any specification included in a schedule of this order, mean a specification issued by Glass Container Manufacturers Institute, Inc.

SEC. 3. *Permitted manufacture of glass containers.* Effective on and after March 31, 1951, no person shall manufacture for sale a glass container except:

(a) Where the glass container is of a design in existence, or

(b) Where the glass container is of a simplified design incorporated in Schedule 1 of this order.

SEC. 4. *Establishment and use of simplified designs.* (a) NPA may from time to time establish simplified designs for glass containers by incorporating in Schedule 1 of this order drawings illustrating such containers and providing specifications for each such simplified design opposite a design number in the table of specifications accompanying such drawings.

(b) Both glass containers of these simplified designs and glass containers of designs in existence may be manufactured and used for packaging any product unless and until, through other schedules of this order, the use of designated glass containers of simplified designs is required for the packaging of specified products.

SEC. 5. *Time allowed for conversion to simplified designs.* Whenever a schedule is added to this order requiring that designated glass containers of simplified designs be used for packaging specified products, time, to the extent indicated in the schedule, will be allowed for conversion to the simplified designs. After the expiration of the allowed conversion period, only glass containers of the simplified designs designated for a specified product shall be manufactured or used for packaging that product, but during the interval between the date of the issuance of the schedule and the expiration of the conversion period provided for the specified product, glass containers of a design in existence may be manufactured and used for packaging such product.

SEC. 6. *Force and effect of schedules.* A schedule of this order may require that, in the packaging of specified products, designated glass containers of simplified designs be used, and may establish a quota limiting the number of such designated containers to be used in the packaging of any specified product. Schedules issued under this order shall be dated, and numbered consecutively from 1 upwards and shall be designated according to number as "Schedule — of NPA Order M 51," but may be issued without any amendment to or change in the text of this order and without any republication of this order or of any provision of this order. All provisions of any such schedule shall be deemed to be incorporated in and made a part of this order. In the event of inconsistency or conflict between a schedule and this order, the provisions of the schedule shall govern. Schedules may be issued or amended at any time and from time to time and shall remain in full force and effect until individually amended or revoked.

SEC. 7. *Exceptions.* Nothing in this order or any schedule of this order shall:

(a) Prevent variations in the design or finish of a glass container within the limits of normal operating tolerances;

(b) Prohibit the usual differences in glass container design due to manufacture with glass container machinery of different types;

(c) Prevent the manufacture of glass containers for fluid milk and other dairy products which differ from a design in existence or a simplified design solely by reason of the addition of lettering or identification marks as follows:

(1) Name of dairy.
(2) Address of dairy.
(3) Neck identification for use in sorting.
(4) The word "store" or "deposit".
(5) The amount of deposit.
(6) Single identification letter or symbol on bottom plate.
(7) Specific lettering required by law or local ordinance.

SEC. 8. *Interchange of finishes.* Unless specifically provided to the contrary, nothing in this order or any schedule of this order shall prevent the interchange of finishes on glass containers of a design in existence or of a simplified design: *Provided:*

(a) Such interchange can be effected without alteration of the body mold required to produce such design, and

(b) The interchanged finish is no greater in diameter than that used or specified for such design, or, if another type of finish is used, no larger than the corresponding size of that type of finish, and

(c) The capacity resulting from such interchange is no less than the capacity used or specified for such design, and

(d) The weight and height are not modified, and the capacity is not increased, to an extent greater than the minimum required by such interchange.

SEC. 9. *Export.* No person shall manufacture a glass container for shipment empty outside of the continental United States except a glass container of a design in existence or of a simplified design incorporated in Schedule 1 of this order, but glass containers so exported shall not be subject to the restrictions on use imposed by this order or any schedule of this order.

SEC. 10. *Application for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after a base period, or because any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry or that its enforcement against him would not be in the interest of the

national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 11. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

(c) Persons subject to this order shall make such records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 12. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C. Ref.: M–51.

SEC. 13. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

This order shall take effect on March 31, 1951.

Dated: March 29, 1951.

[NPA Order M-52]

M–52—MOLYBDENUM-BEARING STEELS; PRODUCTION

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by the Defense Production Act of 1950. In the formulation of this order there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable by the fact that the order affects a very substantial number of different trades and industries.

Sec.
1. What this order does.
2. Definition.
3. Limitation on molybdenum content.
4. Exceptions.
5. Application for adjustment or exception.
6. Communications.
7. Records and reports.
8. Violations.

AUTHORITY: Sections 1 to 8 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to conserve molybdenum, which is in short supply, by reducing and limiting the molybdenum content of stainless steels to 2.5 percent maximum by weight.

SEC. 2. *Definition.* As used in this order, "person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government.

SEC. 3. *Limitation on molybdenum content.* Except as otherwise directed by the National Production Authority, no person shall produce any molybdenum-bearing stainless steel the material specifications for which provide for a molybdenum content greater than 2.5 percent by weight.

SEC. 4. *Exceptions.* This order shall not prohibit the completion of the production of any stainless steel with a molybdenum content greater than 2.5 percent by weight which was in process of production at the effective date of this order.

SEC. 5. *Application for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that any provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 6. *Communications.* All communications concerning this order shall be addressed to National Production Authority, Washington 25, D. C. Ref: M–52.

SEC. 7. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 8. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

This order shall take effect on March 31, 1951.

Dated: March 29, 1951.

[NPA Order M-53]

M–53—COTTON DUCK

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

Sec.
1. What this order does.
2. Definitions.
3. Required shipment dates.
4. Limitation for acceptance of rated orders.
5. Restrictions on operation of looms.
6. NPA assistance in placing rated orders.
7. Reports.
8. Records.
9. Audit and inspection.
10. Adjustments and exceptions.
11. Communications.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law. 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order applies particularly to producers of cotton duck and provides rules for placing, accepting, and scheduling rated orders for cotton duck. Its purpose is to provide equitable distribution of rated orders among all producers of cotton duck in order to make possible maximum production of cotton duck and to reduce to a minimum disruption of its normal distribution. It also places restrictions upon the operation of looms. This order supplements NPA Reg. 2, as amended, but only those provisions of that regulation which are inconsistent with this order are superseded and all other provisions of NPA Reg. 2 continue to apply to the cotton duck industry.

SEC. 2. *Definitions.* As used in this order: (a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes agencies of the United States or any other government.

(b) "Producer" means any person engaged in the business of producing cotton duck for sale.

(c) "Cotton duck" means any cotton fabric commonly known by that name, in any weight, 15 inches or wider (whether gray, bleached, dyed, printed, or otherwise treated and regardless of grade, quality, or length, except in lengths not exceeding 10 yards produced in the ordinary course of manufacture), including but not limited to the following types:

(1) Shelter tent duck.
(2) Numbered (wide or sail) duck.
(3) Narrow or naught duck.
(4) Hose or belting duck.
(5) Harvester duck.
(6) Filter duck or twills, plied yarn.
(7) Chafer duck (chafer fabric), single or plied yarn.
(8) Army duck (including woven awning stripe).
(9) Single or double filling flat duck.
(10) Shoe duck.
(11) Gem duck.
(12) Bootleg duck.
(13) Ounce duck.
(14) Enameling duck.
(15) Cover duck.
(16) Apron duck.

(d) "NPA" means National Production Authority.

SEC. 3. *Required shipment dates.* Every rated order for cotton duck must specify delivery on a particular date or dates, or in a particular month, which in no case may be earlier than required by the person placing the order. The producer of cotton duck must schedule the order for delivery within the requested month as close to the requested delivery date as is practicable considering the need for maximum production.

SEC. 4. *Limitation for acceptance of rated orders.* Unless otherwise directed by NPA, no producer shall be required to accept DO rated orders for cotton duck for shipment in the calendar quarter commencing April 1, 1951, or in any calendar quarter thereafter, in excess of 80 percent by weight of his scheduled production of cotton duck for such quarter.

SEC. 5. *Restrictions on operation of looms.* Commencing April 8, 1951, no producer shall use any loom except in the manufacture of cotton duck if he used such loom in such manufacture during the week commencing January 14, 1951, nor shall he operate such looms during any calendar week for fewer hours in the aggregate than during the week commencing January 14, 1951, unless otherwise directed by NPA.

SEC. 6. *NPA assistance in placing rated orders.* Any person who is unable to place a rated order for cotton duck due to the limitation imposed by section 4 of this order should apply to NPA, Ref: M–53, specifying the producers who refused to accept the order. NPA will arrange to assist him in locating sources of supply.

SEC. 7. *Reports.* (a) Every producer shall file with the Bureau of the Census on or before April 15, 1951, on Form NPAF–43, a report of his operations in the fourth calendar quarter of 1950, and in the calendar week beginning January 14, 1951, and such other information as may be required by such form.

(b) Every producer shall file with the Bureau of the Census within 20 days after the end of the calendar quarter ending March 31, 1951, and 20 days after the end of each calendar quarter thereafter, on the Bureau of the Census Form M 15A–1, a report of his operations during such quarter, and such other information as may be required by such form.

(c) Persons subject to this order shall make such records and submit such other reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 8. *Records.* Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

SEC. 9. *Audit and inspection.* All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

SEC. 10. *Adjustments and exceptions.* Any person affected by any provision of this order may file with NPA a request for adjustment or exception upon the ground that such provision works an undue and exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interests of national defense or in the public interest. In considering requests for adjustment which claim that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each such request shall be in writing and shall set forth all pertinent facts, the nature of the relief sought and the justification therefor.

SEC. 11. *Communications.* Except as otherwise specified in this order, all communications concerning this order shall be addressed to National Production Authority, Washington 25, D. C., Ref.: Order M–53.

SEC. 12. *Violations.* Any person who wilfully violates any provision of this order, or any other order or regulation of NPA, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order, is guilty of a crime and upon conviction may be punished by fine or imprisonment, or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order shall take effect, except as otherwise provided herein, on March 31, 1951.

Dated: March 29, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

Chapter XVIII—National Shipping Authority, Maritime Administration, Department of Commerce

[NSA Order No. 2 (FIS–1)]

NSA 2 (FIS–1)—PROCEDURAL RULES FOR FINANCIAL TRANSACTIONS UNDER AGENCY AGREEMENTS

The following procedural rules will be observed by the agent with respect to financial transactions under agency agreements entered into with the National Shipping Authority (herein re-

ferred to as the owner), it being understood that such instructions may be modified or supplemented from time to time as experience in operations under such agreements may dictate.

ACCOUNTS

Sec.
1. Books of accounts.
2. Bank account.

ACCOUNTING FOR REVENUES

3. Accounting for revenues.

FUNDING OF OPERATIONS

4. Funding of operations.

DISBURSEMENTS

5. Disbursements at principal office of agent.
6. Disbursements at other domestic ports.
7. Disbursements at foreign ports.

DOCUMENTS

8. Disbursement documents.
9. Maintenance of documents.
10. Lost documents.

REPORTS AND AUDIT

11. Reports to the owner.
12. Audit.

AUTHORITY: Sections 1 to 12 issued under 49 Stat. 1987, as amended; 46 U. S. C. 1114.

ACCOUNTS

SECTION 1. *Books of account.* A separate set of books of account shall be opened for the purpose of recording the various transactions in connection with the said agency agreement. The books of original entry and ledgers may be similar in design to those heretofore employed by the agent unless it develops that they are inadequate, in which event the deficiency shall be remedied promptly. The accounts required in operations under this agency agreement, however, shall conform to the chart in the uniform system prescribed by the Maritime Administration in General Order No. 22, Revised, as published in 15 F. R. 7935–7951, and recordings in the accounts shall be in accordance with the descriptions thereof contained in the said uniform system.

SEC. 2. *Bank account.* A separate joint bank account will be maintained in a depository or depositories designated by the agent and approved by the National Shipping Authority (referred to in this order as the owner), into which all collections under the agency agreement will be deposited and from which disbursements in connection with the activities, maintenance and business of the vessels thereunder will be made. Upon designation by the agent and approval by the owner of the depository or depositories, the owner will issue an order for the establishment of the joint bank account. The order will set forth the conditions governing the establishment and maintenance of the account and the making of deposits therein and withdrawals therefrom. A signed copy of the order of the owner will be furnished the agent and the agent promptly shall adopt, through its Board of Directors, a resolution satisfactory in form and substance to the owner, authorizing the establishment and maintenance of the account in conformity with the action of the owner. A signed copy of the order of the owner and a certified copy of the resolution of the agent will be furnished by the owner to the depository for its guidance in maintaining the fund and honoring instruments of withdrawal. The order will provide, among other things, that (a) withdrawals from this bank account may be made by the agent without the countersignature of the owner for disbursements in connection with the activities, maintenance and business of the vessels assigned under agency agreements, except disbursements involving payments to the agent directly, or to any other persons specifically designated by the Director, National Shipping Authority, in which instances the countersignature of a designated representative of the owner will be required, (b) withdrawals may be made from the account by the owner without the countersignature of the agent whenever and to the extent the owner shall determine that the balance in the account in excess of current operating requirements warrants such action, (c) the bank shall have no rights against the joint account on account of indebtedness of the agent either by way of set-off or otherwise, (d) the bank may receive for deposit in the joint account any funds tendered to it by any person with instructions that the same be deposited in the said account, and the bank shall have no responsibility to inquire as to the source of such funds, and (e) the bank shall disburse funds from the joint account in accordance with checks, drafts, or other orders for the payment of money, drawn as provided in the order, without making any inquiry as to the purpose or use to which such withdrawals are to be put.

ACCOUNTING FOR REVENUES

SEC. 3. *Accounting for revenues*—(a) *General.* (1) The agent shall be responsible for the prompt collection of all vessel operating revenue, shall issue such instructions as may be necessary to its branch houses or sub-agents, and shall take such other steps as may be necessary to insure prompt remittance to it of vessel operating revenue collected outside its principal office.

(2) Freight revenue collected, less refunds made therefrom, shall be remitted to the owner promptly subsequent to the close of each month. Disbursements except for refunds shall not be made from freight revenue collections unless specifically authorized by the owner.

(3) Passenger revenue collections shall be accounted for in accordance with procedures to be prescribed.

(4) The agent shall in all cases perform his audit and review functions promptly and shall be in a position to supply complete documentation for a current audit by representatives of the owner.

(b) *Revenue documents*—(1) *Freight revenue.* The agent shall require its domestic and foreign branch houses, subagents, or other representatives, to prepare and submit revenue documents (manifests, bills of lading, lout turn weight certificates, correction notices, etc.) to it. The manifest, in addition to showing the name of shipper, consignee, weight or measurement, freight rate and basis (whether the freight rate applies on measurement or weight basis), and amount of freight, shall show also advance charges, prepaid beyond charges, etc. A recapitulation sheet shall be made of the totals shown on the individual manifest sheets for each port. The aggregate totals of weight and measurement freight shall be converted to freight payable tons of bulk, general, heavy lifts, and commodities subject to special stevedoring rates if freight carried is subject to an over-all stevedoring agreement.

(2) *Passenger revenue.* Agents to whom combination passenger and freight vessels have been assigned under agency agreements and who heretofore have established a passenger accounting procedure, may continue to follow such procedure under the agency operations, unless such procedure is found to be inadequate by the owner.

(3) *Certifications of revenue documents.* The following certifications will be signed by branch houses or subagents:

(i) *Freight manifests.* Certified to be a true and correct reflection of cargo loaded and rates charged.

_____
Branch house or sub-agent
By: _____
Name *Title*

(ii) *Passenger manifests.* Certified to be a true and correct reflection of passengers carried and rates charged.

_____
Branch house or sub-agent
By: _____
Name *Title*

(4) *Definition of manifest.* The term "manifest," as used in this order, shall be interpreted to include appropriate equivalent documents as customarily used.

FUNDING OF OPERATIONS

SEC. 4. *Funding of operations.* Cash advances will be made by the owner in such amounts and at such times as are required to adequately fund the activities, maintenance and business of the vessels assigned under agency agreements.

DISBURSEMENTS

SEC. 5. *Disbursements at principal office of agent.* All expenses directly applicable to the activities, maintenance and business of the vessels assigned under agency agreements shall be paid from funds advanced by the owner unless otherwise specifically provided. When paid by check, invoices shall reflect the numbers of the checks by which the invoices were paid; when paid other than by check of the agent at his principal office, invoices must bear evidence of payment.

SEC. 6. *Disbursements at other domestic ports.* Disbursements at domestic ports other than the principal office of the agent for expenses as referred to in section 5 shall be made by one of the three following methods:

(a) After proper certification by the branch house or subagent, invoices shall be forwarded to the agent for payment, or

(b) The branch house or subagent shall pay invoices and thereafter apply to the agent for reimbursement, supporting its voucher with invoices bearing evidence of payment covering individual disbursement, or

(c) The agent may advance from time to time from the joint bank account the funds necessary to meet the requirements of such branch houses or subagents in connection with the activities, maintenance and business of the vessels assigned under the agency agreement. In such cases the branch house or subagent shall pay invoices from such advances and make proper accounting to the agent for each advance, supported by invoices bearing evidence of payment and accompanied by remittance covering any unexpended balance of the advance, promptly after the departure of each vessel for which such advance was made.

SEC. 7. *Disbursements at foreign ports.* Disbursement procedures at foreign ports may differ in the case of individual agents and in view of existing conditions. Disbursements at foreign ports shall be made by one of the following methods or by any other method outlined to and approved by the owner in advance of its use:

(a) The agent may advance from time to time from the joint bank account the funds necessary to meet the requirements of the business of the vessels assigned under the agency agreement. In such cases the foreign branch house or sub-agent shall pay invoices from such advances and shall make proper accounting to the agent for all advances supported by invoices bearing satisfactory evidence of payment. Any gains or losses in exchange on such advances or disbursements shall be for the account of the owner.

(b) The foreign branch house or subagent may pay all invoices from his own funds and thereafter draw on the agent for reimbursement, at the same time forwarding the disbursements account by air mail.

(c) The agent may establish Letters of Credit making funds available to the foreign branch house or sub-agent against which funds may be drawn by the sub-agent or branch house for payment of properly approved documents.

DOCUMENTS

SEC. 8. *Disbursement documents*—(a) *Preparation of invoices by contractors and/or vendors.* (1) Invoices from contractors or vendors shall be supported by evidence of delivery of supplies (delivery receipts), performance of services, or use of facilities furnished the vessels, and shall include the following:

(i) Name of vessel.

(ii) Name of port at which the services, supplies, or facilities were furnished.

(iii) Date of delivery or service.

(iv) Necessary details as to the nature of services, supplies, or facilities furnished, including quantity, rate, price and total amount.

(2) (i) In addition to the foregoing, contractors or vendors shall certify each invoice or voucher (original only) in the following manner:

I certify that the above bill is correct and just and that payment therefor has not been received.

_____
Name of contractor or vendor
By: _____
Name *Title*

(ii) The agent shall advise its domestic and foreign branch houses, subagents, or other representatives to the effect that the foregoing information and certifications must be shown on all invoices or vouchers when received from contractors or vendors.

(iii) In instances where the foregoing certification is unobtainable for foreign purchases only, it may be waived: *Provided*, That, in lieu of such certification, the agent certifies the invoice as follows:

We certify that the prescribed certification of the payee was unobtainable.

_____
General agent or berth agent
By: _____
Name *Title*

(3) In instances where it is not possible or practicable to obtain invoices bearing evidence of payment covering disbursements at foreign ports, that requirement will be waived, provided the agent certifies as follows:

We certify that, to the best of our knowledge and belief, this invoice has been paid.

_____
General agent or berth agent
By: _____
Name *Title*

(4) Invoices rendered to the agent by its branch houses or sub-agents shall be only those of the contractors or vendors who actually rendered the services or furnished the supplies or facilities.

(5) If the laws of any country require the foreign sub-agent or branch house to retain the original invoice with stamps affixed, or if such laws require the original receipt as prima facie evidence of payment, the corresponding duplicate copy of the invoice, in proper form, must be forwarded to the agent with notation to that effect made thereon by the foreign sub-agent or branch house.

(b) *Certification of master, ship's officers, branch houses, sub-agents, or duly authorized representatives.* (1) Evidence of delivery of supplies, performance of services, or use of facilities, as normally provided by delivery receipts, or an equivalent form, comprises an essential part of proper documentation for disbursing purposes.

(i) Where supplies are delivered or services or facilities are furnished directly to a vessel, evidence of delivery or performance normally should be signed by a ship's officer.

(ii) Where such evidence is not signed by a ship's officer, any duly authorized representative of the agent may sign as "Duly Authorized Representative," provided the agent shall be responsible for the designation of proper and qualified representatives and provided the agent shall furnish, when so required by the owner, adequate evidence that the signing representative was duly authorized by him. In instances in which the agent may not be able to identify in advance the representative who may sign, the agent shall have the responsibility for determining that the person signing was qualified to execute evidence of delivery of supplies, performance of services, or use of facilities involved.

(2) For charges for watching cargo, stevedoring, wharfage, receiving and delivering cargo, clerking and checking, or other services or facilities not rendered directly to the vessel, for which normally delivery receipts or any equivalent form are not furnished, the following certification on the face of the original invoice by a duly authorized representative of the agent is required.

I certify that the services or facilities as specified have been furnished.

_____
Name
_____
Duly authorized representative

(3) Ships' payrolls shall be certified by the master (or his authorized representative) as follows:

I certify that this payroll is true and correct, and that the persons named hereon have performed the services for the period stated.

_____
Master (or his authorized representative)

(4) In instances where vessels are under foreign articles the payroll shall bear proper evidence of having been paid off before a United States Shipping Commissioner or an American Consul.

(5) The slop chest account shall be certified by the master as follows:

I hereby certify that the above is a true statement of all Slop Chest transactions on this vessel and voyage.

_____
Master (or his authorized representative)

(6) A similar certification shall be made by the Chief Steward (or his authorized representative) covering bar transactions (if any).

(c) *Certification by branch house or sub-agent where agent does not handle transactions directly.* The certification of the branch house or sub-agent must be shown on the original invoice (if rendered singly) or on the summary disbursement statement (if rendered in groups) in the following manner:

(1) *On single invoices.*

I certify that the prices charged are reasonable and correct.

_____
Branch house or sub-agent
By: _____
Name *Title*

(2) *On the summary statement.*

I certify that the prices charged per invoices detailed above are reasonable and correct.

_____
Branch house or sub-agent
By: _____
Name *Title*

SEC. 9. *Maintenance of documents.* The agent shall maintain the originals of all documents at his principal office. All documents originating at other domestic ports and at foreign ports shall be transmitted as currently as possible to the principal office of the agent. The agent shall in all cases perform his

audit and review functions promptly and shall be in a position to supply complete documentation for a current audit by representatives of the owner. The agent shall maintain to the maximum extent possible a complete and orderly file of all authorizations for facilities, services and supplies, and complete tariffs and port schedules covering charges at domestic and foreign ports incident to the operation of the vessels assigned under the agency agreement.

SEC. 10. *Lost documents.* In the event of the loss of documents, photostat, carbon, or other suitable copies may be substituted therefor, in which event the following certification shall be placed on such copies:

I certify that, to the best of my knowledge and belief, this is a true copy of an original that has been lost.

Branch house or sub-agent

By: ---
Name *Title*

REPORTS AND AUDIT

SEC. 11. *Reports to the owner.* The agent shall submit to the local District Comptroller of the owner, in triplicate, not later than 20 days after the end of each month, its general ledger trial balance and such schedules and support thereof as may be required. The agent shall also submit to the owner, in original and four copies, not later than 10 days after the end of each month a statement in the form and content to be prescribed reflecting cash receipts and cash disbursements for the preceding month and cumulative totals for the year to date; the original and one copy will be transmitted to the local District Comptroller and three copies will be transmitted to the Comptroller, Maritime Administration, Washington.

SEC. 12. *Audit.* (a) The owner will audit as currently as possible subsequent to audit by the agent, all documents relating to the activities, maintenance and business of the vessels assigned under agency agreements.

(b) The agent shall maintain all documents in his principal office, for the time being in accordance with his customary practice of filing.

(c) Subsequent to audit by the owner, at such intervals as may be determined, the owner will authorize entries to be made to revenue and expense accounts and to accounts reflecting relations between the owner and the agent.

C. H. MCGUIRE,
Director,
National Shipping Authority.

[F. R. Doc. 51-4023; Filed, Apr. 2, 1951; 8:56 a. m.]

[NSA Order No. 3 (AGE 2)]

PART 3—(AGE-2)—GENERAL AGENTS, AGENT, AND BERTH AGENTS

APPLICATIONS FOR SERVICE AGREEMENTS

Whereas, the United States acting by and through the Director, National Shipping Authority, Maritime Administration, Department of Commerce (hereinafter called "Director"), will from time to time authorize the execution of Service Agreements with certain general agents, agents, and berth agents to manage and/or conduct the business of vessels of which the United States is owner or owner pro hac vice and

Whereas, the Director has determined that applicants for such service agreements should meet certain qualifications to assure the most effective utilization of the vessels and performance of the duties by the general agent, agent, or berth under said agreements: *It is therefore ordered,* That:

Sec.
1. Acceptance of applications.
2. General considerations.
3. Financial qualifications.
4. Surety bond.
5. Execution of application.
6. Form of application.

AUTHORITY: Sections 1 to 6 issued under 49 Stat. 1967, as amended; 46 U. S. C. 1114.

SECTION 1. *Acceptance of applications.* The Director will accept applications for the appointment of general agents, agents and berth agents for the performance of the duties contained therein.

SEC. 2. *General considerations.* In determining whether to approve the application, the Director will take into consideration the applicant's financial resources, credit standing, ownership of vessels, practical experience in the operation of vessels, and any other factors that would be considered by a prudent businessman in entering into a transaction involving the responsibilities of an agent as contained in said agreement; and the Director will not enter into such agreements with any applicant applying who lacks sufficient capital, credit, and experience to fulfill the terms of said agreement. If the application is rejected by the Director, the applicant will be so advised.

SEC. 3. *Financial qualifications.* (a) For the purposes of the financial qualifications it will be necessary for a general agent or a berth agent to have a minimum working capital of $50,000 and a minimum net worth of $200,000.

(b) The financial requirements of an agent will be covered in a supplement to this order.

SEC. 4. *Surety bond.* Each general agent and berth agent shall be required to furnish surety bond pursuant to Article 3 (f) of the general agency agreement in an amount deemed by the Director to be adequate to protect the interests of the owner but in no event less than $50,000.

SEC. 5. *Execution of application.* (a) Any citizen of the United States as defined in section 2 of the Shipping Act, 1916, as amended, and section 905 (c) of the Merchant Marine Act of 1936, as amended, may apply to the Director to act as general agent, agent or berth agent. The application to receive consideration should be substantially in the form indicated in this order (section 6). One (1) executed copy and five (5) conformed copies of the application should be filed with the Director, National Shipping Authority, Maritime Administration, Department of Commerce, Washington 25, D. C.

(b) Each application should contain sufficient information to enable the Director to make all necessary determinations as to the qualifications of the applicant, including those as to citizenship, ability, experience, and financial resources.

(c) If any information called for by the application is not furnished, an explanation of the omission should be given. Detailed descriptions of exhibits need not be given. The applicant may furnish such relevant information as it may desire in addition to that specified in the form.

SEC. 6. *Form of application.* The form of application should be substantially as follows:

APPLICATION
FOR APPOINTMENT AS GENERAL AGENT, AGENT AND/OR BERTH AGENT OF THE
NATIONAL SHIPPING AUTHORITY
MARITIME ADMINISTRATION
DEPARTMENT OF COMMERCE

Filed by

A citizen of

The undersigned hereby applies for appointment as:

*(1) General Agent ☐
*(2) Agent ☐
*(3) Berth Agent ☐

of the National Shipping Authority, in accordance with the provisions of NSA Order No. 1 (AGE-1) (herein called the "regulations"), which the applicant agrees shall be binding in all transactions in connection with this application. Applicant also agrees that any amendment or modification of the rules and regulations (approved by the Director), after the date of publication of such amendment or modification shall be binding in all transactions.

In order to induce the Director to act favorably upon this application, the applicant submits in support thereof the following information:

A. As to the applicant: its citizenship and affiliations.

1. Exact name.
2. Form or type of organization.
3. State or other soverign power under the laws of which organized.
4. Address of principal executive offices.
5. A brief description of (a) the shipping business of the applicant; and (b) any other business activities of the applicant during the preceding ten years. If within such period the applicant has acquired the business of any other person or has been reorganized, there should be included a brief description of such acquisition or reorganization.
6. A list of (a) all subsidiaries, (b) parent company, and (c) all other affiliated interests of the applicant, together with an indication of the nature of the business transacted during the past ten years by each. This information may be furnished in the form of a chart, indicating clearly the relationships between the persons named, and the nature and extent of control.
7. The following information with respect to each officer and director of the applicant:

Name and address.
Office.
Nationality.
Capital shares owned.

*Indicate service or services for which application is made.

A brief description should be submitted of the principal business activities during the past ten years of each officer and director, name and title of each other principal supervisory shoreside official with statement of the responsibility and experience, and number of employees in each department including but not limited to operating manager, port captain, port engineer, port steward, traffic manager, purchasing agent, principal accountant, and treasurer. If applicant has more than one class of stock, the information requested should be furnished for each class of stock.

8. Applicant represents that it is a citizen of ---. If applicant claims United States citizenship, submit three affidavits of United States citizenship in form prescribed by the Maritime Administration, Department of Commerce, as follows:

AFFIDAVIT OF CITIZENSHIP

State of ---
County of ---, ss:

I, ---, being duly sworn, depose and say that I am the ---, of ---, (Title of officer) (Exact name of applicant) and that said corporation is a citizen of the United States within the meaning of the Shipping Act, 1916, as amended (U. S. C. Title 46, Sec. 802), and Section 905 (c) of the Merchant Marine Act, 1936, as amended.

Subscribed and sworn to before me, a Notory Public in and for the State and County above named, this ------ day of ----------, 19----.

---------- (Notary seal)

My commission expires ---

In all cases the Director reserves the right to require such additional information with regard to citizenship as may be deemed necessary to determine the eligibility of applicant.

B. As to the management of the applicant.

9. The name and address of each other organization engaged in shipping activities with which any person named in answer to item 7 has any present substantial business connection, the name of such person, and, briefly, the nature of such connection.

10. The name and address of any person, firm or corporation, who is now acting or within the past five years has acted as managing or operating agent of the applicant or in any similar capacity and, briefly, the general terms of any agreement with reference thereto.

C. As to the vessels.

11. Applicant offers to act as General Agent, Agent, or Berth Agent of vessels of the type and number indicated herein:

Type	*Number*
(1) Dry Cargo	
(2) Passenger type	
(3) Tanker	
(4) *Other	

*Specify.

D. As to Berth Agency qualifications.

12. Full details concerning the services, routes, or lines, on which United States flag vessels owned or chartered by the applicant were operated on June 25, 1950, including ports of call, volume and kind of cargo, terminal and dock facilities at all such ports, frequency of sailings per year, period of such berth operations, description of services and voyages, and names of vessels segregated according to services, routes, or lines.

E. Terms and conditions of agreement.

13. If the application is approved by the Director, the applicant agrees to execute a Service Agreement in such form as the Director may prescribe.

F. Supplemental information.

14. A brief description of the general character and location of the principal property of the applicant, other than vessels, employed in its business.

15. A list of vessels owned by the applicant, including (a) name; (b) gross tonnage; (c) net tonnage; (d) deadweight tonnage; (e) bale capacity; (f) year built; (g) type; (h) speed; (i) draft; (j) registry; and (k) identification of route or service on which operated.

16. Information similar to that specified in item 15 as to any vessels owned by others which are chartered to or operated by the applicant.

17. Briefly, the general terms of each charter for operation (a) of vessels owned by the applicant and chartered by it to other persons, and (b) of vessels chartered by the applicant from other persons.

18. List branch office and agents in foreign and domestic ports (who would act as sub-agents under the Service Agreements).

G. As to exhibits furnished.

19. A list of exhibits, properly identified, which should include at the time of original filing, the following:

Exhibit I—Two copies of the certificate of incorporation of the applicant or other organization papers, including all amendments thereto presently in effect.

Exhibit II—Two copies of the by-laws or other governing instruments of the applicant, including all amendments thereto presently in effect

Exhibit III—Two copies of (1) a balance sheet as of a date within six months of the date of filing the application with the Director, (2) a brief statement in duplicate of the nature of any substantial changes in the financial condition of the applicant, or the results of its operations since the date of the balance sheet required hereunder, and (3) profit and loss statements in duplicate for the three fiscal years preceding the date of such balance sheet. If during the period covered by such profit and loss statements, the applicant succeeded to the business and assets of another person, the statements furnished should reflect the operations of such predecessor or predecessors for that part of such period preceding the date of acquisition.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

[Circular 1788]

PART 193—COAL LEASES, PERMITS, AND LICENSES

This part is hereby completely revised as follows, effective 60 days after date of issuance hereof by the Secretary of the Interior:

GENERAL

Sec.
193.1 Statutory authority.
193.2 Area and limitations on holdings.
193.3 Qualifications of applicants.
193.4 Equitable rights; holders of leases or permits affecting certain lands or coal deposits in Oklahoma.
193.5 Permits, leases and licenses for lands disposed of with reservation of coal.
193.6 Requirements when lands are within a withdrawal.

COAL LEASES

193.7 Leasing units.
193.8 Form of lease.
193.9 Minimum expenditure and lease bond.
193.10 Minimum production.
193.11 Application for lease.
193.12 Offer of lands or deposits for lease by competitive bidding.
193.13 Notice of lease offer.
193.14 Sale; bidding requirement; action by successful bidder.
193.15 Modification and leasing of additional land or coal deposits.
193.16 Readjustment of terms and conditions at end of twenty-year periods.
193.17 Relinquishment of lease.
193.18 Cancellation of lease.

COAL PROSPECTING PERMITS

193.19 Character of lands.
193.20 Rights conferred.
193.21 Application for permit.
193.22 Permit bond.
193.23 Extension of permits.
193.24 Reward for discovery.

TRANSFERS OF PERMITS AND LEASES; OVERRIDING ROYALTIES

193.25 Transfers, including subleases.
193.26 Limitation on overriding royalties.

LIMITED COAL LICENSES

193.27 Purpose of license.
193.28 Area and duration.
193.29 Application for license.
193.30 Licenses to relief agencies.

AUTHORITY: §§ 193.1 to 193.29 issued under sec. 32, 41 Stat. 450, sec. 1, 44 Stat. 301; 30 U. S. C. 189, 271. Interpret or apply sec. 5, 44 Stat. 1058, as amended; 30 U. S. C. 285.

CROSS REFERENCE: For coal permits and leases in Alaska see Part 70 of this chapter.

GENERAL

§ 193.1 *Statutory authority.* Sections 2 to 8, inclusive, of the act of February 25, 1920 (41 Stat. 438 et seq., 30 U. S. C. 201, 202–208), as amended, authorize the Secretary of the Interior to:

(a) Divide into leasing units and award leases of coal lands and coal deposits owned by the United States, outside of Alaska:

(b) Issue permits to prospect unclaimed and undeveloped areas of coal lands and coal deposits; and

(c) Issue limited licenses or permits to prospect for, mine and take for use coal from public lands.

§ 193.2 *Area and limitation on holdings.* A single lease or permit may embrace not exceeding 2,560 acres except where the rule of approximation applies. A permit will comprise contiguous tracts, or tracts in reasonably compact form, if good reasons appear for not including a contiguous area. A lease will comprise contiguous tracts, except in cases where it appears that noncontiguous tracts can be practically worked as a single mine or unit. No person, association or corporation, except as in the act provided, may hold at any one time more than 5,120 acres in any one State, whether

directly through the ownership of coal leases and permits or interests in such leases and permits, or indirectly as a member of an association or associations, or as a stockholder of a corporation, or corporations, holding such leases and permits or interests therein or both.

§ 193.3 *Qualifications of applicants.* (a) Leases and prospecting permits may be issued to citizens of the United States, associations of citizens, and corporations organized under the laws of the United States or any State or Territory thereof, including a company or corporation operating a common-carrier railroad, and to municipalities. Limited licenses or permits for the mining of coal may be issued to citizens, associations of citizens and municipalities.

(b) Every applicant for coal permit or lease, other than a company or corporation operating a common-carrier railroad, must show that, with the area applied for, his or its interest or interests in such permits, leases and applications therefor, directly or indirectly, do not exceed in the aggregate 5,120 acres in any one State.

(c) Every company or corporation operating a common-carrier railroad must make a statement that it needs the coal for which it seeks a permit or lease for its own use for railroad purposes; that it operates main or branch lines in the State in which the lands involved are located; that the aggregate acreage in the permits, leases and applications therefor in which it is interested directly or indirectly does not exceed 10,240 acres; and that it does not hold more than one permit or lease for each 200 miles of its railroad lines served or to be served from such coal deposits exclusive of spurs or switches and exclusive of branch lines built to connect the leased coal with the railroad, and also exclusive of parts of the railroad operated mainly by power produced otherwise than by steam.

(d) Every applicant for lease or permit must also furnish a showing as to the need for additional coal production which cannot otherwise be reasonably met, or, if such a showing of need cannot be made, a statement of the reasons why a lease or permit is desired.

§ 193.4 *Equitable rights; holders of leases or permits affecting certain lands or coal deposits in Oklahoma.* (a) Equitable rights of persons who, prior to February 25, 1920, occupied and improved or claimed coal lands in good faith may be recognized in awarding leases of such lands. In the case of an award of a lease to such a person the rents and royalties will be established at rates not less than the minimum provided for leases under the act.

(b) A holder of a lease or permit, including a lease under temporary extensions, outstanding on May 24, 1949, covering certain coal lands or coal deposits in Oklahoma which the Choctaw and Chickasaw Nations agreed to convey to the United States in a contract ratified by the act of June 24, 1948 (62 Stat. 596), who has maintained or acted diligently to maintain the lease or permit in good standing, may obtain a lease for the same lands or deposits without competitive bidding, provided that he files an application for a lease under this part prior to the expiration date of the current lease.

§ 193.5 *Permits, leases and licenses for lands disposed of with reservation of coal.* Where lands included in a permit, lease or license have been or may be disposed of with reservation of the coal deposits, a permittee, lessee or licensee must make full compliance with the law under which such reservation was made. See the acts of March 3, 1909 (35 Stat. 844; 30 U. S. C. 81); June 22, 1910 (36 Stat. 383; 30 U. S. C. 83–85); December 29, 1916 (39 Stat. 862; 43 U. S. C. 291–301); June 17, 1949 (63 Stat. 200); June 21, 1949 (63 Stat. 214; 30 U. S. C. Sup. III, 54), and other laws authorizing such reservations.

§ 193.6 *Requirements when lands are within a withdrawal.* Where any part of the lands embraced in an application for coal lease, permit or license is within a withdrawal which does not preclude disposition of the coal deposits, the head of the Government agency having control will be called upon for a report as to whether there is any objection to the granting of a coal lease, permit or license. In cases where such agency recommends that a special stipulation be furnished by the applicant to protect the interest of the United States, an appropriate stipulation will be included in the lease, permit or license.

COAL LEASES

§ 193.7 *Leasing units.* (a) No coal land or deposits may be leased until after division into suitable leasing units or tracts. Such leasing units may be established either upon application or when it is deemed advisable that additional coal units be established.

(b) All material factors, such as character and depth of the coal deposits, topography of the land, situation with respect to adjacent private holdings of coal lands, the proximity of rail or water transportation and outlet for other lands in the immediate vicinity, as well as the investment reasonably required to provide the requisite development and operating facilities, will be given consideration in the establishment of leasing units.

(c) Leasing units may include, in whole or in part, unsurveyed land, but a survey of the land will be made and the leasing unit conformed to such survey prior to the execution of a lease thereof.

§ 193.8 *Form of lease.* Leases shall be issued on Form 4–696.

§ 193.9 *Minimum expenditure and lease bond.* (a) An actual bona fide expenditure for mine operation, development, or improvement purposes, on or for the benefit of the leased land, of the amount that may be determined will be a condition in each lease as the minimum basis on which it will be granted, with the requirement that not less than one-third of such expenditure shall be made during the first year, and a like amount each year for the two succeeding years, the investment during any one year over such proportionate amount for that year to be credited on the expenditure required for the ensuing year or years.

(b) Prior to the issuance of a lease, the lessee shall furnish a bond executed by the lessee with approved corporate surety on Form 4–1113, or the lessee's personal bond on Form 4–1114, in such sum as may be required but in no event less than $1,000, and conditioned upon compliance with all of the terms and provisions of the lease. Personal bonds must be accompanied by a deposit of securities such as specified in § 193.22. If the amount of the bond is fixed at $1,000, the lessee may, instead, furnish a bond on Form 4–1113 with two qualified individual sureties, as provided in § 191.14 of this chapter. The right is reserved at any time before or after issuance of the lease to require an increase of the amount of the bond, whether a corporate, personal or individual surety bond, in any case where the Director, Bureau of Land Management, deems it proper to do so.

§ 193.10 *Minimum production.* Leases shall be conditioned upon the payment of a royalty on a minimum annual production beginning with the fourth year of the lease, except when operation is interrupted by strikes, the elements, or casualties not attributable to the lessee, unless, on application and showing made, operations shall be suspended when market conditions are such that the lease cannot be operated except at a loss or for the other reasons specified in section 39 of the act.[1] Operations under the lease shall be continuous except in the circumstances described or unless the lessee shall pay a royalty, less rent, on the minimum production for one year in advance, in which case operations may be suspended for that year.

§ 193.11 *Application for lease.* (a) An application for a lease must be filed in duplicate in the proper land office or, for lands or deposits in States in which there is no land office, in the Bureau of Land Management, Washington 25, D. C. No specific form is required, but the application should cover the following points:

(1) The applicant's name and address.

(2) A statement as to citizenship: In case of an individual, whether native born or naturalized and, if naturalized, date of naturalization, court in which naturalized, and number of certificate, if known; if a woman, whether she is married or single; if married, the facts as to the citizenship of her husband, and the date of her marriage if both are not native born citizens. Associations are required to file a certified copy of their articles of association and the same showing as to the citizenship and holdings of their members as required of an individual and specified herein. A corporation is required to file a certified copy of its articles of incorporation, and it must furnish a statement showing the percentage of each class of its stock, and the percentage of all of its stock which is owned or controlled by or on behalf of persons whom the corporation knows to be or who the corporation has reason to believe are aliens, or who have addresses outside of the United States, indicating which classes of stock have voting rights. If more than 10 per cent of the voting stock, or of all of the stock, is owned or controlled by or on behalf of such persons, the corporation must give their names and addresses, the amount and class of stock held by each, and, to the extent known to the corporation or which can be reasonably ascertained by it, the facts as to the citizenship of each such person. If any appreciable percentage of the stock of the corporation is held by aliens of the excepted class, its application will be denied. If 20 per cent or more of the stock of any class is owned or controlled by or on behalf of any one stockholder, a separate showing of his citizenship and holdings must be furnished. A municipality must submit evidence of: (i) The law, charter and procedure taken by which it became and exists as a legal body corporate; (ii) that the taking of a permit or lease is authorized under such law or charter; and (iii) that the action proposed has been duly authorized by the governing body of such municipality.

(3) A statement of the interests, direct or indirect, in other coal leases, permits or applications therefor on public lands in the State in which the lease is desired, identifying same by land office and serial number, and that such interests, when added to the acreage covered by the application, do not exceed in the aggregate 5,120 acres in the State. A railroad company or corporation operating a common carrier must state that its interests, together with the acreage covered by the application, do not exceed in the aggregate 10,240 acres.

(4) Description of the lands for which a lease is desired by legal subdivisions or, if unsurveyed, by metes and bounds connected with a corner of the public surveys by course and distance and where possible, description of the lands by the approximate subdivisions of the future survey.

(5) The showing specified in § 193.3 (d).

(6) A statement of the general situation of the land with respect to other mines, its topography, outlet to market, and transportation facilities and the character and extent of the coal deposits so far as known.

(7) The contemplated investment for the development and equipment of a producing mine of a stated average daily output.

(b) The application must be signed by the applicant or his attorney-in-fact, and if executed by an attorney-in-fact must be accompanied by the power of attorney and the applicant's own statement as to citizenship and acreage holdings. Applications on behalf of a corporation must be accompanied by proof of the signing officer's authority to execute the instrument and must have the corporate seal affixed thereto.

§ 193.12 *Offer of lands or deposits for lease by competitive bidding.* If the lands or deposits are found to constitute an acceptable leasing unit and subject to coal lease, they will be offered for such lease on the terms and conditions to be specified in the notice of sale to the qualified person who offers the highest bonus by competitive bidding as provided in the notice of sale. If it be found that the area covered by an application does not constitute an acceptable leasing unit, the area may be adjusted, by appropriate additions and eliminations, to constitute an acceptable leasing unit which may be offered for lease.

§ 193.13 *Notice of lease offer.* Notice under the preceding section of the offer of the lands or deposits for lease will be given by publication once a week for four consecutive weeks, or for such other period as may be deemed advisable, in a newspaper of general circulation in the county in which the lands or deposits are situated. The notice will be published at the expense of the Government. A copy of the notice will be posted in the proper land office during the period of publication. Such notice will show the day, hour, and place of sale, whether the sale will be at public auction or by sealed bids, the method of submitting sealed bids, the rental and rate of royalty to be charged, the minimum investment and the minimum production requirement, and the description of the land. If the sale is by public auction, the offer will be made at the land office for the district in which the lands are situated, or at such other place as may be fixed in the notice. In such case the notice will also specify that sealed bids may be submitted which will be opened and read at the time and place specified for the auction. The right is reserved by the Director, Bureau of Land Management, in the public interest, to reject any and all bids, and should a bid be rejected, the deposit made by the bidder will be returned. All bidders at any public sale of leases are warned against committing any act of intimidation, combination or unfair management to hinder or prevent bidding thereon, in violation of 18 U. S. C. 1860.

§ 193.14 *Sale; bidding requirements; action by successful bidder.* Before bidding is commenced by those persons present, the manager or other officer conducting the sale will open and read to those persons the sealed bids received on or before the time set in the notice of sale. The successful bidder must on the day of sale deposit with the manager of the land office or other officer conducting the sale and each sealed bid must be accompanied by the following: Certified check, money order, or cash, for one-fifth of the amount bid and evidence of qualifications of the bidder as prescribed in § 193.11 (a) (2) and (3) and (b), if a current showing in that regard has not been filed in connection with the application for lease of the lands or deposits. If the land is surveyed, the successful bidder will be allowed 30 days from receipt of lease forms within which (a) to file in the proper land office a lease, duly executed by him in quintuplicate, on form 4–696, and the bond required by § 193.9, and (b) to pay the remainder of the bonus bid by him and the annual rental for the first year of the lease. The lease will be dated as of the first day of the month following its issuance unless the successful bidder requests that it be dated as of the first day of the month of issuance. If the land is unsurveyed, the successful bidder will not be required to comply with requirements of paragraphs (a) and (b) in this section until the land has been surveyed and the plat of such survey accepted and officially filed. Such survey will be at the expense of the Government. If the bidder fails to comply after due service of notice, that portion of his deposit representing the minimum required to be deposited with the bid shall be held as liquidated damages and disposed of as other receipts under the Mineral Leasing Act.

§ 193.15 *Modifications and leasing of additional land or coal deposits.* (a) Under section 3 of the act (30 U. S. C. 203), a lessee may obtain a modification of his lease to include coal lands on coal deposits contiguous to those embraced in his lease if the Director determines that it will be to the advantage of the lessee and the United States, but in no event shall the area embraced in such modified lease exceed in the aggregate 2560 acres, except where the rule of approximation applies. The lessee shall file his application for modification in duplicate in the proper land office describing the additional lands desired, the needs and reasons for and the advantage to the lessee of such modification. No filing fee is required. Upon determination by the Director that the modification is justified and the interest of the United States is protected, the lease will be modified without competitive bidding to include such part of the land or deposits as he shall prescribe. If, however, it is determined that the additional lands or deposits can be developed as part of an independent operation or that there is a competitive interest in them, they may be offered as provided in § 193.13.

(b) Under section 4 of the act (30 U. S. C. 204), upon satisfactory showing by the lessee that all of the workable deposits of coal within a tract covered by the lease will be exhausted, worked out or removed within three years thereafter, an additional tract of land or coal deposit may be leased. Application shall be filed in duplicate in the proper land office and shall contain a description of the lands requested, estimated recoverable reserves, future plan of operation for such reserve and for any lands requested and the proposed method of entry into such lands. If the lands or coal deposits or any part thereof are found to constitute an acceptable leasing unit they will be offered for leasing as provided in § 193.13. If the applicant be the successful bidder and the additional lands can be practicably operated with the applicant's leasehold as a single mine or unit, the additional lands may be included in a modified lease which must not exceed 2560 acres; otherwise, a separate lease may be issued.

[1] See showing required under § 191.26 of this chapter.

[1] 18 U. S. C. 1001 makes it a crime for any person knowingly and willfully to submit or cause to be submitted to any agency of the United States any false or fraudulent statement as to any matter within its jurisdiction.

(c) Before a lease is modified under paragraph (a) or (b) of this section, the lessee shall file the consent of surety and the acceptance by the lessee of the applicable regulations.

§ 193.16 *Readjustment of terms and conditions at end of twenty-year periods.* The terms and conditions of a lease are subject to readjustment at the end of each twenty-year period succeeding the date of the lease unless otherwise provided by law at the time of the expiration of such periods. The lessee will be notified of the proposed readjustment of terms or notified that no readjustment is to be made. Unless the lessee files objection to the proposed terms or a relinquishment of the lease within 30 days after receipt of the notice, he will be deemed to have agreed to such terms. Notice of the proposed readjustments will be given, whenever feasible, before the expiration of each such twenty-year period.

§ 193.17 *Relinquishment of lease.* Upon payment of all rentals, royalties and other debts due and payable to the lessor and upon payment of all wages or money due and payable to the workmen employed by the lessee, and upon a satisfactory showing that the public interest will not be impaired, the lessee may surrender the entire lease. The lessee may also surrender any legal subdivision of the area included within the lease, but in no case shall such lease be so terminated in whole or in part until and unless the lessee shall have made provision for the preservation of any mines or productive works or permanent improvements on the lands covered thereby in accordance with the regulations and terms of the lease. A surrender must be by a relinquishment filed in triplicate in the proper land office. A relinquishment upon its acceptance shall take effect as of the date it is filed.

§ 193.18 *Cancellation of lease.* If the lessee shall fail to comply with the provisions of the act, or of the general regulations promulgated and in force at the date of the lease, or at the effective date of any readjustment of the terms and conditions thereof under § 193.16, or make default in the performance or observance of any of the terms, covenants, and stipulations of the lease and such failure or default shall continue for 30 days after service of written notice thereof by the lessor, than the lessor may institute appropriate proceedings in a court of competent jurisdiction for the forfeiture and cancellation of the lease as provided in section 31 of the act. A waiver of any particular cause of forfeiture shall not prevent the cancellation and forfeiture of the lease for any other cause of forfeiture, or for the same cause occurring at any other time.

COAL PROSPECTING PERMITS

§ 193.19 *Character of lands.* Permits shall be issued on Form 4–694 for a period of two years to qualified applicants to prospect unclaimed, undeveloped lands where prospecting or exploratory work is necessary to determine the existence or workability of the coal deposits.

§ 193.20 *Rights conferred.* A permit will entitle the permittee to the exclusive right to prospect for coal on the land described therein. In the exercise of this right, the permittee shall be authorized to remove from the premises only such coal as may be necessary in order to determine the workability and commercial value of the coal deposits in the land.

§ 193.21 *Application for permit.* An application for a permit must be filed in duplicate in the manner and in the office specified in § 193.11. Each application must be accompanied by a filing fee of $10.00 which will be retained as a service charge even though the application should be rejected or withdrawn either in whole or in part. No specific form of application is required, but in addition to the requirements of § 193.11 (a) (1), (2), (3), (4) and (5) and (b), it should cover the following points:

(a) Condition of coal occurrences, so far as determined; description of workings, and outcrops of coal beds, if any, and reason why the land is believed to offer a favorable field for prospecting for coal.

(b) Detailed plan and method of conducting prospecting or exploratory operations on the land, estimated cost of carrying out such proposed prospecting operations, and the diligence with which such operations will be prosecuted.

(c) Brief statement of applicant's experience in coal-mining operations, if any, together with one or more references as to his reputation and business standing.

§ 193.22 *Permit bond.* The applicant must furnish a corporate surety bond on Form 4–1130 or his personal bond on Form 4–1131 conditioned upon compliance with all the terms of the prospecting permit. The bond shall be in the sum of $500 except where the lands applied for have been entered or patented with the coal reserved to the United States pursuant to the act of June 22, 1910 (36 Stat. 583, 30 U. S. C. 83–85), in which event, a bond on the same form in the sum of $1,000 will be required. Personal bonds must be accompanied by a deposit of negotiable Federal securities equal at their par value to the amount of the bond. The bond may be filed with the application which will expedite action thereon, or within 30 days after receipt of notice by the applicant that the permit will be granted when the bond is filed. The permittee may, in place of a bond of the two types specified above, submit one on Form 4–1130 with two qualified sureties as provided in § 191.14 of this chapter.

§ 193.23 *Extension of permits.* (a) Coal permits may be extended for a period of two years if the permittee has been unable with the exercise of reasonable diligence to determine the existence or workability of the coal deposits, or for others reasons which may warrant an extension. An application for extension must be filed in duplicate only within the period beginning 90 days prior to the date to which the permit is limited. The application must be filed in the office specified in § 193.11 and must show what efforts, if any, the permittee has made to comply with the terms of his permit and the reasons for failure fully to comply therewith, such showing to be corroborated, if possible, by a statement of at least one disinterested person having actual knowledge of the facts. The application must also show how much additional time is considered necessary to complete prospecting work. Extension will be limited to such period, not exceeding the two years authorized, as may be determined to be allowable under the circumstances in each particular case. Upon failure of permittee to file such an application within the specified period, the permit will expire without notice to the permittee and upon notation of such expiration in the land office tract books, the lands will become subject to new applications for coal permits or leases.

(b) Until the cancellation or termination of a coal permit is noted on the records of the land office or on the records of the Bureau of Land Management if the lands involved are in a State in which there is no land office, no other person will be permitted to gain any right to the same class of deposits by the filing of an application therefor, and such application shall be rejected.

§ 193.24 *Reward for discovery.* A permittee who shows, that prior to the expiration of his permit, the land included in the permit contains coal in commercial quantities, is entitled to a preference right lease for all or part of the land, the area to be taken in a reasonably compact form. An application for preference right lease must be filed in duplicate in the office specified in § 193.11 promptly after commencement of commercial operations, but in no event later than the expiration of the period to which the permit is limited. The application must describe the land desired, set forth fully and in detail the extent and mode of occurrence of the coal deposits as disclosed by the prospecting work performed under the permit, show that coal was discovered in commercial quantities before the date of the expiration of the permit and show any change in the information contained in the application for permit. The application must be accompanied by the rental for the first year of the lease, which shall be 25 cents for each acre or fraction thereof. The lease, if issued, will be in accordance with the provisions of §§ 193.8 to 193.10, inclusive, and will be dated the first day of the month following the date the application is filed unless the applicant requests that it be dated the first day of the month within which it is filed. If the permit expires and the application for lease is finally rejected royalty for coal mined to the date of receipt of notice by the permittee of such rejection will be charged in accordance with the royalty terms of the permit and such mining of the coal will not constitute a trespass.

TRANSFERS OF PERMITS AND LEASES; OVERRIDING ROYALTIES

§ 193.25 *Transfers, including subleases.* (a) Permits and leases may be transferred, in whole or in part to any person, association, or corporation qualified to hold such leases and permits. The approval of a transfer of only part of the lands described in a permit or lease will create a new permit or lease which will be given a current serial number, but a discovery on lands under one permit will not inure to the benefit of the other. The approval of such a transfer will not extend the life of the permit or the readjustment periods of the lease. Transfers of permits and leases, whether by direct assignments, working agreements, transfer of royalty interests, subleases or otherwise, must be filed for approval at the office specified in § 193.11 within 90 days from final execution and must contain evidence of the qualifications of the assignee or transferee, consisting of the same showing required of a lease or permit applicant by § 193.11 (a) (2) and (3) and (b). If the instrument fails to describe the true consideration, a statement must be submitted showing the consideration in full. The statement will be treated as confidential and not for public inspection. If a bond is necessary it must be furnished. Transfers of record title interest must be filed in triplicate. A single executed copy of all other instruments of transfer is sufficient. A transfer will take effect the first day of the month following its final approval by the Director, Bureau of Land Management, or if the transferee requests, the first day of the month of the approval.

(b) The transferor of a permit or lease, including a sublease, and his surety will continue to be responsible for the performance of any obligation under the permit or lease until the effective date of the approval of the transfer. If the transfer is not approved, their obligation to the United States shall continue as though no such transfer had been filed for approval. After the effective date of approval the transferee, including sublessee, and his surety will be responsible for the performance of all permit or lease obligations notwithstanding any terms in the transfer to the contrary. The account under the permit or lease must be in good standing before approval of a transfer will be given.

§ 193.26 *Limitation on overriding royalties.* An overriding royalty interest shall not be created by assignment or otherwise exceeding 50 percent of the rate of royalty first payable to the United States under the lease or an overriding royalty interest which when added to any other overriding royalty interest exceeds that percentage, excepting that where an interest in the leasehold, permit, or operating agreement is assigned, the assignor may retain an overriding royalty interest in excess of the above limitation if he shows to the satisfaction of the Director, Bureau of Land Management, that he has made substantial investments for improvements on the land covered by the assignment.

LIMITED COAL LICENSES

§ 193.27 *Purpose of license.* Coal licenses may be issued for a period of two years to individuals and associations of individuals to mine and take coal for their own local domestic need for fuel, but in no case for barter or sale, without the payment of any rent or royalty. Licenses may be issued to municipalities to mine and dispose of coal without profit to their residents for household use. Under such a license a municipality may not mine coal either for its own use or for nonhousehold use such as for factories, stores, other business establishments and heating and lighting plants.

§ 193.28 *Area and duration.* (a) A license to an individual or association, in the absence of unusual conditions or necessity, will be limited as to area to a legal subdivision of 40 acres or less and may be revoked at any time. Such license will expire by limitation at the end of 2 years from date of issuance, unless timely renewed on application filed and proper showing made prior to expiration of the 2-year period.

(b) Licenses to municipalities are limited as to area by the act, as follows: Not to exceed 320 acres for a municipality of less than 100,000 population, not to exceed 1,280 acres for a municipality of not less than 100,000, and not more than 150,000 population, and not to exceed 2,560 acres for a municipality of 150,000 population or more. Licenses to municipalities will expire by limitation at the end of 4 years from date of issuance, unless renewed; but every such licensee must make to the Director, Bureau of Land Management, an annual report of all operations conducted under such license.

§ 93.29 *Application for license.* Application for a limited license to mine coal for domestic needs must be filed, in quadruplicate, on Form 4–694a, or its substantial equivalent in the office specified in § 193.11 and be accompanied by a $10 filing fee. A municipality must file with the application a showing of (a) the law or charter and procedure taken by which it became and exists a legal body corporate, (b) that the taking of a license is authorized under such law or charter and (c) that the proposed action has been duly authorized by the governing body of the municipality.

§ 193.30 *Licenses to relief agencies.* (a) The Director, Bureau of Land Management, may grant authority to a recognized established relief agency of any State, upon its request, to take government-owned coal deposits within the State in localities where needed to supply families on the rolls of such agency who require coal for fuel for their homes and who are unable to pay for same.

(b) Tracts shall be selected at points convenient to supply the families in the locality thereof, and each family shall be restricted to the amount of coal actually needed for its use, which in no case shall exceed 20 tons annually.

(c) Coal may be taken from such tracts only by those given written authority by the relief agency, and all mining shall be done pursuant to permission and all Federal and State laws and regulations for the safety of miners, prevention of fires and of waste, etc., shall be observed. The relief agency shall see that the premises are left in a safe condition for future mining operations.

(d) The local relief agency may take coal from available land prior to issuance of license but not earlier than 5 days after it has filed in the land office of the district wherein the land is situated an application for license. No filing fee will be required. In the absence of objections and if the application is otherwise regular, a license will be granted. Pending action on the application for license, the relief agency may continue to take the coal.

NOTE: The reporting requirement of this regulation has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

[SEAL] OSCAR L. CHAPMAN,
Secretary of the Interior.

Appendix—Public Land Orders

[Public Land Order 708]

ALASKA

PARTIAL REVOCATION OF EXECUTIVE ORDER 6050 OF FEBRUARY 27, 1933, RESERVING LANDS FOR USE AS A SITE FOR AN ARMY RADIO RECEIVING STATION

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 11, 36; 16 U. S. C. 473), and pursuant to Executive Order No. 9337 of April 24, 1943, it is ordered as follows:

Executive Order No. 6050 of February 27, 1933, reserving two parcels of land for use as a site for the Army radio receiving station at Juneau, Alaska, is hereby revoked so far as it affects the parcel of land described in such order as follows:

PARCEL TWO

Beginning at corner No. 4 of lot B, Mile 7 Group Homesites, in the northerly right-of-way line of Glacier Highway (66 feet wide), said corner being marked by a hemlock post 5 feet long and 4½ inches in diameter, squared to 3½ inches, set 2 feet in ground and marked "HS–4A" on east face and "B" on west face, and referenced by a hemlock tree 7 inches in diameter marked "WHS 4", and a hemlock tree 16 inches in diameter marked "WHS 4", bearing N. 35° W., 20 links, and N. 63½° E., 30 links, respectively, from initial corner post;

Thence from said initial point by metes and bounds,

N. 89° 50' W., 250 feet, along said northerly right-of-way line of Glacier Highway, to a point;

Due north, 150.0 feet, through lot "B" to a point;

S. 89° 50', E., 250.0 feet, through lot "B" to a point in the dividing line between lots "A" and "B" of said Mile 7 Group Homesites;

Due south, 150.0 feet, along said dividing line to place of beginning.

The parcel as described contains an area of 0.86 acres, more or less.

The land above described shall revert to its previous status as a part of the Tongass National Forest but shall not be subject to disposition of any kind prior to 10:00 a. m., on the 35th day after the date of this order. At that time it shall become subject to such disposition as

may by law be made of national forest lands.

OSCAR L. CHAPMAN,
Secretary of the Interior.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

[Rev. S. O. 856, Amdt. 3]

PART 95—CAR SERVICE

INCLUSION OF SATURDAYS AND SUNDAYS COMPUTING DEMURRAGE ON ALL FREIGHT CARS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

Upon further consideration of Service Order No. 856 (15 F. R. 5049, 5050, 4916), and good cause appearing therefor: It is ordered, that:

Section 95.856 *Saturdays and Sundays to be included in computing demurrage on all freight cars* of Service Order 856 be and it is hereby suspended until 7:00 a. m., May 1, 1951, only to the extent it applies to the free time on cars loaded with import, coastwise or intercoastal traffic at ports, and to the free time on unloading box cars containing export, coastwise or intercoastal traffic at ports.

It is further ordered, that this amendment shall become effective at 7:00 a. m., April 1, 1951, and a copy be served upon the State railroad regulatory bodies of each State, and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383 as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

[S. O. 865, Amdt. 7]

PART 95—CAR SERVICE

DEMURRAGE ON FREIGHT CARS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

Upon further consideration of Service Order No. 865 (15 F. R. 6197, 6256, 6330, 6452, 7800, 16 F. R. 320, 819, 1131, 2040), and good cause appearing therefor: It is ordered, that:

Section 95.865 *Demurrage on freight cars*, of Service Order No. 865 be, and it is hereby further amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* This section shall expire at 11:59 p. m., July 15, 1951, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p. m., March 31, 1951.

It is further ordered, that a copy of this amendment and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383 as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

[Rev. S. O. 866]

PART 95—CAR SERVICE

RAILROAD OPERATING REGULATIONS FOR FREIGHT CAR MOVEMENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

It appearing, that an acute shortage of freight cars exists in all sections of the country; that such shortage is further aggravated by the needs of National Defense; that cars loaded and empty are unduly delayed in terminals and in placement at, or removal from industries; that present rules, regulations, and practices with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of freight cars are insufficient and to promote the most efficient utilization of cars; in the opinion of the Commission an emergency requiring immediate action exists in all sections of the country to promote car service in the interest of the public and the commerce of the people: It is ordered, that:

§ 95.866 *Railroad operating regulations for freight car movement.* (a) Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce and obey the following rules, regulations and practices with respect to its car service:

(1) *Placing loaded cars at final destination for unloading.* Loaded cars, which after placement will be governed by demurrage tariff rules applicable to detention of cars awaiting unloading, shall be placed on carrier's or consignee's unloading tracks within twenty-four hours after the first 7:00 a. m. following arrival at the destination station or serving yard.

(2) *Placing loaded cars held for terminal services.* Loaded cars held at billed destination for accessorial terminal services described in the applicable demurrage tariff, such as holding for orders or inspection, shall be placed on carrier's or consignee's unloading tracks within twenty-four hours after disposition orders to place cars for unloading are actually received by the railroad. Carrier records shall show date and time such orders to place cars for unloading are received.

(3) *Constructive placement of loaded cars.* When delivery of a car for unloading cannot be made because of any condition attributable to the consignee, written notice that car is held and that the railroad is unable to deliver shall be sent or given consignees within twenty-four hours after arrival of car at hold point.

(4) *Removal of cars after unloading.* Where switching service is performed more than four days a week, remove empty cars from point of unloading or interchange tracks of industrial plants within twenty-four hours after the first 7:00 a. m. following unloading or release by consignee, unless such cars are ordered or appropriated by the shipper for reloading within such twenty-four hour period.

(5) *Transporting loaded cars.* Where switching service is performed more than four days a week, all outbound loaded freight cars shall be pulled from loading place or interchange tracks of industrial plants within twenty-four hours after the first 7:00 a. m. following acceptance by the carrier of the shipping order. Such cars shall be forwarded in line haul service within twenty-four hours after the first 7:00 a. m. following their receipt in outbound makeup or classification yards.

(6) *Restriction on holding cars for prospective loading.* Except cars assembled for peak or seasonal movements and special types of cars for specific types of loading, hold no more cars for prospective loading at any time, for any industry which it serves, than those needed to protect current outbound loading.

(7) *Repair tracks.* Repair any cars taken out of service for repairs, or carded for repairs, at the earliest time consistent with efficient railroad operating practices.

(8) *Special car orders.* Observe, obey and comply with special car orders now outstanding, issued by W. C. Kendall, former Chairman, or Arthur H. Gass, Chairman, Car Service Division, Association of American Railroads, and said Chairman, Arthur H. Gass, is hereby appointed Agent of the Commission with directions and authority to issue such orders as he may find necessary with respect to the location, relocation and distribution of freight cars as between sections of the country, or carriers by railroads or on such carriers, throughout the United States.

(9) *Yard checks, supervision, and records.* Make the necessary yard and track checks and maintain sufficient supervision and records to enable carriers to comply with subparagraphs (1) to (8) of this paragraph.

(b) Application: (1) The provisions of this section shall apply to intrastate and interstate commerce.

(2) The provisions of this section shall not apply to freight cars containing property held at or short of ports awaiting transfer of the property from the cars to vessels for movement beyond by water, nor to empty cars held at ports for transfer of property from vessels to such cars.

(3) When computing the periods of time provided in this section, exclude Sundays and such holidays as are listed in Item No. 7, Agent L. C. Schuldt's Demurrage Tariff I. C. C. 4257 or reissues thereof, only when they occur within the said periods of time, but not after.

(c) Regulations suspended; announcement required: The operation of all rules and regulations, insofar as they conflict with the provisions of this section, is hereby suspended and each railroad subject to this section, or its agent, shall publish, file, and post a supplement to each of its tariffs affected hereby, in substantial accordance with the provisions of Rule 9 (k) of the Commission's Tariff Circular No. 20 (§ 141.9 (k) of this chapter), announcing such suspension.

(d) Effective date: This section shall become effective at 7:00 a. m., April 1, 1951.

(e) Expiration date: This section shall expire at 7:00 a. m., December 31, 1951, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, that this order vacates and supersedes Service Order No. 866, and that a copy of this order and direction shall be served upon the railroad regulatory body of each State and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement, and all other carriers by railroad; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

[F. R. Doc. 51-3947; Filed, Apr. 2, 1951; 8:49 a. m.]

[Rev. S. O. 867, Amdt. 2]

PART 95—CAR SERVICE

RESTRICTIONS ON TRAP AND FERRY CARS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

Upon further consideration of Revised Service Order No. 867 (15 F. R. 6199, 6313, 6573), and good cause appearing therefor: It is ordered, that:

Section 95.867 *Restrictions on trap and ferry cars*, of Service Order No. 867 be, and it is hereby further amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* This section shall expire at 11:59 p. m., June 30, 1951, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p. m., March 31, 1951.

It is further ordered, that a copy of this amendment and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

[S. O. 868, Amdt. 1]

PART 95—CAR SERVICE

SUSPENSION OF FOLLOW-LOT RULE AND TWO-FOR-ONE RULE

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

Upon further consideration of Service Order No. 868 (15 F. R. 6314, 6452, 6671), and good cause appearing therefor: It is ordered, that:

Section 95.868 *Suspension of follow-lot rule and two-for-one rule*, of Service Order No. 868 be, and it is hereby amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This section shall expire at 11:59 p. m., June 30, 1951, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p. m., March 31, 1951.

It is further ordered, that a copy of this amendment and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

PART 95—CAR SERVICE

FREE TIME ON FREIGHT CARS LOADED AT PORTS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of March, A. D. 1951.

Upon further consideration of Service Order No. 870 (15 F. R. 8994, 9065), and good cause appearing therefor: It is ordered, that:

Section 95.870 *Free time on freight cars loaded at ports*, of Service Order No. 870 be, and it is hereby further amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* This section shall expire at 11:59 p. m., July 15, 1951, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p. m., March 31, 1951.

It is further ordered, that a copy of this amendment and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

NOTICES

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[Order No. 2591, Amdt. 3]

PETROLEUM ADMINISTRATION FOR DEFENSE

ORGANIZATION AND FUNCTIONS

MARCH 27, 1951.

1. Section 1 of Order No. 2591 as amended is hereby further amended to read as follows:

SECTION 1. *Purpose.* The purpose of this order is to establish the Petroleum Administration for Defense and the organization necessary to carry out the functions with respect to petroleum and gas delegated to or vested in the Secretary of the Interior by Executive Order No. 10161 as amended, by such delegations or redelegations as may have been made or may hereafter be made by the Defense Production Administrator pursuant to Executive Order No. 10200, and by such delegations or redelegations as may have been made or may hereafter be made by any other officer of the Government having functions under the Defense Production Act of 1950.

2. The first sentence of section 3 of Order No. 2591 as amended is hereby further amended to read as follows:

SEC. 3. *Delegation of authority.* Except as provided in section 4 of this order, all of the functions and powers delegated to the Secretary of the Interior by Executive Order No. 10161 as amended, by delegations or redelegations heretofore or hereafter made by the Defense Production Administrator pursuant to Executive Order No. 10200, and by such delegations or redelegations as may have been made or may hereafter be made by any other officer of the Government having functions under the Defense Production Act of 1950 are hereby delegated to and may be performed by the Deputy Administrator insofar as these functions and powers relate to petroleum and gas. • • •

3. Paragraph (n) of section 3 of Order No. 2591 as amended is hereby further amended to read as follows:

SEC. 3. *Delegation of authority.* • • •

(n) The power to redelegate to any official of the Petroleum Administration for Defense or any other appropriate Government official any of the powers or authority delegated to him by this order.

• • • • •

[SEAL] OSCAR L. CHAPMAN, *Secretary of the Interior.*

FEDERAL POWER COMMISSION

[Docket Nos. G-1065, G-1517]

EAST TENNESSEE NATURAL GAS CO.

ORDER CONSOLIDATING PROCEEDINGS AND FIXING DATE OF HEARING

MARCH 27, 1951.

On August 17, 1950, East Tennessee Natural Gas Company (Petitioner or Applicant), a Tennessee corporation with offices in the Hamilton National Bank Building, Chattanooga, Tennessee, filed in Docket No. G-1065 a petition further to amend the Commission's order dated May 3, 1949, issuing a certificate of public convenience and necessity (amended by the Commission's order dated November 15, 1949) authorizing the construction and operation of the approximately 172-mile Greenbrier-Oak Ridge 22-inch diameter natural gas pipeline for the transportation and sale of not to exceed 60,000 Mcf of natural gas per day to the Atomic Energy Commission at Oak Ridge, Tennessee, and for use, in conjunction with the natural gas pipeline facilities authorized by the certificates issued to East Tennessee Natural Gas Company in Docket Nos. G-830 and G-1272, for transporting the natural gas necessary to render the service authorized in the said Docket Nos. G-830 and G-1272.

By the petition for further amendment of the G-1065 certificate order, Petitioner seeks authorization to transport and sell to the Atomic Energy Commission at Oak Ridge, in addition to the 60,000 Mcf per day previously authorized, additional volumes of natural gas not to exceed 16,900 Mcf per day for a period extending to June 30, 1952, and subsequent to that date, additional volumes of natural gas, on an interruptible basis, in such volumes as the Atomic Energy Commission may require and Petitioner is willing and able to deliver.

Copies of the petition filed on August 17, 1950, were served on September 5, 1950, on all parties of record in the proceeding in Docket No. G-1065, affording all such parties an opportunity for filing

answers to the petition. Answers were filed by Tennessee Gas Transmission Company, Watauga Valley Gas Company, Kingsport (Tennessee) Chamber of Commerce, Railway Labor Executives Association, National Coal Association and United Mine Workers of America.

On October 20, 1950, East Tennessee Natural Gas Company filed in Docket No. G-1517 an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the construction and operation of certain natural gas transmission pipeline facilities, subject to the jurisdiction of the Commission, for the delivery and sale of natural gas to the Cities of Cooksville, Gallatin and Harriman, Tennessee, for resale and service in those Cities.

Due notice has been given of the filing of the aforesaid petition and application, including publication in the FEDERAL REGISTER.

The Commission finds: Good cause exists and it is appropriate and necessary for carrying out the provisions of the Natural Gas Act, as amended, to consolidate the above-entitled proceedings for purposes of hearing and to hold public hearings as hereinafter provided and ordered.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7, 15 and 16 of the Natural Gas Act, as amended, and the Commission's rules of practice and procedure (18 CFR Part 1):

(i) Petition of East Tennessee Natural Gas Company filed on August 17, 1950, in Docket No. G-1065 and application filed by that Company on October 20, 1950, in Docket No. G-1517, be and the same are hereby consolidated for the purposes of hearing.

(ii) A public hearing be held commencing on April 9, 1951, at 10:00 o'clock a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by the aforesaid petition and application of East Tennessee Natural Gas Company in Docket Nos. G-1065 and G-1517.

(B) Interested state commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Date of issuance: March 28, 1951.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 51-3932; Filed, Apr. 2, 1951; 8:46 a. m.]

[Docket Nos. G-1246, G-1477]

TEXAS ILLINOIS NATURAL GAS PIPELINE CO.

ORDER REOPENING PROCEEDINGS FOR LIMITED PURPOSES AND FIXING DATE OF HEARING

MARCH 27, 1951.

On June 13, 1950, the Commission entered in Docket No. G-1246 its Opinion No. 195 and order, and on December 1, 1950, in Docket No. G-1477 entered its findings and order (amended by an order entered February 27, 1951), issuing to Texas Illinois Natural Gas Pipeline Company (Applicant) certificates of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the construction and operation of certain natural gas pipeline facilities, for the transportation and sale of natural gas in interstate commerce, all as therein more fully described, subject to the conditions contained in the said orders.

The following interveners sought from Applicant the volumes of natural gas specified below to meet their gas requirements in the communities named:

	Mcf
Allied Gas Co. (Paxton, Rantoul, Gibson City, and Ludlow, Ill.)	588
Illinois Power Co. (Mount Vernon and Centralia, Ill.)	3,514
Monarch Gas Co. (St. Elmo and Brownstown, Ill.)	500
Southeastern Illinois Gas Co. (Vandalia, Ill.)	1,800
Union Gas & Electric Co. (Bloomington and Normal, Ill.)	2,524
Total	8,926

In its opinion in Docket No. G-1246 the Commission found that the natural gas service to these communities would be in the public interest and that the volumes specified for each intervener were reasonably required to provide adequate service in the communities named. It found, however, that the record did not show with sufficient definiteness what facilities and what expenditures will be required to provide necessary pipeline connections between distribution facilities and the facilities of Applicant. And accordingly, the Commission in the opinion and order provided, as a condition to granting authority to Applicant to render the specified service, that each intervener, within six months from the date of the issuance of the opinion and order, make application for a certificate of public convenience and necessity "to the extent that authorization is required" for the construction and operation of such connecting pipeline facilities as are required to transport the volumes of natural gas to be made available, or "establish that such certificate is not required".

In the findings and order entered December 1, 1950, in Docket No. G-1477, the Commission amended the authorization granted in Docket No. G-1246 so as to authorize Applicant to deliver, under the same condition, additional volumes of natural gas to some of the same five companies, as follows:

	Docket No. G-1246	Docket No. G-1477
	Mcf	Mcf
Allied Gas Co.	588	711
Illinois Power Co.	3,514	3,514
Monarch Gas Co.	500	668
Southeastern Illinois Gas Co.	1,800	1,800
Union Gas & Electric Co.	2,524	3,442
Total	8,926	10,075

On December 13, 1950, an extension of time to and including April 16, 1951, in which to comply with the above referred to condition of the order of June 13, 1950, was granted pursuant to the request of Southeastern Illinois Gas Company, Union Gas and Electric Company, Illinois Power Company and Allied Gas Company.

In purported compliance with such condition, Illinois Power Company filed on December 8, 1950, a copy of the order of the Illinois Commerce Commission in Case No. 38901, entered November 28, 1950, granting to that Company a certificate of convenience and necessity for (1) construction, operation and maintenance of approximately 13½ miles of 6-inch diameter natural gas transmission pipeline referred to in said order as "gas distribution extensions" and (2) the transaction of a gas public utility business along the routes of such so-called "gas distribution extensions".

In purported compliance with the above referred to condition, the Monarch Gas Company filed on December 11, 1950, a copy of the order of the Illinois Commerce Commission in Case No. 38938, entered December 6, 1950, granting to that Company a certificate of convenience and necessity for (1) the construction, operation and maintenance of approximately 2.7 miles of 6⅝-inch, and 3.4 miles of 3½-inch, diameter natural gas transmission pipeline referred to in the said order as "gas distribution extension" and (2) the transaction of gas public utility business along the route of the so-called "gas distribution extensions".

In purported compliance with the same condition, Union Gas and Electric Company on February 1, 1951, filed with the Commission a copy of an order of the Illinois Commerce Commission in Case No. 38964 entered January 3, 1951, issuing to that Company a certificate of convenience and necessity for (1) the construction, operation and maintenance of approximately 177,700 feet (33.7 miles) of either 6-inch or 8-inch diameter natural gas transmission pipeline and approximately 90,000 feet (17 miles) of 2-inch diameter pipeline, referred to in the said order as a "gas distribution system extension" and (2) the transaction of a gas public utility business along the route of the so-called "gas distribution extension".

In purported compliance with the same condition, Allied Gas Company on February 8, 1951, filed a copy of an order of the Illinois Commerce Commission in Case No. 38967, entered January 3, 1951, granting to that Company a certificate of convenience and necessity for (1) the construction, operation and maintenance of approximately 7½ miles of 4-inch diameter natural gas transmission pipeline referred to in the said order as a "gas distribution extension" and (2) the transaction of a gas public utility business in the area traversed by the said so-called "gas distribution extension".

The Commission by letters to Illinois Power Company under date of January 23, 1951, to Monarch Gas Company under date of January 24, 1951, to Union Gas and Electric Company under date of March 8, 1951, and Allied Gas Company under date of March 8, 1951, acknowl-

edged receipt of the above-mentioned submittals by these Companies and advised each that, in the absence of an appropriate record before it, this Commission could not accept the proffer of the orders of the Illinois Commerce Commission as establishing under the Natural Gas Act that the respective Companies do not require certificates of public convenience and necessity from this Commission. In these letters the Companies were requested to file applications for certificates of public convenience and necessity pursuant to section 7 of that Act authorizing the construction and operation of the facilities by which they propose to connect their systems with that of Texas Illinois Natural Gas Pipeline Company. The Companies were advised that in making such applications they might request, in the alternative, that this Commission find that the facilities in question are not subject to its jurisdiction.

No response has been received to the Commission's letters to Illinois Power Company and Monarch Gas Company. Counsel for Allied Gas Company and Union Gas and Electric Company on March 12, 1951, advised Commission staff representatives that these Companies do not propose to file applications for certificates for public convenience and necessity unless and until the Commission should find that such applications are required; counsel for such Companies have requested early action concerning these matters. Southeastern Illinois Gas Company to date has made no submittal in response to the above-referred to requirements of the Commission's orders entered June 13 and December 1, 1950.

Upon consideration of the foregoing and the matters of record herein, the Commission finds: Good cause exists and it is appropriate and necessary for carrying out the provisions of the Natural Gas Act, as amended, to reopen the above-entitled proceedings, consolidate the same for purposes of hearing, and to hold public hearings as hereinafter provided and ordered.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 1, 2, 7, 15, and 16 of the Natural Gas Act, as amended, and the Commission's rules of practice and procedure (18 CFR Part 1), the above-entitled proceedings in Docket Nos. G-1246 and G-1477 be and the same are hereby reopened and consolidated, and a public hearing be held herein commencing on April 18, 1951, at 10:00 a. m. (e. s. t.) in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the following matters and issues:

(i) Whether paragraph (A) (ii) of the Commission's order dated June 13, 1950, in Docket No. G-1246 or paragraph (C) of the Commission's order dated December 1, 1950, in Docket No. G-1477 should, in whole or in part, be amended so far as the said orders authorize and direct Texas Illinois Natural Gas Pipeline Company to transport and sell natural gas to Allied Gas Company (Paxton Division), Illinois Power Company, Monarch Gas Company, Southeastern Illinois Gas Company, and Union Gas and Electric Company (hereinafter referred to as the "Five Utility Customer Companies").

(ii) Description, location, and cost of facilities to be utilized and necessary for each of the Five Utility Customer Companies to provide necessary natural gas transmission pipeline connections between their existing gas facilities and the interstate natural gas transmission pipeline facilities of Texas Illinois Natural Gas Pipeline Company, for the receipt, transmission and distribution of natural gas to be purchased by each of the said Companies from Texas Illinois, including description, location, and estimated cost of new facilities, if any, to be constructed for such receipt, transportation, and distribution of such natural gas.

(iii) Whether any of the Five Utility Customer Companies in question will be engaged in the transportation of natural gas in interstate commerce, or the sale in interstate commerce of natural gas for resale for ultimate public consumption for domestic, commercial, industrial, or any other use, and therefore be a "natural-gas company" within the meaning of the Natural Gas Act, as amended, by reason of the receipt of natural gas from Texas Illinois Natural Gas Pipeline Company under the Commission's aforesaid orders of June 13 and December 1, 1950; and, if so, what facilities, if any, are proposed by each of the said Five Utility Customer Companies to be utilized in such transportation or sale of natural gas subject to the jurisdiction of this Commission under that act.

(iv) Any other matters pertinent to Commission determination of the issues presented in these reopened proceedings.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Date of issuance: March 28, 1951.

By the Commission.

[Docket No. G-1587]

DELAWARE POWER & LIGHT CO.

ORDER FIXING DATE OF HEARING

MARCH 27, 1951.

On January 12, 1951, Delaware Power & Light Company (Applicant), a Delaware corporation having its principal place of business at Wilmington, Delaware, filed an application for an order pursuant to section 7 (b) of the Natural Gas Act authorizing and approving the abandonment of certain natural-gas transportation facilities and the service rendered thereby, all as more fully described in such application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on January 26, 1951 (16 F. R. 739).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, as amended, a hearing be held on April 20, 1951, at 9:30 a. m., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: March 28, 1951.

By the Commission.

PHILADELPHIA ELECTRIC CO.

ORDER FIXING DATE OF HEARING

MARCH 27, 1951.

On January 12, 1951, Philadelphia Electric Company (Applicant), a Pennsylvania corporation having its principal place of business at Philadelphia, Pennsylvania, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the construction and operation of certain natural-gas transmission pipeline facilities, all as more fully described in the application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application including publication in the FEDERAL REGISTER on January 26, 1951 (16 F. R. 739).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, as amended, a hearing be held on April 20, 1951, at 9:45 a. m., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

[Docket No. G-1641]

MISSISSIPPI RIVER FUEL CORP.

ORDER SUSPENDING PROPOSED RATE SCHEDULE AND PROVIDING FOR HEARING

MARCH 27, 1951.

On February 28, 1951, Mississippi River Fuel Corporation (Mississippi River) filed with this Commission proposed First Revised Sheet No. 4 and First Revised Sheet No. 6 to its FPC Gas Tariff, Original Volume No. 1, pursuant to Part 154 of the Commission's general rules and regulations, setting forth therein its proposed Rate Schedules F-1 and I-1, respectively, to take effect as of April 1, 1951.

The proposed rate schedule F-1 set out in proposed First Revised Sheet No. 4 would increase the presently effective rates and charges to Mississippi River's eight interstate wholesale customers served under said schedule.

The proposed rate schedule I-1 set out in proposed First Revised Sheet No. 6 would increase the presently effective rates and charges for natural gas sold by Mississippi River for resale for industrial use only.

Copies of the proposed rate schedules, together with copies of material submitted by Mississippi River to this Commission pursuant to § 154.63 of the Commission's general rules and regulations (18 CFR 154.63), were transmitted by Mississippi River to the eight interstate wholesale customers served by it.

It appears from the proposed filings that, on the basis of sales for the twelve months following the proposed effective date April 1, 1951, the proposed changes in rates will result in increased charges by Mississippi River to its eight interstate wholesale customers of $3,093,757, averaging 6.4 cents per Mcf, as shown in the following table:

Name of purchaser	Mcf	Revenues		Increase
		Present	Proposed	
Arkansas-Louisiana Gas Co	1,875,700	$362,791	$461,831	$99,040
Fort Smith Gas Corp	76,500	20,393	30,610	10,217

Total	47,985,600	11,394,326	14,488,083	3,093,757

In support of the proposed increase, Mississippi River states that the present interstate rates were established on the basis of 1943 operations. It alleges that its costs have increased materially since that time, and that the proposed increased charges are necessary to compensate for the increasing costs.

To justify the proposed increases in rates and charges, Mississippi River has submitted a statement for the year ended December 31, 1950, which purports to show the cost of service for the entire system and also the cost allocated to the service covered by the proposed rates, including 6 percent return. Upon the basis of such cost study, Mississippi River estimates that a revenue deficiency of $3,829,513 for the 12 months ended December 31, 1950, is attributable to the interstate business, although such cost study shows an over-all excess in revenue over costs including a 6 percent rate of return of $1,996,106 for the same period.

Requests for suspension and hearing on the proposal of Mississippi River have been filed with the Commission by the State regulatory commissions of the States of Arkansas, Missouri and Illinois, by the City of St. Louis, Missouri, and by Laclede Gas Company, Union Electric Power Company, MidSouth Gas Company, and Public Utilities Company of Crossett, Arkansas.

The rates, charges, and classifications set forth in First Revised Sheet No. 4 and First Revised Sheet No. 6 to Mississippi River's FPC Gas Tariff, Original Volume No. 1, comprising the proposed new Rate

Schedules F–1 and I–1, respectively, may be unjust, unreasonable, unduly discriminatory and preferential, and may place an undue burden upon ultimate consumers of natural gas.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing, pursuant to section 4 of the Natural Gas Act, concerning the lawfulness of the rates, charges, and classifications set forth in Mississippi River Fuel Corporation's First Revised Sheet No. 4 and First Revised Sheet No. 6 to its FPC Gas Tariff, Original Volume No. 1, and that said Revised Sheet No. 4 be suspended pending hearing and decision thereon.

The Commission orders:

(A) A public hearing be held commencing on May 14, 1951, at 10:00 a. m. e. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the lawfulness of rates, charges, and classifications, subject to the jurisdiction of the Commission, as set forth in First Revised Sheet No. 4 and First Revised Sheet No. 6 to FPC Gas Tariff, Original Volume No. 1 filed by Mississippi River Fuel Corporation.

(B) Pending such hearing and decision thereon, said First Revised Sheet No. 4 filed by Mississippi River Fuel Corporation on February 28, 1951, be and it hereby is suspended and the use thereof is deferred until September 1, 1951, and until such further time thereafter as such First Revised Sheet No. 4 may be made effective in the manner prescribed by the Natural Gas Act.

Date of issuance: March 28, 1951.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Project No. 2069]

ARIZONA POWER CO.

NOTICE OF APPLICATION FOR LICENSE (MAJOR)

MARCH 28, 1951.

Public notice is hereby given that The Arizona Power Company of Prescott, Arizona, has filed application under the Federal Power Act (16 U. S. C. 791a–825r) for license for constructed major Project No. 2069, located on Fossil Creek, a tributary of Verde River in Yavapai and Gila Counties, Arizona, affecting lands of the United States within the Coconino and Tonto National Forests. The project consists of: (1) The Irving Development comprising a dam, a conduit, a surge tank, a powerhouse containing a 2,100-horsepower turbine connected to a 1,600-kilowatt generator, a tailrace, a step-up substation, and a 69-kilovolt transmission line; and (2) the Childs Development comprising a dam, a forebay, a conduit, a regulating reservoir, a pressure tunnel, a concrete pipe, a concrete surge tank, a penstock, a powerhouse containing three 3,000-horsepower waterwheels each connected to an 1,800-kilowatt generator, a tailrace a step-up substation, and two 69-kilovolt transmission lines.

Any protest against the approval of this application or request for hearing thereon, with the reason for such protest or request and the name and address of the party or parties so protesting or requesting should be submitted on or before May 3, 1951, to the Federal Power Commission.

[SEAL] LEON M. FAQUAY, *Secretary.*

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 25952]

GRAIN FROM TWIN CITIES AND KANSAS CITY, MO., AREA TO ILLINOIS, IOWA, MISSOURI AND ADJACENT POINTS

APPLICATION FOR RELIEF

MARCH 29, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. E. Kipp, Agent, for Chicago, Burlington & Quincy Railroad Company and other carriers named in the application.

Commodities involved: Grain, grain products, and seeds, carloads.

From: Minneapolis, Minnesota Transfer, St. Paul and South St. Paul, Minn., Kansas City, Mo.-Kans., St. Joseph, Mo., and Leavenworth, Kans.

To: Points in Illinois, Iowa, Missouri and certain adjacent points.

Grounds for relief: Competition with rail carriers, circuitous routes and to maintain grouping.

Schedules filed containing proposed rates: L. E. Kipp's tariff I. C. C. No. A-3866, Supp. 3.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 25953]

PULPBOARD FROM GEORGETOWN, S. C., TO MASSACHUSETTS

APPLICATION FOR RELIEF

MARCH 29, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1201.

Commodities involved: Pulpboard and fibreboard, carloads.

From: Georgetown, S. C.

To: Natick, New Bedford, Newton Upper Falls and North Somerville, Mass.

Grounds for relief: Competition with water-rail carriers.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1201, Supp. 30.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2575]

NIAGARA MOHAWK POWER CORP.

ORDER GRANTING APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 27th day of March A. D. 1951.

Niagara Mohawk Power Corporation ("Niagara Mohawk"), a subsidiary of The United Corporation, a registered holding company, having filed an application pursuant to the provisions of sections 9 (a) and 10 of the Public Utility Holding Company Act of 1935 with respect to the acquisition by it of all of the electric plant in service and franchises of Oswegatchie Light and Power Company ("Oswegatchie"), a non-affiliate, for the cash sum of $515,000, plus adjustments from August 31, 1950, to the closing date; and the Public Service Commission of the State of New York having, by order dated February 27, 1951, approved the transfer of such property by Oswegatchie to Niagara Mohawk; and

Said application having been filed on February 21, 1951, and notice of said filing having been duly given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, and the Commission not having received a request for hearing with respect to said application within the period specified in said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission finding with respect to said application that the requirements of the applicable provisions of the act and rules thereunder are satisfied, and deeming it appropriate in the public interest and in the interest of investors and consumers that the said application be granted:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, that the said application be, and hereby is granted forthwith subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[File No. 812-721]

BLUE RIDGE CORP.

NOTICE OF APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 23th day of March A. D. 1951.

Notice is hereby given that Blue Ridge Corporation ("Applicant"), a registered investment company, has filed an application pursuant to sections 6 (c) and 23 (c) (3) of the Investment Company Act of 1940 for an order of the Commission permitting Applicant to purchase for an aggregate price of $268,000 from Atlas Corporation ("Atlas") 67,000 shares of common stock of Applicant and a warrant issued and dated May 18, 1937, entitling Atlas Corporation to purchase from Applicant 228,301 shares of common stock of Applicant at $20 per share.[1]

Applicant is a closed-end, diversified, management investment company. It was organized under the laws of the State of Delaware and has its principal place of business at 60 Broadway, in the City of New York.

Applicant has outstanding 7,489,483 shares of common stock. Carl J. Austrian and Robert G. Butcher, as Trustees of Central States Electric Corporation ("Central States"), own 4,900,788 shares or approximately 65.43 percent of Applicant's outstanding stock. Central States is now in process of reorganization under Chapter X of the Bankruptcy Act in the United States District Court for the Eastern District of Virginia. The said Trustees have proposed a plan of reorganization of Central States which contemplates the transfer to a new Delaware corporation of the cash and securities of Central States held by the Trustees, followed by the merger of Applicant into such new corporation. The new corporation is to be an open-end investment company, the shares of which will be redeemable at the holder's option, subject to certain restrictions on redemption during an initial period after the effective date of consummation of the plan. The plan has been approved and confirmed by the reorganization court. The order of approval of the plan was affirmed by the United States Court of Appeals for the Fourth Circuit and a petition for a writ of certiorari was denied by the United States Supreme Court. An appeal from the order of confirmation was recently dismissed by the aforesaid Court of Appeals. It is expected that the plan of reorganization will be consummated in the reasonably near future.

Atlas, a registered investment company incorporated in Delaware and having an office at 33 Pine Street in the City of New York, is the owner of 67,000 shares of Applicant and a warrant issued by Applicant on May 18, 1937, entitling Atlas to purchase 228,301 shares of Applicant at $20 per share. The warrant is unlimited as to time and is divisible and transferable. Provision is also made in the warrant for the continuation of the contract rights of the holder upon any merger of Applicant with any other corporation. Atlas, as a minority public holder of Applicant, would be entitled under the plan to receive stock of the new corporation on the basis of relative net asset values as of the effective date of the merger and pursuant to the terms of the said warrant to receive a new warrant from the new corporation to purchase a proportionate amount of its stock at a comparable price.

Applicant asserts that although its sole outstanding warrant is now valueless and will continue to be so under any reasonably foreseeable future conditions, it would be desirable to acquire the warrant on reasonable terms for the following reasons: The speculative nature of the warrant; the necessity for preserving the warrant on the proposed merger; the mechanical difficulties involved in setting forth the terms of the warrant in connection with any registration and sale of stock of the new corporation under applicable Federal and State statutes; the divisibility of the warrant, and the possibility of its being subdivided and publicly distributed.

Applicant accordingly entered into a memorandum of agreement on March 14, 1951, with Atlas for the acquisition of its holdings of 67,000 shares of Applicant and of the warrant for an aggregate price of $268,000, subject to an exemptive order of the Commission under section 23 (c) (3) of the act. Under said agreement, David G. Baird would be paid by Applicant a commission of $3,350, which is equal to one-half the normal commission payable on a sale of such shares on the New York Curb Exchange, on which Exchange Applicant's shares are listed.

The application states that if the warrant held by Atlas, which is the only outstanding warrant, be considered worthless, the purchase price to be paid by Applicant for the 67,000 shares is $4 per share. The closing and only market price for shares of Applicant sold on March 14, 1951, was $4 per share. The market range from January 2, 1951, through March 14, 1951, has been $3\frac{3}{4}$ low and $4\frac{1}{4}$ high. At the close of business on March 14, 1951, the asset value per share was $4.08.

Applicant further asserts that at least 90 per cent of its net income for the last fiscal year, not including profits or losses realized from the sale of securities or other properties, was distributed to its stockholders during that year; neither Atlas nor Baird is to its knowledge an affiliated person of Applicant; the purchase was made at a price not above the market value or the asset value, whichever is lower, at the time of purchase; disclosure was made of the approximate

[1] Rule N-23C-1, which was promulgated pursuant to section 23 (c) (3) of the act, permits a registered closed-end investment company to purchase its outstanding securities, provided certain conditions with respect to the securities are met. Among other things, the rule, in effect, prohibits the purchase of a stock unless the issuer has within the preceding six months informed stockholders of its intention to purchase stock of such class by letter or report to all stockholders of such class. Subdivision (c) of the rule provides that a company may file an application with the Commission for an order under section 23 (c) (3) of the act permitting the purchase of any security of which it is the issuer which does not meet the conditions of the rule and which is not to be made pursuant to section 23 (c) (1) or (2) of the act. Since Applicant has not given its stockholders the required six months' notice of its intention to purchase its stock, the instant application was filed for an exemptive order from this requirement of Rule N-23C-1. The application indicates that Applicant has complied with the other requirements of the rule.

or estimated asset coverage of the stock at the time of purchase; no brokerage commission was paid by Applicant to any affiliated person; the purchase was not made in a manner or on a basis which discriminates unfairly against any holder of the class of securities purchased.

All interested persons are referred to said application which is on file in the offices of the Commission for a detailed statement of the proposed transactions and the matters of fact and law asserted.

Notice is further given that an order granting the application, in whole or in part and upon such conditions as the Commission may deem necessary or appropriate, may be issued by the Commission on or at any time after April 16, 1951, unless prior thereto a hearing upon the application is ordered by this Commission as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may submit to the Commission in writing, not later than April 12, 1951, at 5:30 p. m., his views or any additional facts bearing upon the application or the desirability of a hearing thereon, or a request to the Commission that a hearing be held thereon. Any such communication or request should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington, D. C.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-2579]

NORTHERN STATES POWER CO.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 27th day of March A. D. 1951.

Northern States Power Company ("Northern States"), a Minnesota corporation, having filed with this Commission a declaration and amendment thereto under sections 6 (a) and 12 (e) of the Public Utility Holding Company Act of 1935 and Rules U-62 and U-65 thereunder;

All interested persons are referred to said declaration on file in the office of the Commission for a statement of the transactions therein proposed, which are summarized as follows:

Northern States proposes that its Articles of Incorporation be amended:

(a) To change the shares of Preferred Stock from shares without par value to shares having a par value of $100 each; to decrease the authorized number of shares of Preferred Stock from 3,175,000 to 1,000,000; to fix the liquidation price of the Preferred Stock in involuntary liquidation at $100 per share, plus an amount equal to dividends accumulated and unpaid thereon; and to eliminate paragraphs 3 and 16 of Article V; and

(b) To change the shares of Common Stock from shares without par value to shares having a par value of $5 each; and to increase the authorized number of shares of Common Stock from 12,500,000 to 15,000,000;

The declaration stating that the excess of the present stated values of the stocks of the company over the proposed par value will be transferred to Premium on Capital Stocks, increasing that account from $292,025 to $10,276,747;

The declaration further stating that the adoption of the proposed amendments requires the affirmative vote of the holders of a majority of the voting power of all shareholders, preferred and common, assuming the absence of the negative vote of the holders of one-fourth of such voting power, otherwise the affirmative vote of two-thirds of the voting power; that to obtain the required vote, Northern States proposes to submit the proposals to its shareholders at the annual meeting scheduled to be held on May 2, 1951, and to solicit proxies by means of a letter and statement in the form filed as part of the declaration; that expenses in connection with the proposed amendments are estimated by Northern States as $14,000; and that if it later appears necessary to employ an expert in the solicitation of proxies together with special employees, Northern States will file an amendment to its declaration;

Notice of such filing having duly been given in the form and manner prescribed by Rule U-23 under the act and the Commission not having received a request for hearing with respect thereto within the period specified in said notice, or otherwise, and not having ordered a hearing thereon;

The Commission finding, with respect to said declaration, as amended, that the requirements of the applicable provisions of the act and the rules thereunder are satisfied, that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration, as amended, be permitted to become effective, and further deeming it appropriate to grant the request of declarant that the order herein become effective forthwith:

It is ordered, Pursuant to the applicable provisions of the act and the rules thereunder, and subject to the terms and conditions of Rule U-24, that said declaration, as amended, be, and hereby is, permitted to become effective forthwith.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 51-3939; Filed, Apr. 2, 1951; 8:47 a. m.]

DENVER BROKERAGE CO. ET AL.

MEMORANDUM OPINION AND ORDER REVOKING REGISTRATIONS

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 27th day of March A. D. 1951.

In the matter of Denver Brokerage Company, 1721 Stout Street, Denver, Colorado; Malcolm L. Eno, 1510 S. Cascade Avenue, Colorado Springs, Colorado; Stanley H. Ingalls, Apartment 306, Haines Studio, Rapid City, South Dakota; Henry M. Marks, National State Bank Building, Boulder, Colorado; Ross-Wood Company, 90 State Street, Albany, New York; M. C. Rutherford & Company, 926 Exchange Street, Rochester, New York; Arthur Stewart, 504 Symes Bldg., Denver, Colorado; J. E. St. Clair Company, 70 Pine Street, New York, New York.

These are proceedings pursuant to section 15 (b) of the Securities Exchange Act of 1934 ("the act") to determine whether the registrants named above, each of whom is registered as broker and dealer or as a dealer only, willfully violated section 17 (a) of the act and Rule X-17A-5 thereunder and, if so, whether it is in the public interest to revoke their registrations.[1]

The proceedings were instituted by separate notices and orders for hearing issued on November 15, 27 and 28, 1950 and amended on January 15, 1951, as to the hearing date which was postponed in all cases until February 15, 1951. On November 16 and 28, 1950, copies of the notices and orders were sent by registered mail to the addresses last furnished us by the registrants; and on January 16 1951, we forwarded by registered mail copies of the amended orders. These registered notices were returned to us by the Post Office Department with notations indicating that the registrants could not be found at the addresses given. None of the registrants appeared in person or through a representative on February 15, 1951, the date set for the hearings.[2]

On November 28, 1942, we promulgated Rule X-17A-5 under section 17 (a) of the act, which provides among other things, that every registered broker or dealer must file with this Commission a report of financial condition during each calendar year commencing with the year 1943. Promulgation of the rule was announced by publication in the FEDERAL REGISTER, by release to the press, and by distribution to persons on our mailing list.

The registrations of the registrants became effective prior to 1943, and have not been withdrawn, cancelled, revoked or suspended. Our records show that none of the registrants filed the required reports during any year from 1943 through 1949.

Upon review of the records in these proceedings we have concluded that each of the registrants violated section 17 (a) of the act and Rule X-17A-5 thereunder as a result of his failure to file such reports. We conclude also that such violations were willful within the meaning of section 15 (b).[3]

We conclude, on the basis of the foregoing, that it is necessary in the public interest to revoke the registration of each of the registrants. However, in view of the fact that our records do not show whether any of them actually received personal notice of the scheduled hearings, and to avoid any possible prejudice to them, our order will provide that the revocation of registrations be without prejudice to a motion on the part of any registrant to reopen the proceedings and to seek, upon a proper showing, to set aside the order of revocation applicable to said registrant.[4]

Accordingly, it is ordered, That the registrations of Roy O. Adams and Emily P. Adams, doing business as Denver Brokerage Company, a partnership, Malcolm L. Eno, Stanley H. Ingalls, Henry M. Marks, Thomas E. Wood, doing business as Ross-Wood Company, Martin C. Rutherford, Jr., doing business as M. C. Rutherford & Company, Arthur Stewart and James Edward St. Clair, doing business as J. E. St. Clair Company, be, and they hereby are, revoked without prejudice to a motion by any of the said registrants to reopen the record in the proceeding and, upon a proper showing, to set aside the order of revocation applicable to said registrant.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 51-3938; Filed, Apr. 2, 1951; 8:47 a. m.]

---

[1] Section 15 (b) provides in part: "The Commission shall, after appropriate notice and opportunity for hearing, by order * * * revoke the registration of any broker or dealer if it finds that such * * * revocation is in the public interest and that (1) such broker or dealer * * * (D) has willfully violated any provision * * * of this title, or of any rule or regulation thereunder."

[2] Our orders and notices, as amended, substituting these proceedings provided that the same be published in the FEDERAL REGISTER not later than 15 days prior to February 15, 1951, the date of hearing. Pursuant to this provision the orders and notices were published in the FEDERAL REGISTER of November 22 and December 2, 1950. 15 F. R. 7997, 7998, 8553-56; and the amendments were published in the FEDERAL REGISTER of January 20, 1951, 16 F. R. 558-9.

[Return Order 906]

CARLO DEL FRATE AND SUSANNA SEGRE VASSALLO

Having considered the claim set forth below and having issued a determination allowing the claim, which is incorporated by reference herein and filed herewith,

It is ordered, That the claimed property, described below and in the determination, be returned, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Notice of Intention To Return Published, and Property

Carlo Del Frate and Susanna Segre Vassalo, Rome, Italy; Claim No. 45447, December 7, 1950 (15 F. R. 8707); $557.64 in the Treasury of the United States, one-half thereof to each claimant. All right, title and interest of Carlo Del Frate and Susanna Segre (born Del Frate) in and to the trust estate created under the Will of Sarah Ramsey Del Frate, deceased.

The following securities, presently in custody of the Safekeeping Department of the Federal Reserve Bank of New York, one-half thereof to each claimant: United States Treasury Bonds of 1951 53 due December 15, 1953, with interest at 2½% payable June 15 and December 15, Nos. 17389K and 17390L for $1,000 each. United States Treasury Bond of 1952 54 due March 15, 1954, with interest at 2½% payable March 15 and September 15, No. 5887H for $500. United States Treasury Bonds of 1967 72 due December 15, 1972, with interest at 2½% payable June 15 and December 15, Nos. 312333C and 312334D for $1,000 each. The Cleveland Electric Illuminating Company First Mortgage Bonds, 3% Series due July 1, 1970, interest payable January 1 and July 1, Nos. M-29396 and M-29397 for $1,000 each. Southern California Edison Company, Ltd., First and Refunding Mortgage Bond, Series of 3's, due September 1, 1965, interest payable March 1 and September 1, No. M-20496 for $1,000.

Appropriate documents and papers effectuating this order will issue.

Executed at Washington, D. C., on March 26, 1951.

For the Attorney General.

[Return Order 918]

EDOARDO SCARPELLINI ET AL.

Having considered the claim set forth below and having issued a determination allowing the claim, which is incorporated by reference herein and filed herewith,

It is ordered, That the claimed property, described below and in the determination, be returned, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Notice of Intention To Return Published, and Property

Edoardo Scarpellini, a/k/a Odoardo Scarpellini; Francesco Scarpellini, Both of Norcia, Italy; Maddalena Graziosi Cocchi, Augusta Graziosi Salvatori, Elena Graziosi Regoli, Luca Graziosi, all four of San Pellegrino Perugia, Italy; Claim No. 29616; February 16, 1951 (16 F. R. 1661); $456.96 in the Treasury of the United States, one-third to Edoardo Scarpellini, one-third to Francesco Scarpellini and one-twelfth each to Maddalena Graziosi Cocchi, Augusta Graziosi Salvatori, Elena Graziosi Regoli and Luca Graziosi. To Edoardo Scarpellini all right, title and interest of Edoardo Scarpellini; to Francesco Scarpellini all right, title and interest of Francesco Scarpellini; and to Maddalena Graziosi Cocchi, Augusta Graziosi Salvatori, Elena Graziosi Regoli and Luca Graziosi, in equal shares, all right, title and interest of Giulia Graziosi, in and to the Estate of Cesare Scalpellini, also known as Cesare Scarpellini, deceased, Ottavio Diotallevi, Box 176, Brewster, Ohio, Administrator.

Appropriate documents and papers effectuating this order will issue.

Executed at Washington, D. C., on March 26, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[Vesting Order 17541]

OHASHI HIDE

In re: Claims of Ohashi Hide. F-39-6849-C-1.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Ohashi Hide, whose last known address is 80-2 Arata-Cho Chome, Hyogo-Ku, Kobe, Japan is a resident of Japan and a national of a designated enemy country (Japan);

2. That the property described as follows: Any and all rights and claims to benefits under the United States Civil Service Retirement Act, as amended, approved May 22, 1920 (Pub. Law 215; 66 Cong. 2nd Sess., 41 Stat. 614) due or to become due to Ohashi Hide, named beneficiary of Carey J. Scott, deceased, (CSF-188 796-Z), including particularly but not limited to a lump sum settlement in the amount of $484.84 as of December 5, 1950, together with any and all rights to demand, enforce and collect said claim,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid national of a designated enemy country (Japan);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Japan).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

APR 9 '51

THE NATIONAL ARCHIVES

FEDERAL REGISTER

VOLUME 16 NUMBER 65

Washington, Wednesday, April 4, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10230

AMENDING THE SELECTIVE SERVICE REGULATIONS

By virtue of the authority vested in me by Title I of the Selective Service Act of 1948 (62 Stat. 604), as amended, I hereby prescribe the following amendments of the Selective Service Regulations prescribed by Executive Order No. 9988 of August 20, 1948, and constituting portions of Chapter XVI of Title 32 of the Code of Federal Regulations:

1. Section 1622.10 of Part 1622, Classification Rules and Principles, is amended to read as follows:

§ 1622.10 *Necessary employment defined.* (a) A registrant's employment in industry or other occupation, service in office, or activity in research, or medical, scientific, or other endeavors, shall be considered to be necessary to the maintenance of the national health, safety, or interest only when all of the following conditions exist:

(1) The registrant is, or but for a seasonal or temporary interruption would be, engaged in such activity,

(2) The registrant cannot be replaced because of a shortage of persons with his qualifications or skill in such activity.

(3) The removal of the registrant would cause a material loss of effectiveness in such activity.

(b) A registrant's activity in study may be considered to be necessary to the maintenance of the national health, safety, or interest when any of the following conditions exist:

(1) The registrant has been accepted for admission to or is a student in a professional school of medicine, dentistry, veterinary medicine, osteopathy, or optometry and the school in which he is enrolled has certified that he is satisfactorily pursuing a full-time course of instruction leading to his graduation.

(2) The registrant is a full-time graduate student seeking a graduate degree and the graduate school at which he is in attendance has certified that he currently is meeting degree requirements and is expected to attain his degree.

(3) The registrant has been accepted for admission to a graduate school for the class next commencing as a candidate for a graduate degree, or has been accepted for admission to a college, university, or similar institution of learning for the class next commencing for a full-time course of instruction or has entered upon and is satisfactorily pursuing such course, and, within such categories as the Director of Selective Service, with the approval of the President, may prescribe, either has maintained a required scholastic standing, or has attained on a qualification test a score, or both such standing and score, to be prescribed by the Director of Selective Service with the approval of the President.

(c) The Director of Selective Service is authorized to prescribe such qualification test or tests as he may deem necessary for carrying out the provisions of paragraph (b) of this section and to prescribe the procedures for the administration of such test or tests, for the certification of the results thereof, and for the certification of any other information required in carrying out the provisions of paragraph (b) of this section.

(d) The President may, from time to time (1) designate special categories of occupation, employment, or activity essential to the national health, safety, or interest; and (2) prescribe regulations governing the deferment of individual registrants engaged in such occupations, employments, or activities.

2. Paragraph (a) of § 1622.13 is amended to read as follows:

§ 1622.13 *Class II–C: Registrant deferred because of agricultural occupation.* (a) In Class II–C shall be placed any registrant who is employed in the production for market of a substantial quantity of those agricultural commodities which are necessary to the maintenance of the national health, safety, or interest, but only when all of the conditions described in paragraph (a) of § 1622.10 are found to exist.

3. The table of contents of Part 1622 is amended by inserting immediately after "1622.28 Identification of Class I–C registrant transferred to a reserve component of the armed forces." the

TITLE 8—ALIENS AND NATIONALITY

Chapter I—Immigration and Naturalization Service, Department of Justice

Subchapter B—Immigration Regulations

PART 174—CONTROL PURSUANT TO THE SUBVERSIVE ACTIVITIES CONTROL ACT OF 1950 OF PERSONS ENTERING THE UNITED STATES

DEFINITION OF CERTAIN TERMS

MARCH 29, 1951.

Paragraph (i) is hereby added to § 174.1, *Definitions*, of Chapter I, Title 8 of the Code of Federal Regulations, so that when taken with the introductory sentence to that section it will read as follows:

§ 174.1 *Definitions.* For the purposes of this part:

• • • • •

(i) The terms "members of" and "affiliated with" where used in the act of October 16, 1918, as amended, shall include only membership or affiliation which is or was voluntary, and shall not include membership or affiliation which is or was solely (1) when under sixteen years of age, (2) by operation of law, or (3) for purposes of obtaining employment, food rations, or other essentials of living, and where necessary for such purposes.

This order shall become effective on the date of its publication in the FEDERAL REGISTER. The regulation prescribed by the order is necessary to carry out the purpose of Public Law 14, 82d Congress, which became effective on March 25, 1951. Compliance with the provisions of section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003) relative to notice of proposed rule making and delayed effective date is impracticable and contrary to the public interest in this instance, since such compliance would unduly delay and impede the administration and enforcement of the immigration laws.

(Sec. 23, 39 Stat. 892, sec. 24, 43 Stat. 166, sec. 37, 54 Stat. 675; 8 U. S. C. 102, 222, 458. Interprets or applies secs. 1-3, 40 Stat. 1012, as amended, sec. 22, Pub. Law 831, 81st Cong., Pub. Law 14, 82d Cong.; 8 U. S. C. 137)

[SEAL] A. R. MACKEY,
Acting Commissioner of Immigration and Naturalization.

Approved: March 30, 1951.

PEYTON FORD,
Acting Attorney General.

GENERAL CEILING PRICE REGULATION

EXEMPTION OF EXTRA LONG STAPLE COTTON GROWN OUTSIDE THE UNITED STATES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 9 to the General Ceiling Price Regulation (16 F. R. 808) is hereby issued.

STATEMENT OF CONSIDERATIONS

The accompanying amendment to the General Ceiling Price Regulation extends the exemption in section 14 (s) (5) to extra long staple cotton grown outside the United States.

American-Egyptian cotton was exempted under section 14 (s) (5) of the General Ceiling Price Regulation. This exemption was based upon the judgment of the Department of Agriculture that the imposition of a ceiling price at the base period level prescribed in the General Ceiling Price Regulation would deter necessary increases in production of American-Egyptian cotton essential to the defense effort. On February 11, 1951, Amendment 1 to the General Ceil-

ing Price Regulation was issued. That amendment extended the exemption of the specified agricultural commodities in section 14 (s) (including American-Egyptian cotton) to " • • • any that may be imported • • •." It was intended by this amendment that Egyptian cotton grown outside the United States would thereby be exempt. Literally, however, section 14 (s), as amended, does not properly effectuate this objective, and, therefore, the accompanying amendment is designed to express the intention more accurately.

A high proportion of extra long staple cotton which is imported is used for purposes for which American upland cotton cannot be substituted satisfactorily. The price of this imported cotton in world markets has virtually doubled since September, 1950. The Commodity Credit Corporation must continue to purchase this type of cotton for the national stockpile at the request of the Munitions Board. Unless it is exempt under the General Ceiling Price Regulation, its supply to domestic purchasers and the Commodity Credit Corporation will be cut off.

Only one percent, approximately, of total consumption of cotton in the United States consists of imported extra long staple cotton. The import quota for this cotton for the year beginning February 1, 1951, which has been filled, was 45,656,420 pounds, according to the Bureau of Customs.

The Department of Agriculture, as well as representative groups in the industry and trade, have urged this exemption. In the judgment of the Director of Price Stabilization, this exemption will not impede accomplishment of the purposes of the Defense Production Act of 1950.

AMENDATORY PROVISIONS

The General Ceiling Price Regulation is hereby amended in the following respects:

1. Section 14 (s) (5) is amended to read as follows:

(5) American-Egyptian cotton and extra long staple cotton grown outside the United States.

2. Contracts for the sale of extra long staple cotton grown outside the United States executed on or after February 11, 1951 shall not be deemed in violation of the General Ceiling Price Regulation.

(Sec. 704, Pub. Law 774, 81st Cong. Interprets or applies Title III, Pub. Law 774, 81st Cong. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.)

Effective date. This amendment shall become effective April 9, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

APRIL 3, 1951.

[General Ceiling Price Regulation, Supplementary Regulation 15]

GCPR, SR 15—EXCEPTIONS FOR CERTAIN SERVICES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738) this Supplementary Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This Supplementary Regulation suspends the rates, fees, charges and compensation charged for, or excepts certain services from the provisions of the General Ceiling Price Regulation.

Information received by the Director of the Office of Price Stabilization shows that about 90 percent of the hospitals are of a governmental, charitable, or eleemosynary and non-profit character and that increases in the rates, fees, charges and compensation made by such institutions ordinarily do not benefit individuals, associations or corporations, and, generally may be necessary to maintain adequate care and treatment for the sick and injured.

In view of the unique and complex character of the services furnished by hospitals, the number of and differences in hospitals, and the administrative difficulties in instituting controls, it has been determined that such rates, fees, charges, and compensation shall be suspended from the provisions of the General Ceiling Price Regulation for a period of six (6) months from the effective date of this Supplementary Regulation, and thereafter and until this suspension shall be withdrawn, during which period or periods continuing studies of such services will be made: *Provided nevertheless*, That such hospitals shall maintain, during such period or periods, customary records justifying increases put into effect during the period or periods of this suspension.

With respect to the services rendered by educational institutions, as such, with the exception of institutions of higher learning, public school systems generally are able to provide adequate and necessary educational services, in consequence of which the rates, fees, charges, and compensation charged by private schools have less direct effect upon the cost of living.

In view of the non-profit character of the educational facilities of many such educational institutions, and the administrative difficulties involved in attempting to impose controls on the rates, fees, charges, and compensation of institutions providing a systematic and supervised course of instructions in a branch of useful knowledge, and the adequacy, generally, of public school facilities at levels below those of institutions of higher learning, the Director of Price Stabilization has determined to except the rates, fees, charges, and compensation of all such educational institutions from the provisions of the General Ceiling Price Regulation.

The Public Printer, under the printing law, is required to perform all Government printing and binding at the Government Printing Office. In certain instances, however, when he is unable or not equipped to provide the necessary work for the Government he may contract with commercial firms for that work, subject to the approval of the Joint Committee on Printing. During the past few months, as a result of the tremendous expansion in Governmental defense activities, the volume of printing and binding work has become so pressing and delivery schedules so tight, that the Public Printer has had to contract with commercial concerns for a large volume of orders in order to meet the printing and binding needs of Governmental agencies. To expedite the purchase of the printing and binding requirements of the Government, the Government Printing Office proposes to re-establish what is termed, "Standard Rate Contracts," for certain specific types or classes of printing and binding orders, a type of contract used extensively in the fulfillment of the printing and binding requirements of the Government during World War II. A list of standard rates for each labor and machine operation will be established for use in this type of contract pursuant to which the contractor will agree to perform orders of the specific type or class of work indicated at the predetermined rates established. The rates proposed for each item in each contract will be based on Government Printing Office prices and industry averages. The Government Printing Office has heretofore had contracts with approximately 5,000 printing and binding firms located throughout the nation, 3,000 of these firms now being on their active list. By reason of having contracts with these firms, cost and production data available from binding and printing trade associations, and the rates it has established and had in effect, it is in a position to establish standard rates that will be fair to the contractor, and protect the Government from excessive charges.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of the Office of Price Stabilization, the exceptions and suspensions contained in this Supplementary Regulation are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950.

So far as practicable the Director of Price Stabilization gave due consideration to the national defense effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950.

In formulating this Supplementary Regulation the Director has consulted with representatives of the industries, so far as practicable under the circumstances, and has given consideration to their recommendations.

REGULATORY PROVISIONS

Sec.
1. What this supplementary regulation does.
2. Exceptions and suspensions for certain services.
3. Applicability.

AUTHORITY: Sections 1 to 3 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

SECTION 1. *What this supplementary regulation does.* The purpose of this regulation is to suspend the rates, fees, charges and compensation charged for or to except certain services from the provisions of the General Ceiling Price Regulation.

SEC. 2. *Exceptions and suspensions for certain services.*—(a) *Suspension*—(1) *Hospitals.* The provisions of the General Ceiling Price Regulation shall not apply to the rates, fees, charges and compensation for services rendered or performed by hospitals for a period of six (6) months from the effective date of this supplementary regulation. *Provided, however,* That the period of suspension shall continue thereafter and until such time as the Director of Price Stabilization shall withdraw such suspension, *And provided further,* That the records of such hospitals shall, irrespective of the original or extended period of suspension, be maintained pursuant to section 16 of the General Ceiling Price Regulation during the period of such original or extended suspension.

(b) *Exceptions.* The provisions of the General Ceiling Price Regulation shall not apply to the rates, fees, charges and compensation for the following services:

(1) Services rendered in the educational facilities of schools and educational institutions which are providing a systematic and supervised course of instruction in a useful branch of knowledge, art, craft or skill.

(2) Printing and binding services rendered by printers and binders pursuant to "Standard Rate Contracts" entered into with the United States Government Printing Office.

SEC. 3. *Applicability.* The provisions of this supplementary regulation are applicable to the United States, its Territories and possessions, and the District of Columbia.

Effective date: This supplementary regulation shall become effective April 9, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

APRIL 3, 1951.

[F. R. Doc. 51-4115; Filed, Apr. 3, 1951; 11:40 a. m.]

[General Overriding Regulation 2]

GOR 2—SALES TO THE UNITED STATES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this General Overriding Regulation 2 is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes an alternative method by which a manufacturer, wholesaler, or retailer may determine his ceiling price for sales of a commodity or service to the United States or its agencies.

The need for this regulation arises out of the practice of many manufacturers, wholesalers, and, to a lesser extent, retailers, of entering into long term contracts with the Government approximately three months prior to the date when deliveries are to commence, and under which deliveries are scheduled over a period of twelve months.

Thus deliveries under contracts executed as far back as November 1949 were frequently scheduled through January 1951, late 1949 prices became ceiling prices under the General Ceiling Price Regulation, and new contracts calling for deliveries through June 1952 could not specify prices higher than the ceiling price under the General Ceiling Price Regulation.

This regulation is considered necessary in order to permit manufacturers, wholesalers, and retailers to sell to the United States Government and its agencies at prices in line with current ceiling prices for the same commodities when sold to other purchasers, but adjusted to reflect the seller's customary discounts, allowances, and differentials applicable to sales to the United States and its agencies.

Where the seller's ceiling price for sales to the United States and its agencies is not based on long-term contracts, his ceiling price for such sales, as determined under this regulation, should not differ from his ceiling price as determined under other applicable regulations.

The following is an example of the way in which this regulation is intended to operate: Suppose you manufacture a commodity which at some time between December 19, 1950 and January 25, 1951, you delivered to the United States or one of its agencies at a price of $3.60, pursuant to a contract entered into with the Government some months, or even a year previously. Your prices to wholesalers not being tied down by a long-term contract, had increased during 1950, with the result that your ceiling price for sales to wholesalers was $5.00. During the period January 1, 1950 through June 30, 1950, it was your custom, with respect to sales to the United States and its agencies, to give a 15 percent discount from the wholesale price. Upon these facts, your ceiling price as determined under this regulation, for the sale of this commodity to the United States or one of its agencies, would be $4.25 (instead of $3.60) which figure is obtained by deducting the customary discount (15%) from the ceiling price of the commodity when sold to a wholesaler ($5.00).

REGULATORY PROVISIONS

Sec.
1. Alternative ceiling prices for sales to the United States.
2. Definitions.

AUTHORITY: Sections 1 and 2 issued under sec. 704, Pub. Law 774 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong.; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

SECTION 1. *Alternative ceiling prices for sales to the United States.* Notwithstanding the provisions of any other price regulation, you may determine your ceiling price for the sale of a commodity or service to the United States or any agency thereof by using as a base the ceiling price of the commodity or service, when sold to a different class of purchaser, and by adjusting such price so as to reflect your customary discounts, allowances, and differentials between such class of purchaser and the United States and its agencies.

SEC. 2. *Definitions.* (a) "You" means a seller of any commodity or service and includes a manufacturer, wholesaler, and retailer.

(b) "Price regulation" means a ceiling price regulation heretofore or hereafter issued by the Office of Price Stabilization, and any amendment or supplement thereto or order issued thereunder.

(c) "Customary discounts, allowances, and differentials" means discounts, allowances, and differentials in effect between January 1, 1950, and June 30, 1950.

Effective date. This General Overriding Regulation 2 shall become effective April 9, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

APRIL 3, 1951.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-2 as Amended April 1, 1951]

M-2—RUBBER

This order, as amended, is found necessary and appropriate to promote the national defense. It is issued pursuant to both the Defense Production Act of 1950 and the Rubber Act of 1948. In the formulation of this order, as amended, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

This amendment to NPA Order M-2, as last amended March 1, 1951, amends the order in its entirety to read as follows:

EXPLANATORY PROVISIONS

Sec.
1. Purpose and effect.
2. Definitions.

RESTRICTIONS ON IMPORTATION AND CONSUMPTION

3. Private importation of natural rubber prohibited.
4. Limit on total new rubber consumption (except natural rubber latex).
5. Limit on natural rubber latex consumption.
6. Rubber to fill rated orders (other than "DO-97").
7. Orders rated "DO-97".

ALLOCATION OF SYNTHETIC RUBBER

8. Limitation on acquisition of synthetic rubber.
9. Allocation procedure.
10. Basis of allocation.

RUBBER PRODUCT REQUIREMENTS AND LIMITATIONS

11. Camelback production required.
12. Tires or tubes for new passenger automobiles.
13. Required production of certain tires or tubes.
14. Rubber product simplification and manufacturing specifications.

GENERAL PROVISIONS

15. Monthly reports of rubber consumption and stocks.
16. Reports by tire, tube, and camelback manufacturers.
17. Reports by latex importers.
18. Records and reports.
19. Inventory limitations.
20. Adjustments and exceptions.

Sec.
21. Communications.
22. Violations.

AUTHORITY: Sections 1 to 22 issued under sec. 10, 62 Stat. 105, sec. 704, Pub. Law 774, 81st Cong., Pub. Law 575, 81st Cong.; 50 U. S. C. App., Sup., 1929. Interpret or apply sec. 3, 62 Stat. 102, sec. 101, Pub. Law 774, 81st Cong.; 50 U. S. C. App., Sup., 1922. E. O. 9942, Apr. 1, 1948, 13 F. R. 1823, 3 CFR, 1948 Supp., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp., sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

EXPLANATORY PROVISIONS

SECTION 1. *Purpose and effect.* The purpose of this order is to conserve the supply of rubber for the needs of national defense and to provide for its equitable distribution. It places over-all limits on the consumption of new rubber (including both natural and synthetic). It prohibits private importation of natural rubber and provides for allocation of Government-produced synthetic rubber. Provisions are also made for increasing production of camelback, for directing production of rubber products into standard lines, and for restricting the use of natural rubber in certain listed products, for limiting inventories of tires and tubes and for restricting their delivery for installation on new passenger automobiles.

SEC. 2. *Definitions.* As used in this order:

(a) "Natural rubber" means all new RHC (rubber hydrocarbon) forms and types of tree, vine, or shrub rubber, both dry and latex, including the following grades of wild rubber (cut, uncut, washed or dried): upriver fine, acre fine, Bolivian fine, beni fine, island fine, and all other types of fine pará, which are of equivalent quality regardless of name or origin; but excluding all other South or Central American grades of wild rubber and all rubber from guayule, balata or gutta percha, as well as reclaimed natural rubber.

(b) "Dry natural rubber" means all natural rubber in solid form.

(c) "Natural rubber latex" means the dry latex solids contained in natural rubber liquid latex.

(d) "Synthetic rubber" means all new RHC products of chemical synthesis similar in general properties and applications to natural rubber and specifically capable of vulcanization, including synthetic rubber latex but excluding reclaimed synthetic rubber.

(e) "GR–S" means a general-purpose synthetic rubber of the butadiene styrene type produced in the United States generally suitable for use in the manufacture of transportation items such as tires or camelback, as well as any other type of synthetic rubber equally or better suited for use in the manufacture of transportation items such as tires or camelback, as determined from time to time by the NPA, but excluding reclaimed general-purpose synthetic rubber.

(f) "Butyl" or "GR–I" means a special-purpose synthetic rubber produced in the United States, suitable for use in the manufacture of transportation items such as pneumatic inner tubes, but excluding reclaimed special-purpose synthetic rubber.

(g) "New RHC" means total new rubber hydrocarbon. This is the total RHC content of dry natural rubber, natural rubber latex, synthetic rubber, uncured scrap rubber, and uncured in-process materials.

(h) "Consume" means, in the case of dry natural rubber, natural rubber latex or synthetic rubber, to compound, expend, formulate, or in any manner make any substantial change in the form, shape, or chemical composition.

(i) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government.

(j) "Reclaimed rubber" means any rubber derived from the processing or treatment of vulcanized rubber or cured scrap rubber.

(k) "NPA" means the National Production Authority in the Department of Commerce.

RESTRICTIONS ON IMPORTATION AND CONSUMPTION

SEC. 3. *Private importation of natural rubber prohibited.* (a) On and after December 29, 1950, no person other than the Administrator of General Services shall import into the United States (including its territories and possessions) any natural rubber as defined in section 2 (a) of this order, except as specifically authorized in writing by the Administrator of General Services; *Provided, however*, That this prohibition shall not apply to any private importation required by a contract which was made prior to December 29, 1950, and which is registered with the General Services Administration on or before January 5, 1951, except as any such private importation may be disapproved by said Administrator. For purposes of this section, the term "import" includes any physical movement of rubber into the United States, whether placed in general order or in a foreign-trade zone, or whether entered for consumption, bonded customs custody or otherwise, except where the rubber moves through the United States in transit, under bond, from a consignor in one foreign country to a consignee in another foreign country.

(b) The prohibition in paragraph (a) of this section does not apply to the types and grades of natural rubber excluded from the definition in section 2 (a) but all such excluded types and grades shall be inspected by, and a certificate of import secured from, the Administrator of General Services prior to their importation.

SEC. 4. *Limit on total new rubber consumption (except natural rubber latex).* (a) No person shall (except on prior written authorization of the NPA) consume in any calendar month a total amount of new rubber (including all synthetic both dry and latex and all natural except latex) in excess of 90 percent of his base monthly new rubber consumption as computed under paragraph (b) of this section.

(b) Each person's base monthly new rubber consumption shall be one-twelfth of his actual new rubber consumption (including all synthetic both dry and latex and all natural except latex) during the year ending June 30, 1950, as adjusted by the NPA.

(c) The limitation provided in this section shall not apply to any person during any calendar quarter in which his total consumption of new rubber (including all synthetic both dry and latex and all natural except latex) does not exceed 25,000 pounds.

SEC. 5. *Limit on natural rubber latex consumption.* (a) No person shall (except on prior written authorization of the NPA) consume during any calendar quarter, a total quantity of natural rubber latex in excess of one-fourth of his consumption during the year ending June 30, 1950, as adjusted by the NPA.

(b) Any person who imports any natural rubber latex into the United States after October 1, 1950, shall offer at least 10 percent of his imports to the General Services Administration at his regularly established price.

(c) In the event that imports of natural rubber latex are of such volume that an excess remains available for consumption (including any amounts not accepted by General Services Administration), after deducting from total imports (1) the base-period consumption allowed by paragraph (a) of this section, (2) the stockpile requirements of the Government, and (3) a reasonable reserve for adjustments under section 19 of this order. Such excess will be allocated quarterly to consumers by the NPA on the basis of their pro rata allocation of natural rubber latex during the fourth calendar quarter of 1950. Any allocations made under this paragraph may be consumed in addition to the amounts permitted by paragraph (a) of this section.

SEC. 6. *Rubber to fill rated orders (other than "DO–97").* (a) Such quantities of new rubber as are used in making products to fill DO rated orders (other than those rated "DO–97") are hereby exempted from the limitations on consumption contained in sections 4 and 5 of this order. All such quantities shall accordingly be excluded in computing consumption under those sections. Allocations of synthetic rubber will be made for such purposes, upon application in writing to the NPA, in addition to the allocations for which provision is made in sections 8, 9, and 10 of this order.

(b) Any person filing an application for an allocation of rubber to fill DO rated orders (other than those rated "DO–97") must show (1) the DO rating number or symbol applied to the order, (2) the Government contract and purchase numbers, (3) the identity and quantity of the product ordered, (4) the Government specifications for the product insofar as concerns the rubber content, (5) the name and address of the customer and the shipping destination, and (6) the types and quantities of rubber required, by month, to fill the order.

SEC. 7. *Orders rated "DO–97."* (a) Notwithstanding the provisions of NPA Reg. 4, no person shall apply or extend the rating "DO–97" to any order for any pneumatic or solid tires or tire tubes or other transportation products as listed under codes 1 through 8 in appendix A, and no such rating applied or extended to such orders shall be deemed a valid rating.

(b) Insofar as necessary and practicable, new rubber will be made available once a month, in addition to the quantities otherwise permitted by this order, to manufacturers of those products listed under Codes 9–24 in appendix A, to replace rubber used to fill orders for such products rated "DO–97." No additional rubber will be authorized for such purpose, however, except to the extent that the applicant demonstrates that he has filled "DO–97" rated orders for the product in the previous month requiring a greater proportion of his then permitted new rubber consumption than he devoted to the manufacture of that product out of his total new rubber consumption in the year ending June 30, 1950 (exclusive of such units as were manufactured and sold as parts of new equipment or for incorporation in new equipment). Application for such additional new rubber shall be made before the 10th day of each month. The quantities approved under this section will be authorized and allocated for use during the remainder of that month. (For example: If a company used rubber in March for orders rated "DO–97" in excess of the above-described proportion, it may report such excess use before the 10th of April, and additional rubber will be authorized or allocated in April). The applicant must state (if he has not previously submitted the same information) his consumption of new rubber during the year ending June 30, 1950, in making the product involved (broken down to show what proportion went into new equipment), the volume of orders filled for the product during the previous month (broken down to show those rated "DO–97"), the types and quantities of rubber used or required therefor, the new rubber authorization requested, and any other data necessary to demonstrate that the applicant has satisfied the above requirements entitling him to additional rubber.

ALLOCATION OF SYNTHETIC RUBBER

SEC. 8. *Limitation on acquisition of synthetic rubber.* No person shall acquire more Government-produced GR–S or butyl (GR–I) than is allocated to him by the NPA. No person shall sell or transfer any synthetic rubber acquired from the Government to any person other than the Office of Rubber Reserve, Reconstruction Finance Corporation.

SEC. 9. *Allocation procedure.* The NPA will allocate quarterly, to each consumer of GR–S or butyl, the amounts of Government-produced GR–S and butyl that he may purchase during a specified calendar quarter. The NPA will notify the Office of Rubber Reserve, Reconstruction Finance Corporation, of such allocations and the Office of Rubber Reserve will not issue purchase permits to anyone for more GR–S or butyl than is allocated to him. Persons desiring to purchase GR–S or butyl will submit purchase requests to the Office of Rubber Reserve in accordance with its established procedure.

SEC. 10. *Basis of allocation.* GR–S and butyl for non-defense purposes will be separately allocated by the NPA for each calendar quarter on the following basis:

(a) *GR–S.* Subject to the provisions of paragraphs (d) and (e) of this section, each consumer of GR–S will be allocated a fair and proportionate share of the total available Government-produced GR–S (after a reasonable amount has been reserved for DO rated orders, for such other programs as may be approved by the NPA, and for adjustments under section 19 of this order). The share of GR–S so allocated to each consumer will be calculated so that such share, when added to the quantities of other new rubber which are permitted or allocated to him and which enter into the computation of total new rubber under section 4 of this order, will equal his total new rubber consumption as permitted by section 4.

(b) *Butyl for tire tubes.* Subject to the provisions of paragraphs (d) and (e) of this section, each manufacturer of tire tubes will be allocated his pro rata share of total available Government-produced butyl (after a reasonable amount has been reserved for DO rated orders, for such other programs as may be approved by the NPA, and for adjustments under section 19 of this order), based on the proportion which his total new rubber consumption for tire tubes during the year ending June 30, 1950, bears to the total new rubber consumption of the industry for tire tubes during that period as determined by the NPA.

(c) *Butyl for other uses.* Subject to the provisions of paragraphs (d) and (e) of this section, each consumer of butyl for purposes other than the manufacture of tire tubes will be allocated for each calendar quarter, his average quarterly consumption of butyl for such other purposes during the year ending June 30, 1950, as determined by the NPA.

(d) *Imports to be considered.* In making allocations described in paragraphs (a), (b), and (c) of this section, the NPA will ascertain the quantities of imported GR–S and butyl acquired by each consumer, and will reduce by the amounts of such imported rubber the allocations which would otherwise be made.

(e) *Inventories to be considered.* In making the allocations described in paragraphs (a), (b), and (c) of this section, the NPA will ascertain and take into account each consumer's inventory of GR–S and butyl, and will adjust the allocations insofar as practicable so that inventories (including rubber in warehouse and in transit) will not be increased beyond a 20-working-day supply.

RUBBER PRODUCT REQUIREMENTS AND LIMITATIONS

SEC. 11. *Camelback production required.* Every person who produced camelback during the year ending June 30, 1950, shall produce in each month of 1951, an amount of camelback which by RHC weight is at least one and a half times as great in proportion to his total new rubber consumption in the manufacture of transportation products during such months, respectively, as the proportion which his production of camelback during the year ending June 30, 1950, bore by weight on RHC basis to his total new rubber consumption in transportation products during that year. For example, if a person's production of camelback on RHC basis accounted for 5 percent of his new rubber RHC consumption in transportation products during the year specified, his production of camelback in each month must account for at least 7.5 percent of his new rubber RHC consumption in transportation products during each month of 1951. This means that consumers who produce transportation products other than camelback must sacrifice sufficient RHC from other transportation products to achieve the above result, since no extra allocation of RHC will be made to compensate for increased camelback production. Those who produce camelback only are not subject to this section.

SEC. 12. *Tires or tubes for new passenger automobiles.* No person shall deliver any tires or tubes to any manufacturer of new passenger automobiles unless such manufacturer furnishes to him a signed certificate reading substantially as follows:

I hereby certify, subject to the criminal penalties for misrepresentation contained in Title 18, U. S. Code (Crimes), section 1001, that after April 1, 1951, I will not install on or use for any new passenger automobile more than four tires or tubes and that no more than four tires and tubes will be delivered by me with any new passenger automobile.

(Date) (Signed)

SEC. 13. *Required production of certain tires or tubes.* (a) No person, who, during the first calendar quarter of 1951, manufactured any tires or tubes for use on trucks, buses, and truck trailers, in sizes 8.25 and up, or on tractors or farm equipment, shall, during any month, devote less than the same proportion of his total new rubber consumption as limited by section 4 of this order to the manufacture of these items than he did in the first calendar quarter of 1951.

(b) In addition, the saving in new RHC resulting from the reduction in original passenger car tire and tube deliveries in April 1951, as compared with such deliveries in March 1951, shall be used by each tire manufacturer in the production of truck and bus tires and tubes, in sizes 8.25 and up, and for farm tires and tubes. Insofar as natural rubber may be used in producing such tires and tubes in accordance with the specifications in appendix A, such use in lieu of synthetic rubber is permitted, subject to the limitation on total new rubber consumption in section 4 of this order.

SEC. 14. *Rubber product simplification and manufacturing specifications—(a) Manufacture except in accordance with appendix A prohibited.* No person shall manufacture any rubber product except in accordance with the specifications and other terms and conditions prescribed in the attached appendix A. More specifically, (1) no person shall consume any natural rubber (dry or latex) in the manufacture of any product not listed in column II of appendix A; (2) no person shall consume more natural rubber (dry or latex) in the manufacture of any listed product than prescribed in column III (as qualified by column IV) of appendix A, and (3) no person shall consume any new RHC (natural or synthetic) in the manufacture of any listed product in more or different lines, types, qualities, styles or colors than those prescribed in column IV of appendix A.

(b) *Exceptions to limitations of appendix A*—(1) *Defense orders.* Notwithstanding the provisions of appendix A, any product manufactured to fill a DO rated order (other than one rated "DO-97") may be manufactured to the specifications of the order if and to the extent that such specifications are required by the Government. Efforts will be made, however, to obtain maximum standardization of rubber products for Government defense requirements as well as between defense and non-defense requirements.

(2) *Tire experimentation.* Notwithstanding the provisions of appendix A, any person may use up to a total of 2,000 pounds of dry natural rubber during any calendar quarter for experimentation in the manufacture of those sizes and types of tires for which specifications are provided in appendix A.

(3) *Use of natural rubber instead of synthetic rubber.* Notwithstanding the provisions of appendix A, any person who has received an allocation of synthetic rubber, for a given period, which is of a lesser proportion of his total new rubber consumption, as limited by section 4 of this order, than he is required by the specifications contained in appendix A to use in the manufacture of his usual line of products, may (within the limits of section 4) use such additional natural rubber as is necessary to make up the difference: *Provided however*, That any person who uses additional natural rubber in accordance with this section shall prepare a statement setting forth all of the facts and statistics upon which such additional use was based. This statement, signed by an officer of the company, shall be retained in the files of the company and made available to the NPA upon request.

(c) *Import restrictions*—(1) *Certification required.* No product for which specifications are established in Appendix A may be entered for consumption in the United States or its territories or possessions unless the entry thereof is accompanied by a certificate from the exporter or other qualified person to the appropriate Collector of Customs reading substantially as follows:

The undersigned hereby certifies, subject to the criminal penalties for misrepresentation contained in Title 18, U. S. Code (Crimes), section 1001, that the products covered by the invoice to which this certificate is attached contain no more natural rubber (of any type and wherever produced) than permitted by NPA Order M-2 for similar products.

---------- ----------
(Date) (Signature)

(2) *Exceptions.* No such certificate shall, however, be required for the importation (i) of any products by a diplomatic representative of a foreign government for his personal use or for the use of members of his staff or by a commercial representative of a foreign government for use in his official business and not for sale or, (ii) of any products for experimental and testing purposes and not for sale.

GENERAL PROVISIONS

SEC. 15. *Monthly reports of rubber consumption and stocks.* Every person who consumes or owns, at any time during any month, any type of rubber listed below shall file a monthly report on Form NPAF-3 with the NPA in accordance with the instructions accompanying the form. This report form covers consumption, stocks, receipts, production, and shipments.

Types to be reported

Dry natural rubber.
Natural rubber latex.
Reclaimed rubber.
GR-S Types, excluding latex.[1]
GR-S Type latex.[1]
Butyl types.[1]
Neoprene, including latex.
Butadiene-Acrylonitrile types (N-Type).[1]
Other special-purpose synthetic types.[1]
Scrap rubber, uncured.

SEC. 16. *Reports by tire, tube, and camelback manufacturers*—(a) *Monthly reports.* Each manufacturer of tires, tubes, and camelback shall file a report of his production, shipments, and inventory for each calendar month on Form NPAF-5 with the NPA in accordance with the instructions accompanying the form. Such report shall be filed by the 10th of the month following the month to which it relates.

(b) *Weekly reports of cured tires.* Each manufacturer of tires shall file a report of his production of cured tires for each week on Form NPAF-6 with the NPA in accordance with the instructions accompanying the form.

SEC. 17. *Reports by latex importer.* Every importer of natural rubber latex shall report by letter to the NPA by the 15th of each month in long tons of dry latex solids (a) his imports for the current month (actual receipts plus material due to arrive), (b) his scheduled imports for the next succeeding month, and (c) his estimate of his imports for the second and third succeeding months.

SEC. 18. *Records and reports.* Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries and inventories, production, and use, in sufficient detail to permit an audit that determines that the provisions of this order have been met. This order does not specify any particular accounting method and does not require alteration of the system of records customarily used, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals by those persons who have or who may maintain such microfilm or other photographic records in the regular and usual course of business. All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority. All persons subject to this order shall keep such records and file such other reports as may be required subject to approval by the Bureau of the Budget in accordance with the Federal Reports Act of 1942 (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 19. *Inventory limitations.* (a) No person shall in the course of trade or business receive delivery of any new tires or tubes if his inventory of such items exceeds, or by such receipt would be made to exceed, his minimum requirements for the operation of his business during the succeeding 30 days (or, in the case of passenger car manufacturers, 15 days). No person shall deliver tires or tubes (1) if he has reason to believe that his customer is not permitted to receive delivery under this section, nor (2) unless his customer furnishes to him a signed certificate reading substantially as follows:

I hereby certify, subject to the criminal penalties for misrepresentation contained in Title 18, U. S. Code (Crimes), section 1001, that after receipt of the tires or tubes covered by this order my inventory will not exceed the quantity permitted by NPA Order M-2.

---------- ----------
(Date) (Signature)

(b) All of the materials subject to this order are also subject to NPA Reg. 1 which prohibits the accumulation of materials in excess of a practicable minimum working inventory.

SEC. 20. *Adjustments and exceptions.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, in duplicate, and shall set forth all pertinent facts, the nature of relief sought, and the justification therefor.

SEC. 21. *Communications.* All applications, reports, and other communications relating to this order should be addressed to the National Production Authority, Washington 25, D. C., Ref: Order M-2.

SEC. 22. *Violations.* Any person who wilfully violates any provision of this order, or furnishes false information or conceals any material fact in the course of operation under it, is guilty of a crime, and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to compel necessary adjustment of his inventories or consumption or to suspend his privilege of making or receiving further deliveries of, or from processing or using, materials subject to this order.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect on April 1, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[1] Includes all types whether obtained from Government or other sources, including imports.

APPENDIX A—RUBBER PRODUCTS SUBJECT TO SIMPLIFICATION AND MANUFACTURING SPECIFICATIONS AS PROVIDED IN SECTION 13 OF NPA ORDER M-2

EXPLANATION OF COLUMNS AND SYMBOLS

Column 1: The code number indicated in Column 1 is the numerical identification of a similar class of products.

Column 2: The product or product class to which the restrictions apply is described in Column 2.

Column 3: The figures and symbols in Column 3 specify the amount of natural rubber, if any, that may be used in the listed products.

For product codes 1 through 8 and 14, 15, 16, 17, 23 and 24, the figures in Column 3 represent maximum percent of dry natural rubber and/or natural rubber latex to the total weight of new RHC. For product codes 9 through 13 and 18 through 22, such figures represent maximum percent of dry natural rubber and/or natural rubber latex to the total volume of the compound *except* where provided in Column 4 that the percent is expressed in terms of total weight of new RHC.

The figure "0" in Column 3 means that the use of dry natural rubber or natural rubber latex is prohibited except as may be provided in Column 4.

The symbol "X" in Column 3 means that dry natural rubber or natural rubber latex may be used in the minimum amount required except as may be provided in Column 4.

Column 4: The provisions in Column 4 are in some instances qualifications on the use of dry natural rubber or natural rubber latex as otherwise permitted by Column 3. These qualifications take precedence over Column 3 where there is any apparent inconsistency. Column 4 also contains the simplification and standardization provisions governing the manufacture of the product or product class. *These latter provisions do not relate merely to the use of natural rubber but limit the lines, types, qualities, styles and colors in which the listed products may be manufactured with the use of any kind of rubber.* There are no such limitations on the manufacture of listed products except as indicated in Column 4.

Code No. (1)	Product (2)	Percent natural rubber to total new RHC (3)	Special restrictions or provisions (4)
1	Pneumatic tires	(1)	The group average of any product in Code 1 may be exceeded, provided the aggregate natural rubber consumed in all products in this code does not exceed the total amount of natural rubber which would have been consumed if calculated on the maximum group averages for Code 1.
	Airplane tires	100	Max. individual tire—100%.
	Bicycle tires	13	Black side-wall construction only. Maximum individual tire—60%.
	Motorcycle tires	15	Black side-wall construction only. Maximum individual tire—60%.
	Passenger, Highway, rain-snow, taxi		Passenger car tire production is restricted as follows: All types—black side-walls only. Standard tread depth highway tires—one line and one quality only. Extra tread depth highway tires—one line only; and no greater quantity may be produced by any manufacturer in any calendar quarter, in proportion to his total production of passenger car tires in that quarter, than the proportion of his extra depth highway passenger car tire production to his total passenger car tire production in the last 6 months of 1950. Special purpose tires—no more or different lines may be produced by any manufacturer than he was producing on Feb. 19, 1951.
	Thru 7.10 and 6.70	15	Max. individual tire—95%.
	Over 7.10 and 6.70	22	Max. individual tire—95%.
	Industrial pneumatic	13	Max. individual tire—95%.
	Tractor implement	13	Max. individual tire—95%.
	Truck: Highway, heavy highway, traction, off-the-road trailer, flotation type, trailer type.		Truck tire production is restricted as follows: Standard tread depth highway tires—one line only. Extra tread depth highway tires—one line only. Special purpose tires—no more or different lines may be produced by any manufacturer than he was producing on Feb. 19, 1951.
	7.50 and under	28	Max. individual tire—95%.
	8.25 thru 9.00	75	Max. individual tire—90%.
	10.00 thru 12.00	90	Max. individual tire—90%.
	Over 12.00	92	Max. individual tire—90%.
2	Solid tires		
	Airplane tires	X	
	Bogie, filler and support rollers	XX	
	Pressed on		
	Cured on, 4 x 1½ and up	50	
3	Tire tubes:	50	
	Airplane		Any color, but one color only, except that every tube containing latex must be marked with one or more circumferential light blue stripes, applied on the base section of the tubes, any one of which stripes must be 3/16" minimum width. No other tube shall be so marked.
	Bicycle	100	
	Industrial pneumatic	5	
	Passenger	50	
	Puncture seal	0	
	Safety tubes	XX	
	Tractor implement		
	Truck, 8.25 cross-section and under	0	
	Above 8.25 and up to 14.00	0	
	14.00 cross-section and over	5	
4	Tire tube valves and curing bags:	80	Including valves.
	Tire tube valves (including repair valves)		
	Tire tube valve inside washers	XX	
	Curing bags	X	
5	Tire flaps		
	10.00 and up	50	May be averaged with groups in Code 1.
	All others	100	May be averaged with groups in Code 1.
6	Tire retreading materials:	50	
	Air bags, full circle for retreading		
	Camelback for airplane tires	X	
	Camelback for 9.00 cross-sections and larger, in die sizes 6½" crown width and 1/32" ga. and up	X 100	
	Camelback, die sizes under 6½" crown width and under 1/32" ga.		
	Camelback cushion gum	0	
	Peddling stock	100	3/32" ga. max. for synthetic camelback.
	Stripping stock	XX	
	Filler stock	XX	
	Cushion repair gum		
	Tread repair gum	100	
	Tire vulcanizing cement	XX	
7	Tire and tube repair materials:		
	Air bags, sectional	XX	
	Bulk tire repair materials		
	Tire patches	XXXXX	
	Tube patches		
	Patching cement		
8	Tank blocks, treads and band tracks	XX	

[1] Maximum group average.

Code No. (1)	Product (2)	Percent natural rubber by volume (3)	Special restrictions or provisions (4)
9	Belting: Belting must be manufactured in accordance with the following regulations: Rubber belting utilizing a solid woven carcass is permitted, provided such construction uses no more natural rubber than is permitted in laminated belting of equivalent size and thickness. Constructions using combinations of fabric and other reinforcing materials such as cord or wire are permitted provided total natural rubber does not exceed that which is used in an equivalent grade, cotton fabric ply construction belt.		Color black throughout, except where otherwise specified. No manufacturer shall produce by any single manufacturing process more than one line, type, quality or style for any one purpose. For interpretation of purpose in this Order the commonly accepted service classifications used by industry shall apply.
9-A	Conveyor and elevator belting:		
	For severe service only	25	
	For moderate service	15	
	For hot material	X	Operating temp. 200° F. and over.
	For conveying unpackaged food materials and materials that would be discolored with black belts.	25	Black friction, amber or tan cover.
9-B	Misc. belt and related products:		
	Hay baler	X	
	Other agricultural implement	15	
	Belt splicing and repair material	X	
	Chute lining	25	
	Conveyor skirting or skirt board	25	
	Cigar machine aprons		Same restrictions as first grade flat transmission belt (Code 9-C).
	Concentrator belts	25	
	Escalator hand rails	30	
	Flatter belts	X	
	Hog beater belts	40	
	Last puller	20	
	Package	25	
	Paper machine aprons	25	
	Paper making screen diaphragms	15	
	Postal meter and letter opening feed belts	X	
	Powder explosives	15	
	Pulley lagging	25	
	Rubber scrapers for conveyor belts	25	
	Safety belts, linemen's	0	Color optional.
	Sling or lifting	25	
	Special molded conveyor belts	X	
	Street sweeper belts	X	Tan or amber.
	Tube winding	X	Natural rubber color permitted.
	Tobacco stemmer belts	25	
	Molded discs for conveyor belt idlers	X	Color optional.
	Ozalid seals		Natural rubber lb. maximum per 1,200 sq. in. per ply. Color of seaming strip optional.
9-C	Flat transmission belting		
	For severe service, or high speed or to operate over small pulleys		0.65 lbs.
	For moderate service		0.30 lbs.
	Hammermill belt		0.65 lbs.
	Axle generator belt		0.65 lbs.
	Rubber covers for above, maximum thickness 3/4"	10	Color optional, one color only.
	Sheeting type, slab belting		0.65 lbs.
	Using fabric weighing between 10 and 16.50 oz. per sq. yd		0.30 lbs.
	Using fabric weighing less than 10 oz. per sq. yd		Percent based on total volume of belt. In determining belt volume, the published nominal cross-sectional dimensions shall be used where these exist and mold cross-sectional dimensions shall be used in all other cases. All belts black, except as otherwise specified. Buff color permitted for non-marking and food handling.
9-D	"V" Belts		
	Fractional H. P.	20	
	Household equipment	20	
	Automotive:		
	Passenger cars for pulley groove top width more than .500"	20	
	Trucks under 1½ ton for pulley groove top width more than .500"	20	
	Passenger and truck for pulley groove top width .500" or less	25	
	Trucks 1½ tons and over	25	
	Busses	25	
	Police cars and taxis	25	
	Airplane	25	
	Stationery gas and diesel engines	25	
	Industrial, including agricultural:		
	Heavy duty	30	
	Standard	30	
	Speed changers	35	
	Double "V"	15	
	Open end	20	
	Round belts	25	
	Railroad axle-drive	50	
10	Hose		All hose to be black throughout, except where specified. Color permitted in frictions, liners and cements to identify and differentiate between oil resisting and non-oil resisting rubbers. No manufacturer shall produce by any single manufacturing process more than one line, type, quality or style for any one purpose. For interpretation of purpose the commonly accepted service classifications used by industry shall apply.
10-A	Aircraft hose:		
	Crash truck AAF 20611 (−65° F.)	X	
	Ducts	X	Govt. or commercial plane use only.
	Oxygen hose	X	Govt. or commercial plane use only.
	Airbrake (20-147) (a)	5	Govt. or commercial plane use only.
	Aircraft hose not elsewhere listed	0	
10-B	Automotive hose:		
	Air brake	5	
	Air cleaner	5	
	Hydraulic actuating boot	X	
	Car heater	0	
	Coolant (radiator):		
	Curved	15	
	All other radiator	5	
	Defroster	15	
	Hydraulic brake, S. A. E. R-4	0	
	Windshield wiper	5	
	Vacuum brake	5	
	Automotive hose not elsewhere listed	0	
10-C	General industrial hose		All hose to be black throughout, except where specified.
	Acid	X	
	Air and air tool: Air drill for mining and quarrying and heavy duty industrial	30	
	Gas mask air hose	40	
	All other air hose not elsewhere listed	5	Red and green cover permitted on 3/4" and under for identification purposes.
	Alcohol, beverage, brewers, wine, vinegar, food and milk conveying	40	Buff colored tube and cover permitted.
	Ammonia	20	

Code No. (1)	Product (2)	Percent natural rubber by volume (3)	Special restrictions or provisions (4)
10-C	General industrial hose—Continued		
	Arbor pipe framing	25	
	Bonded and skived engine	10	
	Bridled cover tubing	0	
	Cattle covering, electric	20	
	Cloth inserted tubing	5	
	Coupling, flexible	5	
	Creamery	20	Buff color cover permitted.
	Dozers:		
	Floating	X	Natural rubber color permitted.
	Sinking		
	Dredging sleeves	40	
	Expansion joints	40	
	Fire:		
	Cotton rubber lined and R. C	25	
	Wrapped duck	25	
	Fire engine suction:		
	Hard	10	
	Soft	25	
	Fire extinguisher tubing	5	
	Flanged flexible pipe	20	
	Garden and lawn	0	Red and green cover permitted.
	Jetting	10	
	Marine exhaust	0	
	Material handling—including grain	40	
	Cement and concrete	40	
	Phosphate flexible	40	
	Rock dusting	40	
	Insulation blowing	5	
	Paint spray, fluid line	0	50% natural rubber by volume permitted when Thiokol is used.
	Paper mill fuse	10	
	Petroleum products:		
	Gasoline service station	0	
	Oil suction and discharge	15	Both rough and smooth bore permitted.
	Butane and propane	5	
	Tank wagon	5	
	All other not elsewhere listed	0	
	Pinch valve	X	
	Rotary drilling:		
	Vibrator	15	Color stripe or band permitted.
	Mud suction	15	
	Sand blast	X	
	Sand placing and sand suction	40	20" and over I. D. X. natural rubber permitted.
	Shaft covering, flexible	5	
	Spray, horticultural and car washing		For car washing service where pressure exceeds 250 P. S. I.
	Over 400 lbs. working pressure	5	
	Under 400 lbs. working pressure	5	
	Steam:		
	Over 50 lbs. working pressure	X	
	50 lbs. and under working pressure	20	
	Steam ironing	X	
	Suction, water:		
	Hard rubber and rough bore	5	
	Smooth bore up to 6"	10	
	Smooth bore 6" and over	20	
	Vacuum:		
	Household, including hotels, office buildings, etc	25	
	Industrial dust collector and blower exhaust	X	
	Washing machine	0	
	Water:		
	Radiator filling	0	
	Industrial:		
	Severe service	10	
	Moderate service	5	
	Welding	5	Hose may be black, red, and/or green as required for safety identification.
	Hose not elsewhere listed	0	
10-D	Railroad hose:		
	Air brake and signal, M-601	20	
	Air pneumatic tool, M-608	5	
	Paint spray, M-610	5	
	Pantograph	10	
	Sand, M-605 and M-606	X	
	Sand pipe nozzles	X	
	Steam, hot water and car heat, M-605	X	
	Tender tank, M-606	10	
	Water, cold, M-604	5	
	Welding, M-607	5	Hose cover may be black, red, and/or green as required for safety identification.
	Railroad hose not elsewhere listed	0	
11	Packing and gaskets not elsewhere listed		Color optional. Restriction on one line, type, quality, and style do not apply.
11-A	Packings without fabric or high percent of fiber, including sheet and also strips, discs, gaskets, rings, cups, U packings, V rings, O rings, non-fabric diaphragms, etc., made by extruding, cutting, or molding:		
	Below 45 durometer	0	
	45 durometer and above	0	
	Pipe coupling gaskets	0	
	Molded and extruded gaskets sliced endless after initial vulcanization	0	
	Electrical transformer sheet rubber for packing seals	40	
	O rings for sliding contact against steam and chemicals	X	
	Air brake gaskets	X	
	Vulcanizer door gaskets	X	
	All others not elsewhere listed	0	
11-B	Packings with high fiber content sheet (generally known as "compressed gaskets sheet") and gaskets cut from same.	1	By weight.
	Molded gaskets, discs, rings, etc	1	By weight.
	Rod packing coil, spiral ring form (generally known as "rubber-bonded plastic packing").	1	By weight.
11-C	Packings with fabric or wire insertion sheet gasketing (generally known as "C. I. or R. W. I. Sheet") and gaskets cut from same:		
	Cotton insert	5	
	Wire insert	10	
	Asbestos insert	20	
	Rolled or molded gaskets:		
	Cotton insert	25	
	Asbestos insert	25	
	Diaphragm sheet including diaphragms cut from same or molded:		
	Superpressitive gas regulation	X	
	Molded or cut sheet above	25	
	Cut other than above	15	

Code No. (1)	Product (2)	Percent natural rubber by volume (3)	Special restrictions or provisions (4)
11-C	Rectangular piston packing	50	
	Rod packing including molded cups, U packings, and V rings:		
	Cotton insert	25	
	Asbestos insert	25	
11-D	Valve and valve parts:		
	Valve and valve discs—45 durometer and under	X	
	Loaded ball valves	X	
	All other valves and valve parts	0	
11-E	Sealing compounds for food containers:		
	Beverage container gaskets (molded, extruded or lathe-cut)	0	15% natural rubber by weight of compound permitted.
	Food container gaskets (extruded and lathe-cut)		5% natural rubber by weight of compound permitted.
	Gasket-lined home canning lids		
	Jar rings, cut rings	25	
	Molded stoppers for food and beverage containers	0	
	Food closure gasket		30% natural rubber by weight of compound permitted for food gaskets formed and vulcanized in the closure.
	Sealing compounds, food closures and can ends ("flowed-in" type for glass and metal containers).	X	Natural rubber latex permitted.
12	Other mechanicals		All products in Code 12, color optional, unless otherwise specified. Restrictions on line, type, quality, and style do not apply.
12-A	Aircraft equipment:		
	Boots, deicer and integral parts including hose	X	
	Bumpers	0	
	Cords, alighting gear	X	
	Conductive rubber parts	X	
	Flexible couplings, functional	X	
	Engine instrument mountings and vibration insulators	X	
	Oxygen mask, pilot	X	
	All parts 45 durometer or less	0	
	All other parts not elsewhere listed	0	
12-B	Automotive equipment:		
	Windshield wiper blade	X	
	Bumper—retaining and check (molded)	25	
	Bumpers—functional:		
	Suspension	15	
	Crash	10	
	Bushing:		
	Suspension	X	
	Torque rod	X	
	Coupling—flexible	0	
	Weatherstrips and body seals, extruded, under 50 durometer	X	
	Weatherstrip, injection compound for splicing and forming	25	
	Molded ventilator strips	10	
	Glass run	X	
	Crankshaft torsion dampers	40	
	Transmission and engine mountings:		
	50 durometer and over	X	
	Under 50 durometer	0	
	Body and chassis mountings:	0	
	50 durometer and over	X	
	Under 50 durometer	X	
	Tail pipe insulator—under 50 durometer	15	
	Torsion springs	25	
	Grommet, core-molded-retaining, for dashboard insulation	25	
	Fuel tank—filler neck seal		
	Mats:	10	A color spray containing no natural rubber may be applied to one side.
	Contour, rear compartment only	15	New rubber other than natural may be used in the spray.
	Sill with retaining buttons	0	
	All other automotive mats	0	A color spray containing no natural rubber may be applied to one side.
	Cowl and dash liners		New rubber other than natural may be used in the spray.
	Seal beam headlights	X	
	Parts—N. I. with retaining buttons	15	
	Fender flaps or splash guards	0	
	Silencers—coil spring	0	
	Rear spring seat insulator	X	
	Tubing:		
	Drain	X	
	Windshield wiper, non-reinforced	X	
	Spring tying suspension seat cord	25	
	Molded diaphragms	X	
	Hydraulic, air brake, and vacuum brake cups, diaphragms, valves and seals.		
	Seals:	X	
	Valve stem—tire	25	
	Valve stem—motor	0	
	All other parts not elsewhere listed		
12-C	Railroad and streetcar equipment:	X	
	Car spring snubbers	0	
	Refrigerator friction drive wheel	0	
	Refrigerator car door seal	X	
	Molded seal for double-glazed windows		Same as automotive.
	Bumpers	X	
	Streetcar wheel	X	
	Windshield wiper blades		
	Door shoes	X	
	Draft gears	X	
	Vibrational insulators—functional	0	
	All other parts not elsewhere listed		
12-D	Farm equipment:	X	
	Flax roll (50 durometer or under)	5	For adhesion.
	Corn husking roll	5	For adhesion.
	Feed conveyor	5	For adhesion.

	Pipe and fittings	10	
	Pipe lats	15	
	Plating barrels and parts	30	
	Pocket meter cards	X	
	Refrigerator parts	X	
	Rod and tubing for fountain pen parts	X	
	Rods up to .040" diam	X	
	Rods .040" diam. incl	25	
	Rods over ½" diam	20	
	Sheets 1/64" thick or less	X	
	Sheets over 1/64" to ¼" thick incl	50	
	Sheets over ¼" thick	30	
	Tubing up to and incl. 1/32" wall	X	
	Tubing over 1/32" to ⅛" wall incl	50	
	Tubing over ⅛" wall	30	
	Cafeteria trays	50	
	Steering wheels	10	
	Hard rubber parts for alkaline storage batteries	35	
	Heavy duty battery cases over 15#	50	
	Hand wrapped battery cases	20	
	Submarine battery jars	50	
	Storage battery cases where product of tensile and elongation is 10,000 pounds or more	50	
	Ventilating parts for submarines—hand wrapped	X	
	Ventilating parts for submarines—molded	50	
	Parts for submarines not elsewhere listed	50	
	Telephone commutator inserts	50	
	Tubular retainers	40	
	Parts for water meters	X	
	X-ray and photo tanks	20	
	Forming tanks	50	
	Connecter stocks	20	
	Parts not elsewhere listed	0	
12-Q	Industrial equipment: Industrial abrasive implements		The over-all monthly consumption of natural rubber shall not exceed [illegible] of the total new RHC consumed. Restrictions on line, type, quality, style, and color do not apply.
12-R	Brake linings, brake blocks and clutch facings		The over-all monthly consumption of natural rubber shall not exceed [illegible] of the total new RHC consumed. Restrictions on line, type, quality, style, or color do not apply.
13	Wire and cable		Except where required for circuit identification, rubber compounds used in cable shall be furnished as: Insulation compounds in natural or black color only; jacket compounds black color only. Restrictions on line, type, quality, and style do not apply.
13-A	Insulation compounds:		
	Insulation for power and control cable or for building wire rated at 600 V (phase to phase) or less and which has insulation wall thickness of more than 25 mils	0	
	Insulation compounds having thickness of 25 mils or less	X	
	For all types of insulated wire and cable in excess of 2000 V (phase to phase)	70	
13-B	Sheaths and jackets:		
	Sheaths and jackets for operation at temperature of −40° C or higher	0	
	Sheaths and jackets for operation at temperatures lower than −40° C	X	
13-C	Cements and nonreinforced tapes incidental to manufacture, repair, or installation of cables	70	

Code No. (1)	Product (2)	Percent natural rubber to total new RHC (3)	Special restrictions or provisions (4)
14	Rubber footwear	70	Group average percent. No type rubber footwear shall contain more than 85% natural rubber. Line, type, quality, style, or color optional.
15	Shoe products		Line, type, quality, style, or color optional.
15-A	Heels and soles:		
	Heels, soles and other specialized materials, manufactured by rubber heel and sole manufacturers used in the manufacture and repair of shoes and excluding those items covered by other subsections of this code.	1	

Code No. (1)	Product (2)	Percent natural rubber to total new RHC (3)	Special restrictions or provisions (4)
15–A	Soles	X	DO orders for black, full length, cleated soles for "Tropical Army Combat Boots" and "Ski-Mountain Army Boots."
	Heels	60	DO orders for tan, neutral, white, and nonmarking black heels, except white heels. For the Armed Forces, Fed. Spec. ZZ-H-11A.
	Soling	85	DO orders for Arctic boot soling for the Armed Forces (U. S. Army Spec. Mil-H-2280).
	Crepe soles, heels, welting and wrappers	0	The consumption, production or sale (other than to G. S. A., unless specifically authorized by G. S. A.) of natural RHC for crepe soles, heels, welting and wrappers is prohibited. Only exception: Existing inventories as of March 15, 1951, in the actual possession of shoe manufacturers and shoe repairmen may be consumed.
15–H	Inner shoe cushions and pads	X	
15–C	Orthopedic appliances	X	
15–D	Impregnated insoles, impregnated box toes, impregnated midsoles		
15–E	Materials used in the manufacture of shoes and incorporated therein for the operations of combining, coating, finishing, laminating, impregnating, and proofing		The over-all monthly consumption of natural rubber shall not exceed 75% of the total new RHC.
15–F	Shoe tapes	X	
15–G	Cements for the manufacture and repair of shoes and component parts		Natural rubber latex only.
15–H	Cements for manufacturing welting for shoes		Color options.
16	Cements		The over-all monthly consumption of natural rubber shall not exceed 67% of the total new RHC.
16–A	Cements for all purposes	X	
16–B	Miscellaneous uses: For manufacture of products covered by all code numbers in this Appendix A.		In products where natural rubber is permitted, no product shall contain a higher percent of natural rubber than a comparable product produced during the base period. Color optional. Restrictions on one line, type, quality and style do not apply.
17	Proofing, combining or coating of fabric		
	Covering material for transportation equipment	0	
	Film and coated materials for medical, health, and safety products	40	
	Anchor coats: spread, frictioned, or impregnated directly on fabric, or other material to be later calendered or spread	100

[NPA Order M-7, as Amended March 9, 1951, Amendment]

M-7—USE OF ALUMINUM

MISCELLANEOUS AMENDMENTS

This amendment to NPA Order M-7, as amended March 9, 1951, is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this amendment, consultation with industry representatives has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of users in different trades and industries.

This amendment affects NPA Order M-7, as amended March 9, 1951, as follows:

1. Paragraph (c) of section 2 is deleted and a new paragraph (c) is substituted therefor:

(c) "Manufacture" means to put into process, machine, fabricate, or otherwise alter materials by physical or chemical means: *Provided, however*, That as applied to "castings (foundry products as shipped by the producer)" specified in section 3 of this order the word "manufacture" also means the assembly of said items into components or end products, and that as applied to "powder (including atomized, flake, paste, and pigments)," the word "manufacture" also means segregating, weighing, or packaging for sale or resale by persons other than producers.

2. Section 3 is amended to add following the word "products" and before the colon in line 5, the words "obtained from either domestic or foreign sources".

3. Paragraph (c) of section 5 is amended by substituting a period for the colon in line 5, and by deleting the proviso clause and inserting the following sentences at the end of the paragraph:

"Any person who was authorized by the National Production Authority to use an adjusted monthly base to determine permitted use of aluminum during January, February, or March 1951, shall not use during the second calendar quarter of 1951 a quantity by weight of aluminum in excess of 65 percent of three times such adjusted monthly base. The National Production Authority reserves the right to review and modify or revoke any such adjustment. An authorization by the National Production Authority to use a specific quantity of aluminum in any specified month or months or in the first quarter of 1951 shall not be considered an adjusted base for the purposes of this paragraph (c)".

4. Section 6 is amended by deleting the word "April" and substituting the word "May" in lieu thereof in lines 1 and 17 of paragraph (a) and in line 11 and the last line of paragraph (b); by inserting a comma in place of the word "and" in line 39 of paragraph (a) and inserting in the same line following the word "April" the words "and May"; and by inserting the words "and April" in line 1 of paragraph (b) following the word "March".

5. Paragraph (c) of section 6 is deleted and the following paragraph (c) is substituted therefor:

(c) Commencing on April 30, 1951, no person shall use aluminum in the manufacture or assembly of any item on the attached List B: *Provided, however*, That ducts and windows of the residential type may be completed if they were in process of manufacture or assembly on or before April 30, 1951, and such completion is effected not later than June 30, 1951: *And provided further*, That windows of the nonresidential type may be manufactured to fill orders received by the manufacturer prior to February 20, 1951, if such completion is effected not later than June 30, 1951, and the use of aluminum for this purpose shall not be subject to the provisions of section 5 of this order. During each of the months of March, April, May, and June 1951, no person may use in the manufacture or assembly of ducts and of windows of residential type a total quantity by weight of aluminum in excess of 65 percent of his average monthly use of aluminum in the manufacture or assembly of such items during the base period.

6. Paragraph (e) of section 6 is deleted and the following paragraph is substituted therefor:

(e) The prohibitions of this section apply notwithstanding the provisions of NPA Reg. 2 with respect to the filling of rated orders, and are not affected by any of the exemptions stated in section 8 of this order: *Provided, however*, That the provisions of NPA Reg. 2 and paragraph (a) of section 8 of this order apply as to those items in the attached Lists A and B which are specifically designated by means of an asterisk as being permitted to be manufactured from aluminum for the use of the Armed Forces of the United States, including the United States Coast Guard, in the construction, fitting, or furnishing of ships (other than pleasure craft), aircraft, and hospitals, or to supply military specification organizational equipment items.

7. Paragraph (b) of section 8 is deleted and the following paragraph is substituted therefor:

(b) The procurement and use by electric utilities of aluminum conductor and aluminum conductor accessories as those terms are defined in NPA Order M-50, is subject to order M-50 and is accordingly exempt from this order. The use by electric utilities of forms and shapes of aluminum listed in section 3 of this order, other than aluminum conductor and aluminum conductor accessories, remains subject to the restrictions of this order, and in computing permitted use of such other forms and shapes of aluminum, use of aluminum conductor and conductor accessories during the base period shall be excluded.

8. *List A* is amended by clarifying certain of the items listed thereon, and by marking certain items with an asterisk to denote that such items may be manufactured for use by the Armed Forces of the United States for certain purposes.

LIST A

(See section 6)

The use of the forms and products of aluminum defined in section 3 of this order and any component parts made therefrom (excluding repair parts) in the items listed below is subject to the prohibitions stated in this order, except as otherwise stated in the order or List A: *Provided, however*, That those items in List A which are specifically designated by an asterisk are permitted to be manufactured from aluminum for the use of the Armed Forces of the United States, including the United States Coast Guard, in the construction, fitting, or furnishing of ships (other than pleasure craft), aircraft, and hospitals, or to supply military specification organizational equipment items:

Airfoil (tubing) for windmills.
Aluminum wool.
Andirons, screens, and fireplace fixtures.
Animal cages.
Animal training equipment.
Animal traps.
Applicators for moistening envelopes.
Arbors and trellises.
Architectural and other building ornamentation.
Ash trays.
Automobile hardware and trim (except functional parts).
Awnings.
Badges.
Balloon molds.
Bar rails, fixtures and equipment.
Barber chairs.
Batons.
Bathtubs.
Beauty parlor equipment.
Beer equipment: all items.
Bells (except parts where nonmagnetic gong material is required for electrically operated signaling devices used as adjuncts to communication systems).
Beverage mixing and serving equipment, such as bottle coolers, cocktail shakers, ice buckets and palls, ice chippers and shavers.
Bicycles and accessories.
Bird and pet cages, houses, aquariums, accessories and equipment.
Blackboard frames and chalk troughs.
Boards: shampoo, tanning.
Book covers.
Book stacks.
*Boxes, including match, cigarette, typewriter ribbon (except instrument cases that require nonmagnetic properties).
*Brackets: light, shelf and wall.
Brooms and brushes (except tooth brushes and industrial).
*Buckles, all types.
Buckets, household.
*Burglar alarms and protective systems (except where essential to the proper servicing or functioning of the parts).
Burial vaults and urns.
*Buttons (except for work clothing where necessary to resist corrosion).
*Cabinets: kitchen, medicine.
Calendars, calendar pads and parts.
Cameras, amateur box type still picture, fixed focus (except reflex).
Candle molds.
Canes.
Canopies.
*Cans, including ignition coil and motion picture humidor.
Caps: chimney and vent flue (except for industrial).
Card tables.
Cards, greeting.
Carriages: baby, luggage, strollers, scooters (except functional parts).
Cases:
  Cigar.
  Film.
  Radio, home type.
  Soft drink.
  Spectacle.
  Vanity.
Caskets, and accessory devices.
Caster cups, wheel casters and glides (except for industrial and materials handling equipment).
Chicken crates.
*Chutes: coal, package and waste.
Cigarette lighters.
Cleaning accessories, such as carpet sweepers, dustpans and scrubbing sets.
Clothespins.
Coasters.
Combs.
*Containers, foil lined.
Coops, brooder, chicken, quail, etc.
*Copings.
*Cornices.
Crayon molds.
*Cups.
Curtain, drapery, and carpet hardware.
Cutlery handles.
Cuspidors.
Desk pads.
Dispensers, fixed or portable, for soap, lotion, papers, straws, etc. (except where necessary to resist corrosion for hospital, scientific laboratory and industrial use).
Dolls.
Door chimes.
*Doors, including, but not limited to:
  Coal.
  Door frames.
  Dumbwaiter.
  Incinerator.
  Screen.
  Storm.
Draperies.
Dresser sets.
Emblems, medals (except religious), crestings and plates.
Fences, wire.
Flag poles, stanchions and sockets.
Flower boxes, stands and pot holders.
Forms, concrete vault casting, wax.
Fountains.
Frames:
  Electric sign.
  Picture.
*Frames, Window Screen (including top and bottom bars for tension screens).
Frozen fruit sticks.
*Furniture (except medical, dental and hospital).
*Furniture, hardware (except functional parts).
Games.
Garden tools and equipment.
Garment hooks, brackets, racks, rods, trees, and hangers.
Giftware.
Gutters, leaders and downspouts.
Hair curlers.
Hand-tool handles (except portable electric tools).
Hedge clipping machine.
Highway markers, signals and signs (except electrically operated traffic control signals).
Holders:
  Brush.
  Pen.
  Soda fountain cup.
*Hollow ware.
Horse shoes.
Ice cream freezers for home use.
Jewelry, all types (except religious goods).
Ladders and step stools (except industrial, fire and marine).
Laundry accessories, domestic, such as tubs and boilers, washboards, drain board, and tub covers, clothes hampers, ironing boards and tables, garment stretchers and dryers, clothes drying frames, and clothes line hardware.
Lawn and garden hose accessories, such as sprinklers, nozzles, couplings, clamps, menders and reels.
Lawn mowers, seeders, rollers and tampers.
Ledger openers.
Letter openers.
Lightning rods.
Luggage, fittings, trim and hardware.
Machines: rowing, voting.
Mail boxes.
Maps and globes (world).
Marine construction: Pleasure crafts and fittings of all kinds, including but not limited to:
  Boats.
  Canoes.
  Rowboats.
  Sailboats.
Markers:
  Grave.
  License plates.
  Price.
  Tee.
  Traffic.
  Tree.
Memorials and tablets.
Mesh bags.
Metal Lath, and accessories.
*Metal letters and numbers (except for industrial or public utility control identification).
Mops.
*Mouldings and trim (except functional retaining mouldings, shapes or forms).
Mud scrapers.
Nursing bottles.
Oil cloth, foil-covered.
Ornaments, Christmas tree.
Packaging:
  Containers for:
    Bath salts.
    Cosmetic, except collapsible tubes.
    Gift.
    Powder.
    Shoe polish.
    Tube, for cigar.
  Jars, beauty cream.
  Shakers, talcum powder.
  Foil for:
    Capsules (except therapeutical).
    Cartons, liquor.
    Florist.
    Household.
    Labels.
    Over wraps (except food).
    Wraps: gift, cosmetic, liquor.
    Wine bottle.

Paper clips.
•Plates: name, scuff, push, kick (except instruction and identification plates on equipment).
Playground equipment.
Pleasure boat fastenings, fittings and hardware.
Portable bleachers.
Roofing and accessories, residential type (including shingles).
•Rulers (except technical rulers such as slide rules and others used in engineering).
Saddlery, and harness hardware.
•Screening (except insect and that used in technical and scientific equipment).
Shoe heels (except orthopedic).
Shovels, scoops, scrapers and pushers (except as required for handling food, chemical products and grain in processing and distribution).
Siding and accessories (except industrial).
•Signs, including advertising.
Smokers' accessories.
•Soap dishes and bathroom accessories.
Souvenirs and novelties, advertising specialities.
Spandrels.
Spools, such as wire (except magnet), adhesive tape, solder.
Sporting goods, all kinds (except commercial fishery goods, life raft equipment, fishing rod offset handles, and firearms components).
Spray guns (except paint spraying equipment and agricultural sprays).
Spurs, climbing.
Statuary (except religious and artists originals).
Stencils.
Store fronts (except glass holding members).
Stove pipe and other flue connections.
•Tent poles, frames and pegs.
•Thermostatic containers (except shoulders and cups on vacuum bottles of one quart and under size, and special laboratory and hospital equipment).
Toilet seats and covers.
Tokens (except where necessary for electrical operation).
Tombstones.
•Tooth brush and tumbler holders.
•Towel bars.
Toys.
Tricycles and other children's vehicles.
Umbrellas and parasols.
Venetian blinds, fittings and accessories.
Vending machines (except functional parts).
Waste baskets.
Wheel barrows (except as required for handling chemicals).
•Whistles (except safety devices, air raid and fire alarms).
Windows, storm (except sash slides).

9. The introductory paragraph to List B is amended to read as follows:

LIST B

(See section 6)

The use of the forms and products of aluminum defined in section 3 and any component parts made therefrom (excluding repair parts) in the items listed below is subject to the prohibitions stated in this order, except as otherwise stated in the order or List B: *Provided, however*, That those items in List B which are specifically designated by an asterisk are permitted to be manufactured from aluminum for the use of the Armed Forces of the United States, including the United States Coast Guard, in the construction, fitting, or furnishing of ships (other than pleasure craft), aircraft, and hospitals, or to supply military specification organizational equipment items:

•Ducts, air conditioning, warm air, ventilating.
•Windows, residential type.
•Windows, nonresidential type.

This order as amended shall take effect on March 31, 1951.

Dated: March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[F. R. Doc. 51-4077; Filed, Apr. 2, 1951; 5:06 p. m.]

[NPA Order M-24 as Amended April 3, 1951]

M-24—TIN PLATE AND TERNE PLATE

This order as amended is found necessary and appropriate to promote the national defense and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order as amended there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected by the issuance of this order as amended has been rendered impracticable by the fact that the order as amended affects a very substantial number of different trades and industries.

This amendment to NPA Order M-24 affects the order as follows:

It amends the definition of terne plate, deletes the provisions relating to idle and excess inventories, amends the provisions relating to the use of menders, inserts provisions relating to export shipments to except them from the restrictions of the order and to provide that such shipments shall only be made in compliance with a validated export license, and amends Schedule A to permit the use of special coated manufacturing ternes and manufacturing ternes.

The foregoing changes affect §§ 23.2, 23.4, 23.5, 23.7, 23.8 and 23.9 and Schedule A.

It renumbers §§ 23.1 to 23.13 so that they are numbered sections 1 to 13, respectively.

As so amended, NPA Order M-24 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Permitted uses.
4. Additional permitted uses.
5. Optional uses.
6. Manufacture.
7. Other restrictions.
8. Certification of delivery of plate.
9. Exceptions.
10. Application for adjustments.
11. Communications.
12. Records and reports.
13. Violations.

AUTHORITY: Sections 1 to 13 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong. Sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp. Sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to set forth the permitted uses of tin plate and terne plate, the permitted materials in those uses, and the maximum permitted coating of tin or of terne metal per single base box. This order also sets forth certain additional permitted uses, optional uses, restrictions on manufacturers, and permitted substitutions. NPA Order M-8, as amended, contains certain limitations on the use of pig tin in the manufacture of tin plate and terne plate, but permits the use of tin for tin plate and terne plate in accordance with the provisions of this order insofar as tin plate and terne plate specifications are concerned.

SEC. 2. *Definitions.* As used in this order:

(a) "Tin plate" means steel sheet coated with tin and includes electrolytic tin plate, hot dipped tin plate, primes, seconds, unassorted, and waste-waste.

(b) "Terne plate" means steel sheets coated with terne metal and includes special coated manufacturing ternes, manufacturing ternes, and roofing ternes generally coated in tin mill coating machines, and long ternes which are steel sheets coated in sheet mill coating machines.

(c) "Reconditioned tin plate or terne plate" means damaged tin plate or terne plate which has been put into usable condition by recoating.

(d) "Terne metal" means a tin-bearing lead alloy used as a coating for terne plate, but does not include lead recovered from secondary sources which contains less than 1½ percent residual tin.

(e) "Waste-waste" means hot dipped or electrolytic tin coated steel sheets or steel sheets coated with terne metal which have been rejected during processing by the producer because of imperfections which disqualify such sheets from sale as primes, seconds, or unassorted.

(f) "Menders" means tin plate arising in the production of electrolytic tin plate which has been rejected by the producer by reason of defects which disqualify such tin plate from sale as "primes", "seconds", or "unassorted" and which tin plate has been (1) mended into coke tin plate primes, seconds or unassorted by hot dipping in tin, or (2) mended into terne plate by hot dipping in terne metal.

(g) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government.

SEC. 3. *Permitted uses.* Tin plate, terne plate and reconditioned tin plate and terne plate may be used only for the purposes set forth in Schedule A of this order, subject to the limitations, restrictions, and conditions specified in the said Schedule A with respect to the various items and purposes.

SEC. 4. *Additional permitted uses.* (a) Any person may use waste-waste from electrolytic tin plate, from hot dipped tin plate, or from terne plate for any purpose which is not prohibited in List A of NPA Order M-8, as amended March 12, 1951, or as subsequently amended. In addition, any person may use tin plate or terne plate for any purpose which is not prohibited in List A of NPA Order M-8, if his total annual consumption of tin plate and terne plate does not exceed 100 base boxes.

(b) Tin plate menders arising in the production of electrolytic tin plate may be used only for purposes where hot-dipped tin plate is permitted under Schedule A.

SEC. 5. *Optional uses*—(a) *Substitution of material with lower tin content.* Wherever Schedule A permits use of tin plate or terne plate in any grade, tin plate or terne plate coated with less tin per base box may be used; or if tin mill black plate is adaptable it may be used as a substitute.

(b) *Optional use of 0.25 tin plate for terne plate.* Where terne plate is permitted to be used in the manufacture of an item listed in Schedule A of this order, a manufacturer may substitute electrolytic tin plate with a maximum permitted tin coating of 0.25 pound per base box for that item.

(c) *Optional use of electrolytic tin plate.* Where hot dipped tin plate is permitted to be used in the manufacture of an item listed in Schedule A of this order, the manufacturer may substitute electrolytic tin plate.

SEC. 6. *Manufacture*—(a) *Manufacture of tin plate and terne plate.* Tin plate and terne plate may be manufactured and tested as in this section provided and for the purposes set forth in Schedule A. Coating shall be determined on the basis of average spot coating tests, in the case of electrolytic tin plate, and on the basis of pot yield, in the case of hot dipped tin plate. No person may use terne metal containing more than 15 percent tin in tin mill coating machines, and for coating roofing ternes. No person may use terne metal containing more than 10 percent tin in sheet mill coating machines.

(b) *Manufacture of terne metal.* Secondary tin only may be used to make terne metal.

SEC. 7. *Other restrictions.* No person shall sell or deliver any tin plate, terne plate or reconditioned tin plate or terne plate which he knows or has reason to believe will be accepted or used in violation of the terms of this order, or any other order or regulation of the National Production Authority. No person shall sell or deliver any tin plate, terne plate or reconditioned tin plate or terne plate which he knows or has reason to believe will be exported outside of the continental limits of the United States, its territories and possessions, and Canada, except as permitted under section 9 (c) of this order.

SEC. 8. *Certification of delivery of plate.* Except as otherwise permitted by section 9 (c) of this order, no person shall sell or deliver any tin plate or terne plate unless he has received from the purchaser a certificate signed manually. This certificate shall be by letter in substantially the following form and, once filed by a purchaser with a seller, covers all future deliveries of tin plate or terne plate from the seller to that purchaser:

To_____, Seller:
The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that he is familiar with Order M-24 of the National Production Authority, and that all purchases from you of items regulated by that order, and the acceptance and use of the same by the undersigned, will be in compliance with said order, and any amendments thereto.

SEC. 9. *Exceptions.* (a) The restrictions in this order shall not apply to military requirements for tin plate or terne plate intended for manufacture of items of a special design or style not normally produced or used commercially, nor to tin plate or terne plate intended for manufacture of items for emergency rations nad supplies for lifeboats.

(b) The provisions of this order do not apply to use of tin plate or terne plate which is in process of manufacture or in the inventory of a consumer, or in the inventory of a manufacturer for the account of a consumer, on the effective date of this order.

(c) The restrictions of this order shall not apply to the sale or delivery for export of tin plate, terne plate or reconditioned tin plate or terne plate where the person selling or delivering the same has received a validated export license therefor from the Office of International Trade, or has received from another person a certificate signed manually. This certificate shall be by letter in substantially the following form, striking therefrom the inapplicable words, and shall be filed with each purchase order with the person selling or delivering to such other person tin plate, terne plate or reconditioned tin plate for export:

To_____, Seller:
The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that (he has received a certification from another person that) the Office of International Trade has issued to (him) (such other person) validated export license No. ____ for export shipment of all of the items included in the attached purchase order, and that all purchases from you of items included in the said purchase order and the acceptance of the same by the undersigned will be in compliance with the said validated export license.

SEC. 10. *Application of adjustments.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 11. *Communications.* All communications concerning this order shall be addressed to National Production Authority, Washington 25, D. C., Ref.: M-24.

SEC. 12. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this part have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139-139F).

SEC. 13. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or who willfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect on April 3, 1951.

Issued: March 30, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

SCHEDULE A—Continued

Permitted use (1)	Permitted material (2)	Maximum permitted coating of tin or terne metal (per single base box) (3)
18. Gas meters	Hot dipped tin plate	0.25 pound per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate, special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
	Reconditioned terne plate, special coated manufacturing terne	See note 1.
19. Heat exchangers	Long terne	4 pounds per base box.
	Reconditioned terne plate	4 pounds per base box.
20. Integral parts of signal cells—but only for current collectors and baskets.	Hot dipped tin plate	1.25 pounds per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate	0.50 pound per base box.
21. Lining of drying chambers for milk and sugar solidification.	Electrolytic tin plate	11 pounds per base box.
	Reconditioned tin plate	11 pounds per base box.
22. Maple syrup evaporators	Hot dipped tin plate	11 pounds per base box.
23. Oilers (excluding cans as defined by Order M-25).	Reconditioned tin plate, special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
	Reconditioned terne plate	4 pounds per base box.
24. Oil lanterns and non-electric lamps	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
	Reconditioned terne plate	4 pounds per base box.
25. Repair parts for domestic laundry equipment.	Hot dipped tin plate	1.25 pounds per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate	0.50 pound per base box.
26. Safety cans for inflammable liquids	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
27. Textile spinning cylinders, card screens, spools, bobbins, loom reeds, warper and flasher combs and brushing machines for reed cleaning.	Reconditioned terne plate	4 pounds per base box.
	Hot dipped tin plate	1.25 pounds per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
28. Torpedoes for oil and gas well shooting	Reconditioned terne plate, special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
29. Vaporizing liquid fire extinguishers	Reconditioned terne plate, hot dipped tin plate, special coated manufacturing terne	1.25 pounds per base box. See note 1.
	Long terne	4 pounds per base box.
30. Wick holders for oil stoves	Reconditioned terne plate, special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
31. Smoke pipe elbows and fittings	Reconditioned terne plate	10 pounds per base box.
32. Hot water heater tube jacket liners and other parts exposed to flame or hot flue gases.	Long terne	6 pounds per base box.
33. Roofing; fire doors, gutters, downspouts, and fittings for same; roof flashings; exterior louvres and exterior shutters; where such flashings, louvres and shutters are to be soldered and painted.	Roofing terne	10 pounds per base box.

NOTE 1. Special coated manufacturing ternes may be used in all games up to and including 107 pounds. In base weights heavier than 107 pounds per base box, special coated manufacturing ternes, or manufacturing ternes may be used a coating not in excess of 3 pounds per base box, may be used.
(Also see section 4 of this order for additional permitted uses and section 5 for optional uses.)

[F. R. Doc. 51-4106; Filed, Apr. 3, 1951; 10:54 a. m.]

SCHEDULE A

Permitted use (1)	Permitted material (2)	Maximum permitted coating of tin or terne metal (per single base box) (3)
1. All kitchen equipment	Electrolytic tin plate	0.25 pound per base box.
2. Food preparation and cooking equipment:		
(a) Baking pans for institutions and commercial bakers.	Hot dipped tin plate	1.25 pounds per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate	
(b) All other food preparation and cooking equipment.	Electrolytic tin plate	0.50 pound per base box.
3. Battery cans for electrical contact	Special coated manufacturing terne	0.50 pound per base box.
4. Brushes, power driven		See note 1.
	Long terne	4 pounds per base box.
	Reconditioned terne plate	
5. Cans as defined in Order M-25	Hot dipped tin plate	As permitted by Order M-25.
6. Closures as defined in Order M-26:	As permitted by Order M-26.	
(a) Closures for milk cans	Hot dipped tin plate	1.25 pounds per base box.
(b) Closures for steel drums	Electrolytic tin plate	0.50 pound per base box.
	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
7. Carbide nonexplosive emergency lights	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
	Reconditioned terne plate	
8. Chaplets, skingates, and tin forms for foundry use	Hot dipped tin plate	1.25 pounds per base box.
	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate	
	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
9. Cheese vats	Reconditioned terne plate	11 pounds per base box.
10. Component parts for Internal Combustion engines including air cleaners, cooling systems, fuel systems, and lubricating systems, but only when less essential metals is immediately because of corrosion or solderability.	Hot dipped tin plate	See note 1.
	Reconditioned tin plate	
	Special coated manufacturing terne	4 pounds per base box.
	Long terne	
	Reconditioned terne plate	3 pounds per base box.
	Manufacturing terne	1.25 pounds per base box.
11. Cylinder liners for hard and fruit presses	Hot dipped tin plate	3.50 pounds per base box (2A chargeoval).
12. Dairy ware and equipment including	Hot dipped tin plate	
Bucket pails, strainers, milk kettles, setter or cream cans, weigh cans, measures and test ware, bottle conveyors, ice cream freezers, milk filters, receiving tanks, separators, storage tanks, pasteurizers, vats and covers for surface type heaters and coolers, and testing equipment.	Electrolytic tin plate	0.50 pound per base box.
	Reconditioned tin plate	
13. Diamond cutting wheels	Special coated manufacturing terne	See note 1.
	Long terne	4 pounds per base box.
14. Dusters and sprayers, hand, for disinfectant and pest control; parts requiring solderable coatings.	Reconditioned terne plate	0.50 pound per base box.
	Electrolytic tin plate	
	Reconditioned tin plate	See note 1.
	Special coated manufacturing terne	4 pounds per base box.
15. Equipment or appliance parts requiring solderable coatings.	Long terne	0.25 pound per base box.
	Reconditioned terne plate	See note 1.
	Hot dipped tin plate	4 pounds per base box.
16. (a) Fuel tanks, except for automotive equipment.	Special coated manufacturing terne	
	Long terne	See note 1.
	Reconditioned terne plate	
(b) Fuel tanks for automotive equipment.	Special coated manufacturing terne	6 pounds per base box.
	Long terne	
	Reconditioned terne plate	See note 1.
17. Gas mask canisters	Special coated manufacturing terne	4 pounds per base box.
	Long terne	
	Reconditioned terne plate	

[NPA Order M-38, as Amended April 3, 1951]

M-38—LEAD

This order as amended is found necessary and appropriate to promote the national defense, and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, as amended, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable due to the necessity for immediate action, and because the order affects a large number of different trades and industries.

This amendment to NPA Order M-38, dated February 16, 1951, amends and restates the order to read as follows:

Sec.
1. What this order does.
2. Definitions.
3. Lead forms and materials to which this order applies.
4. Limitations on acceptance of rated orders.
5. Limitations on use of lead.
6. Restrictions on toll agreements.
7. Assistance in placing rated orders.
8. Inventories.
9. Records and reports.
10. Applications for adjustments.
11. Communications.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Public Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order sets forth certain limitations on the acceptance of rated orders so as to provide for the equitable distribution of such orders, and establishes limitations on the use of lead and lead products. It places limitations on lead scrap toll agreements and on inventories of pig lead, lead alloys, and lead products. It explains the conditions under which reports are required in connection with production, receipt, shipment, use, and inventories of lead and materials containing lead.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government;

(b) "Primary refiner" means any person who produces lead in refinery shapes mainly from lead ores and concentrates, or who has such lead produced for him on toll agreement;

(c) "Secondary refiner" means any person who produces lead in refinery shapes mainly from lead scrap;

(d) "Dealer" means any person who receives physical deliveries of pig lead, lead-base alloy, lead scrap, or lead products, and sells or holds same for resale without change in form.

(e) "Import" means to transport in any manner into the continental United States from areas outside the continental United States, including territories and possessions. It includes shipments into foreign-trade zones, customs bonded warehouses, and customs custody, except when such shipments are merely in transit through the continental United States, to destinations outside the continental United States, as shown by the bills of lading or other shipping documents. However, if any such material in transit is halted or diverted to a destination in the continental United States or subjected to processing or manufacture in the continental United States, it becomes an "import" for the purposes of this order.

(f) "Base period" means the 6 months' period ending June 30, 1950.

SEC. 3. *Lead forms and materials to which this order applies.* This order applies to the following lead forms and materials: Pig lead, lead-base alloys, lead scrap, and lead products. For the purpose of this order these items are defined as follows:

(a) "Pig lead" means and includes soft lead and antimonial lead in refinery shapes current in the trade.

(b) "Lead-base alloy" means any alloy containing 50 percent or more of lead metal by weight.

(c) "Lead scrap" means all materials or objects which are the waste or by-product of industrial fabrications or processes, or which have been discarded for obsolescence, failure, or other reason, and which contain lead commercially recoverable.

(d) "Lead products" means semi-processed materials, finished parts or sub-assemblies which have been produced from pig lead or lead-base alloys.

SEC. 4. *Limitations on acceptance of rated orders.* Unless specifically directed by the National Production Authority, commencing on May 1, 1951:

(a) No primary refiner or secondary refiner (as defined in section 2 of this order), and no producer of lead products (as defined in section 3 of this order) shall be required to accept rated orders for any of the lead forms and materials defined in section 3 for shipment in any one month in excess of 20 percent of his scheduled production of such materials during that month.

(b) No dealer (as defined in section 2) shall be required to accept rated orders for such lead forms and materials for shipment in any one month in excess of 20 percent of the quantity of such materials available to him during that month.

(c) No person shall be required to accept rated orders for such lead forms and materials which are not received at least 15 days prior to the first day of the month in which shipment is requested.

SEC. 5. *Limitations on use of lead.* (a) Commencing on May 1, 1951, or unless specifically authorized by the National Production Authority, no person shall put into process or otherwise use in manufacturing, treating, installation, or construction, or for maintenance, repair, and operating supplies during any one month, a total quantity by weight of pig lead, lead-base alloy, and lead products in excess of 100 percent of his average monthly use of such forms of lead during the base period; and no person shall use any of such forms of lead for any purpose or purposes other than the purpose or purposes for which such forms of lead were used by him during the base period.

(b) Pig lead, lead-base alloy, or lead products acquired by a rated order or to meet a scheduled program of the National Production Authority, may be used in addition to the quantities permitted by the provisions of paragraph (a) of this section.

(c) The use of pig lead, lead-base alloy, or lead products to fill an order rated under the priorities system established by NPA Reg. 2, or to meet any mandatory order of the National Production Authority, is permitted in addition to the use of such materials authorized by the provisions of paragraph (a) of this section.

(d) The provisions of paragraph (a) do not apply to any person who uses less than 5 short tons of pig lead, lead-base alloy, and lead products in any month.

SEC. 6. *Restrictions on toll agreements.* (a) Except with the written approval of the National Production Authority, no person shall deliver or accept delivery of lead scrap for converting, remelting, or other processing under any existing or future toll agreement or other arrangement by which title to the scrap remains vested in any person other than the processor, or pursuant to which any of the forms of lead defined in section 3 of this order in any quantities, equivalent or otherwise, is to be returned to the person delivering or owning the scrap. Application for such approval may be made by the person delivering or owning the lead scrap, or the person for whose benefit the conversion, remelting, or other processing will be effected. The provisions of this paragraph apply with equal effect to any agency or other relationship which results in a toll arrangement similar to that above-described.

(b) No person shall sell or deliver any lead forms or materials defined in section 3 to any person subject to either an express or implied condition of sale, that the lead scrap remaining after the use of the delivered material will be resold or returned to the person originally supplying such material.

(c) Persons requesting approval of toll agreements shall file with the National Production Authority a letter setting forth: the names and addresses of the parties to any existing or proposed toll or conversion agreement; the kind, grade, and form of the scrap involved; the tonnage of the scrap and the estimated tonnage of the lead forms and materials resulting; the estimated rate and the dates of delivery of such materials; the length of time such agreement or other similar agreement between the same parties has been in force; the duration of the agreement; the purpose for which such materials are to be used; and such other information as may seem pertinent and necessary.

(d) The provisions of paragraphs (a) and (b) of this section shall not apply to any agreement covering lead scrap or other lead forms or materials delivered by the General Services Administration or the Armed Forces of the United States, including the United States Coast Guard, to any person for converting, remelting, or other processing.

SEC. 7. *Assistance in placing rated orders.* Any person who is unable to place a rated order for pig lead, lead-base alloy, or lead products due to the limitations imposed by section 4 of this order, should apply to the National Production Authority, Washington 25, D. C., Ref: M–38, specifying the persons who refuse to accept the order. The National Production Authority will arrange to assist him in locating sources of supply.

SEC. 8. *Inventories.* (a) No person shall receive or accept delivery of a quantity of pig lead, lead-base alloy, or lead products, if his inventory of all such material is, or by such receipt would become, more than the smallest quantity of such material which he reasonably requires to meet his deliveries or maintain his currently scheduled rate of operations during the next succeeding 30-day period, or in excess of a "practicable minimum working inventory" as defined in NPA Reg. 1., whichever is less.

(b) No dealer shall receive or accept delivery of any quantity of lead scrap, unless during the 60 days immediately preceding the date of such acceptance he shall have made delivery or otherwise disposed of such scrap to an amount at least equal in weight to his inventory of scrap on the date of such acceptance, exclusive of the delivery to be accepted.

(c) A person may import any materials to which paragraphs (a) and (b) of this section apply acquired prior to landing without regard to the inventory restrictions of this section. However, if his inventory of such material thereby becomes in excess of the amount permitted, he may not receive further deliveries of it from domestic sources until his inventory is reduced to permitted levels. The inventory restrictions of this section do apply to any deliveries of the imported materials he makes, and to the amount of it that any person accepting delivery from him is permitted to receive.

SEC. 9. *Records and reports.* (a) Any primary refiner who produces or ships 10 short tons or more of pig lead during any month, or who has 10 short tons or more of pig lead in his possession or under his control on any day of any month, shall complete and file Bureau of Mines report form 6–1075–M, in duplicate, on or before the 25th day of February, 1951, with respect to January, 1951, and on or before the 20th day of each month thereafter with respect to such transaction or possession during the preceding month.

(b) Any secondary refiner who produces or ships 10 short tons or more of pig lead during any month, or who has 10 short tons or more of pig lead in his possession or under his control on any day of any month shall complete and file Bureau of Mines report form 6–1116–M, in duplicate, on or before the 25th day of February, 1951, with respect to January, 1951, and on or before the 20th day of each month thereafter with respect to such transaction or possession during the preceding month.

(c) Any dealer who receives or ships 5 short tons or more of pig lead during any month, or who has 10 short tons or more of pig lead in his possession or under his control on any day of any month shall complete and file Bureau of Mines report form 6–1078–M, in duplicate, on or before the 25th day of February, 1951, with respect to January, 1951, and on or before the 20th day of each month thereafter with respect to such transactions or possession during the preceding month.

(d) Any person using pig lead to produce lead products who puts into process 5 short tons or more of pig lead in any month, or who on any day of any month has in his possession or under his control 10 short tons or more of pig lead, shall complete and file Bureau of Mines report forms 6–1078–M, in duplicate, on or before the 25th day of February, 1951, with respect to January, 1951, and on or before the 20th day of each month thereafter with respect to such transactions or possession during the preceding month.

(e) All reports required by this order shall be addressed to the Bureau of Mines, Washington 25, D. C., ref: M–38, together with such number of copies as may be specified on the report form.

(f) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, production, and use, in sufficient detail to permit an audit that determines for each transaction whether the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(g) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

SEC. 10. *Applications for adjustments.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, or because any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 11. *Communications.* All communications concerning this order other than reports, shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–38.

SEC. 12. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act (P. L. 831, 77th Cong., 5 U. S. C. 139–139F).

This order as amended shall take effect on April 3, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[F. R. Doc. 51–4080; Filed, Apr. 2, 1951; 5:07 p. m.]

[NPA Order M–54]

M–54—PLATINUM

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable due to the necessity for immediate action.

Sec.
1. What this order does.
2. Definitions.
3. Restrictions on sale, purchase, delivery receipt, and manufacture.
4. Restrictions on sale or accumulation of scrap.
5. Restrictions on inventory accumulations.
6. Records and reports.
7. Application for adjustment or exception.
8. Communications.
9. Violations.

AUTHORITY: Sections 1 to 9 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp. Sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order restricts platinum deliveries to dealers, refiners, distributors, processors and consumers, prohibits the use of platinum and platinum alloys in jewelry and other items, places restrictions on the sale and delivery of scrap, prohibits delivery of platinum to processors having more than a specified amount of scrap, and limits processors' and consumers' inventories of platinum.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes agencies of the United States or any other government.

(b) "Platinum" means the metal platinum, and platinum salts, compounds, alloys, solutions, or mixtures, containing more than 0.25 percent platinum by weight, in any form, including but not limited to matte, residues, sponge, bar, sheet, wire, semifabricated forms, and partially fabricated products, but excluding ores and concentrates. It also includes scrap and secondary materials, the platinum content of which is more than 0.25 percent by weight. It does not include finished parts, articles, or equipment regardless of platinum content.

(c) "Consumer" means a person who purchases, accepts delivery of, or owns finished parts, articles, or equipment containing platinum, other than jewelry, for use for any purpose other than resale or investment.

(d) "Processor" means a person who uses platinum by incorporating it in the parts, articles, or products which he manufactures, and includes a person who produces dental restorations.

(e) "Dealer" means a person who makes a regular business of buying and selling platinum at an established address in the continental United States.

(f) "Distributor" means a person who makes a regular business of acting as buying or selling agent for dealers or processors at an established address in the continental United States.

(g) "Refiner" means a person regularly engaged in the business of refining platinum.

(h) "Process" means cut, draw, machine, stamp, melt, alloy, cast, forge, roll, turn, spin, or otherwise alter by physical or chemical means. The term does not include buffing or polishing an assembled article.

(i) "Put into process" means the first change by the processor in the form of material from that form in which it is received by him.

(j) The term "assemble" shall mean the normal putting together of components or parts but shall not be deemed to include the putting together of an article after delivery to a sales outlet or consumer in knockdown form pursuant to an established custom. The term "assemble" shall also not be deemed to include adding stones or finished parts to an otherwise finished article when the placing of one or more stones or finished parts, or the size or type of one or more stones or finished parts, is determined by the choice of the ultimate consumer or the use to which the ultimate consumer is to put the article.

(k) The terms "deliver" and "receive" shall be deemed to include deliveries and receipts under toll agreements.

(l) "Finished parts, articles, or equipment" means products which are finished to the extent that they are ready for their final end-use without further processing or are ready for attachment to equipment or parts of equipment which are not platinum.

(m) "Scrap" means all platinum materials or objects which are the waste or by-product of processing, or which have been discarded on account of wear, failure, obsolescence, or other reason.

SEC. 3. *Restrictions on sale, purchase, delivery, receipt, and manufacture.* (a) Commencing on April 1, 1951, no person shall: (1) Sell, transfer, or otherwise deliver platinum except to a person known by the seller or transferror to be a refiner, dealer, distributor, processor, or consumer of platinum; or purchase or accept delivery of platinum unless he is a refiner, dealer, distributor, processor, or consumer of platinum; (2) sell, transfer, or otherwise deliver platinum to any person for use in the manufacture of any item included in List A annexed to this order, or purchase or accept delivery of platinum for use in the manufacture of any item included in such List A.

(b) Commencing on April 1, 1951, no person shall put into process any platinum in the manufacture of any item included in List A annexed to this order. However, this prohibition shall not apply to such use of any platinum which was in such person's inventory on April 1, 1951, or to the platinum content of any completed jewelry or parts thereof. Every person who relies on the provisions of the preceding sentence shall prepare a detailed record showing the quantities of platinum in his inventory on the first days of January, February, March, and April 1951, and the platinum content of any completed jewelry or parts thereof delivered to him after March 31, 1951. Such record shall be maintained for at least 2 years and shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) The restrictions of paragraphs (a) and (b) of this section shall not prohibit the sale, delivery, purchase, or receipt of jewelry or parts thereof which are finished and complete except for the addition of stones or other finished parts or which are finished and complete except for buffing or polishing.

(d) Commencing on April 1, 1951, and except as permitted by paragraph (b) of this section, no person may use in the manufacture of any article, or any component part thereof, a greater quantity of platinum, or an alloy containing a greater percentage of platinum, than is necessary for functional or operational purposes.

(e) The prohibitions of this section apply notwithstanding the provisions of NPA Reg. 2 with respect to the filling of rated orders.

(f) The provisions of paragraph (a) of this section shall not apply to any delivery of platinum to the General Services Administration for the stockpile of strategic materials.

SEC. 4. *Restrictions on sale or accumulation of scrap.* (a) No processor shall purchase or accept delivery of any platinum if he owns or has in his possession more than a 30-day accumulation of scrap, exclusive of sweepings, unless such accumulation aggregates less than 25 ounces, platinum content, or unless it is in the process of being refined: *Provided, however,* That a processor who refines his own scrap may purchase or accept delivery of platinum if he owns or has in his possession not more than a 60-day accumulation of scrap.

(b) No person shall sell or deliver scrap except to a distributor, a dealer, or a refiner: *Provided, however,* That dental scrap may be sold to a person who produces or sells dental alloys.

SEC. 5. *Restrictions on inventory accumulations.* (a) No processor or consumer shall purchase or accept delivery of platinum in the form of raw materials, semiprocessed materials, subassemblies, finished parts, or finished products if the total platinum content of his inventory in all forms, including finished parts and products but excluding scrap in the process of being refined, is, or by such receipt would become, in excess of the quantity of platinum contained in the final products required to meet his deliveries or supply his services on the basis of his scheduled method and rate of operation during the succeeding 60-day period, or in excess of a "practicable minimum working inventory" as defined in NPA Reg. 1, whichever is less.

(b) Except as otherwise provided by this section, NPA Reg. 1, and particularly § 10.11 thereof entitled "Imported Materials," will apply to platinum.

(c) This order does not require the disposal of excess inventory already on hand, but such excess inventory may be subject to requisition as provided by section 201 (a) of Title II of the Defense Production Act of 1950.

SEC. 6. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by the order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942. (Pub. Law. 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 7. *Application for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an

undue or exceptional hardship upon him not suffered generally by others in the same trade or industry or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 8. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C. Ref: M-54.

SEC. 9. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of the National Production Authority or wilfully conceals a material factor or furnishes false information in the course of operation under this order is guilty of a crime, and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order shall take effect on March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

LIST A

(See section 3)

Jewelry, including but not limited to:
- Badges.
- Bracelets.
- Brooches.
- Buckles.
- Buttons.
- Chains.
- Combs.
- Cuff links.
- Earrings.
- Hair and head ornaments.
- Insignia.
- Medallions and other objects of personal adornment.
- Pendants.
- Rings.
- Studs.
- Watch cases.

Miscellaneous:
- Bookbinding.
- Candlesticks.
- Cigarette cases.
- Electroplating (except for functional purposes).
- Flatware.
- Hardware.
- Leather goods.
- Lettering.
- Lighters.

Miscellaneous—Continued
- Medals, trophies and objects of art.
- Metalized glass and ceramic ware.
- Musical instruments.
- Optical frames.
- Pencils.
- Pens (except pen point tips).
- Picture frames.
- Sign painting.
- Tableware.
- Toilet sets.
- Decorative and ornamental uses, not elsewhere specified.

[NPA Order M-55]

M-55—FARM EQUIPMENT

This order is found necessary and appropriate to promote the national defense and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order consultation with industry representatives was impracticable due to the necessity for immediate action and because the order affects a large number of users in different segments of the industry.

Sec.
1. What this order does.
2. Definitions.
3. Authorization of ratings.
4. Application of ratings.
5. Certification of ratings.
6. Inventory.
7. Application for adjustment or exception.
8. Records and reports.
9. Communications.
10. Violations.

AUTHORITY: Sections 1 to 10 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong. Sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp. Sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order authorizes producers of farm equipment to apply a rating to obtain delivery of materials for June 1951 from their regular suppliers. The amount of such DO rated orders that may be placed is limited as herein provided.

SEC. 2. *Definitions.* As used in this order:

(a) "Farm equipment" means any item of farm machinery, equipment, or repair parts listed in Schedule I of this order.

(b) "Producer" means any person engaged in the manufacture or production of farm equipment.

(c) "Production material" means aluminum, copper, steel, zinc, or textiles.

(d) "Component part" means a component part required to be physically incorporated into or attached to any piece of farm equipment.

(e) "Base period" means the period commencing January 1, 1950, and ending June 30, 1950.

(f) "June 1951 requirements" of a production material means the tonnage or yardage required by a producer for his June 1951 consumption of such production material, limited, however, to one-sixth of the tonnage or yardage of such production material received by such producer during the base period for the manufacture of farm equipment.

(g) "June 1951 requirements" of a component part means the quantity required by a producer for his June 1951 use of such component part, limited, however, to one-sixth of the quantity (measured by units) of such component part received by such producer during the base period.

SEC. 3. *Authorization of ratings.* Each producer of farm equipment is hereby authorized to apply a DO-87 rating to obtain delivery of his June 1951 requirements of each production material and of each component part: *Provided*, That the orders placed by him to cover his said June 1951 requirements of aluminum, copper, and zinc, whether rated or otherwise, shall be limited as to each production material to the respective tonnages of his said June 1951 requirements. This order applies only to June 1951 requirements. DO-87 rated orders for June 1951 requirements must be placed in accordance with lead time requirements of applicable NPA orders. In no event may such orders be placed subsequent to May 31, 1951. No producer shall apply a DO-87 rating, and no other person shall extend a DO-87 rating to secure production materials or component parts except to a person who during the 2 years preceding the effective date of this order has been a regular supplier of the producer so applying or other person so extending: *Provided*, That the restrictions of this sentence shall not apply to DO-87 orders which have been rejected solely because of the set-aside provisions of some other applicable NPA order.

SEC. 4. *Application of ratings.* When a DO-87 rating is applied by a producer to a supplier, it may be extended in accordance with NPA Reg. 2 (except in those cases mentioned in the last sentence of this section). No person shall apply or extend a DO-87 rating except in accordance with the provisions of this order and said Reg. 2. Certain provisions of this order (a) require a change in the certification required by NPA Reg. 2, (b) limit the application of the rating DO-87 to the procurement of June 1951 requirements of a production material or of a component part, and (c) limit the class of suppliers among whom the rating DO-87 may be applied. The provisions of this order shall prevail over the conflicting provisions of NPA Reg. 2, but all other provisions of NPA Reg. 2 shall continue in full force and effect. The authorization in this order to apply DO-87 ratings shall supersede the use limitations contained in other applicable NPA orders, except where such uses are specifically prohibited. Any producer of component parts who has received special authorization from NPA to adjust his base quota to permit use of additional copper for component parts for farm equipment shall reduce any such additional amount to the extent that he extends DO-87 rated orders for copper.

SEC. 5. *Certification of ratings.* When a person applies or extends such a rating, the certification shall read as follows:

"Certified under NPA Order M-55 and NPA Reg. 2."

Such certification constitutes a representation to the recipient and to NPA that the person applying or extending the rating is authorized under the provisions of this order to so apply or extend a DO-87 rating.

SEC. 6. *Inventory.* The provisions of Reg. 1 requiring inventories to be limited to practicable minium working inventories shall continue in full force and effect. Accordingly, DO-87 ratings shall not be applied if such application would increase inventories beyond such practicable minimum.

SEC. 7. *Application for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, or because any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry or its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 8. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139-139F).

SEC. 9. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C. Ref.: M-55.

SEC. 10. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with said Federal Reports Act.

This order shall take effect on March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

SCHEDULE I

Planting, seeding, and fertilizing machinery:
- Planters, corn and cotton.
- Potato planters (horse and tractor drawn).
- Transplanters.
- Beet and bean drills or planters.
- Grain drills.
- Broadcast seeders.
- Garden planters.
- Fertilizer distributors.
- Lime spreaders.
- Manure spreaders and loaders.
- Other planting, seeding, and fertilizing machines.

Farm plows and listers:
- Moldboard plows.
- Disc plows.
- Disc tillers.
- Listers and middlebusters.
- Sub-soil plows.
- Plow stocks.
- Other plows.

Harrows, rollers, pulverizers, and stalk cutters:
- Harrows.
- Rollers.
- Soil pulverizers and packers.
- Stalk cutters.
- Ridge busters.

Cultivators and weeders:
- Cultivators.
- Rotary hoes.
- Weeders, drawn or mounted.
- Other cultivators and weeders.
- Tool bar carriers.

Farm sprayers, dusters, and orchard heaters:
- Power sprayers.
- Hand sprayers with tank, barrel, knapsack, etc., with complete equipment (capacity 1 quart or over but less than 6 gallons).
- Hand pump sprayers (capacity 6 gallons or more).
- Spray pumps, power.
- Weed and pear burners.
- Dusters.
- Orchard heaters.

Harvesting machinery:
- Combines.
- Grain and rice binders.
- Corn binders.
- Corn pickers.
- Field forage harvesters.
- Potato diggers and pickers.
- Bean cutters or pullers.
- Sugar beet and cane harvesting equipment.
- Other harvesting equipment.

Farm haying machinery:
- Mowers.
- Rakes.
- Hay loaders.
- Stackers.
- Pick-up hay balers and bale loaders.
- Other haying machinery.

Machines for preparing crops for market or use:
- Stationary threshers.
- Peanut pickers.
- Ensilage cutters.
- Feed cutters—hand and power.
- Corn shellers.
- Corn huskers and shredders.
- Stationary hay and straw balers.
- Feed grinders and crushers (farm).
- Grain cleaners and graders.
- Sorters and graders.
- Maple syrup evaporators.
- Cane syrup evaporators.
- Cane mills—farm size.
- Cider mills and fruit presses.
- Other machines for preparing crops for market or use.

Farm elevators and blowers:
- Elevators—portable.
- Elevators—stationary.
- Blowers—grain and forage.

Tractors:
- Farm tractors, wheel type.
- Garden tractors (for vegetable gardens).

Farm wagons, gears, and trucks (not motor):
- Wagons and trucks.
- Wagon bodies.
- Trailers—farm.
- Other transporting equipment (not motor trucks).

Domestic water systems (farm type):
- Deep and shallow well systems.
- Power pumps.
- Water well casing.

Farm pumps and windmills:
- Pumps, water.
- Windmills.
- Pump jacks.

Irrigation equipment:
- Irrigation pumps.
- Distribution equipment.
- Other farm irrigation equipment.

Dairy farm machines and equipment:
- Milking machines.
- Farm cream separators.
- Farm milk coolers.
- Farm butter making equipment.
- Other dairy farm equipment.

Barn and barnyard equipment:
- Feed carriers, litter carriers, and feed trucks.
- Hay unloading equipment.
- Cattle stalls, pen equipment, and stanchions.
- Livestock drinking cups and watering bowls.
- Barnyard stock tanks.
- Feeders, feed cookers, and tank heaters.
- Barn cleaners.
- Other barn and barnyard equipment.

Farm poultry equipment:
- Incubators.
- Floor brooders.
- Battery brooders (heated).
- Growing and laying batteries.
- Poultry feeders.
- Poultry waterers and water heaters.
- Laying nests and grit boxes.
- Other farm poultry equipment.

Miscellaneous farm equipment:
- Beekeepers' supplies.
- Silo fittings.
- Horse shoes—including mule and oxen shoes.
- Harness hardware.
- Power sheep-shearing machines.
- Electric fence controllers.
- Farm electric plants.

Attachments and repair parts:
- Attachments and repair parts specifically designed for the above-listed equipment.

[F. R. Doc. 51-4082; Filed, Apr. 2, 1951; 5:08 p. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter C—Procedural Regulations

[Regs., Serial No. PR-10]

PART 300—PRINCIPLES OF PRACTICE OF THE CIVIL AERONAUTICS BOARD

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 27th day of March 1951.

Although the standards and principles which usually govern the proceedings of judicial bodies have always been applicable to the Board in the conduct of its quasi-judicial functions, the Board has not previously reduced to written form those principles of practice by which the Board and the persons appearing before it should be governed. In December of 1950 the Board requested a representative committee of industry counsel established as the Civil Aeronautics Board Advisory Committee on Practices and Procedures to assist and to advise it in formulating procedures and practices with respect to proceedings before the Board. As an initial phase in its activity, a statement of rules of conduct which will serve as a guide for all parties and the Board and its staff in relation to proceedings before the Board has been recommended by the Committee and as modified is being adopted and promulgated by the Board as a guide to all parties in relation to matters pending before the Board.

In consideration of the foregoing the Civil Aeronautics Board hereby makes and promulgates a new Part 300 to the Board's Procedural Regulations to read as follows, effective March 30, 1951:

Sec.
300.0 Applicability of part.
300.1 Judicial standards of practice.
300.2 Hearing cases; improper influence.
300.3 Conciseness of presentation.
300.4 Unusual hospitality.
300.5 Attorney-client relationship.
300.6 Violations.

AUTHORITY: §§ 300.0 to 300.6 issued under sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply sec. 1001, 52 Stat. 1017; 49 U. S. C. 641.

§ 300.0 *Applicability of part.* The principles of practice set out in this part to the extent applicable shall govern the relationships between the Board, its staff, and all other persons.

§ 300.1 *Judicial standards of practice.* In many respects the functions of the Board are similar to those of a court and parties to cases before it and those who represent such parties are expected to conduct themselves with honor and dignity. By the same token, the members of the Board, and those of its employees who participate with the Board Members in the determination of cases upon a record, are expected to conduct themselves with the same fidelity to standards of propriety that characterize a court and its staff. The standing and effectiveness of the Board are in direct relation to its observance, that of its staff, and the parties and attorneys appearing before it, of the highest standards of judicial and professional ethics.

§ 300.2 *Hearing cases; improper influence.* It is essential in cases to be determined after notice and hearing and upon a record that the Board's judicial character be recognized and protected. In such cases:

(a) It is improper that there be any private communication on the merits of the case to a member of the Board or its staff or to the examiner in the case by any person, either in private or public life, unless provided for by law.

(b) It is likewise improper that there be any private communication on the merits of the case to a member of the Board or to the examiner in the case by any members of the Board's staff who participate in the hearing as witnesses or as counsel.

(c) It is improper that there be any effort by any person interested in the case to sway the judgment of the Board by attempting to bring pressure or influence to bear upon the members of the Board or its staff, or that such person or any member of the Board's staff, directly or indirectly, give statements to the press or radio, by paid advertisements or otherwise, designed to influence the Board's judgment in the case.

§ 300.3 *Conciseness of presentation.* Persons practicing before the Board should endeavor to present their cases in concise form avoiding cumulative and repetitious evidence, since the members of the Board participating in the decision of a case, after notice and hearing and upon a record, must familiarize themselves with the evidence in the record and with the arguments made on behalf of the parties orally and in written briefs, and must base their decision solely on the record.

§ 300.4 *Unusual hospitality.* It is particularly improper that persons interested in the business of the Board should provide unusual hospitality to the Board or its staff; nor should such hospitality be accepted.

§ 300.5 *Attorney-client relationship.* Persons practicing or appearing before the Board, whether or not members of the bar, should have due regard for the standards of professional conduct applicable to the lawyer-client relationship and to the relationship between a lawyer and a judicial tribunal.

(a) The nontechnical nature of the Board's procedure calls for special adherence, by practitioners, to scrupulous standards of fairness, candor, and consideration for the rights of others in the pleadings filed, evidence submitted, conduct of the hearing, and briefs and arguments made. In appearing for a client, the practitioner thereby vouches on his honor that in his opinion the client's cause is one proper for determination, and in presenting pleadings and offering evidence he represents that the same are not offered for unwarranted delay and that in his opinion the content thereof is not misleading. Nor should he indulge in offensive personalities, unseemly wrangling, or intemperate accusations or characterizations.

(b) A practitioner, moreover, should advise his client to observe the law according to his conscientious belief as to its permissible meaning and should use his best efforts to restrain his client from improprieties in dealing with the Board or its staff. If a client persists in such improprieties, the practitioner should terminate their relationship.

§ 300.6 *Violations.* The Board may disqualify and deny temporarily or permanently, the privilege of appearing or practicing before it in any way to any person who is found after hearing by the Board to have engaged in unethical or improper professional conduct. Violation of any of the foregoing principles shall be deemed to be such conduct.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 51-4007; Filed, Apr. 3, 1951; 8:52 a. m.]

TITLE 20—EMPLOYEES' BENEFITS

Chapter I—Bureau of Employees' Compensation, Department of Labor

MISCELLANEOUS AMENDMENTS TO CHAPTER

The following amendments are issued to Title 20, Chapter I:

Subchapter A—Procedures

PART 01—STATEMENT OF PROCEDURES

Part 01 of Subchapter A of this chapter is hereby amended by adding a new subpart G as follows:

SUBPART G—COMPENSATION FOR INJURY, DISABILITY OR DEATH OF CIVILIAN AMERICAN CITIZENS INCURRED WHILE DETAINED BY OR IN HIDING FROM THE IMPERIAL JAPANESE GOVERNMENT

Sec.
01.61 General procedures.
01.62 Forms.

AUTHORITY: §§ 01.61 to 01.62 issued under sec. 32, 39 Stat. 749; 5 U. S. C. 783.

§ 01.61 *General procedures.* The procedure in respect to the administration of the benefit provisions of section 5 (f) of the War Claims Act of 1948 (Act of July 3, 1948, Public Law 896, 80th Congress, 62 Stat. 1240) is set forth in detail by regulations in Subchapter G of this chapter and, by reference therein, to pertinent regulations in Subchapter F of this chapter. Under such regulations claims must be filed directly with the Bureau, except claims originating in the Philippine Islands which may however be filed with the field representative of the Bureau in Manila, P. I. All claims are processed directly by the Bureau through its Claims Branch with supplementary actions by other Branches of the Bureau as a particular case may require, including final audit by the Audit and Accounting Branch. The final authority in the Bureau in the approval or rejection of claims is the Director or Acting Director thereof. Hearings are not authorized by the applicable statute, and the adjudication of cases is upon written evidence as in other cases under the Federal Employees' Compensation Act of September 7, 1916.

§ 01.62 *Forms.* Forms used in connection with the administration of benefits provided by section 5 (f) of the said War Claims Act of 1948 are as follows:

WC-3—Claim for Injury or Disability Benefits by Civilian American Citizen.
WC-3A—Medical Report of Attending Physician.
WC-3B—Claim for Continuance of Disability Benefits by Civilian American Citizen.
WC-4—Claim for Death Benefits by Survivors of Deceased Civilian American Citizens.
CA-12—Same as under the Federal Employees' Compensation Act.
CA-13—Same as under the Federal Employees' Compensaton Act.
CA-13A—Same as under the Federal Employees' Compensation Act.
CA-14—Same as under the Federal Employees' Compensation Act.
CA-42—Same as under the Federal Employees' Compensation Act.
CA-43—Same as under the Federal Employees' Compensation Act.
Std. 69—Same as under the Federal Employees' Compensation Act.
Std. 1012—Same as under the Federal Employees' Compensaton Act.
Std. 1034—Same as under the Federal Employees' Compensation Act.

Subchapter F—Compensation for Injury, Disability, Death, or Enemy Detention of Employees of Contractors With the United States

PART 61—GENERAL ADMINISTRATIVE PROVISIONS

1. Paragraph (a) of § 61.1, Subchapter F of this chapter is hereby amended by deleting the next to the last sentence thereof and by substituting therefor the following: "Total compensation payable for injury or death may not exceed the limitations specified in section 14 (m) of the Longshoremen's Act as such section may be amended from time to time except as hereinafter set forth in this paragraph. Any amendment to the Longshoremen's Act, the effect of which is to increase the amount of benefits payable for injury or death, shall be applied in the administration of benefits payable under this subchapter as if the amendment had been in effect at the time of occurrence of the particular injury or death, and the compensation (except funeral and burial expenses) in any case determined prior to such amendment shall be adjusted accordingly in respect to the beneficiaries entitled thereto under this subchapter. Any amendment to the Longshoremen's Act, the effect of which is to decrease the amount of benefits payable for injury or death shall not be applied in the administration of benefits payable under this subchapter if such amendment should reduce the aggregate amount of compensation payable to less than $7,500 in case of disability or less than $7,500 in case of death. Any such maximum limitation of compensation payable shall be exclusive of medical costs and funeral and burial expenses."

2. Paragraph (b) of § 61.1, Subchapter F of this chapter is hereby amended by adding the following unnumbered paragraph:

Under the provisions of the act of December 23, 1943 (Public Law 216, 78th Congress, 57 Stat. 626, 42 U. S. C. 1701 (b)) the amount of benefits credited to the account of a person who falls within subparagraphs (1) or (2) of this paragraph, for purposes of this paragraph only, shall be one hundred per cent of the average weekly wages of such person subject, however, to other limitations specified in such act; seventy per cent of the average weekly wages of such person shall be paid to his dependent or dependents irrespective of the limitations in sections 9 of the Longshoremen's and Harbor Workers' Compensation Act, but subject to other limitations in the act of December 23, 1943, concerning distribution and disbursement to dependents. In all cases falling within subparagraphs (1) and (2) of this paragraph, benefits for detention shall accrue from January 1, 1942, unless the beginning of the absence occurred upon a later date, in which event benefits accrue from such later date.

3. Section 61.2, Subchapter F of this chapter is amended by adding the following paragraph:

(g) Compensation for disability under this subchapter, except under allowances for scheduled losses of members or functions of the body, shall not be paid in any case in respect to any period of time during which benefits for detention may accrue under this subchapter in the same case.

(Sec. 32, 39 Stat. 749, sec. 106, 56 Stat. 1033; 5 U. S. C. 783, 42 U. S. C. 1706)

Subchapter G—Compensation for Injury, Disability or Death of Civilian American Citizens Incurred While Detained by or in Hiding From the Imperial Japanese Government

This chapter is hereby amended by adding a new Subchapter G as follows:

PART 71—GENERAL PROVISIONS

Sec.
71.1 General administrative provisions.
71.2 Computation of benefits.
71.3 Deductions from benefits.
71.4 Limitation upon benefits.
71.5 Payment of benefits.
71.6 Notice of injury or death.
71.7 Claim filing, processing, adjudication and time limits.

AUTHORITY: §§ 71.1 to 71.7 issued under sec. 32, 39 Stat. 749, sec. 106, 56 Stat. 1033; 5 U. S. C. 783, 42 U. S. C. 1706. Interpret or apply sec. 5, 62 Stat. 1243; 50 U. S. C. Sup., 2004.

§ 71.1 *General administrative provisions.* (a) Section 5 (f) of the War Claims Act of 1948 (act of July 3, 1948; Public Law 896, 80th Cong., 62 Stat. 1240) makes provision for the payment of benefits with respect to the injury, disability or death resulting from injury of any civilian American citizen occurring while he was held by or in hiding from the Imperial Japanese Government to the same extent as if such civilian American citizen were an employee within the purview of the act of December 2, 1942 (Public Law 784, 77th Cong., 56 Stat. 1028, 42 U. S. C. 1701, et seq.). Under section 5 (f) of the said War Claims Act of 1948, the rights of individuals to benefits payable under this subchapter shall accrue from and after December 7, 1941, subject, however, to all of the provisions of said act and the regulations in this subchapter.

(b) The regulations in Part 61 of Subchapter F of this chapter governing the administration of the benefits provided under Titles I and II of the said act of December 2, 1942, as amended, shall, insofar as they are applicable and are not inconsistent with any of the provisions of this subchapter, govern the administration of the benefits payable under this subchapter. Provisions of such regulations relating to benefits for detention by the enemy, reimbursement to an employer or insurance carrier, and limitations on benefits in cases where workmen's compensation is payable are not applicable to the benefits provided in this subchapter nor are they within the purview of this subchapter. The provisions of sections 101 (b), 104 and 105 of such act of December 2, 1942, and the various provisions of Part 61 of this chapter relating to such provisions, accordingly, are not applicable to the payment of benefits under this subchapter.

(c) All rights or benefits under this subchapter which are determinable with reference to other provisions of law other than the said War Claims Act of 1948, shall be determined with reference to such provisions as they existed and were in force on January 3, 1948.

(d) As used in this subchapter:

(1) The term "Bureau" means the Bureau of Employees' Compensation, United States Department of Labor.

(2) The term "civilian American citizen" means any person who, being then a citizen of the United States, was captured by the Imperial Japanese Government on or after December 7, 1941, at Midway, Guam, Wake Island, the Philippine Islands, or any Territory or possession of the United States attacked or invaded by such government or while in transit to or from any such place, or who went into hiding at any such place in order to avoid capture or internment by such government; except (i) a person who at any time voluntarily gave aid to, collaborated with, or in any manner served such government, or (ii) a person who at the time of his capture or entrance into hiding was within the purview of the Federal Employees' Compensation Act of September 7, 1916, as amended and extended, or the said act of December 2, 1942, as amended, or the Missing Persons Act of March 7, 1942 (56 Stat. 143), as amended, or who was a regularly appointed, enrolled, enlisted, or inducted member of any military or naval force.

(3) The terms "held by the Imperial Japanese Government" or "captured by the Imperial Japanese Government" mean a holding of such person as a prisoner, internee, hostage or in any other capacity.

(4) The terms "compensation", "physician" and "medical, surgical and hospital services and supplies" shall be construed and applied as defined in the Federal Employees' Compensation Act of September 7, 1916, as amended.

(5) The term "benefit" is construed as synonymous with the term "compensation".

(6) The terms "disability", "wages", "child", "grandchild", "brother", "sister", "parent", "widow", "widower", "adoption" or "adopted" shall be construed and applied as defined in the Longshoremen's and Harbor Workers' Compensation Act, as amended.

§ 71.2 *Computation of benefits.* (a) For the purpose of determining the benefits under this subchapter, the average weekly wage of any such civilian American citizen, whether employed, self-employed, or not employed, shall be deemed to have been $37.50. The provisions of this subchapter are applicable and benefits are payable whether or not such civilian American citizen was employed. Monthly compensation in cases involving partial disability shall be determined by the percentage which the degree of partial disability bears to total disability, and shall not be determined with respect to the extent of loss of wage-earning capacity.

(b) Notwithstanding any of the provisions of Part 61 of this chapter, total maximum aggregate compensation for disability payable under this subchapter is limited to $7,500 in case of injury and $7,500 in case of death, such sum being exclusive of medical costs and funeral and burial expenses.

§ 71.3 *Deductions from benefits.* If a civilian American citizen or his dependent receives or has received from the United States any payments on account of the same injury or death, or from his employer in the form of wages or payments in lieu of wages, or in any form of support or compensation (including workmen's compensation) in respect to the same objects, the benefits under this subchapter shall be diminished in the case of an injured person by the amount of payments such injured person received on account of the same injury or disability, or in the case of dependents, by the amount of payments such dependents of the deceased civilian American citizen received on account of the same death, as the case may be.

§ 71.4 *Limitation upon benefits.* No person, except a widow or a child, shall be entitled to benefits under this subchapter for disability with respect to himself and to death benefits on account of the death of another.

§ 71.5 *Payment of benefits.* (a) Benefits under this subchapter payable for disability or death shall be paid only to the person entitled thereto, or to his legal or natural guardian if he has one, and shall not upon death of the person so entitled survive for the benefit of his estate or any other person.

(b) The benefit of a minor or an incompetent person who has no natural or legal guardian may, in the discretion of the Bureau be paid in whole or in such part as the Bureau may determine, for and on behalf of such minor or incompetent directly to the person or institution caring for, supporting or having custody of such minor or incompetent.

(c) In any case in which benefits are payable under this subchapter to any person who is prevented from accepting such benefits by the rules, regulations or customs of the church or the religious order or organization of which he is a member, such benefits will be paid, upon the request of such person, to such church or to such religious order or organization.

§ 71.6 *Notice of injury or death.* Notwithstanding any of the provisions in Part 61 of this chapter, no notice or report of injury or death shall be required for claims filed under this subchapter.

§ 71.7 *Claim filing, processing, adjudication and time limits.* (a) Claims for injury, disability or death benefits payable under section 5 (f) of the said War Claims Act of 1948, originating in the United States or in its Territories or possessions, shall be filed by mailing to the Bureau of Employees' Compensation, United States Department of Labor, Washington 25, D. C. All claims originating in the Philippine Islands may be filed by mailing to the Bureau of Employees' Compensation, United States Department of Labor, Manila, P. I. All claims will be finally processed and adjudicated by the Bureau at its principal office in Washington, D. C.

(b) The limitation provisions for the filing of claims for disability or death benefits, as prescribed by applicable provisions of statute, shall not begin to run earlier than July 3, 1948.

Signed at Washington, D. C., this 27th day of March 1951.

MAURICE J. TOBIN,
Secretary of Labor.

[F. R. Doc. 51-3944; Filed, Apr. 3, 1951; 8:47 a. m.]

TITLE 24—HOUSING AND HOUSING CREDIT

Chapter VIII—Office of Housing Expediter

[Controlled Housing Rent Reg., Atlantic County Defense-Rental Area, Amdt. 32]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

ATLANTIC COUNTY DEFENSE-RENTAL AREA

Amendment 32 to the Controlled Housing Rent Regulation for the Atlantic County Defense-Rental Area (§§ 825.61 to 825.72). Said rent regulation is hereby amended in the following respect:

Section 825.61 (a) is amended to read as follows:

(a) *Housing and defense-rental area to which §§ 825.61 to 825.72, inclusive, apply.* Sections 825.61 to 825.72, inclusive, apply to all housing accommodations in the Atlantic County Defense-Rental Area, consisting of the County of Atlantic, New Jersey, except as provided in paragraph (b) of this section. The Atlantic County Defense-Rental Area is referred to hereinafter in §§ 825.61 to 825.72, inclusive, as the "defense-rental area."

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Supp., 1894)

This amendment shall become effective March 30, 1951.

Issued this 30th day of March 1951.

TIGHE E. WOODS,
Housing Expediter.

[F. R. Doc. 51-4037; Filed, Apr. 3, 1951; 8:56 a. m.]

[Controlled Housing Rent Reg., Amdt. 363]

[Controlled Rooms in Rooming Houses and Other Establishments Rent Reg., Amdt. 358]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

MISCELLANEOUS AMENDMENTS

Amendment 363 to the Controlled Housing Rent Regulation (§§ 825.1 to 825.12) and Amendment 358 to the rent regulation for Controlled Rooms in Rooming Houses and Other Establishments (§§ 825.81 to 825.92). Said regulations are amended in the following respects:

1. Schedule C, including the heading thereof, of §§ 825.1 to 825.12, inclusive, and §§ 825.81 to 825.92, inclusive, is hereby revoked and deleted.

2. Paragraph (a) of § 825.1 is amended to read as follows:

(a) *Housing and defense-rental areas to which §§ 825.1 to 825.12, inclusive, apply.* (1) Sections 825.1 to 825.12, inclusive (except the provisions contained in Schedule B) apply to all housing accommodations within each of the defense-rental areas and each of the portions of a defense-rental area (each of which is referred to hereinafter in §§ 825.1 to 825.12 as the "defense-rental area"), which are listed in Schedule A except as provided in paragraph (b) of this section.

(2) In Schedule A, the "maximum rent date" and the "effective date of regulation," as established under the rent regulation, issued pursuant to the Emergency Price Control Act of 1942, as amended, are given for each defense-rental area listed. More than one effective date is given for different portions of a defense-rental area where the same effective date is not applicable to the entire defense-rental area.

(3) In Schedule B are set forth provisions which modify or supplement §§ 825.1 to 825.12 insofar as they are applicable to certain individual defense-rental areas, or portions thereof.

3. Paragraph (a) of § 825.81 is amended to read as follows:

(a) *Rooms in rooming houses, hotels and other establishments and defense-rental areas to which §§ 825.81 to 825.92, inclusive, apply.* (1) Sections 825.81 to 825.92, inclusive (except the provisions contained in Schedule B), apply to all rooms in hotels, rooming houses, and other establishments and to all accommodations brought under §§ 825.81 to 825.92, inclusive, by consent of the Area Rent Director pursuant to paragraph (e) of this section and to all accommodations brought under the "Hotel Regulation" by consent of the Area Rent Director pursuant to section 1 (e) of that regulation, within each of the defense-rental areas and each of the portions of a defense-rental area (each of which is referred to hereinafter in §§ 825.81 to 825.92, inclusive, as the "defense-rental area"), which are listed in Schedule A, except as provided in paragraph (b) of this section.

(2) In Schedule A of §§ 825.81 to 825.92, inclusive, the "maximum rent date" and the "effective date of regulation" as established under the rent regulations issued pursuant to the Emergency Price Control Act of 1942, as amended, is given for each defense-rental area listed. More than one effective date is given for different portions of a defense-rental area where the same effective date is not applicable to the entire defense-rental area.

(3) In Schedule B are set forth provisions which modify or supplement §§ 825.81 to 825.92, inclusive, insofar as they are applicable to certain individual defense-rental areas or portions thereof.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup., 1894)

This amendment shall be effective March 30, 1951.

Issued this 30th day of March 1951.

TIGHE E. WOODS,
Housing Expediter.

[Controlled Housing Rent Reg., Amdt. 364]

[Controlled Rooms in Rooming Houses and Other Establishments Rent Reg., Amdt. 359]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

NEW JERSEY

Amendment 364 to the Controlled Housing Rent Regulation (§§ 825.1 to 825.12) and Amendment 359 to the rent regulation for Controlled Rooms in Rooming Houses and Other Establishments (§§ 825.81 to 825.92). Said regulations are amended in the following respects:

1. Schedule A, Item 138a, is amended to read as follows:

Camden County, except the Boroughs of Audubon, Haddonfield and Merchantville; Gloucester County; and Burlington County, except the Townships of Bass River, Tabernacle, Shamong, Woodland and Washington, and the Borough of Medford Lakes in Medford Township.

In Cape May County, the Borough of Woodbine; and in Cumberland County, the City of Millville, the Borough of Vineland and the Township of Landis.

This recontrols the Borough of Vineland and the Township of Landis in Cumberland County, portions of the Southern New Jersey Defense-Rental Area. Cumberland County in which the Borough of Vineland and the Township of Landis are located, was heretofore decontrolled as of December 8, 1949. The City of Millville in said County was recontrolled as of March 1, 1951.

2. A new item is hereby incorporated in Schedule B to read as follows:

83. Provisions relating to the Borough of Vineland and the Township of Landis in Cumberland County, New Jersey, portions of the Southern New Jersey Defense-Rental Area.

Recontrol of the Borough of Vineland and the Township of Landis in Cumberland County, New Jersey, portions of the Southern New Jersey Defense-Rental Area. Effective March 31, 1951, the provisions of §§ 825.1 to 825.12 and 825.81 to 825.92 shall apply to housing accommodations in the Borough of Vineland and the Township of Landis in Cumberland County, New Jersey, portions of the Southern New Jersey Defense-Rental Area (said Cumberland County having been heretofore decontrolled as of December 8, 1949 and the City of Millville in said county having been recontrolled as of March 1, 1951), except as modified by the following provisions:

a. All orders in effect on December 7, 1949, in accordance with §§ 825.1 to 825.12 or 825.81 to 825.92, shall be in full force and effect.

b. If, on March 31, 1951, there was a ground for adjustment under § 825.5 (a) or § 825.85 (a) for which no order had previously been issued, and a petition for adjustment is filed on or before April 30, 1951, the adjustment shall be effective as of March 31, 1951.

c. If, on March 31, 1951, the services provided with any housing accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall either restore and maintain such minimum services or file a petition on or before April 30, 1951 requesting approval of the decreased services. If, on March 31, 1951, the furniture, furnishings or equipment provided with any housing accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall file, on or before April 30, 1951, a written report showing the decrease in furniture, furnishings or equipment. Except as modified by this paragraph "c", the provisions of §§ 825.5 (b) and 825.85 (b) shall be applicable to all such cases.

d. In the case of any action which, on March 31, 1951, was required or authorized by §§ 825.1 to 825.12 or 825.81 to 825.92 to be taken within a specified period of time, the same time period shall be applicable but such time period shall be counted from March 31, 1951.

e. The provisions of §§ 825.6 and 825.86 shall not apply to any case in which judgment was entered prior to March 31, 1951 by a court of competent jurisdiction for the eviction or removal of a tenant from housing accommodations.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup., 1894)

This amendment shall become effective March 31, 1951.

Issued this 30th day of March 1951.

[Controlled Housing Rent Reg. Amdt. 365]

[Controlled Rooms in Rooming Houses and Other Establishments Rent Reg., Amdt. 360]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

SOUTH DAKOTA

Amendment 365 to the Controlled Housing Rent Regulation (§§ 825.1 to 825.12) and Amendment 360 to the Rent Regulation for Controlled Rooms in Rooming Houses and Other Establishments (§§ 825.81 to 825.92). Said regulations are amended in the following respects:

1. Schedule A, Item 284, is amended to read as follows:

In Meade County, Township 5 North, Range 5 East of the Black Hills Meridian, including the City of Sturgis; in Pennington County, Rapid Valley Township and that portion of Pennington County west of a line running north and south of the western border of Rapid Valley Township.

This recontrols in Meade County, South Dakota, the following portion of the Rapid City-Sturgis, South Dakota, Defense-Rental Area: Township 5 North, Range 5 East of the Black Hills Meridian, including the City of Sturgis. Meade County, except the City of Sturgis, was decontrolled as of April 8, 1949. The City of Sturgis was decontrolled as of October 5, 1949.

2. A new Item is hereby incorporated in Schedule B to read as follows:

84. Provisions relating to Township 5 North, Range 5 East of the Black Hills Meridian, including the City of Sturgis, in Meade County, South Dakota, a portion of the Rapid City-Sturgis, South Dakota, Defense-Rental Area.

Recontrol of Township 5 North, Range 5 East of the Black Hills Meridian, including the City of Sturgis, in Meade County, South Dakota, a portion of the Rapid City-Sturgis, South Dakota, Defense-Rental Area. Effective March 31, 1951, the provisions of §§ 825.1 to 825.12 and 825.81 to 825.92 shall apply to housing accommodations in Township 5 North, Range 5 East of the Black Hills Meridian, including the City of Sturgis, in Meade County, South Dakota, a portion of the Rapid City-Sturgis, South Dakota, Defense-Rental Area (said Meade County, other than the City of Sturgis, having been heretofore decontrolled as of April 8, 1949, and the said city of Sturgis, having been heretofore decontrolled as of October 5, 1949), except as modified by the following provisions:

a. As to housing accommodations in the City of Sturgis in Meade County, South Dakota, all orders in effect on October 4, 1949, in accordance with § 825.1 to 825.12 or § 825.81 to 825.92 shall be in full force and effect.

b. As to housing accommodations in that portion of Meade County, South Dakota, other than the City of Sturgis, described as Township 5 North, Range 5 East of the Black Hills Meridian, all orders in effect on April 7, 1949, in accordance with § 825.1 to 825.12 or § 825.81 to 825.92 shall be in full force and effect.

c. If, on March 31, 1951, there was a ground for adjustment under § 825.5 (a) or § 825.85 (a) for which no order had previously been issued, and a petition for adjustment is filed on or before April 30, 1951, the adjustment shall be effective as of March 31, 1951.

d. If, on March 31, 1951, the services provided with any housing accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall either restore and maintain such minimum services or file a petition on or before April 30, 1951 requesting approval of the decreased services. If, on March 31, 1951, the furniture, furnishings or equipment provided with any housing accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall file, on or before April 30, 1951, a written report showing the decrease in furniture, furnishings or equipment. Except as modified by this paragraph "d," the provisions of §§ 825.5 (b) and 825.85 (b) shall be applicable to all such cases.

e. In the case of any action which, on March 31, 1951, was required or authorized by § 825.1 to 825.12 or § 825.81 to 825.92 to be taken within a specified period of time, the same time period shall be applicable but such time period shall be counted from March 31, 1951.

f. The provisions of §§ 825.6 and 825.86 shall not apply to any case in which judgment was entered prior to March 31, 1951 by a court of competent jurisdiction for the eviction or removal of a tenant from housing accommodations.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup., 1894)

This amendment shall become effective March 31, 1951.

Issued this 30th day of March 1951.

TIGHE E. WOODS,
Housing Expediter.

[Controlled Housing Rent Reg., Amdt. 366]

[Controlled Rooms in Rooming Houses and Other Establishments Rent Reg., Amdt. 361]

PART 825—RENT REGULATIONS UNDER THE HOUSING AND RENT ACT OF 1947, AS AMENDED

FLORIDA

Amendment 366 to the Controlled Housing Rent Regulations (§§ 825.1 to 825.12) and Amendment 361 to the Rent Regulation for Controlled Rooms in Rooming Houses and Other Establishments (§§ 825.81 to 825.92). Said regulations are amended in the following respect:

A new item is hereby incorporated in Schedule B to read as follows:

85. Provisions relating to the Key West, Florida, Defense-Rental Area.

Recontrol of certain housing accommodations located in trailers and trailer spaces in the Key West, Florida, Defense-Rental Area on the Housing Expediter's Initiative. Effective March 31, 1951, in the Key West, Florida, Defense-Rental Area, the provisions of §§ 825.1 to 825.12 and 825.81 to 825.92 shall apply to housing accommodations located in trailers and ground space rented for trailers, other than those which on April 1, 1949 were used exclusively for transient occupancy, i. e., other than those which, on April 1, 1949, were rented on a daily basis to tenants who had not continuously resided therein on and since March 1, 1949, except as modified by the following provisions:

a. All orders pertaining to said accommodations in effect on September 20, 1949, in accordance with §§ 825.1 to 825.12 or 825.81 to 825.92 shall be in full force and effect.

b. If on March 31, 1951, there was a ground for adjustment under § 825.5 (a) or § 825.85 (a) for which no order had previously been issued, and a petition for adjustment is filed on or before April 30, 1951, the adjustment shall be effective as of March 31, 1951.

c. If, on March 31, 1951, the services provided with any of said accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall either restore and maintain such minimum services or file a petition on or before April 30, 1951, requesting approval of the decreased services. If, on March 31, 1951, the furniture, furnishings or equipment provided with any of said accommodations are less than the minimum required by § 825.3 or § 825.83, the landlord shall file, on or before April 30, 1951, a written report showing the decrease in furniture, furnishings or equipment. Except as modified by this paragraph "c", the provisions of §§ 825.5 (b) and 825.85 (b) shall be applicable to all such cases.

d. In the case of any action which on March 31, 1951, was required or authorized by §§ 825.1 to 825.12 or 825.81 to 825.92 to be taken within a specified period of time, the same time period shall be applicable but such time period shall be counted from March 31, 1951.

e. The provisions of §§ 825.6 and 825.86 shall not apply to any case in which judgment was entered prior to March 31, 1951, by a court of competent jurisdiction for the eviction or removal of a tenant from any of said accommodations.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

This amendment shall become effective March 31, 1951.

Issued this 30th day of March 1951.

TIGHE E. WOODS,
Housing Expediter.

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter E—Organized Reserves

PART 561—OFFICERS' RESERVE CORPS

APPOINTMENT OF PROFESSIONAL AND TECHNICAL PERSONNEL

In § 561.20, paragraphs (a), (b) and (d) are amended, and a new paragraph (f) add as follows:

§ 561.20 *Appointment of professional and technical personnel*—(a) *General.* (1) This section governs the appointment as commissioned officers in the Active Reserve, Officers' Reserve Corps, of qualified professional and technical experts or specialists, of the categories indicated below, whose services are desired to fill authorized position vacancies in regularly constituted units listed in the ORC troop program and to meet the need for officers for active military service.

* * * * *

(xxix) Postal specialists.

* * * * *

(b) *Grade.* Initial appointments up to and including the grade of captain are authorized under this section in recognition of advanced professional or technical experience and training. In no case will appointment be made in a higher grade than that authorized for the vacancy to which the applicant will be assigned.

* * * * *

(d) *Special requirements.* (1) The applicant must possess professional or technical ability as required to perform the duties appropriate to the position vacancy or appropriate to the assignment for those desired for active military service.

(2) For those applying for appointment to fill authorized position vacancies in ORC troop program units, the services of the applicant must be required for a particular vacancy, and there must be no qualified commissioned officer of the appropriate grade or lower grade available to fill the position vacancy. In this connection, qualified officers of the unit and other available officers must be considered for assignment.

(3) For those applying for appointment and concurrent active military service, the services of the applicant must be required for active military service when qualified officers of the Active or Inactive Reserve are not available.

(4) For appointment, applicant must have graduated from a recognized college or university, preferably with major field of study closely related to the position vacancy to be filled and have had minimum qualifying experience in the field of specialization as follows:

Grade:	*Years of experience*
Second lieutenant	3
First lieutenant	6
Captain	10

Each year of graduate education, in the field for which the applicant is being considered, may be counted as a year of qualifying experience. Applicants for appointment for service in Military Railway Service and Harbor Craft units, and in the Adjutant General's Corps Section as postal specialists for service with the Army-Air Force Postal Service, may substitute 4 years of qualifying experience in lieu of graduation from a recognized college or university, or a United States Power Squadron Certificate as a navigator in the case of applicants for appointment in Harbor Craft units. Experience in an administrative, executive, or supervisory capacity in the United States Post Office Department or in the military postal service in one of the first three noncommissioned officer grades or as a warrant officer is required for appointment in the Adjutant General's Corps Section as postal specialists, a minimum of 1 year of such experience being required for the grade of second lieutenant, 3 years for the grade of first lieutenant, and 5 years for the grade of captain. This experience is to be included within the required "years of experience" shown in the table above.

* * * * *

(f) *Organized Reserve Corps unit vacancies and active duty quotas.* Individuals interested in appointments may secure information as to vacancies in ORC troop program units from unit commanders. Information relative to quotas for active military service may be secured from the appropriate area commander.

[C 1, SR 140-105-8, Mar. 9, 1951] (R. S. 161; 5 U. S. C. 22. Interpret or apply sec. 37, 39 Stat. 189, as amended; 10 U. S. C. 351-353)

[SEAL] EDWARD F. WITSELL,
Major General, U. S. Army.
The Adjutant General.

TITLE 31—MONEY AND FINANCE: TREASURY

Chapter I—Monetary Offices, Department of the Treasury

[1951 Dept. Circ. 1]

PART 129—VALUES OF FOREIGN MONEYS

QUARTER BEGINNING APRIL 1, 1951

APRIL 1, 1951.

§ 129.14 *Calendar year 1951.* * * *

(b) *Quarter beginning April 1, 1951.* Pursuant to section 522, title IV, of the Tariff Act of 1930, reenacting section 25 of the act of August 27, 1894, as amended, the following estimates by the Director of the Mint of the values of foreign monetary units are hereby proclaimed to be the values of such units in terms of the money of account of the United States that are to be followed in estimating the value of all foreign merchandise exported to the United States during the quarter beginning April 1, 1951, expressed in any such foreign monetary units: *Provided, however,* That if no such value has been proclaimed, or if the value so proclaimed varies by 5 per centum or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate as determined and certified by the Federal Reserve Bank of New York and published by the Secretary of the Treasury pursuant to the provisions of section 522, title IV, of the Tariff Act of 1930.

The value of foreign monetary units, as shown below in terms of United States money, is the ratio between the legal gold content of the foreign unit and the legal gold content of the United States dollar. It should be noted that this value, with respect to most countries, varies widely from the present exchange rates. Countries not having a legally defined gold monetary unit, or those for which current information is not available, are omitted.

Country	Monetary unit	Value in terms of U. S. money	Remarks
Canada	Dollar	$1.0061	Redemption of notes into gold suspended. Export of gold prohibited except under license.
Colombia	Peso	.5128	Monetary Law No. 80 of Dec. 16, 1948, effective Dec. 18, 1948, content of peso 0.59037 gram of gold 9/10 fine. Obligation to sell gold suspended Sept. 21, 1931.
Costa Rica	Colon	.1781	Parity of 0.185267 fine gram gold established by decree law effective Mar. 25, 1947.
Denmark	Krone	.4737	Conversion of notes into gold suspended Sept. 29, 1931.
Dominican Republic	Peso	1.0000	By Monetary Law No. 1528 effective Oct. 9, 1947, gold content of peso equal to 0.888671 gram fine.
Ethiopia	Dollar	.4025	New unit established by Proclamation of the Emperor on May 25, 1945, effective July 23, 1945.
Finland	Markka	.0126	Conversion of notes into gold suspended Oct. 12, 1931.
Guatemala	Quetzal	1.0000	Decree No. 203 of Dec. 10, 1945, defined the monetary unit as 1.50 21 grams gold 9/10 fine. Conversion of notes into gold suspended Mar. 6, 1933.
Haiti	Gourde	.2000	National bank notes redeemable on demand in U. S. dollars.
Hungary	Forint	.0822	New unit based on 13,210 forint per kilogram fine gold, effective July 1946.
Ireland	Pound	4.0336	Conversion of notes into gold suspended Sept. 21, 1931.
Peru	Sol	.4710	Conversion of notes into gold suspended May 18, 1932; exchange control established Jan. 23, 1942.
Philippines	Peso	.5000	International value according to the Central Bank Act approved June 15, 1948. Exchange control established.
Sweden	Krona	.4537	Conversion of notes into gold suspended Sept. 29, 1931.
Union of Soviet Socialist Republics	Ruble	.2500	By decree of Council of Ministers ruble equal to 0.222168 fine gram gold, effective Mar. 1, 1950.
Uruguay	Peso	.6583	Present gold content of 0.456018 grams fine established by law of Jan. 18, 1935. Conversion of notes into gold suspended Aug. 2, 1914; exchange control established Sept. 7, 1931.
Venezuela	Bolivar	.3267	Exchange control established Dec. 12, 1936.

PROPOSED RULE MAKING

DEPARTMENT OF LABOR

Wage and Hour Division

[29 CFR, Part 526]

INDUSTRIES OF A SEASONAL NATURE

NOTICE OF HEARING WITH RESPECT TO PROCESSING OF CITRUS PULP AND WASTE INDUSTRY IN FLORIDA AND TEXAS

On March 25, 1943, the Administrator of the Wage and Hour Division issued a determination (8 F. R. 3811) that the dehydration of citrus pulp and waste in the States of Florida and Texas is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act of 1938 (sec. 7 (b) (3), 52 Stat. 1063; 29 U. S. C. 207 (b) (3)) and the regulations contained in this part.

On January 25, 1951, notice was published in the FEDERAL REGISTER (16 F. R. 692) that the Administrator, upon consideration of applications filed by the Citrus Processors Association, Inc., and the Luban Company, Inc., of Florida, made a preliminary determination, pursuant to section 7 (b) (3) of the Fair Labor Standards Act and Part 526, as amended, of the regulations issued thereunder, that a prima facie case had been shown for amending the aforesaid determination of March 23, 1943 (8 F. R. 3811) to include the manufacture of citrus molasses and the chemical processing of citrus peel and for changing the name of the industry from the "dehydration of citrus pulp and waste industry in Florida and Texas" to the "processing of citrus pulp and waste industry in Florida and Texas."

Within fifteen days following the publication of said preliminary determination, the Administrator received objection and request for hearing.

Notice is hereby given pursuant to §§ 526.5 and 526.6 of the regulations, of a public hearing to be held in the Orange Court Hotel, 650 North Orange Avenue, Orlando, Florida, on May 2, 1951, at 10:00 a. m. before Nathan Rubinstein, an authorized representative of the Administrator, for the purpose of receiving evidence and arguments on the question:

Whether the aforesaid determination of March 25, 1943, (8 F. R. 3811) should be amended to include the manufacture of citrus molasses and the chemical processing of citrus peel, and if so, subject to what conditions and limitations.

Any interested person may appear at the hearing to offer evidence provided that not later than April 24, 1951, such person shall file with the Administrator of the Wage and Hour Division, United States Department of Labor, 14th Street and Constitution Avenue NW., Washington 25, D. C., a notice of intention to appear which should contain the following information:

1. The name and address of the person appearing.

2. If he is appearing in a representative capacity, the names and addresses of the persons or organizations which he is representing.

3. Whether he is appearing in support of or in opposition to the application for exemption.

Such notice may be mailed to the Administrator and shall be considered filed upon receipt. Written statements in lieu of personal appearance may be mailed to the Administrator at any time prior to the date of hearing or may be filed with the presiding officer at the hearing.

Signed at Washington, D. C., this 29th day of March 1951.

WM. R. MCCOMB,
Administrator,
Wage and Hour Division.

[F. R. Doc. 51-4005; Filed, Apr. 8, 1951; 8:45 a. m.]

[29 CFR, Part 526]

INDUSTRIES OF A SEASONAL NATURE

NOTICE OF HEARING WITH RESPECT TO THE CANE SUGAR INDUSTRY IN FLORIDA

An application has been filed by the Fellsmere Sugar Producers Association of Florida for a determination that that portion of the cane sugar processing and milling branch of the cane sugar industry which is located in Florida is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act of 1938 (sec. 7 (b) (3), 52 Stat. 1063; 29 U. S. C. 207 (b) (3)) and the regulations contained in this part.

Notice is hereby given pursuant to §§ 526.5 and 526.6 of the regulations, of a public hearing to be held in the Orange Court Hotel, 650 North Orange Avenue, Orlando, Florida, on May 1, 1951, at 10:00 a. m. before Nathan Rubinstein, an authorized representative of the Administrator, for the purpose of receiving evidence and arguments on the questions:

1. Whether that portion of the cane sugar processing and milling branch of the cane sugar industry which is located in Florida is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act and Part 526, as amended, of the regulations issued thereunder.

2. What is the scope of the industry?

Any interested person may appear at the hearing to offer evidence provided that not later than April 24, 1951, such person shall file with the Administrator of the Wage and Hour Division, United States Department of Labor, 14th Street and Constitution Avenue NW., Washington 25, D. C., a notice of intention to appear which should contain the following information:

1. The name and address of the person appearing.

2. If he is appearing in a representative capacity, the names and addresses of the persons or organizations which he is representing.

3. Whether he is appearing in support of or in opposition to the application for exemption.

Such notice may be mailed to the Administrator and shall be considered filed upon receipt. Written statements in lieu of personal appearance may be mailed to the Administrator at any time prior to the date of hearing or may be filed with the presiding officer at the hearing.

Signed at Washington, D. C., this 29th day of March 1951.

WM. R. MCCOMB,
Administrator,
Wage and Hour Division.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR, Part 31]

[Docket No. 9921]

UNIFORM SYSTEM OF ACCOUNTS FOR CLASS A AND CLASS B TELEPHONE COMPANIES

NOTICE OF PROPOSED RULE MAKING

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. It is proposed to amend Part 31 of the Commission's rules and regulations as set forth below to become effective six months after the adoption of the final order herein, with the provision, however, if the order is adopted, that any carrier may follow the new classifications of companies prescribed thereby as of January 1, 1951.

3. The proposed amendment revises upward the revenue classifications of telephone companies as follows:

Company	Revenue classification	
	Present	Proposed
Class A	Exceeding $100,000	Exceeding $250,000.
Class B	$50,000 to $100,000	$100,000 to $250,000.
Class C	$25,000 to $50,000	$50,000 to $100,000.
Class D	Less than $25,000	Less than $50,000.

These reclassifications appear desirable in view of the substantial increase in gross operating revenues without any material changes in the nature of operations. There is also included in the proposed amendment an editorial correction with reference to the Commission's rules for preservation of records of telephone companies which were revised on August 16, 1950.

4. The proposed amendment is issued under authority of sections 4 (i) and 220 of the Communications Act of 1934, as amended.

5. Any interested party who is of the opinion that the proposed amendment should not be adopted, or should not be adopted in the manner proposed herein, may file with the Commission on or before April 16, 1951, a statement or brief setting forth his comments. At the same time persons favoring the amendment as proposed may file statements in support thereof. Comments or briefs in reply to the original comments or briefs may be filed on or before April 30, 1951. The Commission will consider all such comments that are presented before taking action in the matter and, if any comments are submitted which appear to warrant the holding of oral argument, notice of the time and place of such oral argument will be given.

6. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and fourteen copies of all statements, briefs, or comments filed shall be furnished to the Commission.

Adopted: March 21, 1951.

Released: March 21, 1951.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary

1. Amend § 31.01-1 as follows:

a. Delete paragraph (a) and substitute the following:

§ 31.01-1 *Classification of companies.* (a) For accounting purposes, telephone companies are divided into four classes as follows:

Class A. Companies having annual operating revenues exceeding $250,000.

Class B. Companies having annual operating revenues exceeding $100,000 but not more than $250,000.

Class C. Companies having annual operating revenues exceeding $50,000 but not more than $100,000.

Class D. Companies having annual operating revenues not exceeding $50,000.

b. Delete the note and add the following paragraphs:

(d) Class C companies shall keep all the accounts prescribed by Part 33 of this chapter which are applicable to their affairs.

(e) It is recommended but not required that Class D companies keep the accounts prescribed in Part 33 of this chapter.

(f) Companies that desire more detailed accounting may adopt the accounts prescribed for a higher classification of telephone companies: *Provided*, That the Commission is notified promptly of such action. Such companies are not required to comply with the more detailed reporting requirements contained in the rules respecting such higher classification.

(g) The classification of a company shall be determined by its lowest annual operating revenues for the three immediately preceding years. Subsequent changes in classification shall be made when the annual operating revenues show a greater or lesser classification for three consecutive years. Companies becoming subject to the jurisdiction of the Commission subsequent to the year 1950 shall estimate the amount of their annual revenues and adopt the scheme of accounts appropriate for the amount of such estimated revenues.

2. In the cross reference following paragraph (b) of § 31.01-2, change "Part 42" to read "Part 45."

[F. R. Doc. 51-3982; Filed, Apr. 3, 1951; 8:47 a. m.]

[47 CFR, Part 33]

[Docket No. 9922]

UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C TELEPHONE COMPANIES

NOTICE OF PROPOSED RULE MAKING

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. It is proposed to amend Part 33 of the Commission's rules and regulations as set forth below to become effective six months after the adoption of the final order herein, with the provision, however, if the order is adopted, that any carrier may follow the new classifications of companies prescribed thereby as of January 1, 1951.

3. The proposed amendment revises upward the revenue classifications of telephone companies as follows:

Company	Revenue classification	
	Present	Proposed
Class A	Exceeding $100,000	Exceeding $250,000.
Class B	$50,000 to $100,000	$100,000 to $250,000.
Class C	$25,000 to $50,000	$50,000 to $100,000.
Class D	Less than $25,000	Less than $50,000.

These reclassifications appear desirable in view of the substantial increase in gross operating revenues without any material changes in the nature of operations. There is also included in the proposed amendment a revised paragraph with reference to the Commission's rules for preservation of records of telephone companies since new regulations in this respect were promulgated August 16, 1950, and an editorial rearrangement of the provision relating to subdividing accounts in the manner ordered by a State commission.

4. The proposed amendment is issued under authority of sections 4 (i) and 220 of the Communications Act of 1934, as amended.

5. Any interested party who is of the opinion that the proposed amendment should not be adopted, or should not be adopted in the manner proposed herein, may file with the Commission on or before April 16, 1951, a statement or brief setting forth his comments. At the same time persons favoring the amendment as proposed may file statements in support thereof. Comments or briefs in reply to the original comments or briefs may be filed on or before April 30, 1951. The Commission will consider all such comments that are presented before taking action in the matter and, if any comments are submitted which appear to warrant the holding of oral argument, notice of the time and place of such oral argument will be given.

6. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and fourteen copies of all statements, briefs, or comments filed shall be furnished to the Commission.

Adopted: March 21, 1951.

Released: March 21, 1951.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

1. Delete § 33.1, including the note; redesignate § 33.11 as § 33.1 and revise to read as follows:

§ 33.1 *Classification of companies.* (a) For accounting purposes, telephone companies are divided into four classes as follows:

Class A. Companies having annual operating revenues exceeding $250,000.

Class B. Companies having annual operating revenues exceeding $100,000 but not more than $250,000.

Class C. Companies having annual operating revenues exceeding $50,000 but not more than $100,000.

Class D. Companies having annual operating revenues not exceeding $50,000.

CROSS REFERENCE: For regulations governing the accounting for Class A and Class B telephone companies, see Part 31 of this chapter.

(b) Class C companies shall keep all of the accounts prescribed in this system of accounts that are applicable to their affairs. Companies that desire more detailed accounting may adopt the accounts prescribed for a higher classification of telephone companies: *Provided*, That the Commission is notified promptly of such action. Such companies are not required to comply with the more detailed reporting requirements contained in the rules respecting such higher classification.

(c) It is recommended but not required that Class D companies keep all of the accounts prescribed in this system of accounts or the accounts listed in § 33.94.

(d) The classification of a company shall be determined by its lowest annual operating revenues for the three immediately preceding years. Subsequent changes in classification shall be made when the annual operating revenues show a greater or lesser classification for three consecutive years. Companies becoming subject to the jurisdiction of the Commission subsequent to the year 1950 shall estimate the amount of their annual revenues and adopt the scheme of accounts appropriate for the amount of such estimated revenues.

2. Amend § 33.12 as follows:

a. Delete paragraph (c) and substitute the following:

(c) The periods for which records are to be retained are set forth in Part 45 Preservation of Records of Telephone Carriers of the Commission's rules and regulations.

b. Add the following sentence to paragraph (d): "Nothing contained in this part shall prohibit or excuse any company from subdividing the accounts hereby prescribed in the manner ordered by any State commission having jurisdiction or to the extent necessary to secure the information required in the prescribed reports to such commission."

3. Delete § 33.91 and substitute the following:

§ 33.91 *Definition.* Class D telephone companies are defined in § 33.1 as "Companies having annual operating revenues not exceeding $50,000." "Operating revenues" as there used consist of revenues includible in accounts 3010 to 3090, inclusive. The classification of a company shall be determined by its lowest annual operating revenues for the three immediately preceding years.

[F. R. Doc. 51-3981; Filed, Apr. 3, 1951; 8:47 a. m.]

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[Order 551]

DELEGATIONS OF AUTHORITY

Sec.
1. Appeals.
2. Authority of the Associate Commissioner, Assistant Commissioners and the Executive Officer.
3. Authority of area directors.
4. Fee patents and competency certificates.
5. Sales and conveyances.
6. Removal of restrictions (other than Five Civilized Tribes).
7. Land exchanges.
8. Land acquisitions.
9. Sale of pledged land.
10. Allotment adjustments.
11. Tax exemption certificates.
12. Leases and permits.
13. Land partitions.
14. Tribal fees.
15. Allotment applications.
16. Mineral leases and permits.
17. Deferred payment sales, Five Civilized Tribes.
18. Release of mortgages.
19. Rights of way.
20. Lead and zinc leases.
21. Leases and other instruments for oil, gas and other mining purposes, Five Civilized Tribes.
22. Leases and other instruments for oil, gas and other mining purposes, Anadarko area, other than Osage oil leases.
23. Assignment Osage oil leases and rights of appeal.

SECTION 1. *Appeals.* (a) Any action taken by Area Directors pursuant to this order shall be subject to the right of appeal. An appeal may be taken from the decision of the Area Director to the Commissioner of Indian Affairs. All appeals must be filed in writing with the Area Director. An appeal filed with the Area Director shall be promptly transmitted by him with the record in the case to the Commissioner of Indian Affairs. Any action taken by the Commissioner of Indian Affairs pursuant to this order shall be subject to the right of appeal to the Secretary of the Interior, pursuant to section 1 of Order 2508, as amended, of the Secretary of the Interior.

(b) The Associate Commissioner, Assistant Commissioners and Executive Officer of the Bureau of Indian Affairs are severally authorized on behalf of the Commissioner to dispose finally of any appeal taken pursuant to paragraph (a) of this section.

SEC. 2. *Authority of the Associate Commissioner, Assistant Commissioners and Executive Officer.* The Associate Commissioner, Assistant Commissioners and Executive Officer of the Bureau of Indian Affairs may severally exercise any and all of the authority conferred

upon the Commissioner of Indian Affairs by the Secretary of the Interior by his Order 2508, as amended, published in 14 F. R. 258, January 18, 1949, and 16 F. R. 473–475, January 18, 1951, and by section 50 (d) of his Order 2509 and the general regulations of the Bureau appearing in Title 25 of the Code of Federal Regulations.

SEC. 3. *Authority of area directors.* The area directors may exercise the authority of the Commissioner of Indian Affairs in the following classes of matters:

FUNCTIONS RELATING TO INDIAN LANDS AND MINERALS

SEC. 4. *Fee patents and competency certificates.* The approval of applications for patents in fee or certificates of competency, pursuant to the provisions of 25 CFR, Part 241.

SEC. 5. *Sales and conveyances.* The approval of sales and conveyances of original allotments and inherited lands pursuant to the provisions of 25 CFR 241. The authority conferred by this paragraph extends to and includes the sale of inherited lands without the consent of the Indian owners, the approval of deeds or other instruments of conveyance, the issuance of certificates or memoranda of purchase to purchasers on deferred payment sales, the reduction or waiver of sales fees, the granting of extensions of time to purchasers to make payment, and the cancellation of deferred payment sales in case of default.

SEC. 6. *Removal of restrictions (other than Five Civilized Tribes).* The removal of restrictions against alienation of Indian lands, other than allotted lands of the Five Civilized Tribes, pursuant to the provisions of 25 CFR Part 241.

SEC. 7. *Land exchanges.* The approval of exchenges of lands between individual Indians, between individual Indians and Indian tribes, between individual Indians and non-Indians, and between Indian tribes and non-Indians.

SEC. 8. *Land acquisitions.* The approval of the purchase of lands for individual Indians and Indian tribes. This authority extends to and includes the acceptance of options for the acquisition of lands and the authorization to disburse restricted individual Indian money to complete the acquisition of lands for individual Indians.

SEC. 9. *Sale of pledged land.* The approval of authorizations for the sale of restricted Indian lands pledged as security for the repayment of tribal loans to individuals, and the approval or acceptance of conveyances of such lands in accordance with the terms of the pledge in the event of default.

SEC. 10. *Allotment adjustments.* The approval and certification of allotment exchanges, correction of patent descriptions and cancellation of multiple allotments, as authorized by the act of April 23, 1904 (33 Stat. 297; 25 U. S. C. 343).

SEC. 11. *Tax exemption certificates.* The issuance of tax exemption certificates covering lands designated as tax exempt under the provisions of the act of June 20, 1936 (49 Stat. 1542) as amended May 19, 1937 (50 Stat. 188; 25 U. S. C. 412a) and the act of May 10, 1928 (45 Stat. 495) as amended May 24, 1928 (45 Stat. 733) and August 4, 1947 (61 Stat. 731).

SEC. 12. *Leases and permits.* The approval of leases and permits of tribal and allotted lands for farming, farm pasture, or business purposes, pursuant to the provisions of 25 CFR Part 171. This authority extends to and includes the waiver of requirements for advertising of leases or permits and the waiver of acreage limitations on farm and farm pasture lands.

SEC. 13. *Land partitions.* The approval of partitions of land held in trust or subject to restrictions against alienation, pursuant to the provisions of 25 CFR Part 241.

SEC. 14. *Tribal fees.* The approval of fees fixed by tribes when performing clerical and ministerial work in connection with the grants of leases and permits pursuant to 25 CFR Part 171.

SEC. 15. *Allotment applications.* The approval and certification of applications for allotments on the public domain under authority of section 4 of the act of February 8, 1887 (24 Stat. 388; 25 U. S. C. 334).

SEC. 16. *Mineral leases and permits.* The approval of sand, gravel, pumice and building stone leases and permits of tribal and allotted lands, pursuant to the provisions of 25 CFR 183, 189, 195 and 204.

SEC. 17. *Deferred payment sales, Five Civilized Tribes.* The approval of the negotiation of notes given in connection with deferred payment sales of restricted lands of the Five Civilized Tribes, pursuant to the provisions of 25 CFR 241.41.

SEC. 18. *Release of mortgages.* The approval of releases of mortgages given as security for loans made from the restricted funds of individual Indians, upon proof of payment of the loan.

SEC. 19. *Rights of way.* The approval of rights of way for oil and gas pipelines, telephone and telegraph lines, and public highways, pursuant to the provisions of 25 CFR Part 256. This authority extends to and includes the issuance of advance authority for preliminary surveys and permission for beginning construction prior to the official approval of the right of way.

SEC. 20. *Lead and zinc leases.* The approval of leases for lead and zinc mining purposes, Quapaw jurisdiction, pursuant to the provisions of 25 CFR Part 201. The authority conferred by this section extends to and includes the approval required or other appropriate administrative action on all subleases or assignments of leases now or hereafter in force and bonds and other instruments required in connection therewith.

SEC. 21. *Leases and other instruments for oil, gas and other mining purposes, Five Civilized Tribes.* The approval of leases for oil, gas or other mining purposes, Five Civilized Tribes, pursuant to the provisions of 25 CFR Part 183. The authority conferred by this section extends to and includes the approval or other appropriate administrative action required on all assignments of mineral leases now or hereafter in force on restricted alloted lands, bonds and other instrumnets required in connection with such leases or assignments thereof, unit and communitization agreements, well-spacing orders of the Oklahoma Corporation Commission submitted for approval under authority of section 11 of the act of August 4, 1947 (61 Stat. 751), the acceptance of voluntary surrender of such leases by lessees, cancellation of leases for violation of terms thereof, and approval of agreements for settlement of claims for damages to Indian lands resulting from oil and gas or other mineral operations.

SEC. 22. *Leases and other instruments for oil, gas and other mining purposes, Anadarko Area, other than Osage oil leases.* The approval of leases for oil, gas or other mining purposes, pursuant to the provisions of 25 CFR Parts 186 and 189. The authority conferred by this section extends to and includes the approval or other appropriate administrative action required on all assignments of mineral leases now or hereafter in force on restricted tribal or allotted lands, bonds and other instruments required in connection with such leases or assignments thereof, unit and communitization agreements, the acceptance of voluntary surrender of such leases by lessees, cancellation of leases for violation of terms thereof, and approval of agreements for settlement of claims for damages to Indian lands resulting from oil and gas or other mineral operations.

SEC. 23. *Assignment Osage oil leases and rights of appeal.* Approval of assignments of Osage oil leases now or hereafter in force and bonds and other instruments required for leases or assignments thereof, and the acceptance of the voluntary surrender of leases. Any person aggrieved by a decision or order approving, disapproving, or rejecting any lease, assignment, bond, or voluntary surrender of a lease, may appeal to the Commissioner of Indian Affairs within 20 days from the date of such decision or order.

D. S. MYER,
Commissioner.

National Production Authority

[NPA Del. 7 as amended Apr. 3, 1951]

DEL. 7—DELEGATION OF AUTHORITY TO ADMINISTER NPA ORDER M-4

NPA Del. 7 is amended by adding a new district office to List A.

Del. 7 as amended reads as follows:

Pursuant to the authority of section 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; Defense Production Administration Delegation 1, January 24, 1951; and U. S. Department of Commerce Order 123 as amended, the following administrative functions to be performed pursuant to NPA Order M-4 are delegated to the Directors of the Regional Offices of the U. S. Department of Commerce, and the Managers of the District Offices of the U. S. Department of Commerce, specified in List A:

1. To receive, consider, pass upon, and take action for and in the name of the National Production Authority upon, applications for an authorization to commence construction pursuant to section 6 of NPA Order M-4.

2. To receive, consider, pass upon, and take action for and in the name of the National Production Authority upon, applications for adjustment and exception based upon unreasonable hardship pursuant to section 11 of NPA Order M-4.

3. To receive, consider, pass upon, and take action for and in the name of the National Production Authority upon, applications for exemption where the prohibition of such construction would not be in the interest of the national defense pursuant to section 11 of NPA Order M-4.

Actions taken by a Regional Director or District Manager pursuant to this delegation shall be signed as follows:

National Production Authority
By ----------
(Name and Title)

This delegation as amended shall take effect on April 3, 1951.

Issued: March 31, 1951.

Dated: March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[Supp. 1 to NPA Del. 1, as amended Apr. 3, 1951]

DEL. 1—DELEGATION OF AUTHORITY TO THE SECRETARY OF DEFENSE

SUPP. 1—DELEGATION OF FURTHER AUTHORITY AS TO CERTAIN PROGRAMS

NPA Supp. 1 to Del. 1 is amended by adding a new item to the table in List A. As so amended Supp. 1 to Del. 1 reads as follows:

This amended supplement to NPA Del. 1 is issued pursuant to the Defense Production Act of 1950. The Secretary of Defense has been delegated certain authority to apply and assign ratings by NPA Del. 1. In addition to such authority, there is hereby delegated to the Secretary of Defense the following authority:

1. To reschedule deliveries of the materials specified in Column I of attached List A which are required in support of the authorized programs appearing in the corresponding section of Column II of the List: *Provided, however,* That such authority (a) shall be applicable only to deliveries to fill orders rated by or under the authority of the Secretary of Defense; and (b) shall be applicable only to the extent that such rescheduling of deliveries requires no change in production schedules.

2. To redelegate the authority hereby delegated to appropriate agencies of the Department of Defense or its authorized agents.

The exercise of this authority shall conform to the terms of the regulations and orders of the National Production Authority and also to priorities and allocations policy directives issued by the Munitions Board and subject to approval by the National Production Authority.

This supplement as amended shall take effect on April 3, 1951.

Issued: March 29, 1951.

Dated: March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

LIST A

The authority hereby delegated shall be exercised only with respect to the following materials to be used in connection with the authorized programs of the Department of Defense specified below:

Column I	Column II
(1) Aluminum forms and products listed in section 2 of NPA Order M-5.	(1) DO-01 Aircraft. DO-02 Guided missiles.
(2) Magnesium bar, sheet strip, tubing, extrusions, forgings, and castings.	(2) DO-01 Aircraft.

FEDERAL POWER COMMISSION

[Docket No. G-1575]

MICHIGAN GAS STORAGE CO.

ORDER FIXING DATE OF HEARING

MARCH 29, 1951.

On January 2, 1951, Michigan Gas Storage Company (Applicant), a Michigan corporation with its principal place of business in Jackson, Michigan, filed an application for a certificate of public convenience and necessity pursuant to the Natural Gas Act, as amended, authorizing the construction and operation of certain natural-gas transmission facilities, subject to the jurisdiction of the Commission, all as more fully described in such application on file with the Commission and open to the public.

The Commission finds: Applicant has requested that this application be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)) for noncontested proceedings, and it appears to be a proper one for disposition under the aforesaid rule, no request to be heard, protest or petition raising an issue of substance having been filed subsequent to the giving of due

notice of the filing of the application including publication in the FEDERAL REGISTER on January 16, 1951 (16 F. R. 397).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, as amended, and the Commission's rules of practice and procedure, a public hearing be held on April 9, 1951, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application; *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: March 29, 1951.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 51-3976; Filed, Apr. 3, 1951; 8:45 a. m.]

[Docket No. G-1636]

EL PASO NATURAL GAS CO.

NOTICE OF APPLICATION

MARCH 29, 1951.

Take notice that on March 19, 1951, El Paso Natural Gas Company (Applicant), a Delaware corporation of El Paso, Texas, filed an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act authorizing the construction of approximately 2.25 miles of 4½-inch O. D. pipeline near Joseph City, Arizona, and the construction and operation of a metering station thereon. Applicant proposes by these facilities to sell and deliver natural gas to Southern Union Gas Company for resale and distribution in the town of Joseph City, Arizona.

Through the proposed facilities, Applicant expects to deliver in the third year of operation about 10,000 Mcf of natural gas with a daily maximum of about 121 Mcf. The cost of these facilities is estimated to be $25,850, which will be paid from general funds of Applicant.

Applicant requests that its application be heard under the shortened procedure pursuant to § 1.32 (b) of the rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of April 1951. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-1637]

EL PASO NATURAL GAS CO.

NOTICE OF APPLICATION

MARCH 29, 1951.

Take notice that on March 19, 1951, El Paso Natural Gas Company (Applicant), a Delaware corporation of El Paso, Texas, filed an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the construction and operation of approximately 5.3 miles of loop line from Gulf Oil Corporation's Eunice plant to Applicant's Eunice plant in Lea County, New Mexico. Applicant proposes by these facilities to take additional volumes of gas from the Gulf Oil Corporation's plant to Applicant's Eunice plant. The cost of these facilities is estimated to be $98,000, which will be paid from general funds of Applicant.

Applicant requests that its application be heard under the shortened procedure pursuant to § 1.32 (b) of the rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of April 1951. The application is on file with the Commission for public inspection.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 25954]

STRIP STEEL FROM ILLINOIS, INDIANA AND WESTERN TRUNK LINE TERRITORIES TO COLORADO AND WYOMING

APPLICATION FOR RELIEF

MARCH 30, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. E. Kipp, Agent, for carriers parties to his tariffs I. C. C. Nos. A-3600 and A-3614.

Commodities involved: Strip steel, carloads.

From: Points in Illinois, Indiana and western trunk-line territories.

To: Points in Colorado and Wyoming.

Grounds for relief: To apply over short tariff routes rates constructed on the basis of the short line distance formula and to maintain grouping.

Schedules filed containing proposed rates: L. E. Kipp's tariff I. C. C. No. A-3600, Supp. 115; L. E. Kipp's tariff I. C. C. No. A-3614, Supp. 111.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 25956]

LATEX AND OTHER ARTICLES FROM NEW ENGLAND TERRITORIES TO SOUTHERN TERRITORY

APPLICATION FOR RELIEF

MARCH 30, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin and I. N. Doe, Agents, for carriers parties to C. W. Boin's tariff I. C. C. No. A-911, and other tariffs, pursuant to fourth-section order No. 9800.

Commodities involved: Latex and various other commodities, carloads.

From: Points in trunk-line and New England territories.

To: Points in southern territory.

Grounds for relief: Circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 25955]

METHANOL AND ANTI-FREEZE PREPARATIONS FROM MILITARY, KANS., TO MACON, MO.

APPLICATION FOR RELIEF

MARCH 30, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. E. Kipp, Agent, for Chicago, Burlington & Quincy Railroad Company and other carriers named in the application.

Commodities involved: Methanol and anti-freeze preparations, carloads.

From: Military, Kans.

To: Macon, Mo.

Grounds for relief: Competition with rail carriers and market competition.

Schedules filed containing proposed rates: L. E. Kipp's tariff I. C. C. No. A-3614, Supp. 111.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

CRUDE SULPHUR FROM TEXAS TO FLORIDA

APPLICATION FOR RELIEF

MARCH 30, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: D. Q. Marsh, Agent, for carriers parties to his tariff I. C. C. No. 3862.

Commodities involved: Crude sulphur (brimstone), carloads.

From: Newgulf, Tex., and other Texas producing points.

To: Bartow, Tampa and Orlando, Fla., and certain other points in Florida.

Grounds for relief: Competition with water carriers.

Schedules filed containing proposed rates: D. Q. Marsh's tariff I. C. C. No. 3862, Supp. 79.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. LIQUEFIED PETROLEUM GAS FROM BATON ROUGE-NEW ORLEANS GROUP TO OFFICIAL TERRITORY

APPLICATION FOR RELIEF

MARCH 30, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1065.

Commodities involved: Liquefied petroleum gas, in tank-car loads.

From: Baton Rouge-New Orleans, La., group.

To: Points in central, trunk-line, and New England territories.

Grounds for relief: Competition with rail carriers, circuitous routes and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1065, Supp. 208.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. [S. O. 874, General Permit 12]

BLATCHFORD CALF MEAL CO.

LOADING REQUIREMENTS

Pursuant to the authority vested in me in paragraph (d) of Service Order No. 874 (16 F. R. 2040), permission is granted for any common carrier by railroad, subject to the Interstate Commerce Act, serving Blatchford Calf Meal Co., at Waukegan, Ill., Des Moines, Iowa, and Nampa, Idaho, to disregard the provisions of Service Order No. 874 insofar as it applies to any car loaded with Animal Feed Concentrate by Blatchford Calf Meal Co. when Blatchford Calf Meal Co. advise that service would be denied because of its inability to meet the minimum requirements because of deterioration.

The waybills shall show reference to this general permit and the Blatchford Calf Meal Co. shall furnish the Permit Agent the car numbers, initials, and destinations of the cars shipped under this permit.

This general permit shall become effective at 12:01 a. m., March 29th, 1951, and shall expire at 11:59 p. m., September 15, 1951, unless otherwise modified, changed, suspended or revoked.

A copy of this general permit has been served upon the Association of American Railroads, Car Service Division, as Agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement, and notice of this permit shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., this 28th day of March 1951.

HOWARD S. KLINE, *Permit Agent.*

NEWS-JOURNAL CORP. (WNDB)

ORDER CONTINUING HEARING

In re application of News-Journal Corporation (WNDB), Daytona Beach, Florida, for construction permit; Docket No. 9667, File No. BP-6983.

The Commission having under consideration a petition filed March 21, 1951, by the News-Journal Corporation, Daytona Beach, Florida, requesting that the hearing in the above-entitled matter, presently scheduled in Washington, D. C., on April 9, 1951, be continued for a period of not less than sixty days to give the corporation an opportunity to study an engineering survey conducted by their consulting radio engineer, and requesting a waiver of the Commission's four-day rule and immediate action on this petition; and

It appearing that petitioner states that Station WQAM, party respondent herein, has consented to immediate action on this petition, that Commission Counsel has also consented to immediate action thereon, that, therefore, the requirements of § 1.745 of the Commission's rules have been met, and that good cause has been shown for a grant thereof;

It is therefore ordered, This 23d day of March 1951, that the petition of the News-Journal Corporation be and it is hereby granted and the hearing herein is hereby continued to June 25, 1951, at 10:00 a. m., in Washington, D. C.

[Docket No. 9923]

AURORA BROADCASTERS, INC.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Aurora Broadcasters, Inc., Ketchikan, Alaska, for construction permit; Docket No. 9923, File No. BP-7532.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled application for a construction permit for a new standard broadcast station to operate on the frequency 580 kilocycles, with a power of 500 watts night and one kilowatt day, unlimited time at Ketchikan, Alaska;

It appearing that Aurora Broadcasters, Inc. is financially qualified to construct and operate the proposed station; that the construction and operation of the proposed station would not result in objectionable interference with any existing station or pending application for broadcast facilities and would provide adequate service to the City of Ketchikan, Alaska; and that a grant of the above-entitled application would be in conformance with the Commission's rules relating to engineering matters and with the Commission's Standards of Good Engineering Practice provided that the said grant was subject to the following conditions: (1) That the applicant satisfy legitimate complaints of blanket interference occurring within the 250 mv/m contour; and (2) that obstruction marking be in accordance with FCC Form B6-1; and

It further appearing, that the Estate of A. E. Lathrop, deceased, holds approximately 44.87 percent of the capital stock of Aurora Broadcasters, Inc.; that one Harry J. Hill is one of four executors of the Estate of A. E. Lathrop, deceased; that said Harry J. Hill is presently under an indictment charging him and others with conspiracy in violation of the Sherman Anti-Trust Act; and that for this reason, among others, the Commission is unable to conclude that a grant of the above-entitled application would serve public interest, convenience, and necessity;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled application is designated for hearing to commence at 10:00 a. m. on May 8, 1951, at Washington, D. C., upon the following issue:

1. To determine the technical and other qualifications of the corporate applicant, its officers, directors, and stockholders, to construct and operate the proposed station, with particular reference to the participation in the control of said corporate applicant of Harry J. Hill in the light of the matters in issue in the case now pending in the U. S. District Court for the District of Alaska, Fourth Division, No. 2376, entitled The United States of America vs. Healy River Coal Corporation, Harry J. Hill, et al.

[Docket No. 9924]

ENTERPRISE PUBLISHING CO. (WBET) ET AL.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Enterprise Publishing Company (WBET), Brockton, Massachusetts, for construction permit; Docket No. 9924, File No. BP-7743.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled application for construction permit to change the facilities of Station WBET, Brockton, Massachusetts from frequency 990 kilocycles, 1 kilowatt power, daytime only to frequency 1460 kilocycles, 1 kilowatt power, unlimited time and install directional antenna for night use only;

It appearing that the applicant is legally, technically, financially and otherwise qualified to operate Station WBET as proposed, but that the application may involve interference with one or more existing stations and otherwise not comply with the Standards of Good Engineering Practice; particularly with reference to population residing within the 250 mv/m blanket contours and to nighttime service to the city of Brockton, Massachusetts and to the Brockton metropolitan district; and

It further appearing that, in the event of a grant of either the application of Harrisburg Broadcasting Company (File Number BP-7331, Docket Number 9477) or of Rossmoyne Corporation (File Number BP-7296, Docket Number 9476) on which hearing in a consolidated proceeding was concluded January 27, 1950, nighttime service to the city of Brockton, Massachusetts and the Brockton metropolitan district may be further degraded;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said application is designated for hearing commencing at 10:00 a. m. on May 9, 1951, at Washington, D. C., upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the character of other broadcast service available to such areas and populations.

2. To determine whether the operation of station WBET, as proposed, would involve objectionable interference with station WSAR, Fall River, Massachusetts, or with any other existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

3. To determine whether the operation of station WBET, as proposed, would involve objectionable interference with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other

broadcast service to such areas and populations.

4. To determine whether the installation and operation of Station WBET, as proposed, would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference to population residing within the 250 mv/m blanket contours and to nighttime service to the city of Brockton, Massachusetts and to the Brockton metropolitan District.

It is further ordered, That Fall River Broadcasting Company, Incorporated, licensee of Station WSAR, Fall River, Massachusetts, is made a party to the proceeding.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket No. 9925]

JOSEPH F. BIDDLE PUBLISHING CO. (WHUN)

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of The Joseph F. Biddle Publishing Co. (WHUN), Huntingdon, Pennsylvania, for construction permit; Docket No. 9925, File No. BP-7788.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled application for a construction permit to change facilities from 1400 kilocycles, with 250 watts of power, unlimited time to 1010 kilocycles, with 1 kilowatt of power, daytime only, and to install a new transmitter, at Station WHUN, Huntingdon, Pennsylvania.

It appearing that the applicant is legally, technically, financially and otherwise qualified to operate Station WHUN as proposed, that no interference would be caused to any existing or proposed station but that the proposed station may not comply with the Standards of Good Engineering Practice;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said application is designated for hearing commencing at 10:00 a. m. on May 10, 1951, at Washington, D. C., upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of Station WHUN as proposed, and the character of other broadcast service available to such areas and populations.

2. To determine whether the installation and operation of Station WHUN as proposed would be in compliance with the Commission's Rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference (1) to a signal intensity in excess of 25 microvolts per meter delivered at the nearest point on the Canadian border in violation of § 3.25 (c) of the rules, (2) to the antenna height not meeting the minimum requirements of the Standards for a Class II Station, and (3) to the percentage of population residing within the 250 mv/m blanket contour.

3. To determine whether a grant of this application would be in accordance with section 307 (b) of the Communications Act of 1934, as amended.

4. To determine the overlap, if any, that will exist between the service areas of Station WHUN, as proposed, and of Station WCPA, Clearfield, Pennsylvania, the nature and extent thereof, and whether such overlap, if any, is in contravention of § 3.35 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 9626, 9871]

GOOD NEIGHBOR BROADCASTING CO. (KIWW) AND COMMUNITY BROADCASTING CO. (KUNO)

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of The Good Neighbor Broadcasting Company (KIWW), San Antonio, Texas, Docket No. 9871, File No. BP-7880, for construction permit; Leslie C. Smith, B. G. Moffett and J. H. Mayberry d/b as Community Broadcasting Company (KUNO), Corpus Christi, Texas, Docket No. 9626, File No. BMP-5034, for a modification of a construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration (1) the above-entitled application of The Good Neighbor Broadcasting Company, Inc. (KIWW), San Antonio, Texas (1540 kc., 250 w., D) for a change in frequency from 1540 kilocycles to 1400 kilocycles; (2) the above-entitled application of Leslie C. Smith, B. G. Moffett and J. H. Mayberry d/b as Community Broadcasting Company (KUNO), Corpus Christi, Texas (1400 kc., 100 w., U) for an increase in power from 100 watts to 250 watts; and the petition of the Community Broadcasting Company for reconsideration of the Commission's action of October 23, 1950 designating the petitioner's application for hearing and for a grant of said application without hearing;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said applications are designated for hearing in a consolidated proceeding commencing at 10:00 a. m. on May 17, 1951, at Washington, D. C., upon the following issues:

1. To determine the technical, financial and other qualifications of the applicant partnership and its partners, and the corporate applicant, its officers, directors and stockholders to operate Stations KIWW and KUNO, as proposed.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations, and the character of other broadcast service available to such areas and populations.

3. To determine the type and character of program service proposed to be rendered and whether it would meet the requirements of the populations and areas proposed to be served.

4. To determine whether the operation of Station KIWW, as proposed, would involve objectionable interference with Station KBOP, Pleasanton, Texas, and to determine whether the operation of Station KUNO, as proposed, would involve objectionable interference with Station KNAL, Victoria, Texas, or whether Stations KIWW and KUNO, as proposed, would involve objectionable interference with any other existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

5. To determine whether the operation of the stations, as proposed, would involve objectionable interference, each with the other, or with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

6. To determine whether the installation and operation of the proposed stations would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations, with particular reference to the overlap of the 25 mv/m contour of Station KIWW, as proposed, and the 2 mv/m of Station KBOP, Pleasanton, Texas.

7. To determine on a comparative basis which, if either, of the applications in this consolidated proceeding should be granted.

It is further ordered, That Marguerite N. Drain and Ben L. Parker d/b as Atoscosa Broadcasting Company, Pleasanton, Texas (KBOP), and the Victoria Broadcasting Company, Inc., Victoria, Texas (KNAL), be made parties to this proceeding, and

It is further ordered, That the Community Broadcasting Company's (KUNO) petition for reconsideration and grant be denied.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 9927-9929]

FLORAL CITY BROADCASTING CO. ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Boyd Phelps tr as Floral City Broadcast Company, Monroe, Michigan, Docket No. 9927, File No. BP-7877; Kenneth Neubrecht and Monroe MacPherson d/b as Ionia Broadcasting Co., Ionia, Michigan, Docket No. 9928, File No. BP-7912; Seneca Radio Corporation, Fostoria, Ohio, Docket No. 9929, File No. BP-7939; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled applications of Boyd Phelps tr/as Floral City Broadcast Company for a new standard broadcast station to be operated on the frequency 1430 kilocycles, with 500 watts of power, daytime only, using a directional antenna at Monroe, Michigan; of Kenneth Neubrecht and Monroe MacPherson d/b as Ionia Broadcasting Co. for a new standard broadcast station to be operated on the frequency 1430 kilocycles, with 500 watts power, daytime only at Ionia, Michigan; and of Seneca Radio Corporation for a new standard broadcast station to be operated on the frequency 1430 kilocycles, with 1 kilowatt of power, unlimited time, employing different directional antennas for day and night use at Fostoria, Ohio;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said applications are designated for hearing in a consolidated proceeding commencing at 10:00 a. m. on May 21, 1951, at Washington, D. C., upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the individual applicant and of the applicant partnership and its partners, and to determine the technicl, financial and other qualifications of the corporate applicant, its officers, directors and stockholders to operate the proposed stations.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations, and the character of other broadcast service available to such areas and populations.

3. To determine the type and character of program service proposed to be rendered and whether it would meet the requirements of the populations and areas proposed to be served.

4. To determine whether the operation of the proposed station at Ionia, Michigan would involve objectionable interference with Station WGRD, Grand Rapids, Michigan, or with any other existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

5. To determine whether the operation of the three proposed stations would involve objectionable interference, each with the other two, or with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

6. To determine whether the installation and operation of the proposed stations would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations, with particular reference to the population within the 250 mv/m blanket contour of the Monroe, Michigan proposal; and with particular reference to the ratio of the population within the normally protected and actual nighttime interference-free contours to the population which would receive satisfactory service, with respect to the Fostoria, Ohio application only.

7. To determine on a comparative basis which, if any, of the applications in this consolidated proceeding should be granted.

It is further ordered, That Music Broadcasting Company, licensee of Station WGRD, Grand Rapids, Michigan, is made a party to this proceeding, with respect to the Ionia, Michigan, application only.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket No. 9446]

RADIO READING

ORDER ENLARGING ISSUES

In re application of John J. Keel and Lloyd W. Dennis, Jr., tr as Radio Reading, Reading, Pennsylvania, for construction permit; Docket No. 9446, File No. BP-7589.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled application requesting a construction permit for a new standard broadcast station to operate on frequency 1510 kilocycles, with 1 kilowatt power, unlimited time employing a directional antenna (DA-1), at Reading, Pennsylvania;

It appearing that the said application was designated for hearing by Commission order of September 6, 1950, on engineering issues specified therein and that said hearing is presently scheduled to commence on April 16, 1951; and

It further appearing that the transmitter site and antenna system specified in the said application requires an aeronautical study by the Air Space Subcommittee under Part 17 of the Commission's rules and regulations and accordingly the Commission is unable at the present time to determine whether or not the said proposed transmitter site and antenna system would constitute a hazard to air navigation;

It is ordered, That the order of September 6, 1950, designating the above-entitled application for hearing is amended to include the following as issue 4 therein:

4. To determine whether the installation and operation of the proposed station would constitute a hazard to air navigation.

FEDERAL COMMUNICATIONS COMMISSION,

[Docket No. 9705]

PRAIRIE BROADCASTING CO., INC.

ORDER CONTINUING HEARING

In re application of Prairie Broadcasting Company, Inc., Beaver Dam, Wisconsin, for construction permit; Docket No. 9705, File No. BP-7554.

The Commission having under consideration the petition of the applicant herein, filed March 19, 1951, which requests that the hearing upon its application, presently scheduled for April 2, 1951, be continued for a period of approximately thirty days;

It appearing that petitioner is contemplating the abandonment of its original plan to establish a standard broadcast station in Beaver Dam, Wisconsin, on 1350 kilocycles, 500 watts, daytime hours, and is considering the advisability of making an amended application for authority to construct such a station in another community wherein there is no radio outlet for local expression at the present time;

It appearing further that petitioner has recently retained the services of engineering counsel to advise with respect to its new proposal, and it is expected that an amendment to its application will be filed within the thirty-day continuance period herein requested;

It appearing further that all interested parties have been notified of the instant petition and have not interposed objection thereto;

It is ordered, This 27th day of March 1951, that the petition under consideration be, and it is hereby, granted; and the hearing upon the above-entitled application is continued to May 3, 1951, in Washington, D. C.

[Designation Order No. 56]

DESIGNATION OF MOTIONS COMMISSIONER FOR APRIL

In re designation of Motions Commissioner for the month of April 1951.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

It is ordered, Pursuant to § 0.111 of the Statement of Delegations of Authority, that Frieda B. Hennock, Commissioner, is hereby designated as Motions Commissioner for the month of April 1951.

It is further ordered, That in the event said Motions Commissioner is unable to act during any part of said period the Chairman or Acting Chairman will designate a substitute Motions Commissioner.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 9931, 9932]

CLARKSVILLE BROADCASTING CO. AND TEXO BROADCASTING CO.

CORRECTED ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Winston O. Ward, d/b as Clarksville Broadcasting Company, Clarksville, Texas, Docket No. 9931, File No. BP-7976; B. B. Black, June Brewer and Reagan Hurt, d/b as Texo Broadcasting Company, Clarksville, Texas, Docket No. 9932, File No. BP-7977; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 21st day of March 1951;

The Commission having under consideration the above-entitled applications of Winston O. Ward, d/b as The Clarksville Broadcasting Company, B. B. Black, June Brewer and Reagan Hurt, d/b as Texo Broadcasting Company, both requesting construction permits for new standard broadcast stations to operate on 1350 kc., with 500 w. power, daytime only, at Clarksville, Texas;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said applications are designated for hearing in a consolidated proceeding commencing at 10:00 a. m. on May 24, 1951, at Washington, D. C., upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicant Winston O. Ward and the applicant partnership and its partners to operate the proposed stations.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations, and the character of other broadcast service available to such areas and populations.

3. To determine the type and character of program services proposed to be rendered and whether they would meet the requirements of the populations and areas proposed to be served.

4. To determine whether the operation of the proposed stations would involve objectionable interference with any existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

5. To determine whether the operation of the proposed stations would involve objectionable interference, each with the other, or with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

6. To determine whether installation and operation of the proposed stations would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

7. To determine the overlap, if any, that will exist between the service areas of the station proposed by Winston O. Ward and of Station KIMP, Mt. Pleasant, Texas, the nature and extent thereof, and whether such overlap, if any, is in contravention of § 3.35 of the Commission's rules.

8. To determine on a comparative basis which, if either of the applications in this consolidated proceeding should be granted.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2382]

MONTAUP ELECTRIC CO.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held in its office in the city of Washington, D. C. on the 28th day of March A. D. 1951.

Montaup Electric Company ("Montaup"), an indirect public-utility subsidiary company of Eastern Utilities Associates ("EUA"), a registered holding company, having filed a declaration and amendments thereto, pursuant to section 7 of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder, with respect to the following proposed transactions:

Montaup proposes to issue, from time to time but not later than December 31, 1951, unsecured promissory notes in an aggregate amount not in excess of $12,000,000. The notes, bearing an interest rate of 2½ percent per annum and maturing not later than nine months after the date of issue of the first of said notes and in no event later than December 31, 1951, will be issued to The First National Bank of Boston, which bank may grant participation in the proposed loans to another bank or banks. The notes will be issued under a bank loan agreement and may be prepaid at any time without premium.

The declaration indicates that the proceeds of the notes will be used by Montaup to pay its unsecured 2 percent promissory notes, due March 30, 1951, and outstanding on that date in the estimated face amount of $7,600,000, and to finance Montaup's construction requirements through 1951. The declaration states that Montaup is carrying out a construction program involving the installation of a 60,000 kilowatt steam-electric generating unit estimated to cost $12,215,476 through the year 1951.

The declaration indicates that with respect to the proposed transactions, it is not necessary to secure the approval of any State or Federal commission, other than this Commission. The expenses in connection with the proposed transactions are estimated in the declaration at $1,500, of which $1,400 represents estimated fees and expenses for legal services.

The said declaration having been filed on February 27, 1951, and amendments thereto having been subsequently filed, and notice of said filing having been given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, and the Commission having received no request for a hearing with respect to said declaration, as amended, within the period specified in said notice, and not having ordered a hearing thereon; and

The Commission finding with respect to the proposed transactions that the applicable provisions of the act and the rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration, as amended, be permitted to become effective, subject to the terms and conditions prescribed by Rule U-23; and the Commission further deeming it appropriate that the order herein become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that the declaration, as amended, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed by Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R Doc 51-3977; Filed, Apr. 3, 1951; 8 45 a. m.]

[File No. 70-2586]

KINGSPORT UTILITIES, INC.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of March A. D. 1951.

Kingsport Utilities, Incorporated ("Kingsport"), a wholly owned electric utility subsidiary of American Gas and Electric Company, having filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935, particularly sections 6 (a) and 7 thereof, with respect to the following proposed transactions:

Kingsport proposes to establish a line of credit with The Guaranty Trust Company of New York whereby Kingsport may borrow from time to time prior to December 31, 1953, amounts not to exceed in the aggregate $750,000. Said borrowings will be evidenced by promissory notes dated as of the date of each such borrowing, maturing not more than 9 months after the issuance thereof, and bearing interest from the date of issuance at the then current prime credit rate. The initial borrowing is proposed to be made on or about April 1, 1951, in the amount of $100,000, at the then current prime credit rate, which Kingsport expects will be 2½ percent per annum.

At least 10 days before each borrowing subsequent to the initial borrowing, or 10 days prior to the proposed renewal of any note outstanding hereunder, Kingsport will file an amendment herein setting forth the amount of such borrowing, or proposed renewal, and the annual interest rate thereon, such amendment to become effective 10 days after the filing thereof, if no action is taken by the Commission within such 10-day period.

Proceeds from the proposed borrowing will be used to finance, in part, the construction program of Kingsport which, it is estimated, will require the expenditure of approximately $1,450,000 during the years 1951 to 1953, inclusive.

Said declaration having been filed on March 5, 1951, notice of said filing having been given in the form and manner required by Rule U-23 promulgated pursuant to said act, the Commission not having received a request for hearing within the time specified in said notice or otherwise and the Commission not having ordered a hearing thereon; and

The Commission finding that the proposed transactions are in accordance with the applicable standards of the act and that no adverse findings are necessary thereunder and the Commission deeming it appropriate that said declaration be permitted to become effective forthwith, without the imposition of terms or conditions:

It is ordered, Pursuant to the applicable provisions of the act that said declaration be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions contained in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F R. Doc. 51-3979; Filed, Apr. 3, 1951; 8:46 a m.]

[File No. 70-2594]

OHIO EDISON CO.

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 29th day of March A. D. 1951.

Notice is hereby given that a declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 (the "act") by Ohio Edison Company ("Ohio"), a registered holding company and a public utility company. The filing has designated sections 6, 7, and 12 of the act and Rules U-42 and U-50 promulgated thereunder as being applicable to the transactions described therein.

Notice is further given that any interested person may, not later than April 16, 1951, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter stating the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted; or he may request that he be notified if the Commission should order a hearing thereon. At any time after said date, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 and U-100 thereof. Any such request should be addressed to: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C.

All interested persons are referred to said declaration, which is on file in the offices of this Commission, for a statement of the transactions therein proposed which are summarized as follows:

Ohio proposes to issue and sell 150,000 shares of a new series of $100 par value preferred stock at competitive bidding pursuant to Rule U-50. The dividend rate and the price per share to be paid the company are to be determined by the competitive bidding. The price to be paid shall not be less than $100 nor more than $102.75 per share. Ohio proposes to accept the bid resulting in the lowest actual cost of money, which, by the terms of the proposal, shall not be more than 4.50 percent.

By the terms of the filing, Ohio also proposes to issue 436,224 shares of additional common stock, par value $8 per share, pursuant to a subscription rights offering to its common stockholders of record at the close of business on May 2, 1951, at the rate of one share of new common stock for each 10 shares of common stock held, at a price to be determined by the company. The holders of warrants evidencing subscription rights will also be entitled to subscribe, subject to allotment, at the same price for the shares covered by outstanding unexercised warrants. No fractional shares are to be issued in exchange for warrants. The warrants provide that persons subscribing for stock may direct the subscription agent to purchase additional rights required to complete the subscription for a full share or to sell rights in excess of full share subscriptions. In each case, the purchase or sale may not exceed 9 rights for any single stockholder.

The offer of shares of common stock will be underwritten. Such shares as are not subscribed for by the stockholders and such shares, if any, as are acquired by Ohio in connection with stabilizing the price of the common stock, as described more fully below, are to be offered to prospective bidders pursuant to the competitive bidding requirements of Rule U-50 at the same price per share as the price at which stockholders may subscribe for additional common stock. Prospective bidders will be notified of the price per share as determined by the company at least 42 hours prior to the time for the receipt of the bids. Invitations for

bids will request that the prospective bidders name the amount of compensation, if any, to be paid by the company to such bidders for their services. The proposed purchase contract provides that the bidders are to agree that, in case any shares of any new common stock purchased by them shall be sold prior to the expiration of 30 days following the close of the subscription period, for a price in excess of $1.50 more than the subscription price, the bidders shall pay to Ohio, in addition to the purchase price, a sum equal to one-half of such excess.

In connection with stabilizing the price of the common stock Ohio may, during the period commencing with the first business day when the price per share is determined by the company and ending at the time of the acceptance of a bid for the stock, purchase up to 43,622 shares of its common stock on the New York Stock Exchange, on the Midwest Stock Exchange, or otherwise, such purchases to be made through brokers with the payment of regular stock exchange commissions.

It is stated in the filing that during the years 1951 and 1952 the company contemplates expenditures for the construction of property additions aggregating approximately $57,000,000 and that the proceeds from the sale of the securities embraced in the instant filing will assist in providing needed funds for the construction program.

The declaration requests that the order of the Commission with respect thereto become effective forthwith upon issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 51-3978; Filed, Apr. 3, 1951; 8:46 a. m.]

[File No. 70-2598]

NEW ENGLAND GAS AND ELECTRIC ASSN. AND ALGONQUIN GAS TRANSMISSION CO.

NOTICE REGARDING FILING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 28th day of March A. D. 1951.

Notice is hereby given that a joint application-declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by New England Gas and Electric Association ("Negea"), a registered holding company, and its subsidiary, Algonquin Gas Transmission Company ("Algonquin"). Applicants-declarants have designated sections 6 (b), 7, 9 (a), 10, and 12 of the act and Rule U-43 promulgated thereunder.

Notice is further given that any interested person may, not later than April 11, 1951, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law raised by said application-declaration proposed to be controverted, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after April 11, 1951, said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application-declaration which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Algonquin, a natural gas pipe line company, has presently authorized 100,000 shares of common stock, par value $100 per share, of which 2,265.62 shares are presently outstanding and owned as follows: Negea, 820.31 shares or 32$^{13}/_{16}$ percent; Eastern Gas & Fuel Associates, 820.31 shares or 32$^{13}/_{16}$ percent; and Texas Eastern Transmission Corporation, 625 shares or 25 percent. In addition to the above outstanding shares, Algonquin has reserved for issuance to Providence Gas Company 234.35 shares of common stock. In the event that the stock thus reserved is not taken up by Providence, it will be issued pro rata to the existing stockholders, or if Texas Eastern Transmission Corporation does not take up its pro rata share then equally to Negea and to Eastern Gas and Fuel Associates.

In order to provide approximately $8,000,000 necessary to furnish equity capital required by Algonquin in connection with the financing of essential construction of pipeline facilities to carry on its business as a natural gas transmission company, Algonquin proposes to issue and sell to its present stockholders pursuant to preemptive rights, not in excess of 77,500 shares of common stock having a par value of $100 per share, such stock to be offered to its stockholders at a price of $100 per share, or such funds will be secured by temporary non-interest bearing advances from stockholders on open account, to be subsequently converted into such common stock.

Negea proposes to purchase from Algonquin additional capital stock up to but not in excess of an amount to bring its stock holdings in Algonquin to a maximum of $3,000,000, part of which may initially be in the form of advances from time to time, such advances to be converted subsequently into common stock. In no event will the total participation of New England in the common stock of Algonquin presently authorized be in excess of 37½ percent.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[Vesting Order 17544]

DIETER LENZ ET AL.

In re: Securities owned by Dieter Lenz and others. F-28-31130.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That the persons whose names and last known addresses are listed below:

Dieter Lenz, Wehr, Germany.
Johanna Lenz, Wehr, Germany.
Gerda Obermaier, Wehr, Germany.
Erich Sutter, Wehr, Germany.
Rolf Sutter, Wehr, Germany.

are residents of Germany and nationals of a designated enemy country (Germany);

2. That the property described as follows:

a. Those certain debts or other obligations, matured or unmatured, evidenced by four (4) 1st Mortgage Leasehold Sinking Fund Gold Bonds, extended to 1933, 4½ percent–5 percent of 1 West 42d Street, Inc., said bonds having an aggregate face value of $4,000 and bearing the numbers 3889, 5159, 5160 and 5269, together with any and all accruals to the aforesaid debts or other obligations, and any and all rights to demand, enforce and collect the same, and any and all rights in, to and under the aforesaid bonds,

b. Six hundred seventy-five (675) shares of preferred stock of the American Electric Securities Corporation, 20 Pine Street, New York 5, New York, evidenced by the certificates numbered and in the amounts listed below:

Certificate No.:	Number of shares
NP 050	[illegible]
NP 246	[illegible]
NP 481 5	[illegible]

[1] Each.

said certificates registered in the name of Hermann Sutter-Herlan, together with all declared and unpaid dividends thereon, and

c. Two thousand (2,000) shares of $1.00 par value common capital stock of Basin Montana Tunnel Company, Inc., 2 Park Avenue, Room 703, New York 16, New York evidenced by the certificates numbered, registered and in the amounts listed below:

Certificate No.	Number of shares	Registered owner
17[illegible]	1[illegible]	M. F. Rothe[illegible]
1[illegible]	12[illegible]	Hermann Sut[illegible]
13[illegible]	5[illegible]	[illegible]

[1] Each.

together with all declared and unpaid dividends thereon,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by Dieter Lenz, Johanna Lenz, Gerda Obermaier, Erich Sutter and Rolf Sutter, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[Vesting Order 17501]

WALDEMAR GIESE

In re: Estate of Waldemar Giese, deceased. File No. D-28-12957.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Ulrich Giese and Ferdinand Fuhde, whose last known address is Germany, are residents of Germany and nationals of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the persons named in subparagraph 1 hereof, in and to the Estate of Waldemar Giese, deceased, is property payable or deliverable to, or claimed by the aforesaid nationals of a designated enemy country (Germany);

3. That such property is in the process of administration by Max Strassenberger, as Executor, acting under the judicial supervision of the Surrogate's Court, Kings County, New York;

and it is hereby determined:

4. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 13, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General.
Director, Office of Alien Property.

[Vesting Order 17503]

MARIE WITT GRELL

In re: Estate of Marie Witt Grell, deceased. File No. D-28-5164.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Mrs. Anny Bockelman Heidorn and Hans Joachim Heidorn, whose last known address is Germany, are residents of Germany and nationals of a designated enemy country (Germany);

2. That all right, title, interest, and claim of any kind or character whatsoever of the persons named in subparagraph 1 hereof, in and to the Estate of Marie Witt Grell, deceased, is property payable or deliverable to, or claimed by the aforesaid nationals of a designated enemy country (Germany);

3. That such property is in the process of administration by Mrs. Rosamond T. Kane, as Executrix, acting under the judicial supervision of Kings County Surrogate's Court, Hall of Records, Brooklyn, New York;

and it is hereby determined:

4. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 13, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[Vesting Order 17546]

ANNA RACKE

In re: Stock owned by and debt owing to Anna Racke. File No. D-28-12936.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Anna Racke, whose last known address is Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the property described as follows:

a. Sixty-nine (69) shares of $1.00 par value capital stock of Mutual Investment Fund, Inc., 15 Exchange Place, Jersey City, New Jersey, a corporation organized under the laws of the State of Maryland, evidenced by a certificate numbered D2130, registered in the name of Anna Racke, and presently in the custody of said Mutual Investment Fund, Inc., together with all declared and unpaid dividends thereon, and

b. That certain debt or other obligation of Mutual Investment Fund, Inc., 15 Exchange Place, Jersey City, New Jersey, representing accumulated dividends on sixty-nine (69) shares of Mutual Investment Fund, stock, formerly registered in the name of Katharina Racke, now deceased, together with any and all accruals thereto, and any and all rights to demand, enforce and collect the same,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Anna Racke, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the prop-

erty described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,

[Vesting Order 17547]

MARTHA SCHLOSSER

In re: Stock owned by Martha Schlosser. F-28-31374.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Martha Schlosser, whose last known address is Fellbach-Stuttgart, Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the property described as follows:

a. Four (4) shares of $10.00 par value common capital stock of Cities Service Company, 60 Wall Street, New York 5, New York, a corporation organized under the laws of the State of Delaware, evidenced by a certificate numbered LE 26827, registered in the name of Martha Schlosser, and presently in the custody of Cities Service Company, 60 Wall Street, New York 5, New York, together with all declared and unpaid dividends thereon, and

b. Four (4) shares of $5.00 par value common capital stock of Toledo Edison Company, Toledo, Ohio, a corporation organized under the laws of the State of Ohio, evidenced by a certificate numbered TNCO 45365, registered in the name of Martha Schlosser, and presently in the custody of Cities Service Company, 60 Wall Street, New York 5, New York, together with all declared and unpaid dividends thereon,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of, or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 19, 1951.

FEDERAL REGISTER

VOLUME 16 NUMBER 66

Washington, Thursday, April 5, 1951

TITLE 3—THE PRESIDENT

PROCLAMATION 2921

ARMED FORCES DAY, 1951

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the armed forces of the United States, having dedicated themselves unselfishly to the service of their country, are now fighting and dying on foreign soil in defense of the principles of freedom which this Nation has cherished since its birth; and

WHEREAS it is appropriate that we dedicate one day each year to paying tribute to the armed forces and to rendering homage to them as the defenders of our people, our Nation, and our democratic way of life:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby proclaim Saturday, May 19, 1951, as Armed Forces Day; and I invite the Governors of the States, Territories, and possessions of the United States to provide for the celebration of that day in such manner as to honor the members of our armed forces.

As Commander in Chief of the armed forces of the United States, I direct the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force to mark the designated day with appropriate ceremonies, and to cooperate with civil authorities in suitable observances of the day.

I also request my fellow citizens to display the flag of the United States on Armed Forces Day, and by fitting exercises to demonstrate their recognition of the gallantry, sacrifice, and devotion to duty of the men and women of the armed forces.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this second day of April in the year of our Lord nineteen hundred and [SEAL] fifty-one, and of the Independence of the United States of America the one hundred and seventy-fifth.

HARRY S. TRUMAN

By the President:

DEAN ACHESON,
Secretary of State.

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Bureau of Animal Industry, Department of Agriculture

[B. A. I. Order 373, Amdt. 3]

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), AND NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS): PROHIBITED AND RESTRICTED IMPORTATIONS

FOREIGN CURED OR COOKED MEATS FROM COUNTRIES WHERE RINDERPEST OR FOOT-AND-MOUTH DISEASE EXISTS

Pursuant to the authority conferred by section 306 of the Tariff Act of 1930 (46 Stat. 689, 19 U. S. C. 1306) and by section 2 of the act of February 2, 1903, as amended (32 Stat. 792, 45 Stat. 59; 21 U. S. C. 111), § 94.4 of the regulations relating to prohibitions and restrictions upon importations of certain animals and products because of rinderpest, foot-and-mouth disease, fowl pest (fowl plague), and Newcastle disease (avian pneumoencephalitis) (15 F. R. 6907) is hereby amended to read as follows:

§ 94.4 *Foreign cured or cooked meats[1] from countries where rinderpest or foot-and-mouth disease exists.* (a) The importation of cured meats derived from ruminants or swine, originating in any country designated in § 94.1 is prohibited unless the following conditions have been fulfilled:

(1) All bones shall have been completely removed in the country of origin.

(2) The meat shall have been held in an unfrozen, fresh condition for at least 7 days immediately following the slaughter of the animals from which it was derived.

(3) The meat shall have been thoroughly cured by the application of dry salt or by soaking in a solution of salt.

(4) When so directed by the Chief of the Bureau of Animal Industry, such meat shall be consigned directly from the port of entry to a meat-processing establishment operating under Federal meat inspection that has been approved by him for the further processing of such meat. Such meat shall be shipped from the port of entry to the approved establishment under Customs seals or seals of the Bureau and shall be otherwise handled as the said Chief of Bureau may direct. Seals applied under authority of this section shall not be broken except by persons authorized to do so by the said Chief of Bureau.

(b) The importation of cooked meats derived from ruminants or swine originating in any country designated in § 94.1 is prohibited unless the following conditions shall have been fulfilled:

(1) All bones shall have been completely removed in the country of origin.

(2) The meat shall have been heated to such an extent that, upon inspection, the meat will have a thoroughly cooked appearance throughout.

(3) When so directed by the Chief of the Bureau of Animal Industry such meat shall be dealt with as provided in paragraph (a) (4) of this section.

The primary effect of the amendment is to give additional protection to the livestock industry of the United States by providing added safeguards in the handling of certain cured and cooked meats imported from countries where foot-and-mouth disease or rinderpest exists. Rapidly developing new demands for such importations require that this amendment be made effective at the earliest possible moment. Accordingly, pursuant to section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and public procedure on this amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after its publication in the FEDERAL REGISTER. Such notice and procedure are not required by any other statute.

This amendment shall become effective immediately.

(Sec. 2, 32 Stat. 792, as amended, sec. 307, 46 Stat. 689; 19 U. S. C. 1306, 21 U. S. C. 111)

Done at Washington, D. C., this 30th day of March 1951.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

[F. R. Doc. 51–4051; Filed, Apr. 4, 1951; 8:49 a. m.]

[1] This does not include any meat that has been sterilized by heat in hermetically sealed containers.

TITLE 31—MONEY AND FINANCE: TREASURY

Chapter II—Fiscal Service, Department of the Treasury

Subchapter A—Bureau of Accounts

PART 202—DEPOSIT OF PUBLIC MONEYS AND PAYMENT OF GOVERNMENT CHECKS

MISCELLANEOUS AMENDMENTS

Part 202, Subchapter A, Chapter II, Title 31 of the Code of Federal Regulations of the United States of America (appearing also as Treasury Department Circular No. 176 (Revised) dated December 21, 1945, as amended) is hereby amended in the follwing respects:

1. By revising § 202.8 (a) to read as follows:

§ 202.8 *Indorsement and transmission of checks for collection*—(a) *Form of indorsement.* The depositor should stamp on the face of each check deposited for credit to the account of the Treasurer of the United States the words "This check is in payment of an obligation to the United States and must be paid at par. N. P. Do not wire nonpayment," followed by the name of his Department or agency. The Federal Reserve Bank or general depositary will make an effort to collect every check on these terms. If the bank on which a check is drawn for any reason does not pay it at par, it will be returned to the depositor in the same manner as a bad check. A check is not paid by the bank on which it is drawn until the proceeds thereof have been received in actually and finally collected funds. All checks should be indorsed: "Pay to the order of any Federal Reserve Bank or Branch or general depositary for credit to the Treasurer of the United States,

_____,
(Date)

_____
(Stamp signature or title of depositor)

2. By revising the undesignated paragraph immediately following paragraph (f) of § 202.20 *Collateral security for deposits,* to read as follows:

All securities to be pledged as collateral security for such deposits must be deposited with (1) the Federal Reserve Bank or Branch of the district in which the depositary is located or, by the direction and subject to the order of the Federal Reserve Bank or Branch, with a custodian or custodians within the United States, designated by such Federal Reserve Bank or Branch, and

under such terms and conditions as it may prescribe, or (2) the Treasurer of the United States, Division of Securities, and should be accompanied by a letter stating distinctly the purpose for which deposited. When registered bonds are to be deposited as collateral security hereunder, such bonds must be assigned to the Treasurer of the United States in trust for the bank by an officer of the bank, duly authorized by resolution of its board of directors to make such assignment, and the assignment must be duly acknowledged pursuant to the regulations of the Secretary of the Treasury governing assignments of registered bonds. A certified copy of the resolution of the board of directors must accompany the registered bonds when forwarded for deposit.

(Sec. 10, 56 Stat. 358; 12 U. S. C. 265)

[SEAL] E. H. FOLEY, JR.,
Acting Secretary of the Treasury.

MARCH 29, 1951.

PART 315—UNITED STATES SAVINGS BONDS

PART 316—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES E

PART 318—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES F & G

CROSS REFERENCE: See Part 329 of this chapter, *infra*, for provisions amendatory of and supplementary to Parts 315, 316, and 318.

[1951 Dept. Circ. 885]

PART 329—OPTIONS OPEN TO OWNERS OF MATURING UNITED STATES SAVINGS BONDS OF SERIES E

MARCH 26, 1951.

Sec.
329.1 Offering to owners of Series E savings bonds heretofore or hereafter issued.
329.2 Further interest after maturity.
329.3 Exchange for Series G bonds bearing special par redemption privilege.
329.4 Federal income tax.
329.5 Definition of terms.
329.6 Right to purchase bonds of Series E and G currently.
329.7 Modification of other circulars.
329.8 Other circulars generally applicable.
329.9 Supplements and amendments.

AUTHORITY: §§ 329.1 to 329.9 issued under sec. 22, 40 Stat. 21, as amended, sec. 1, Pub. Law 12, 82d Cong.; 31 U. S. C. 757c.

§ 329.1 *Offering to owners of Series E Savings Bonds heretofore or hereafter issued.* (a) Pursuant to section 22 (b) (2) of the Second Liberty Bond Act, as amended (31 U. S. C. 757c (b) (2)[1]), the Secretary of the Treasury offers to owners of United States Savings Bonds of Series E (hereinafter referred to as Bonds of Series E) who wish to continue their investment beyond maturity, the options hereinafter set forth. Bonds of Series E were first issued on May 1, 1941 and will mature beginning on May 1, 1951. Such options are hereby granted for the benefit of owners of Bonds of Series E heretofore or hereafter issued and are as binding on the United States as if expressly set forth in the text of the bonds. The term "owners" as used in these regulations in this part is defined in § 329.5 (b).

(b) The provisions of § 329.2 do not in any way restrict the right of owners of Bonds of Series E to cash their bonds at any time in accordance with the terms of such bonds.

§ 329.2 *Further interest after maturity.* (a) Owners of Bonds of Series E, which mature on and after May 1, 1951, have the option of retaining the matured bonds for a further 10-year period and earning interest upon the maturity values thereof to accrue at the rate of 2½ percent simple interest per annum for the first 7½ years and at a higher rate thereafter so that the aggregate return for the 10-year extension period will be about 2.9 percent compounded semi-annually. No action is required of owners desiring to take advantage of the extension. Merely by continuing to hold their bonds after maturity, owners will earn further interest in accordance with the schedule set forth in the table at the end of this part.

(b) Interest hereunder accrues at the end of the first half-year period following maturity and each successive half-year period thereafter. If the bonds are redeemed before the end of the first half-year period following maturity, the owner is entitled to payment only at the face value thereof.

§ 329.3 *Exchange for Series G bonds bearing special par redemption privilege.* (a) Owners of Bonds of Series E which mature on and after May 1, 1951, who prefer to have an investment paying current income rather than to exercise their right to request cash, or to retain the bonds under § 329.2, have the option of presenting their matured bonds in amounts of $500 (maturity value) or multiples thereof in exchange for Series G bonds which will bear the special privilege of redemption at par at any time at the owner's option as set forth in paragraph (b) of this section. The exchange will be governed by the rules set forth in paragraph (c) of this section. Except as set forth in this section, the Series G bonds issued upon exchange will in all other respects be the same as the Series G bonds currently on sale which mature 12 years from issue date and bear interest at the rate of 2½ percent per annum payable semiannually by check drawn to the order of the registered owner.

(b) The Series G bonds issued upon exchange will be specially stamped to indicate that they are unconditionally redeemable by the owner at par at any time after 6 months from the issue date upon one calendar month's notice to a Federal Reserve Bank or Branch or to the Treasury Department. The Series G bonds currently on sale for cash subscription may not be redeemed at par prior to maturity except in the event of death as set forth in the regulations governing United States Savings Bonds (Part 315 of this chapter).

(c) The following rules govern the exchange under this section: (1) The Series G bonds will be registered in the names of the owners of the matured Bonds of Series E in any authorized form of registration; (2) Series G bonds will be issued upon exchange only in denominations of $500, $1,000, $5,000 and $10,000 (maturity value); (3) the Bonds of Series E used in the exchange must be presented to a Federal Reserve Bank or Branch or to the Treasury Department, Washington 25, D. C., not later than two calendar months after the month of maturity and the bonds of Series G issued upon exchange will be dated as of the first day of the month in which the Bonds of Series E matured; but (4) if an owner desires to accumulate a number of Bonds of Series E for exchange to bonds of Series G in any authorized denomination set forth in subparagraph (2) of this paragraph he may accumulate such bonds during any twelve consecutive calendar months and present them for exchange not later than two calendar months after the month of maturity of the last bond in the group to be exchanged and the Series G bonds issued upon such exchange will be dated on a weighted average dating basis which will afford an adequate interest adjustment for the period during which the owner has accumulated the Bonds of Series E for the exchange; and (5) cash subscriptions in whole or in part will not be accepted for the Series G bonds offered under this section.

§ 329.4 *Federal income tax.* (a) A taxpayer who has been reporting the increase in redemption value of his Bonds of Series E, for Federal income tax purposes, each year as it accrues, must continue to do so if he retains the bonds under § 329.2, unless in accordance with income tax regulations (Regulations 111, § 29.42-6 of Title 26) the taxpayer secures permission from the Commissioner of Internal Revenue to change to a different method of reporting income from such obligations. A taxpayer who has not been reporting the increase in redemption value of such bonds currently for tax purposes may in any year prior to final maturity, and subject to the provisions of section 42 (b) of the Internal Revenue Code and of the regulations prescribed thereunder, elect for such year and subsequent years to report such income annually. Holders of Bonds of Series E who have not reported the increase in redemption value currently are required to include such amount in gross income for the taxable year of actual redemption or for the taxable year in which the period of extension ends, whichever is earlier.

(b) Taxpayers who exchange their matured Bonds of Series E for Series G bonds under the provisions of § 329.3 must report the difference between the purchase price of their Series E bonds and the maturity value thereof in their returns for the year in which the bonds mature to the extent to which such difference has not been reported in previous returns. The interest payable on the Series G bonds issued upon exchange must be reported as income for the taxable year in which received or accrued.

(c) If further information concerning the income tax is desired, inquiry should be addressed to the Collector of Internal Revenue of the taxpayer's district or to the Bureau of Internal Revenue, Washington 25, D. C.

§ 329.5 *Definition of terms.* (a) The term "Bonds of Series E" as used in the regulations in this part includes all Bonds of Series E issued as United States Defense Savings Bonds, United States War Savings Bonds and all those issued as Series E savings bonds without special designation; (b) the term "owners" as used in the regulations in this part includes registered owners, coowners, surviving beneficiaries, next of kin and legatees of a deceased owner, and persons who have acquired bonds pursuant to judicial proceedings against the owner, except that judgment creditors, trustees in bankruptcy and receivers of insolvents' estates will have the right only to payment of Bonds of Series E in accordance with the regulations governing United States Savings Bonds (Part 315 of this chapter).

§ 329.6 *Right to purchase bonds of Series E and G currently.* The amount of matured Bonds of Series E retained after maturity and the amount of bonds of Series G issued upon exchange in accordance with the regulations in this part will not be included in the limitation on holdings applicable to the amount of bonds of such series which may be purchased by an investor each calendar year; except that nothing contained in this part shall be construed to permit the current purchase of savings bonds of Series E for the account of organizations and fiduciaries or the purchase of savings bonds of either series for the account of persons who are not entitled to have them on original issue, contrary to the provisions of the regulations governing United States Savings Bonds (Part 315 of this chapter).

§ 329.7 *Modification of other circulars.* The provisions of these regulations in this part shall be considered as amendatory of and supplementary to the offering circular for saving bonds of Series E (Department Circular No. 653 and its revisions (Part 316 of this chapter)), the offering circular for savings bonds of Series G (Department Circular No. 654 and its revisions (Part 318 of this chapter)) and the circular containing the regulations governing United States Savings Bonds[2] (Part 315 of this chapter), which circulars are hereby modified to accord with the provisions of this part.

§ 329.8 *Other circulars generally applicable.* Except as provided in the regulations in this part, the circulars referred to in § 329.7 will continue to be generally applicable.

§ 329.9 *Supplements and amendments.* The Secretary of the Treasury may at any time or from time to time supplement or amend the terms of the regulations in this part, or of any amendment or supplement thereto.

[1] Act of March 26, 1951, Pub. Law 12, 82d Cong.

[2] The regulations currently in force governing United States Savings Bonds are set forth in Department Circular No. 530, Sixth Revision, as amended.

OPTIONAL EXTENSION OF UNITED STATES SAVINGS BONDS, SERIES E—TABLE OF REDEMPTION VALUES AND INVESTMENT YIELDS RELATING TO EXTENDED BONDS

Table for the 10 year extension period showing: (1) How bonds of Series E, by denominations, increase in redemption value during successive half-year periods following date of original maturity; (2) the approximate investment yield on the purchase price from issue date to the beginning of each half-year period; and (3) the approximate investment yield on the current redemption value from the beginning of each half-year period to extended maturity. Yields are expressed in terms of rate percent per annum, compounded semiannually.

Extended maturity value	$33.33	$33.33	$66.67	$133.33	$266.67	$666.67	$1,333.33	Approximate investment yield	
Original maturity (or face) value	10.00	25.00	50.00	100.00	200.00	500.00	1,000.00		
Issue price	7.50	18.75	37.50	75.00	150.00	375.00	750.00	(2) On purchase price from original issue date to beginning of each half year period	(3) On current redemption value from beginning of each half year period to extended maturity
Period after issue date	(1) Redemption values during each half-year period								
10 to 10½ years	$10.00	$25.00	$50.00	$100.00	$200.00	$500.00	$1,000.00	*Percent* 2.90	*Percent*
10½ to 11 years	10.12	25.31	50.62	101.25	202.50	506.25	1,012.50	2.88	2.90
11 to 11½ years	10.25	25.62	51.25	102.50	205.00	512.50	1,025.00	2.86	2.92
11½ to 12 years	10.37	25.94	51.87	103.75	207.50	518.75	1,037.50	2.84	2.91
12 to 12½ years	10.50	26.25	52.50	105.00	210.00	525.00	1,050.00	2.83	2.93
12½ to 13 years	10.62	25.56	53.12	106.25	212.50	531.25	1,062.50	2.87	2.95
13 to 13½ years	10.75	26.87	53.75	107.50	215.00	537.50	1,075.00	2.90	3.00
13½ to 14 years	10.87	27.19	54.37	108.75	217.50	543.75	1,087.50	2.92	3.10
14 to 14½ years	11.00	27.50	55.00	110.00	220.00	550.00	1,100.00	2.93	3.21
14½ to 15 years	11.12	27.81	55.62	111.25	222.50	556.25	1,112.50	2.94	3.32
15 to 15½ years	11.25	28.12	56.25	112.50	225.00	562.50	1,125.00	2.72	3.33
15½ to 16 years	11.37	28.41	56.87	113.75	227.50	568.75	1,137.50	2.71	3.33
16 to 16½ years	11.50	28.75	57.50	115.00	230.00	575.00	1,150.00	2.69	3.33
16½ to 17 years	11.62	29.06	58.12	116.25	232.50	581.25	1,162.50	2.68	3.33
17 to 17½ years	11.75	29.37	58.75	117.50	235.00	587.50	1,175.00	2.67	3.33
17½ to 18 years	12.40	30.00	60.00	120.00	240.00	600.00	1,200.00	2.70	4.36
18 to 18½ years	12.37	30.37	61.23	122.47	245.33	613.33	1,226.67	2.78	4.33
18½ to 19 years	12.58	31.33	62.67	125.33	250.67	626.67	1,253.33	2.79	4.37
19 to 19½ years	12.80	32.00	64.00	128.00	256.00	640.00	1,280.00	2.81	4.42
19½ to 20 years	13.67	32.67	65.33	130.67	261.33	653.33	1,306.67	2.87	4.48
Extended maturity value (20 years from issue date)	13.33	33.33	66.67	133.33	266.67	666.67	1,333.33	2.90	

[1] Calculated on basis of $1,000 bond (face value).

Compliance with the notice, public procedure, and effective date requirements of the Administrative Procedure Act (Pub. Law 404, 79th Cong.; 60 Stat. 237) is found to be impracticable and unnecessary with respect to these regulations which enlarge the rights of owners of Bonds of Series E.

JOHN W. SNYDER,
Secretary of the Treasury.

Approved: March 26, 1951.

HARRY S. TRUMAN

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter F—Personnel

PART 578—DECORATIONS, MEDALS, RIBBONS, AND SIMILAR DEVICES

MISCELLANEOUS AMENDMENTS

Sections 578.16 (b) and 578.19 (b) are amended to read as follows:

§ 578.16 *Distinguished-flying cross.*

* * *

(b) *Standards.* The performance of the act of heroism must be evidenced by voluntary action in the face of great danger above and beyond the line of duty while participating in aerial flight. The extraordinary achievement while participating in aerial flight must have resulted in an accomplishment so exceptional and outstanding as to clearly set the individual apart from his comrades, none of whom have been recognized for the identical achievement. Awards will be made only to recognize single acts of heroism or extraordinary achievement and will not be made in recognition of sustained operational activities against an armed enemy.

§ 578.19 *Air medal.* * * *

(b) *Standards.* Awards may be made to recognize single acts of merit or sustained operational activities against an armed enemy. The required achievement, while of lesser degree than that required for the award of the Distinguished Flying Cross, must nevertheless have been accomplished with distinction above and beyond that normally expected. The term "sustained operational activities" will be defined to include only activities over enemy-held territory wherein definite opposition has been encountered.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-12 as amended April 1, 1951]

M-12—USE OF COPPER AND COPPER-BASE ALLOYS

This order, as amended, is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

However, consultation with representatives of all trades and industries affected in advance of the issuance of this order, as amended, has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of different trades and industries.

This amendment affects NPA Order M–12 as follows: A new paragragh (h) is added to section 7; section 11 (c) is amended, and the item "Fins" is deleted from Building Materials in List B, as so amended, NPA Order M–12 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Copper forms and products to which this order applies.
4. Application of order.
5. Production of brass mill products, copper wire mill products and foundry products.
6. Use of copper forms and products.
7. Prohibited uses of copper.
8. Maintenance, repair and operating supplies.
9. Exemptions.
10. Inventories.
11. Restrictions on delivery.
12. Applications for adjustment.
13. Records and reports.
14. Communications.
15. Violations.

AUTHORITY: Sections 1 to 15 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to describe how the copper remaining after allowing for the requirements of national defense may be distributed and used in the civilian economy. It is the policy of the National Production Authority that copper and articles made of copper, not required to fill rated orders, shall be distributed equitably through normal channels of distribution, and that due regard shall be given by suppliers to the needs of new and small business. It is the intent of this order that other materials which are not in short supply shall be substituted for copper and copper-base alloy wherever possible.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association or any other organized group of persons and includes any agency of the United States or any other government.

(b) "Base period" means the six-months period ending June 30, 1950.

(c) "Manufacture" means to put into process, machine, incorporate into products, fabricate or otherwise alter the forms and products of copper defined in section 3 by physical or chemical means, and includes the use of copper in plating.

(d) "Maintenance" means the minimum upkeep necessary to continue a building, machine, piece of equipment or facility in sound working condition, and "repair" means the restoration of a building, machine, piece of equipment or facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like: *Provided, however,* Neither maintenance nor repair includes the improvement of any such item with materials of a better kind, quality or design.

(e) "Operating supplies" means any copper or copper-base alloy forms or products listed in section 3 of this order which are normally carried by a person as operating supplies according to established accounting practice and are not included in his finished product, except that materials included in such product which are normally chargeable to operating expense may be treated as operating supplies.

SEC. 3. *Copper forms and products to which this order applies.* This order applies to the following forms and products of copper: Copper, copper-base alloy, brass mill products, copper wire mill products, and foundry copper products and copper-base alloy products. For the purpose of this order, these items are defined as follows:

(a) "Copper" means unalloyed copper. (It includes electrolytic copper, fire refined copper and all unalloyed copper in any form including scrap.)

(b) "Copper-base alloy" means any alloy in the composition of which the percentage of copper metal by weight equals or exceeds 40 percent of the total weight of the alloy. (It shall include fired and demilitarized cartridge and artillery cases, and all copper-base alloy, as specified above, in any form including scrap.) It does not include alloyed gold produced in accordance with U. S. Commercial standard CS67–38.

(c) "Brass mill product" means sheet, including strip and plate; rod, including bars, forgings (rough as forged), and extruded shapes; wire; or tube, including pipe; made from copper or copper-base alloy. This does not include copper wire mill products.

(d) "Copper wire mill product" means bare wire, insulated wire and cable whatever the outer protective coverings may be, and uninsulated wire and cables, where the conductors are made from copper, copper-base alloy, or copper clad steel containing over 20 percent copper by weight. All copper wire mill products should be measured in terms of pounds of copper content.

(e) "Foundry products" means cast copper and copper-base alloy shapes or forms suitable for ultimate use without remelting, rolling, drawing, extruding or forging. (Includes the removal of gates, risers and sprues, and sandblasting, tumbling, or dipping, but excludes any further machining or processing.)

SEC. 4. *Application of order.* Subject to the exemptions stated in section 9, this order applies to all persons who produce brass mill products, copper wire mill products or foundry products as listed in section 3 of this order, or who use any of the forms and products of copper defined in paragraphs (a), (b), (c), (d) and (e) of section 3 for the purpose of manufacture, use in installation or construction, or for maintenance, repair or operating supplies. This order also contains limitations on the use of such copper forms and products in the manufacture or assembly of certain items. This order does not apply to persons who use copper or copper-base alloy in the production of other metals or metal alloys.

SEC. 5. *Production of brass mill products, copper wire mill products and foundry products.* Subject to the exemptions stated in section 9 of this order or unless specifically directed by the National Production Authority:

(a) No person shall produce during the following months a total quantity by weight of brass mill products and copper wire mill products in excess of the percentages specified with respect to each month of his average monthly production of such products during the base period:

	Percent
January, 1951	85
February, 1951	85
March, 1951	80

During the calendar quarter commencing on April 1, 1951, no person shall produce a total quantity by weight of brass mill products and copper wire mill products in excess of 80 percent of his average quarterly production of such products during the base period: *Provided however,* That such production in any one month shall not exceed 40 percent of the permitted quarterly production. The production of brass mill products and copper wire mill products, pursuant to a valid toll or conversion agreement or other arrangement whereby title to the material to be processed remains vested in the person who delivers it, is permitted in addition to the production permitted by this paragraph. In determining average monthly production during the base period, the brass mill products and copper wire mill products so produced shall not be included in the base period production of the brass mill or wire mill. Nothing contained in this paragraph shall affect the restrictions on toll and other similar agreements contained in NPA Order M–16.

(b) During each of the calendar quarters commencing on January 1, 1951, and April 1, 1951, no person shall produce a total quantity by weight of foundry products in excess of 100 percent of his average quarterly production of foundry products during the base period.

SEC. 6. *Use of copper forms and products.* Subject to the exemptions stated in section 9 of this order, or unless specifically directed by the National Production Authority, no person shall use in manufacture, installation or construction:

(a) During December 1950, a total quantity by weight of the forms and products of copper defined in paragraphs (a), (b), (c), (d) and (e) of section 3 of this order in excess of 100 percent of his average monthly use of such material in October and November 1950.

(b) During the following months a total quantity by weight of the forms and products of copper defined in paragraphs (a), (b), (c), and (d) of section 3 (including copper forms and products produced under toll and conversion agreements or other similar arrangements) in excess of the percentages specified with respect to each month of his average monthly use of such material during the base period:

	Percent
January, 1951	85
February, 1951	85
March, 1951	80

(c) During the calendar quarter commencing on April 1, 1951, a total quantity by weight of the forms and products of copper defined in paragraphs (a), (b), (c), and (d) of section 3 (including copper forms and products produced under toll and conversion agreements or other similar arrangements) in excess of 75 percent of his average quarterly use of such copper during the base period: *Provided, however,* That such use in any one month shall not exceed 40 percent of the permitted use.

(d) During each of the calendar quarters commencing on January 1, 1951, and April 1, 1951, a total quantity by weight of foundry products in excess of 100 percent of his average quarterly use of such products during the base period: *Provided, however,* That in cases where a foundry product in the form of a casting is owned by one person and machined pursuant to a contractual agreement by another person, it shall be considered that the owner used the casting in manufacture.

SEC. 7. *Prohibited uses of copper.* (a) Commencing on March 1, 1951, no person shall use copper in the forms and products defined in section 3 of this order, or any component part made therefrom, in the manufacture or assembly of any item included in attached List A, except as permitted therein; and no person shall use in the manufacture or assembly of any item, whether or not included in List A, a greater quantity or better grade of such materials than is necessary for functional or operational purposes, or use such materials solely for decorative or ornamental purposes. However, these prohibitions shall not apply to such use of: (1) Any such copper forms and products, or component parts made therefrom, on or after March 1, 1951, if such materials were contained in such person's inventory on said date and are wholly unsuitable for use in the manufacture or assembly by such person of any item not included in List A; or (2) any such materials covered by an order placed with a producer and included in the producer's schedule for February 1951, which are delivered to such person at his plant prior to April 1, 1951, to the extent that such materials are wholly unsuitable for use in manufacture or assembly by such person of any item not included in List A. Every person who relies on the provisions of the next preceding sentence shall prepare a detailed record showing: (A) The quantities of such copper forms and products, and component parts made therefrom, which were contained in his inventory on the first days of December 1950, and of January, February and March 1951, and which were wholly unsuitable for use in his manufacture or assembly of any item not included in List A; and (B) the quantities of such materials wholly unsuitable for such use which were delivered to him on or after March 1, 1951, the names and addresses of the suppliers thereof, and the dates of the orders and acceptances covering such materials together with the applicable mill schedule. Such record shall be retained for at least two years and shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(b) Commencing on April 1, 1951, no person shall use copper in the forms and products defined in section 3, or any component part made therefrom, in the manufacture or assembly of any item included in attached List B, except as permitted therein. However, this prohibition shall not apply to such use of: (1) Any such copper forms and products, or component parts made therefrom, on or after April 1, 1951, if such materials were contained in such person's inventory on said date and are wholly unsuitable for use in the manufacture or assembly by such person of any item not included in List A or List B; or (2) any such materials that have been covered by any order placed with a producer which were included in the producer's schedule for March 1951, and are delivered to such person at his plant prior to May 1, 1951, to the extent that such materials are wholly unsuitable for use in manufacture or assembly by such person of any item not included in List A or List B. Every person who relies on the provisions of the next preceding sentence shall prepare a detailed record showing: (A) The quantities of such copper forms and products, and component parts made therefrom, which were contained in his inventory on the first days of January, February, March and April 1951, and which were wholly unsuitable for use in his manufacture or assembly of any item not included in List B; and (B) the quantities of such materials wholly unsuitable for such use which were delivered to him on or after April 1, 1951, the names and addresses of the suppliers thereof, and the dates of the orders and acceptances covering such materials, together with the applicable mill schedule. Such record shall be retained for at least two years and shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, copper or copper-base alloy may be used: (1) For plating any item included in List A or List B, or any component part thereof, where such plating is an undercoat for chromium, nickel, gold or silver; or (2) for brazing any item, or component part thereof, included in List A or List B.

(d) During February 1951, no person shall use in the manufacture or assembly of the items included in attached List A a total quantity by weight of the copper forms or products defined in paragraphs (a), (b), (c) and (d) of section 3, or any component part made therefrom, in excess of 85 percent, or of the foundry products defined in paragraph (e) of said section, or any component part made therefrom, in excess of 100 percent, of his average monthly use of such materials for such purposes during the base period. During March 1951, the same limitations shall apply to the manufacture or assembly of the items included in attached List B, except that the percentage limitation as to the copper forms and products defined in paragraphs (a), (b), (c) and (d) of section 3 shall be 80 percent instead of 85 percent. To the extent that manufacture or assembly of the items on attached List A or List B is permitted under paragraphs (a) or (b) of this section, the limitations of section 6 of this order, shall also apply during March 1951 and each succeeding month.

(e) Commencing on April 1, 1951, no person shall use in construction any brass mill product as such for any item included in List A or List B except as permitted therein.

(f) The following items included in List A or List B shall be exempt from the application of this section if they are used on vessels other than pleasure craft: (1) Furnishings, fittings, and fixtures when located within the sphere of the magnetic compasses; and (2) builders' hardware, building materials and snap hooks where the properties supplied by copper are essential and satisfactory substitutes not available.

(g) The prohibitions of this section apply notwithstanding the provisions of NPA Reg. 2 with respect to the filling of rated orders and are not affected by any of the exemptions stated in section 9 of this order: *Provided, however,* That such provisions of NPA Reg. 2 and paragraphs (a) and (b) of section 9 apply to such items included in attached List A or List B as are specifically designated as being permitted for the use of the Armed Forces of the United States, including the United States Coast Guard.

(h) Any component parts of items included in List A or List B which are manufactured or assembled within the limitations of paragraphs (a) or (b) of this section may be sold at any time and the purchaser thereof may assemble these component parts into items included in List A or List B at any time provided these component parts are wholly unsuitable for use in the production, manufacture, or assembly of any item not prohibited by this section.

SEC. 8. *Maintenance, repair and operating supplies.* Unless specifically directed by the National Production Authority, during the calendar quarter commencing on January 1, 1951, and each calendar quarter thereafter, no person shall use for maintenance, repair and operating supplies a quantity by weight of the forms and products of copper defined in paragraphs (a), (b), (c), (d), and (e) of section 3 of this order, in excess of 100 percent of his average quarterly use for such purposes during the base period.

SEC. 9. *Exemptions.* (a) The production of brass mill, copper wire mill and foundry products and the use of such products is permitted to fill rated orders, or to meet any mandatory order of the National Production Authority, in addition to the production and use permitted

by the provisions of sections 5, 6, and 8 of this order.

(b) Copper forms and products defined in section 3 acquired with ratings, or to meet a National Production Authority scheduled program may be used in addition to the quantities permitted by the provisions of sections 6 and 8.

(c) The provisions of sections 6 and 8 do not apply to persons who use less than 1,000 lbs. of the copper forms and products defined in section 3 during any calendar quarter; *Provided, however,* That persons who by reason of the provisions of sections 6 and 8 would be permitted to use less than 1,000 lbs. during any calendar quarter, may use during such period a quantity up to 1,000 lbs.

SEC. 10. *Inventories.* In addition to the provisions of NPA Reg. 1 relating to Inventory Controls, it is considered that a more exact requirement applying to producers of brass mill products, copper wire mill products and foundry products, and to users of the copper forms and products defined in section 3 of this order is necessary.

(a) No person producing brass mill products, copper wire mill products or foundry products may receive or accept delivery of copper or copper-base alloy if his inventory is, or by such receipt would become, in excess of that necessary to meet his deliveries or supply his services on the basis of his scheduled method and rate of operation pursuant to this order during the succeeding 45-day period, or in excess of a "practicable minimum working inventory" (as defined in NPA Reg 1, whichever is less.

(b) No person obtaining copper forms or products defined in section 3 for use in manufacture, installation or construction, or for maintenance, repair or operating supplies, may receive or accept delivery of a quantity of such forms and products if his inventory is, or by such receipt would become, in excess of that necessary to meet his deliveries or supply his services on the basis of his scheduled method and rate of operation pursuant to this order during the succeeding 60-day period, or in excess of a "practicable minimum working inventory" (as defined in NPA Reg. 1), whichever is less.

(c) For the purpose of this section, any copper forms and products defined in section 3, in which minor changes or alterations have been effected, shall be included in inventory. NPA Reg. 1 will apply to all such forms and products except as modified by this section.

SEC. 11. *Restrictions on delivery.* (a) No person shall deliver any of the forms and products of copper defined in section 3 of this order, if he knows or has reason to believe that his customer may not accept delivery of such materials under this order or will use such materials in violation of this order.

(b) No person shall deliver any copper forms or products defined in section 3 unless the purchaser shall have furnished to the seller a signed certification as follows:

> The undersigned, subject to statutory penalties, certifies that acceptance of delivery and use by the undersigned of the copper forms or products herein ordered will not be in violation of NPA Order M–12.

This certification constitutes a representation by the purchaser to the seller and to the National Production Authority that delivery of such copper forms or products may be accepted by the purchaser under this order, and that such materials will not be used by the purchaser in violation of this order.

(c) The certification required by paragraph (b) of this section shall not be required in connection with the delivery of copper forms and products (1) to the General Services Administration for the stockpile of strategic materials, (2) to purchasers where delivery is made prior to April 1, 1951, pursuant to an order received prior to February 19, 1951, (3) to purchasers of quantities weighing 25 pounds or less, (4) to purchasers in foreign countries; or (5) in connection with the delivery of scrap.

SEC. 12. *Applications for adjustment.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, or because any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or its enforcement against him would not be in the interest of the national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Producers shall make such application on Form NPAF–11, "Copper and Copper-Base Alloys: Producer's application for Adjustment or Exception." Users shall make application on Form NPAF–12, "Copper Forms and Products: User's Application for Adjustment or Exception." Copies of these forms may be obtained from the nearest Department of Commerce Field Office.

SEC. 13. *Records and reports.* (a) Persons subject to this order shall preserve the records which they have maintained of production, inventories, receipts, deliveries and uses of copper forms and products defined in section 3 of this order commencing with January 1, 1950.

(b) Persons subject to this order shall make records and submit such reports to the National Production Authority as it shall require subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 14. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C. Ref: M–12.

SEC. 15. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

This order, as amended, (includes Lists A and B hereto attached. The order as amended including Lists A and B shall take effect, except as otherwise specifically stated, on April 1, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

LIST A

(See section 7)

The use of the forms and products of copper defined in section 3 and of any component parts made therefrom in the items listed below (excluding repair parts) is prohibited except to the extent permitted in the order or the list: *Provided, however,* That such material may be used in such items included in the list as are marked with an asterisk in cases where such items are to be used by the Armed Forces of the United States, including the United States Coast Guard.

BUILDERS' HARDWARE

Protective brass plating of all listed items of builders' hardware is permitted where other types of finishes are not practicable.
Butts, hinges and related items.
Checking floor closers, overhead concealed, semi-concealed and surface door closers (except gland nuts, regulating screw assemblies, and fusible links).
Closers, hanging brackets for.
Closers, screen door.
Cabinet hardware, including cabinet hinges.
Hangers, track and related items including:
Sliding door hardware.
Folding door hardware.
Sliding-folding door hardware.
Folding partition hardware.
Upward acting door hardware.
Fire door hardware (except bearings and fusible links).
Hardware for sash, screen, transom and casement and other shelf hardware items.
Locks, lock trim (except for cylinder assemblies and keys, for essential working parts of locks and latches, for faces of locks and latches and for trim of cylinder lock sets).
Spring hinges.
Sash balances.
Door holding devices.
Kick plates.
Push plates.
Door pulls.
Push bars.
House numbers.
Door knockers.
Letter boxes.
Nameplates.

BUILDING MATERIALS

Anchors and dowels (except window cleaner's safety anchors).
Bands on pipe insulation.
Bathtub enclosures and shower enclosures.
Blinds, including fixtures and fittings (except where essential for operating parts).
Caulking anchors.
Cement flooring and composition flooring (except that crude arsenical copper precipitate may be used for flooring in hospital operating and anesthesia rooms, for places where explosives are handled or stored and for places where explosive vapors may be present).
Chimneys and flues.
Conduits (except instrument assemblies).
Cornices.
Door sills.
Door frames.
Doors.
Downspouts and accessories thereto.
Drains (except strainer grids for showers and urinals).
Drip pans.
Elevators and escalators (except for worm gears and parts for conducting electricity).
Escutcheons and plates for floor, ceiling and wall use.
Fences and gates.
Food waste disposal units (except current-carrying parts, bearings, controls, impellers and sink strainers).
Gratings.
Grids (except for flooring in hospital operating rooms and anesthesia rooms, and for places where explosives are handled or stored and for places where explosive vapors may be present).
Grilles and shields, including fresh air inlet boxes and radiator and convector enclosures.
Gutters and accessories thereto.
Holdback hooks for curtains.
I. P. S. waste nipples.
Lavatory legs (except for hospital use).
Leaders and accessories thereto.
Linoleum stripping.
Louvres.
Marquees.
Metal siding.
Mouldings for joining cabinet sinks.
Ornamental metal work; including grille work, railings, and fittings.
Pipe, iron pipe sizes and fittings (except for industrial process piping and chemical and gas equipment and except for solder nipples, solder bushing and ferrules).
Radiator covers and shields.
Railings and fittings.
Reglets, moulding and trim.
Rim protectors for fixtures.
Robe hooks.
Roofing.
Roofing nails (except staples, clips and similar devices designed for the purpose of protecting shingles, flashings and siding against wind damage).
Shower curtain rods and bars (except for hospitals).
Shower door frames.
Shower goosenecks.
Skylights.
Stair and threshold treads, nosing and edgings.
Store fronts.
Straps and hangers for pipe supports.
Supply pipes, iron pipe sizes.
Switch plates.
Tanks for automatic storage water heaters.
Traps (except tube traps in 20 gauge without cleanouts and except traps cast from secondary metal).
Thresholds and saddles.
Towel bars and brackets.
Tube, tubing and fittings for piping systems in construction (except for Type K for underground water service connections; Types B, L, and M for domestic hot and cold water supply pipes, tank to oil burner hook-ups, and oxygen lines; Types B, K, L, and M for industrial process, food, chemical and gas equipment piping; and seamless tube for air temperature control apparatus).
Unit heaters, unit ventilators, unit ventilator inlet wall boxes and convectors, and blast heating coils, or any apparatus using such coils as part of its construction (except for valves, controls, fins, bearings or parts necessary for conducting electricity, and for water or steam courses and headers).
Ventilators.
Vents.
Weatherstripping.
Window frames.
Window sills.
Windows.

BURIAL EQUIPMENT

Burial urns.
Burial vaults.
Caskets and casket hardware (except copper or brass flash plate treatment necessary to prevent corrosion during period of manufacture and warehousing).
Memorial tablets.

CLOTHING AND DRESS ACCESSORIES, NOT INCLUDING SAFETY EQUIPMENT

Artificial flowers.
*Buckles and shoe buckles (except for foundation garments where strength, launderability and non-corrosiveness are essential).
*Buttons (except front shells of uniform buttons for police, firemen, guards, railroad and other transportation employees and similar uniforms, the backs to be made of steel with rust resistant plating; and work clothing and other utility (closure) purposes where launderability and non-corrosiveness are essential, provided that all strictly decorative and out-size buttons are eliminated).
Dress ornaments and trimmings.
*Fittings: belt, corset, garter, glove, hand bag, purse, suspender, luggage and supporter (except for foundation garments and sanitary belts where launderability and non-corrosiveness are essential).
*Insignia and decorations (awards).
*Metal clothes, laces, tassels, braids, embroidery, ribbons.
Millinery accessories and frames.
*Snaps, snap buttons, and hooks and eyes (except (1) irrespective of weight, in industrial safety clothing, work clothing and foundation garments; (2) for complete fasteners weighing 5 pounds or less per thousand units, on other wearing apparel exclusive of belts, suspenders, gloves, footwear, and other dress accessories, and billfolds, luggage, wallets and key cases; and (3) except for wire springs contained in snaps and snap buttons weighing in excess of 5 pounds per thousand complete units).

FURNISHINGS AND EQUIPMENT

Andirons, fireplace screens and fittings.
Candlesticks.
Curtain fasteners, rods and rings.
Cuspidors.
Gas heater and stove installation connections (except for high pressure LPG connections from tank to fixture).
Lamp shades.
Mops.
Mud scrapers.
Scrubbing boards.
Space heaters, flue connected and non-flue connected (except valves, controls and parts necessary for proper operation or for conducting electricity).
Stoves and ranges of all fuels for household cooking use (except valves, compression fittings, controls including timers, thermostats and parts for conducting electricity or necessary for safe operation).
Trays.
Upholsterers' supplies, including nails and tacks.
Vases, pitchers, bowls, and artcraft (except scientific laboratory).
Washing tubs and washing boilers.
Waste baskets, humidors and similar items.

FURNITURE AND FIXTURES

Barber shop and beauty parlor furniture.
Household furniture.
Mattresses and bedsprings (except hospital).
Partitions and shelving (except hospital and laboratory).
Public building and office furniture.
Reed and rattan furniture.
Restaurant furniture.
Venetian blinds (except where essential for operating parts).

HARDWARE, MISCELLANEOUS

Collars and other harness for pets.
Cutlery, table, kitchen, butcher and meat packing (except rivets and knife assemblies in matching silver-plated flatwear sets).
Fireplace fixtures and equipment.
Furniture (except in cylinder assemblies and keys and for essential working parts of locks).
Hand saw screws, nuts and washers for attaching saw blades to the handles.
Hand service tools, including hammers, pliers, wrenches, screw drivers, etc. (except essential parts of spiral ratchet and ratchet screw drivers and drills; hand and breast drills and bit braces; soldering irons; and blow-torches; except nonsparking tools necessary to prevent explosion hazards; and except portable spot welders).
Passenger transportation equipment, decorative hardware and ornamental metal work and trim and general hardware (except for locks).
Pleasure boat decorative hardware.
Pocket knives (except rivets and lining assemblies).
Puttying and scraping knives (except rivets).
*Saddlery and harness hardware (except for brass protective plating).
Scissors, shears, hedge and other trimmers, tinners and other snips.
Stairs and threshold treads and edgings.
Trunk and luggage hardware (except for brass protective plating and except in cylinder assemblies and keys and for essential working parts of locks).

HOUSEHOLD ELECTRICAL APPLIANCES

(Except for operational parts where the properties supplied by the copper are essential or where necessary for electrical conductivity)

Household electrical appliances including but not limited to:

Laundry equipment.
Vacuum cleaners.
Refrigerators.
Floor and furniture polishers.
Food mixers.
Electric irons.
Hair driers.
Toasters.

JEWELRY, GIFTS, AND NOVELTIES

All jewelry (except operational attachments such as screw and snap posts; cam assemblies; wire pegs; screws and or rivets; spring pins for wrist watches; catches and pin stems; and copper seal interlinings to prevent "bleeding" of silver through gold); gifts and novelties, including but not limited to:

Book ends.
Jewelry and instrument cases, including cosmetic.
Lighters (except necessary operational parts).
*Medals and emblems, including decorations (except religious goods).
Mirror and picture frames.
Napkin rings.
Smokers' accessories, including ash trays and humidors.
Souvenirs.

CIVILIAN TYPE MOTOR VEHICLE: PASSENGER AUTOMOBILES INCLUDING TAXICABS, STATION WAGONS, AMBULANCES, HEARSES, TRUCKS, TRUCK TRACTORS, TRUCK TRAILERS, MOTORCYCLES AND BUSSES

Decorative mouldings, both internal and external (except for glass run channels, window-glass frames, external windshield and rear window external mouldings where such mouldings are produced from strip 6 inches or narrower).
Defrosters and heaters (except (1) for conducting electricity and (2) radiators (heat exchangers) and supply and return hot water lines and (3) parts used in the operating controls of the heating and defrosting systems).
Gas tank caps (except valves and springs).
Horns (except parts for diaphragms, vibrators and conducting electricity).
Lighters (except parts for conducting electricity).
Lights, lamps, headlamps, and lighting accessories (except for doors, bezels, adjusting and attaching screws, retaining rings, copper flash plating on reflectors and parts for conducting electricity including light bulbs).
Motor vehicle hardware (except door handles, ventilator and regulator handles for windows and doors, working parts for locks, ventilator window latches, external lock cylinder caps and covers, external windshield wiper arm and blade assemblies and screw).
Rear-view mirrors and brackets (except copper flash plating on mirrors).
Smokers' accessories, including ash trays.
Wheel discs and wheel trim rings.

PASSENGER TRANSPORTATION EQUIPMENT

(Including railroad cars, street and interurban cars, busses, and trailers, but excluding locomotives)

All items under the heading "Furnishings and Equipment".
Bands on pipe coverings.
Door knockers, checks, pulls and stops.
Doors and windows, door and window frames and window sills.
Drinking water reservoirs.
Shower rods and pans.
Sinks and drainboards.
Towel and luggage racks.
Water containers for humidification.
Weatherstripping and insulation.

MISCELLANEOUS

Alarm and protective systems (except parts for conducting electricity or where essential to the proper service or functioning of the parts).
Antique reproductions.
Arch supports.
Atomizers (except for medicinal purposes and for use in the preparation of dried milk and dried eggs).
Barrels, boxes, cans, jars, and other containers.
*Badges (except for use by personnel where badges are required for protection and security by Government agencies or by industrial plants).
Bar and counter equipment and fittings.
Barber shop equipment and supplies (except for current-carrying parts).
Barrel hooks.
Bathroom accessories (including grab bars, tumbler holders, tooth brush holders, paper holders, and shelf brackets).
Beauty parlor equipment and supplies (except for replacement parts of commercial permanent wave equipment and commercial hair driers and for current-carrying parts).
Bicycles, and similar vehicles and equipment therefor (except valves for bicycle tires and tubes and except plating of operational parts).
Binoculars (except precision types) and opera glasses.
Bird and pet cages and stands.
Branding, marking, and labeling devices and stock for same (except engraved burning branding dies, and except where the devices and the stock are for affixing governmental, notarial and corporate seals).
Bronze ink (except use in the graphic arts industry where bronze ink and powder are an integral part of product identification and whose normal replating is less frequent than one year).
Brushes (except for the types used in electric motors and generators; and except for industrial brushes and tooth brushes).
Carpet rods.
Chimes and bells (except parts for conducting electricity or where non-magnetic gong material is required for electrically operated signaling devices used as adjuncts to communication systems and except bells for use on board ship where essential to the proper functioning of the parts).
Clips, paper.
Cleaning and polishing accessories, such as brooms, carpet sweepers, crumbing sets, dust pans, mops, pot scourers, whisk brooms and floor and furniture polishers.
Clock cases (except for marine use).
Clothes line pulleys and reels.
Cocktail shakers.
Coin-operated game and gambling machines (except tumblers for locks and current-carrying parts).
Coin-operated vending machines (except necessary operational parts and current-carrying parts).
Cooking utensils (except gauges and protective devices and plating of bottoms).
Daubers for shoe polish.
Dispensers, hand, for hand lotions, paper products, soap and straws (except for hospitals).
Flower pots, boxes and holders for same.
Fountain pens (except necessary operational parts).
Furniture grommets.
Garden tools and equipment (except for functional parts).
Hair curlers, hair brushes and combs (except for heat-carrying parts and for electrical conductivity).
Ice cream freezers for use in the home (except electric).
Juke boxes (except for current-carrying parts).
Kitchen utensils, devices and machines (except electrical appliances).
Lace tips.
Lamps, portable electric (except for current-carrying parts).
Lamps and lanterns, other than electric (except for generators, valves, controls, burners, wicks and founts).
Letter boxes and mail chutes.
Lighting fixtures (except (1) current-carrying parts, plating, rivets, eyelets, screws, small fasteners; (2) the threaded parts, clamping, sealing or attachment devices of exterior, explosion-proof, dust-tight and vapor-tight fixtures; (3) Marine and airport).
Loose-leaf binders.
Manicure implements.
Match and pattern plates, matrices, and flasks.
Mattress buttons and furniture glides.
Name plates (except instruction and data plates and identification plates for use on machinery or equipment without display or ornamentation).
Nonoperating or decorative uses of copper or copper-base alloy, or the use of the same in such parts of installations and equipment (mechanical or otherwise) as bases, frames, guards, standards and supports.
Package handles and holders.
Pari-mutuel gambling and gaming machines, devices and accessories.
Pencils, mechanical (except functional parts and plating).
Pins (except safety pins, common pins, laundry net and laundry identification pins, or safety catches on products otherwise permitted under this order).
Pleasure boat fastenings and fittings.
Razors operated by electricity (except functional parts and parts for conducting electricity).
Razors not operated by electricity (except (1) in making safety razors: heads, functional parts for heads, and plating; and (2) in making straight razors: rivets, pins and washers).
Razor blade magazines.
Reflectors (except photographic and except as an undercoating or an overcoating in electroplating with silver or chromium).
Signs and advertising displays (except current-carrying parts).
Sporting goods and equipment (except fishing equipment and supplies for commercial fishing use, firearms, ammunition, and except reel gears, bearings and spools, swivels and snaps, rod mountings and copper for plating of baits and lures for sport fishing use).
Staplers and stapler machines (not including foot-operated or power-driven stitching machines).
Stationery supplies including but not limited to:
Desk accessories.
Office supplies.
Pencils (except for ferrules).
Pens and penholders.
Statues and statuettes (except religious and artists' originals).
Sundials.
*Tent poles and parts.
Tobacco pipes.
Toys (except in motors and essential operating parts).
Unions and union fittings (except seats, and except for other parts of unions and union fittings (1) where and to the extent that the physical and chemical properties of the liquid or gas passing through the union or union fittings make the use of any other material dangerous or impractical, or (2) where the valve is of a type designed for use in an air conditioning or refrigeration "system", or (3) where use of copper and tubing and/or brass pipe is permitted).
Umbrellas and parasols.
Vacuum bottles and jugs.
Valve handles (except plumbing fixture trim).
Walking sticks and canes.
Weather vanes.
Weight reducing and exercising machines (except for current-carrying parts).
Wool (except metal sponges intended for use in dairy products processing plants and by the canning industry and for filtering purposes).

LIST B

(See section 7)

The use of the forms and products of copper defined in section 3 and of any component parts made therefrom in the items listed below (excluding repair parts) is prohibited except to the extent permitted in the order or the list: *Provided, however,* That such material may be used in such items included in the list as are marked with an asterisk in cases where such items are to be used by the armed forces of the United States, including the United States Coast Guard.

BUILDERS' HARDWARE

Protective brass plating of all listed items of builders' hardware is permitted where other types of finishes are not practicable.
Door knobs.
Letter slots.

BUILDING MATERIALS

Facias: Fittings for underfloor raceway systems.
Flashings (except (1) cap and base flashing for built-up roofing, (2) through-wall flashing in parapet walls, (3) flashing for chimneys, vent stacks and all other vertical surfaces rising through roof levels, (4) roof-to-side wall flashing, (5) valley flashing for slate, tile and cement shingle roofs, (6) door and window head flashing, (7) expansion joint flashing).
Gravel stops.
Shower pans.
Terrazzo strips.

CIVILIAN-TYPE MOTOR VEHICLE: PASSENGER AUTOMOBILES INCLUDING TAXICABS, STATION WAGONS, AMBULANCES, HEARSES, TRUCKS, TRUCK TRACTORS, TRUCK TRAILERS, MOTORCYCLES AND BUSSES.

Hubcaps (except for plating).
Radio antennae for vehicles.
Sidewalk or curbstone warning devices for automobiles.

CLOTHING AND DRESS ACCESSORIES, NOT INCLUDING SAFETY EQUIPMENT

*Slide fasteners (zippers) (except (1) for the following functional components: slider bodies, separating end-components and top and bottom stops; and (2) except for applications in safety garments, work clothing, rubber footwear, foundation and surgical garments were necessary for reasons of strength, launderability and anticorrosion).

FURNISHINGS AND EQUIPMENT

Refrigerator and water heater installation connections (except for high pressure LPG connections from tank to fixture).

FURNITURE AND FIXTURES

Fittings (except hospital and laboratory).

HARDWARE, MISCELLANEOUS

Tags for pets.

HOUSEHOLD ELECTRICAL APPLIANCES

(Except for operational parts where the properties supplied by the copper are essential or where necessary for electrical conductivity)

Coffee makers.
Home and farm freezers.
Ice cream freezers.
Waffle irons.

REFRIGERATION AND AIR CONDITIONING MACHINERY AND EQUIPMENT

(Commercial and Industrial)

(Except where copper products or copper-base alloy products are essential for the following: carbonators, complete condensing units less condensers, dehydrators, draft arms for soda fountain equipment, electrical controls and wiring, fittings, protective coatings, refrigerant circuits, refrigerant connections between compressor and cooling coils, refrigerant flow control valves, sight glasses, soldering and brazing materials, strainers, suction line heat exchangers, tube sheets, valves, water cooler low sides and pre-coolers, water flow control valves and water spray nozzles for evaporative condensers, evaporative coicers, and air washers)

Commercial and industrial refrigeration and air conditioning machinery and equipment including but not limited to:

Air conditioning systems, self-contained or remote.
Air washers.
Blast coolers.
Blast freezers.
Bottled beverage coolers.
Carbonated beverage dispensing systems (except coin operated).
Compressor stop valves (except valve seats, gaskets, bonnets, discs, disc screens, and protective coverings for valve stems).
Evaporative condensers.
Evaporative coolers (desert type).
Finned air-cooled condensers except those used for hermetic systems where the condenser is exposed to the outside air or for transportation systems.
Finned coils or evaporators.
Florist refrigerators.
Fountainettes.
Frozen food cabinets.
Ice cream cabinets.
Ice cube makers.
Malt beverage dispensing systems.
Mortuary refrigerators.
Non-carbonated beverage dispensing systems (except coin operated).
Packaged air conditioners (room, window, and store coolers).
Reach-in refrigerators.
Refrigerated display cases.
Refrigeration systems, self-contained or remote.
Reverse cycle heating and air conditioning systems (heat pumps).
Sandwich units.
Shell and tube or shell and coil condensers (except water courses, either straight or finned tube, where the refrigerant is in contact with the tube).
Shell and tube or shell and coil water chillers (except water courses, either straight or finned tube, where the refrigerant is in contact with the tube).
Soda fountains.
Space coolers.
Unit coolers.
Walk-in refrigerators.
Water coolers (except bubblers, bubbler connections, faucets and faucet connections).

MISCELLANEOUS

Ball point pens (except necessary operational parts).
Dehumidifiers for home and office use (except operational parts where the properties supplied by the copper are essential or where necessary for electrical conductivity).
Flashlight cases (except contact points for carrying current).
Garment hangers.
Hollow ware (except for hotels, restaurants, institutions and ecclesiastical use).
Identification and directional signs (except current-carrying parts).
Key chains and catches and fasteners therefor.
Lawn sprinklers (except working parts and propellers).
Outboard motors (except for operational parts).
Portable electric lanterns, such as railroad, miners' and industrial (except parts for conducting electricity and for plating).
*Shells and caps for sockets.
Ties (except for explosives and other products where the properties supplied by copper are essential).

[F. R. Doc. 51-4078; Filed, Apr. 2, 1951; 5:06 p. m.]

[NPA Order M-14 as Amended Mar. 31, 1951]

M-14—NICKEL

This order as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of different trades and industries.

This amendment affects NPA Order M-14 as amended Feb. 28, 1951, as follows:

It amends sections 5 and 6; renumbers sections 10, 11, 12, 13, and 14 to be sections 11, 12, 13, 14, and 15 respectively; amends section 15, and adds new sections 10 and 16. As amended this order reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Nickel forms and products to which this order applies.
4. Application of order.
5. Use of nickel.
6. Prohibited uses of nickel.
7. Maintenance, repair, and operating supplies.
8. Exemptions.
9. Inventories.
10. Restrictions on delivery.
11. Application for adjustments.
12. Records and reports.
13. Communications.
14. Violations.
15. List A.
16. List B.

AUTHORITY: Sections 1 to 16 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to describe how the primary nickel remaining after allowing for the requirements of national defense may be distributed to the civilian economy. It is the policy of the National Production Authority that primary nickel, not required to fill rated orders, shall be distributed equitably through normal channels of distribution, and that due regard shall be given by suppliers to the needs of new and small business. It is the intent of this order that other materials which are not in short supply will be substituted for nickel wherever possible.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association or any other organized group of persons and includes any agency of the United States or any other government.

(b) "Base period" means the 6 months period ending June 30, 1950.

(c) "Consume" means to melt, alloy, mix, electrodeposit, process, or otherwise alter nickel as defined by this order by physical or chemical means.

(d) "Maintenance" means the minimum upkeep necessary to continue a building, machine, piece of equipment, or facility in sound working condition, and "repair" means the restoration of a building, machine, piece of equipment, or facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like: *Provided, however,* Neither maintenance nor repair includes the improvement of any

such item with material of a better kind, quality, or design.

(e) "Operating supplies" means any forms of nickel listed in paragraph (a) of section 3 of this order which are normally carried by a person as operating supplies according to established accounting practice and are not included in his finished product.

(f) "Manufacture" means to put into process, machine, fabricate, electroplate, clad, or otherwise alter materials by physical or chemical means.

SEC. 3. *Nickel forms and products to which this order applies.* (a) The word "nickel" as used in this order means only the following forms of primary nickel: electrolytic nickel, ingots, pigs, rondelles, cubes, pellets and powder, rolled and cast anodes, shot, oxides, salts, chemicals and residues derived directly from new nickel, including residues containing nickel derived as a by-product from copper refinery operations.

(b) "Stainless steel," as used in this order, means chromium-nickel iron-base alloys, wrought or cast, containing 6 percent to 22 percent inclusive of nickel, commonly referred to as "austenitic chromium-nickel stainless steel."

(c) "High nickel alloy," as used in this order, means ferrous and non-ferrous alloys, wrought or cast, containing more than 22 percent nickel.

(d) "Nickel silver," as used in this order, means non-ferrous alloys, wrought or cast, containing 8 percent or more nickel.

(e) "Nickel plating," as used in this order, means all plating regardless of plating procedure.

SEC. 4. *Application of order.* Subject to the exemptions stated in section 8 of this order, this order applies to all persons who consume nickel in manufacture, processing, or construction, or who use nickel for maintenance, repair, or operating supplies. This order does not apply to the suppliers of nickel in the forms listed in paragraph (a) of section 3 of this order.

SEC. 5. *Use of Nickel.* Subject to the exemptions stated in section 8 of this order, or unless specifically directed in writing by the National Production Authority, no person shall consume in production or processing during the first or second calendar quarter of 1951 a quantity of nickel (as defined in paragraph (a) of section 3 of this order) by weight in excess of 65 percent of his average quarterly consumption of nickel for such purposes during the base period: *Provided, however,* That his consumption in any one month shall not exceed 40 percent of the permitted use during the quarter.

SEC. 6. *Prohibited uses of nickel.* (a) Commencing on March 1, 1951, no person shall consume nickel (as defined in paragraph (a) of section 3 of this order), secondary nickel or nickel-bearing scrap containing 6 percent or more of nickel in the production of, or use any such forms of nickel or any alloys containing nickel (as defined in paragraphs (b), (c) and (d) of section 3), or any component parts made therefrom, in the manufacture or assembly of any stainless steel, high nickel alloy, nickel plating, or nickel silver items included in List A, except as indicated therein; and no person shall consume or use in the manufacture or assembly of any item, whether or not included in List A, including components or parts thereof, a greater quantity of nickel or an alloy containing a greater percentage of nickel than is necessary for functional or operational purposes, or use such material for decorative or ornamental purposes. However, these prohibitions shall not apply to such use of (1) nickel, nickel alloys above mentioned, or component parts made therefrom on and after March 1, 1951, if such materials were contained in such person's inventory on said date and are wholly unsuitable for use in the production, manufacture, or assembly by such person of any item not prohibited by this section; or (2) any such materials covered by an order placed with a producer and included in the producer's schedule for February 1951, which are delivered to such person at his plant prior to June 1, 1951, to the extent that such materials are wholly unsuitable for use in production, manufacture, or assembly by such person of any item not prohibited by this section. Every person who relies on the provisions of the next preceding sentence shall prepare a detailed record showing: (1) The quantities of such nickel, nickel alloys, or component parts made therefrom, which were in his inventory on the first days of December 1950, and of January, February and March 1951 which were wholly unsuitable for use by him in the production, manufacture, or assembly of any item not prohibited by this section; and (2) the quantities of such materials wholly unsuitable for such use by him which were delivered to him on or after March 1, 1951, the names and addresses of the suppliers thereof, and the dates of the orders and acceptances covering such materials together with the applicable mill schedule. Such record shall be retained for at least 2 years, and shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(b) Commencing on April 15, 1951, no person shall consume nickel (as defined in paragraph (a) of section 3 of this order), secondary nickel or nickel-bearing scrap containing 6 percent or more of nickel in the production of, or use any such forms of nickel or any alloys containing nickel (as defined in paragraphs (b), (c), and (d) of section 3), or any component parts made therefrom, in the manufacture or assembly of any stainless steel, high nickel alloy, nickel plating, or nickel silver items included in List A, except as indicated therein; and no person shall consume or use in the manufacture or assembly of any item, whether or not included in List A, including components or parts thereof, a greater quantity of nickel or an alloy containing a greater percentage of nickel than is necessary for functional or operational purposes, or use such material for decorative or ornamental purposes. However, these prohibitions shall not apply to such use of (1) nickel, nickel alloys above mentioned, or component parts made therefrom on and after March 1, 1951, if such materials were contained in such person's inventory on said date and are wholly unsuitable for use in the production, manufacture, or assembly by such person of any item not prohibited by this section; or (2) any such materials covered by an order placed with a producer and included in the producer's schedule for February 1951, which are delivered to such person at his plant prior to June 1, 1951, to the extent that such materials are wholly unsuitable for use in production, manufacture, or assembly by such person of any item not prohibited by this section. Every person who relies on the provisions of the next preceding sentence shall prepare a detailed record showing: (1) The quantities of such nickel, nickel alloys, or component parts made therefrom, which were in his inventory on the first days of December 1950, and of January, February and March 1951 which were wholly unsuitable for use by him in the production, manufacture, or assembly of any item not prohibited by this section; and (2) the quantities of such materials wholly unsuitable for such use by him which were delivered to him on or after March 1, 1951, the names and addresses of the suppliers thereof, and the dates of the orders and acceptances covering such materials together with the applicable mill schedule. Such record shall be retained for at least 2 years, and shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Paragraph (a) of this section shall not apply to the use of nickel anodes in nickel plating if such nickel anodes were in the inventory of the person doing the nickel plating on March 1, 1951. Paragraph (b) of this section shall not apply to the use of nickel anodes in nickel plating if such nickel anodes were in the inventory of the person doing the nickel plating on April 15, 1951.

(d) No person shall use in building construction any stainless steel, high nickel alloy, nickel plating, or nickel silver for any item included in List A or List B after May 31, 1951: *Provided, however,* That this prohibition shall not apply to the use of such forms of nickel for any such item if its manufacture, processing, or assembly is permitted by this section.

(e) Any component parts of items included in List A or List B which are produced, manufactured, or assembled within the limitations of paragraphs (a) or (b) of this section may be sold at any time and the purchaser thereof may assemble those component parts into items included in List A or List B at any time provided those component parts are wholly unsuitable for use in the production, manufacture, or assembly of any item not prohibited by this section.

(f) The prohibitions of this section apply notwithstanding the provisions of NPA Reg. 2 with respect to the filling of rated orders, and are not affected by any of the exemptions stated in section 8 of this order: *Provided, however,* That such provisions of NPA Reg. 2 and paragraphs (a) and (b) of section 8 of this order apply to such items included in attached List A or List B under the heading "Stainless Steel—Nickel Bearing," as are manufactured for use on board vessels operated by the Armed Forces of the United States, including the United States Coast Guard.

SEC. 7. *Maintenance, repair, and operating supplies.* Unless specifically directed by the National Production Authority, no person shall consume for maintenance, repair, or operating supplies during the calendar quarter commencing on January 1, 1951, and each calendar quarter thereafter, a quantity by weight in excess of his average quarterly consumption of nickel for such purposes during the base period.

SEC. 8. *Exemptions.* (a) The consumption of nickel to fill an order that is rated under the priorities system established by NPA Reg. 2, or to meet any mandatory order of the National Production Authority, is permitted in addition to the consumption of nickel authorized by the provisions of sections 5 and 7 of this order.

(b) Nickel acquired by a rated order, or to meet a scheduled program of the National Production Authority, may be used in addition to the quantities permitted by the provisions of sections 5 and 7.

(c) The provisions of sections 5 and 7 do not apply to persons who use less than 250 pounds of nickel during any calendar quarter: *Provided, however,* That persons who by reason of the provisions of section 5 would be permitted to use less than 250 pounds during any calendar quarter may use during such period a quantity up to 250 pounds.

SEC. 9. *Inventories.* (a) In addition to the provisions of NPA Reg. 1, relating to Inventory Control, it is considered that a more exact requirement applying to consumers of nickel is necessary. No person obtaining nickel for use in manufacture, processing, or building construction, or for maintenance, repair, or operating supplies may receive or accept delivery of a quantity of nickel if his inventory is, or by such receipt would become, in excess of that necessary to meet his deliveries or supply his services on the basis of his scheduled method and rate of operation pursuant to this order during the succeeding 30-day period, or in excess of a "practicable minimum working inventory" (as defined in NPA Reg. 1), whichever is less. For the purpose of this section, the forms of nickel listed in paragraph (a) of section 3 of this order in which only minor changes or alterations have been effected shall be included in inventory. NPA Reg. 1 will apply to nickel except as modified by this section.

(b) *Inventories; exception to Reg. 2.* No person may extend a rating pursuant to paragraph (b) of section 5 of NPA Reg. 2 to replace nickel in his inventory, which nickel has been used by him in the manufacture of stainless steel, high nickel alloy, nickel silver, or any other nickel-bearing alloy or material prior to January 1, 1951, except with respect to shipments made by warehouses subsequent to December 31, 1950. This order does not supersede Reg. 2 in any respect except as set forth in the preceding sentence. However, any person may extend a rating to replace stainless steel, high nickel alloy, nickel silver, or any other nickel-bearing alloy in his inventory pursuant to paragraph (b) of section 5 of Reg. 2.

SEC. 10. *Restrictions on delivery.* No person shall deliver any nickel or nickel alloys (as defined in paragraphs (a), (b), (c), and (d) of section 3 of this order), secondary nickel, or nickel-bearing scrap containing 6 percent or more of nickel if he knows or has reason to believe that his customer may not accept delivery of such materials under this order or will use such materials in violation of this order.

SEC. 11. *Application for adjustments.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, or because any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 12. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act. (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F.)

SEC. 13. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–14.

SEC. 14. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

SEC. 15. *List A (see section 6).* The use of the forms and products of nickel defined in section 3 of this order, and of any component parts made therefrom in the items in attached List A of this order, is prohibited except to the extent permitted in the order or List A.

SEC. 16. *List B (see section 6).* The use of the forms and products of nickel defined in section 3 of this order, and of any component parts made therefrom in the items in attached List B of this order, is prohibited except to the extent permitted in the order or the List B.

This order as amended shall take effect, except as otherwise specifically stated, on March 31, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

LIST A

(See section 6)

STAINLESS STEEL—NICKEL BEARING

(except where manufactured for use on board vessels operated by the Armed Forces of the United States, including the United States Coast Guard)

Agriculture farm equipment, etc.:
- Barn cleaners.
- Ensilage cutters.
- Feeding troughs.
- Fertilizer spreading equipment.
- Grain bins and cribs.
- Implements, hand tools, etc.
- Silos.
- Spreaders.

Automotive:
- Bumpers, clad.
- Clad panels for buses.
- Grills.
- Hardware.
- Horn rings.
- Hubcaps.
- Mufflers (except on heavy duty equipment).
- Steering wheel spoke wire.
- Trim.
- Wheel rings and wheel covers.

Construction:
- Curtain walls.
- Decorative trim.
- Doors.
- Down spouts.
- Elevator and escalator kick plates and panels.
- Flashings.
- Gutters.
- Mouldings.
- Roofing.
- Screens (except in extra active or manufacturing industries where no other substitute is available).
- Sheathing.
- Spandrels.
- Storefronts.
- Window frames.

Electrical machinery and equipment:
- Pole line hardware.
- Pole line guy wires.
- Radio towers.
- Transmission tower baskets.

General:
- Automatic vending machines (except for parts of food vending machines where public health specifications make such use mandatory).
- Bar equipment.
- Beer barrels.
- Coal bins and coal hoppers (except in coal preparation plants).
- Diesel grills.
- Jewelry (except watch cases and except functional springs).
- Pens and pencils including caps and barrels (except fountain pen nibs, separate fountain pen inner caps and other functional parts).
- Radio antennae (except military).
- Railings.
- Soda fountains (except parts as permitted under List B—"Refrigeration").
- Sporting goods, all applications.
- Toys.
- Water coolers (except parts as permitted under List B—"Refrigeration").
- Water softener tanks.

Household appliances, electric, gas, and other fuel (except where used for functional parts where the properties supplied by stainless steel are essential and no satisfactory substitute is practicable): Home and farm freezers, sheathing.
- Range tops.
- Refrigerator shelves and trim.
- Toasters.

Other household appliances and utensils (except cooking ware):
- Ash trays.
- Cabinets.
- Cake and pie dishes.
- Cake servers.
- Canisters.
- Cooling racks.
- Counter tops.
- Drainboards.
- Egg beaters.
- Flatware.
- Garbage cans.
- Hardware.
- Ironing boards.
- Irons.
- Ladles.
- Mixing bowls.
- Mixing spoons.
- Picnic coolers.
- Potato mashers.
- Refrigerator dishes.
- Sinks.
- Spatulas.
- Table tops.
- Utility cans.
- Washing machine tubs.

Railroad:
- Trim and decorative parts in passenger cars.

Shipbuilding:
- Pleasure craft galleys.
- Pleasure craft decorative trim.
- Pleasure craft rigging.
- Pleasure craft stack and ventilating shafts.

Miscellaneous:
- Band instrument valves.
- Binders (index books).
- Button parts.
- Cheese slicers.
- Cocktail shakers and accessories.
- Cup holders.
- Dairy equipment (except functional uses).
- Deodorizers.
- Diaper pins (except where launderability and non-corrosiveness are essential).
- Dog leashes.
- Fly screens.
- Furniture.
- Garden accessories.
- Hardware parts, including builders' finishing hardware.
- Humidifiers.
- Lightning rods.
- Mirror clips.
- Musical instrument strings.

Miscellaneous—Continued
- Organ springs.
- Paint brush ferrules and rivets.
- Permanent wave equipment.
- Phonograph needles.
- Pot cleaners.
- Refuse cans.
- Rulers.
- Shovels (except food and chemical).
- Teabag staples.
- Tooth brushes.
- Water reservoirs (gum tape machine).
- Weather stripping.

HIGH NICKEL ALLOY

Building materials:
- All sheet metal building applications including but not limited to:
  - Air ducts.
  - Downspouts.
  - Elevator cabs.
  - Flashings.
  - Garbage grinder parts.
  - Cutters.
  - Leaders.
  - Louvers.
  - Roofing.
  - Siding.
  - Sinks.
  - Sink bowls.
  - Skylight framing.
  - Brick anchors.
  - Hanger wire for suspended ceiling construction.
  - Ornamental and decorative applications.
  - Tie-wire for suspended ceiling construction.

Dry cleaning (except for corrosion or abrasion resistance where no satisfactory substitute is practicable):
- Condenser tubing.
- Irons.
- Lint traps.
- Pads for dry cleaning presses and tailors' presses.
- Piping, valves and fittings.
- Solvent pressure filters, including filter cloth.
- Spotting boards.
- Sump tanks.
- Truck tubs.
- Utensils.
- Water separators.

Food servicing and kitchen equipment:
- All food service applications including but not limited to:
  - Bar equipment.
  - Beverage tubing.
  - Cafeteria counters.
  - Dishwashing machines.
  - Electric food warming cups.
  - Home and farm freezers.
  - Mobile food trucks.
  - Scullery and dishwashing sinks.
  - Soap dispensers.
  - Steam tables.
  - Work tables.

Hospital equipment:
- Counter tops.
- Furniture.
- Instrument cabinets.
- Instrument tables.
- Kick and push plates.
- Linen cabinets.
- Medicine cabinets.
- Operating tables.
- Paneling and wainscoting, decorative.
- Work tables.

Household appliances:
- Element name plates.
- Element pans on electric ranges.
- Oven linings.
- Radiant broilers on gas ranges.
- Range crumb trays.
- Range tops.
- Range vents.
- Refrigerator light shields.
- Refrigerator shelf parts.
- Steam iron casings.
- Washing machine tubs.

Jewelry:
- Ash trays.
- Badges.
- Cigarette lighters.
- Collar buttons.
- Comb trim.
- Costume jewelry.
- Cuff buttons.
- Emblems.
- Finger nail files.
- Jewelry.
- Key chains.
- Knives (except blades).
- Necklaces.
- Novelties.
- Pill containers.
- Perfume flacons.
- Watch bracelet.
- Watch cases.
- Watch chains.
- Watch crowns.
- Watch movement holders.
- Watch strap pinions.

Laundry equipment:
- Laundry chutes.
- Net racks.
- Plant truck tubs.
- Rug pole pins.
- Soap storage tanks.
- Sorting tables.
- Special washers for blankets and silks.
- Starch cookers (except for hospital or institutional use).
- Ironer, rug cleaning machines, trim on flatwork.
- Utensils.
- Ventilating hoods and fans.
- Water storage tanks.

Motor vehicles:
- Antennae.
- Battery cables.
- Hubcaps.
- Exhaust gaskets (except for military vehicles).
- Exhaust manifolds.
- Windshield wiper blades.

Refrigeration and air conditioning machinery and equipment (commercial and industrial), (except the mechanical refrigeration cycle) including but not limited to:
- Bottled beverage coolers.
- Ice cream cabinets.
- Refrigerated food display cases.
- Soda fountains.
- Water coolers.

Miscellaneous:
- Barbecue grills.
- Bits and spurs.
- Ferrules.
- Outdoor stoves.
- Pen and pencil parts.
- Portable refrigerators.
- Sporting goods, all applications.

NICKEL PLATING

Communications:
- Escutcheon plates.
- Knobs.
- Name plates.
- Radio and television, decorative trim.
- Speaker grilles.

Hardware:
- Bells.
- Boat trim and accessories.
- Builders' finishing hardware (except half trim for bathroom and toilet side of door).
- Casket hardware.
- Chimes.
- Curtain hooks.
- Door catches.
- Door knobs.
- Door knockers.
- Drawer pulls.
- Harnesses.
- Hinges.
- Kick plates.
- Leashes.
- Letter boxes.
- Locks.
- Luggage hardware.
- Nails.

Hardware—Continued
- Picture frames.
- Picture hangers.
- Push plates.
- Screen door and window hardware exclusive of screen.
- Screws.
- Switch plates.
- Tacks.
- Valve handles (except for bathroom and kitchen fixtures).

Household appliances (except parts subject to abrasion or heat and except the strike prior to silver plating or vitreous enameling):
- Including but not limited to:
  - Food mixers.
  - Heaters.
  - Polishers.
  - Refrigerators (except shelving and door handles).
  - Washing machines.
  - Waxers.
  - Vacuum cleaners (except runners).

Jewelry—Clocks:
- Alarm clocks (except for internal parts).
- Clocks (except for internal parts).
- Costume jewelry (except for 0.0001 inch thickness or less as an undercoating for gold, silver or platinum-group metals).
- Trim and optical glasses (except frames).

Metal furniture and fixtures:
- Commercial furniture, all decorative parts.
- Electrical fixtures.
- Home furniture, all decorative parts.
- Napkin dispensers.
- Store display cases.
- Store fixtures.
- Straw dispensers.

Motor Vehicles:
- Accessories.
- Dash panels (including instruments, controls and appearance items mounted in or on dash panels).
- Escutcheon plates.
- Gas caps.
- Gravel guards.
- Grilles.
- Horns.
- Interior trim.
- Lamp housing.
- License frames.
- Name plates.
- Ornamental trim around windows.
- Radiator trim.
- Trim rings.
- Wheel discs.
- All other parts (except for window frames and slide channels, external and internal door handles, ventilator and regulator handles for windows and doors, the bumpers, bumper guards, bumper bolts, rear deck handles, windshield wiper assemblies, hub caps and exposed screws where no satisfactory substitutes are practicable. The nickel employed for protection of bumper guards and bumpers should not exceed that amount equivalent to an average thickness of .001" on outside surfaces)

Novelties:
- Ash trays.
- Coasters.
- Cocktail shakers and accessories.
- Clothing ornamentation.
- Cosmetic containers.
- Hair curlers.
- Handbag trim.
- Humidors.
- Ornamental buttons.
- Smoking stands.

Plumbing:
- Basin supports.
- Cabinet trim.
- Soap dishes.
- Shower curtain rods and rings.
- Shower doors and trim.
- Tooth brush holders.
- Towel racks.
- Tumbler holders.

Sheet, strip and wire products:
- All decorative parts fabricated from plated sheets, strips or wire.
- Bird cages.
- Clothes hangers.
- Display stands.
- Lamp shades.
- Shopping carts.

Tools:
- Drills.
- Flexible metal tapes (except measuring tape).
- Hammers.
- Office machines and business machines, decorative trim.
- Planes.
- Pliers.
- Power tools (except for functional parts).
- Punches.
- Rules.
- Saws.
- Screw drivers.
- Wrenches.

Toys:
- Mechanical toys.
- Pistols.
- Toys.
- Trains.
- Tricycles.
- Wagons.

Utensils (except the strike necessary prior to silver plating or vitreous enameling):
- Flatware.
- Hollow ware (except for hotels, restaurants, institutions, or ecclesiastical use).
- Serving dishes.
- Serving utensils.
- Racks.
- Trays.

Miscellaneous:
- Bicycles (except handlebars, sprockets, spokes and hubs).
- Electric fans.
- Gambling equipment.
- Lighters.
- Ornamentation on musical instruments.
- Pin ball machines.
- Slot machines.
- Sporting goods.
- Tonsorial equipment (except tools).
- Vending machines.

NICKEL SILVER

The use of nickel is prohibited except in the following permitted items:
- Clock movements.
- Communications equipment, functional parts.
- Cutlery, including pocket knives (for rivets and lining assemblies), not over 10 percent nickel.
- Dairy equipment.
- Drafting instruments.
- Electrical equipment, functional parts.
- Engineering instruments.
- Eyelets and rivets.
- Flat and hollow ware, not over 15 percent nickel.
- Fountain pen separate inner caps.
- Hospital equipment.
- Keys, not over 10 percent nickel.
- Meters and regulators for fluids or gas, where substitute materials are not suitable.
- Optical goods including camera shutters.
- Orthopedic appliances.
- Pins, catches, joints and posts.
- Religious medallions and chains, not over 10 percent nickel.
- Slide fasteners.
- Springs, where required for functional purposes.
- Tonsorial tools.
- Valves for chemicals, where substitute materials are not suitable.
- Watch cases, not over 10 percent nickel.
- Watch movements.

LIST B

(See section 6)

STAINLESS STEEL—NICKEL BEARING

(Except where manufactured for use on board vessels operated by the Armed Forces of the United States, including the United States Coast Guard)

Automotive:
- Bumpers.
- Panels for buses.

Household appliances, electric, gas and other fuel (except where used for functional parts where the properties supplied by stainless steel are essential and no satisfactory substitute is practicable) including but not limited to:
- Cooking stoves and ranges.
- Electric housewares including:
  - Heating and cooking appliances.
  - Motor driven appliances.
  - Personal appliances.
- Fans.
- Floor waxers and polishers.
- Home and farm freezers.
- Lamps, portable electric.
- Laundry equipment including:
  - Clothes driers.
  - Ironing machines.
  - Washing machines.
- Refrigerators.
- Sewing machines.
- Vacuum cleaners.

Other household appliances and utensils:
- Food serving trays, including compartment mess trays.
- Ice refrigerators.
- Salt shakers.

Refrigeration and air conditioning machinery and equipment (commercial and industrial) (except the mechanical refrigeration cycle) including but not limited to:
- Air conditioning systems, self-contained or remote.
- Bottled beverage coolers.
- Carbonated water and carbonated beverage dispensing systems including connecting and interconnecting lines (except for carbonators, carbonated water cooling units, fittings and operational parts for carbonated water or combination syrup and water flow control valves where no substitute material is practicable).
- Dough retarders.
- Florist refrigerators.
- Fountainettes.
- Frozen food cabinets.
- Ice cube makers.
- Malt beverage dispensing systems.
- Mortuary refrigerators.
- Non-carbonated beverage dispensing systems (except for parts where public health specifications make such use mandatory).
- Reach-in refrigerators.
- Refrigeration systems, self-contained or remote.
- Sandwich units.
- Walk-in refrigerators.

Miscellaneous:
- Boats.
- Buttons and button parts (except where launderability, non-corrosiveness and strength are essential, as in uniforms for police, firemen, guards, and similar uniforms, and work clothing and safety clothing).
- Cleaning and scouring sponges.
- Collars, leashes, harness and tags for pets.

HIGH NICKEL ALLOY

Food servicing and kitchen equipment:
- Food serving trays, including compartment mess trays.
- Salt shakers.

Household appliances:
- Home and farm freezers.
- Irons (except heating elements and controls).

Jewelry:
- Knives.

Motor vehicles:
- Windshield wipers.

Refrigeration and air conditioning machinery and equipment (commercial and industrial) (except the mechanical refrigeration cycle) including but limited to:
- Air conditioning systems, self-contained or remote.
- Carbonated beverage dispensing systems.
- Dough retarders.
- Florist refrigerators.
- Fountainettes.
- Frozen food cabinets.
- Ice cube makers.
- Malt beverage dispensing systems.
- Mortuary refrigerators.
- Non-carbonated beverage dispensing systems.
- Reach-in refrigerators.
- Refrigeration systems, self-contained or remote.
- Sandwich units.
- Walk-in refrigerators.

Shipbuilding:
- Pleasure craft galleys.
- Pleasure craft decorative trim.
- Pleasure craft propeller shafts.
- Pleasure craft rigging.
- Pleasure craft stack and ventilating shafts.

Miscellaneous:
- Boats.
- Buttons and button parts (except where launderability, non-corrosiveness, and strength are essential as in uniforms for police, firemen, guards, and similar uniforms, and in work clothing and safety clothing).
- Cleaning and scouring sponges.
- Diaper pins (except where launderability and non-corrosiveness are essential).
- Fountain pens, ball point pens and mechanical pencils.

NICKEL PLATING

Hardware:
- Collars and tags for pets.
- Bolts, washers and similar fastening devices.

Household appliances (except parts subject to abrasion or heat and except the strike prior to silver plating or vitreous enameling) including but not limited to:
- Cooking stoves and ranges (except door and drawer handles).
- Electric housewares including:
  - Heating and cooking appliances.
  - Motor driven appliances.
  - Personal appliances.
- Home and farm freezers.
- Laundry equipment including:
  - Clothes driers.
  - Ironing machines.
- Sewing machines.

Metal furniture and fixtures:
- Commercial furniture.
- Home furniture.

Motor vehicles:
- Hubcaps.

Miscellaneous:
- Bicycle handle bars, sprockets and hubs.
- Juke boxes.
- Insignia, buttons, buckles, decorations, awards and badges (except military).

NICKEL SILVER

The use of nickel silver is prohibited in the following items:
- Flatware, over 10 percent nickel.
- Hollow ware for hotels, restaurants, institutions or ecclesiastical use, over 10 percent nickel.

[F. R. Doc. 51 4079: Filed, Apr. 2, 1951; 5.07 p. m.]

[NPA Order M-47, as amended April 4, 1951]

M-47—Use of Iron and Steel

This amendment to NPA Order M-47 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this amendment, consultation with industry representatives has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of users in different trades and industries.

This amendment affects NPA Order M-47 as follows:

Section 3 shall be deleted and the following substituted therefor:

SEC. 3. *Iron and steel products to which this order applies.* This order applies to the iron and steel products listed in Table I of NPA Order M-1, as amended.

The first sentence of section 4 shall be deleted and the following substituted therefor: "This order applies to persons who use iron and steel products or parts or components made wholly or partly therefrom, for purposes of manufacture or assembly, and limits the use of such materials and parts in the manufacture or assembly of certain items."

Section 5 shall be deleted and the following substituted therefor:

SEC. 5. *Use of iron and steel products in consumer durable goods.* (a) Subject to the exemptions stated in section 6 of this order, and unless specifically authorized in writing by the National Production Authority, no person shall use during the calendar quarter commencing on April 1, 1951, in the manufacture of any item included in List A at the end of this order, a total quantity by weight of iron and steel products in excess of 80 percent of his average quarterly use of such materials in the manufactured item during the base period: *Provided, however,* That such use in any one month shall not exceed 40 percent of the permitted quarterly use. However, if such person manufactured one or more units of a part made wholly or partly from iron or steel products during the base period, and uses one or more purchased units of that part during said calendar quarter in any item in List A, he shall include the weight of the iron and steel products used in the manufacture of each such part, whether by himself or another, in computing his use of iron and steel products during the base period and during said calendar quarter. During the calendar quarter commencing on April 1, 1951, any person who does not use any iron and steel product in the manufacture of an item in List A, but who assembles parts made wholly or partly from such material into such item, shall not assemble a total number of units of such item in excess of 40 percent of the number of such units which he assembled during the base period.

(b) Any person who during the 6-month period ending December 31, 1950, used conversion steel in the manufacture of any items included in List A at the end of this order shall, during the calendar quarter commencing on April 1, 1951, use conversion steel in the manufacture of such items to the extent stated in this paragraph. The ratio between nonconversion steel used and the total permitted use of steel shall not exceed the ratio between nonconversion steel and total steel received by him during the 6-month period ending December 31, 1950: *Provided, however,* That in the alternative and in the event it is not practicable to determine the quantity of conversion steel used in the manufacture of items in List A, the ratio between nonconversion steel and total steel used in his total production, including all items in List A, shall not exceed the ratio between nonconversion steel and total steel received by him during said period. Any person who selects and applies either of the alternatives above stated may not subsequently apply the other alternative without the written approval of the National Production Authority.

Paragraph (b) of section 6 shall be deleted and the following substituted therefor:

(b) Section 5 shall not apply to any person whose total output of manufactured and assembled items included in List A during the calendar quarter commencing April 1, 1951, has an iron and steel content (including the estimated iron and steel content of parts and semifabricated materials purchased from others) of less than 100 short tons: *Provided, however,* (1) That no such person shall during said quarter use iron and steel products (not including the estimated iron and steel content of parts and semifabricated materials purchased from others) in the manufacture of items in List A a total quantity by weight of such material in excess of his average quarterly use thereof for such purposes during the base period; and (2) that any such person who does not use any iron and steel product in the manufacture of an item in List A, but who assembles parts made wholly or partly from such material into such item, shall not assemble a total number of units of such item in excess of 50 percent of the number of such units which he assembled during the base period.

List A attached to the order as an appendix shall be deleted and the following substituted therefor:

LIST A

The items on this List A, made in whole or in part from iron and steel products or containing parts made wholly or partly from iron and steel products, are subject to the provisions of this order. (Joining hardware is not considered "parts" within the meaning of List A.) The listing following each Arabic numeral shall be considered a separate item hereunder.

I. HOUSEHOLD FURNITURE

1. Household furniture: living room, dining room, kitchen, breakfast room, and bedroom furniture (excluding bed springs, mattresses, and dual purpose sleeping equipment).
2. Other household furniture, including but not limited to beach, sunroom, garden, porch, lawn furniture, and steamer chairs.
3. Household cabinets such as kitchen, wardrobe, broom, and medicine cabinets.

II. OFFICE, PUBLIC BUILDING, PROFESSIONAL, BUSINESS, AND STORE FURNITURE AND FIXTURES

1. Furniture and fixtures such as desks, bookcases, shelving, tables, stands, booths, filing cabinets, and transfer cases, including card and document cases.
2. Furniture and fixtures such as chairs, stools, benches, sofas, couches, settees, clothing racks, and costumers.
3. Restaurant furniture and fixtures, including tray stands and serving tables.
4. Theater, auditorium, stadium, and grandstand chairs and seats, ganged and single, indoor or outdoor types.
5. Barber shop and beauty shop furniture especially designed for such use, including but not limited to manicure tables, dresserettes, hydraulic and reclining chairs, and couch units.
6. Soda fountain creamers.
7. Beer dispensing equipment and fixtures.

III. OFFICE, PUBLIC BUILDING, PROFESSIONAL, BUSINESS, AND STORE PARTITIONS, SHELVING, LOCKERS, AND FIXTURES

1. Lockers (except especially designed and made for the armed services), partitions, and shelving.
2. Tables, show and display cases (including wall types), cabinets (floor and wall types), and counters.
3. Store and office decorative and ornamental fixtures.
4. Telephone booths.

IV. HOUSEHOLD APPLIANCES, HOUSEHOLD MACHINES, AND HOUSEHOLD EQUIPMENT

1. Cooking stoves and ranges.
2. Small electric appliances, including but not limited to: broilers; coffee percolators and urns; heating units for coffee makers; hot plates and disc stoves; roasters; toasters; waffle irons; sandwich grills; cookers; casseroles; food mixers; juice extractors; drink mixers and whippers; hand and hair dryers; vibrators; portable electric air space heaters; electric steam radiators; flat irons, including steam irons; and immersion heaters.
3. Electric fans, 16 inches and under.
4. Floor waxing and polishing machines.
5. Portable electric lamps, including office types, such as, floor, bridge, desk, torch, table, pin-up lamps, and lamp shades.
6. Home laundry equipment, including but not limited to: clothes dryers, gas and electric; mechanical ironers and mangles; and washing machines, electric and gasoline types.
7. Refrigerators, mechanical and ice, and cabinets for household refrigerators sold separately.
8. Home and farm freezers under 13 cubic foot capacity, and cabinets for same sold separately.
9. Dish-washing machines.
10. Water softeners.
11. Automatic food and garbage disposal units.
12. Vacuum cleaners.
13. Carpet sweepers.
14. Packaged air conditioning units (window and console types) ¾ horsepower and under.

V. UTENSIL AND CUTLERY

1. Pocket knives.
2. Silverware, including but not limited to: flatware, hollow ware, novelties, toilet ware, and trophies.
3. Plated ware, including but not limited to: flatware, hollow ware, novelties, toilet ware, and trophies.
4. Table and kitchen cutlery, such as all types of knives, forks, spoons, and carving sets.

VI. RADIO, TELEVISION, AND PHONOGRAPHS

1. Radio receivers, home, portable, and broadcast band automobile receivers.
2. Radio-phonograph combinations.
3. Television receivers.
4. Radio-television receivers, television-phonograph combinations, and radio-television-phonograph combinations.
5. Phonographs and record players.

VII. TRANSPORTATION EQUIPMENT

1. Passenger automobiles and station wagons.
2. Motorcycles, motor scooters, motor bikes.
3. Bicycles.
4. Ships and boats, except military and commercial.
5. Aircraft, except military and commercial.

VIII. MISCELLANEOUS ITEMS

1. Cameras, amateur box type still picture, fixed focus (except reflex), and 8-mm. motion picture cameras and projectors.
2. Coin operated scales and automatic merchandising machines.
3. Games, toys, and children's vehicles.
4. Jewelry, novelties, ornaments, and jewelry cases.
5. Lawn mowers, rollers, seeders, and tampers.
6. Musical instruments.
7. Pianos and organs.
8. Paper weights, desk and document trays, and letter openers.
9. Pens and mechanical pencils.
10. Smokers' articles such as ash trays; cigar, cigarette, and match cases; and holders, lighters, pipe cleaners, and smoking stands.
11. Table tops for kitchen, dinette, and breakfast tables.
12. Venetian blinds, shades, and awnings.
13. Fireplace fixtures and equipment such as dampers, irons, and fire screens.
14. Ornamental lawn fence and railing.
15. Sporting and athletic goods.
16. Morticians' goods and equipment such as caskets, coffins, vaults, liners, but excluding wooden coffin hardware, instruments, and supplies.
17. Coin or slug operated gambling, amusement, or musical devices or machines.
18. Signs and advertising displays.
19. Mirror and picture frames.
20. Miscellaneous items such as shoe trees and wire garment hangers.

IX. ACCESSORIES

Accessories for any single item in this List A shall constitute a separate item for the purposes of this order, and shall also be an item separate from the item to which it is an accessory.

An "Accessory" shall mean any product used with or attachable to an item described in this List A and which is generally known in the trade as an "accessory."

(Sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp., sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61)

This amendment shall take effect on April 4, 1951.

Issued April 3, 1951.

NATIONAL PRODUCTION AUTHORITY,
[SEAL] MANLY FLEISCHMANN,
Administrator.

[F. R. Doc. 51-4156; Filed, Apr. 4, 1951; 11:44 a. m.]

Chapter XV—Federal Reserve System

[Regulation X]

REG. X—REAL ESTATE CREDIT

STATE AND MUNICIPAL PROGRAMS

1. Effective April 4, 1951, paragraph (g) of section 6 of Regulation X is amended to read as follows:

(g) *State and municipal programs.* Nothing in this regulation shall prohibit extensions of credit to public corporations created pursuant to a public housing program of a State or municipality where such credit is extended, insured, or guaranteed by the State or municipality or the State or municipality has made commitments to furnish funds to assure repayment. Nothing in this regulation shall apply to extensions of credit by any State or political subdivision of a State or agencies of either with respect to any nonresidential property.

2. (a) The above amendment is issued by the Board of Governors of the Federal Reserve System under authority of the "Defense Production Act of 1950", approved September 8, 1950, and Executive Order No. 10161, dated September 9, 1950.

The purpose of this amendment is to exempt from the regulation extensions of credit by States and municipalities in connection with the financing of nonresidential construction.

(b) Section 709 of the Defense Production Act of 1950 provides that the functions exercised under such act shall be excluded from the operations of the Administrative Procedure Act except as to the requirements of section 3 thereof.

Special circumstances have rendered impracticable consultation with industry representatives, including trade association representatives, in the formulation of the above amendments; and, therefore, as authorized by the aforesaid section 709, the amendments have been issued without such consultation.

(Sec. 704, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp. Interprets or applies sec. 602, Pub. Law 774, 81st Cong.)

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] S. R. CARPENTER,
Secretary.

[F. R. Doc. 51-4046; Filed, Apr. 4, 1951; 8:47 a. m.]

[Regulation X, Interpretation 30]

REG. X—REAL ESTATE CREDIT

INT. 30—PARTICIPATING SHARE IN COOPERATIVE DEVELOPMENT

Participating share in cooperative development. An inquiry has been received asking whether borrowing by a prospective tenant in a cooperative development is subject to Regulation X if the loan is for the purpose of purchasing a participating share in the cooperative development which will entitle the owner thereof to acquire or use a

family unit in the cooperative development.

Cooperative developments ordinarily are built and operated by a nonprofit corporation organized for that specific purpose. Credit secured by a blanket mortgage covering the development is extended to the corporation. The corporation's equity or capital investment is raised by the sale of shares of capital stock to the individual cooperators. Ownership of a share carries with it the right to acquire a long term lease upon a family unit in the cooperative development.

It is the opinion of the Board that borrowing is subject to Regulation X when it is for the purpose of purchasing a share in a cooperative development. The total amounts borrowed by the corporation and the individual shareholders may not exceed the maximum loan value of the cooperative development.

(Sec. 704, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp. Interprets or applies sec. 602, Pub. Law 774, 81st Cong.)

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] S. R. CARPENTER,
Secretary,

[F. R. Doc. 51-4045; Filed, Apr. 4, 1951; 8:47 a. m.]

Chapter XVI—Production and Marketing Administration, Department of Agriculture

[Defense Food Order No. 1]

DFO-1—CASTOR OIL

RESTRICTIONS

It is hereby found and determined that the provisions of this order are necessary and appropriate to promote the national defense; and this order is, therefore, made effective pursuant to the Defense Production Act of 1950 (Pub. Law 774—81st Cong., approved September 8, 1950), Executive Order No. 10161 (15 F. R. 6105), Executive Order No. 10200 (16 F. R. 61), Defense Production Administration Delegation No. 1 (16 F. R. 738), and Secretary's Memorandum No. 1270, as amended (15 F. R. 6424; 16 F. R. 2446). In the formulation of this order there has been consultation with industry representatives, and consideration has been given to their recommendations. Consultation with representatives of trade associations in the formulation of this order has been rendered impracticable inasmuch as there is no trade association, as such, with respect to the castor oil industry, and this order applies to numerous trades.

This order is designed to insure, insofar as possible, that the available supply of castor oil will be used in such manner as to meet military and essential civilian requirements. It limits inventories of castor oil, restricts the quantities that may be used by class use, and contains reporting requirements. The restrictions on use do not apply to users of 60 pounds, or less, of castor oil, during any calendar quarter. No provision is made for set asides and no restrictions are placed on the use of castor oil in the production of sebacic acid.

Sec.
1. Definitions.
2. Restrictions on inventory and use of castor oil.
3. Exemptions.
4. Records and reports.
5. Audits and inspections.
6. Contracts and other obligations.
7. Violations.
8. Petition for relief from hardship.
9. Delegation of authority.
10. Territorial scope.
11. Communications.

AUTHORITY: Sections 1 to 11 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *Definitions.* (a) "Castor oil" means that oil, commonly known as castor oil, produced from the castor bean, whether crude, raw, filtered, refined, blown, dehydrated, saponified, sulfonated, or otherwise processed as oil. Such term does not include tank bottoms or residue from storage tanks in which castor oil was stored.

(b) "Person" includes any individual, corporation, partnership, association, or other organized group of persons, or legal successor or representative of the foregoing. It also includes the United States or any agency thereof or any other government, or any of its political subdivisions, or any agency of any of the foregoing with the exception of the Commodity Credit Corporation and any agency of the United States Government engaged in stockpiling castor oil for purposes of national defense.

(c) "Producer" means any person engaged in the production of castor oil. Such term also means any person for whose account castor oil is produced.

(d) "Distributor" means any person who acquires, by purchase or otherwise, castor oil for resale, or for use by persons other than himself.

(e) "Import" means to bring castor oil into the continental United States.

(f) "Administrator" means the Administrator, Production and Marketing Administration, United States Department of Agriculture, and any other officer or employee of the United States Department of Agriculture authorized to act in his stead.

(g) "Director" means the Director of the Fats and Oils Branch, Production and Marketing Administration, United States Department of Agriculture, and any other officer or employee of the United States Department of Agriculture authorized to act in his stead.

(h) "Calendar quarter" means the several three-month periods, beginning January 1, April 1, July 1, and October 1, of any calendar year.

(i) "Base period" means the last three months of the calendar year 1950.

(j) "Appendix A" means Appendix A to this order as from time to time amended.

SEC. 2. *Restrictions on inventory and use of castor oil.* No person shall receive, accept delivery of, or use castor oil except as provided herein.

(a) Beginning April 5, 1951, no person other than a producer, importer, public warehouseman, or distributor shall, during any day, receive or accept delivery of any quantity of castor oil if such receipt or delivery when added to the total quantity of castor oil owned by such person during such day would exceed an amount equal to one-third of his permitted usage of castor oil during the then current calendar quarter: *Provided,* That when such person customarily purchases castor oil in tank car quantities he may continue to do so and may exceed the limitation provided above by an amount less than the total capacity of a tank car.

(b) Commencing with the calendar quarter beginning on April 1, 1951, no person shall use, during any calendar quarter, in any class use listed in Appendix A an aggregate quantity of castor oil in excess of the quantity obtained by multiplying the quantity of castor oil he used in the same class use during the base period by the percent specified in Appendix A for such class use. However, any person who used castor oil in the form of castor resins which he acquired from another person for any class use listed in Appendix A may include as a part of his base period castor oil use 40 percent of the weight of such castor resins used during the base period. The use of castor resins acquired from another person shall, for the purpose of this order, be deemed as a use of castor oil to the extent of 40 percent by weight of such resins used. The restrictions of this paragraph shall not be applicable to the use of castor oil in the production of sebacic acid.

(c) The Director is authorized to amend Appendix A, from time to time, whenever he determines it to be necessary or appropriate to promote the national defense.

SEC. 3. *Exemptions.* (a) This order shall not apply to any person with respect to any quantity of his castor oil, whether or not in transit, while such oil is in the bonded custody of the United States Bureau of Customs.

(b) Except as to the requirements of sections 2 (a) and 4 (b), this order shall not apply to any person during any calendar quarter if the aggregate quantity of castor oil used by him during such calendar quarter does not exceed the smaller of (1) 1,260 pounds, or (2) the quantity used by him during the base period or 60 pounds, which ever is the greater.

SEC. 4. *Records and reports.* (a) Each person who produced or used 30,000, or more, pounds of castor oil between October 1, 1949, and December 31, 1950, shall, not later than April 30, 1951, submit to the Director, Bureau of the Census, Washington 25, D. C., either of the following forms:

(1) DFO Form-1, for transmittal to the Production and Marketing Administration, showing his receipts, production, use, shipments and stocks of castor oil by calendar quarters from October 1949 through December 1950, or

(2) If complete reports covering the entire period were filed, DFO Form-2 authorizing the Director, Bureau of the Census, to furnish the Administrator with any data previously reported by such person, from October 1, 1949, through December 31, 1950, on Census Form M17A (Animal and Vegetable Fats and Oils, Monthly Report of Producers and Consumers), or any data previously reported by such person for the years 1949 and 1950 on Census Form MA17A (Report of Selected Producers and Consumers of Animal and Vegetable Fats and Oils).

(b) Each person who, during any calendar quarter, receives or accepts delivery of an aggregate quantity of castor oil greater than 60 pounds but less than 30,000 pounds shall submit in duplicate to each of his suppliers a certificate in substantially the following form with respect to the castor oil delivered to such person by the respective supplier during such calendar quarter.

The undersigned hereby certifies to the United States Department of Agriculture, Production and Marketing Administration, and to ---------- that he is familiar with and understands the provisions of Defense Food Order No. 1, that the amount of castor oil used by him during the base period was ---------- pounds, that the amount of castor oil covered by this certificate is ---------- pounds, and the acceptance of such quantity will not result in the holding or ownership by him of an amount of castor oil in violation of section 2 (a) of the order. He further certifies that the oil covered by this certificate is to be used ----------, and such use will not be in violation of section 2 (b) or section 3 (b) of the order.

(Name of supplier)
(State purpose)

(Date)

(Name of firm)
By ---
(Authorized official)

(c) Each person who receives, or accepts delivery of, castor oil, pursuant to specific relief granted with respect to a petition therefor, in accordance with section 8 of this order, shall submit in duplicate to each of his suppliers a certificate in substantially the following form:

The undersigned hereby certifies to the United States Department of Agriculture, Production and Marketing Administration, and to ---------- that he is familiar with and understands the provisions of Defense Food Order No. 1, and that the amount of castor oil covered by this certificate is ---------- pounds; and such quantity, taken with all other castor oil received pursuant to the relief granted in a letter dated ----------, from ----------

(Name of supplier)
(Director or Administrator)

(Date)

(Name of firm)
By ---
(Authorized official)

will not exceed the quantity specified in such letter. He further certifies that the oil covered by this certificate will be used in accordance with the aforesaid letter.

(d) Each person whose production of castor oil, or permitted use of castor oil in accordance with Appendix A, exceeds 30,000 pounds per calendar quarter and who does not submit to the Director, Bureau of the Census. Census Form M17A, in duplicate, shall, not later than the 10th of May 1951, and the 10th of each succeeding month, submit to the Director, Bureau of the Census, Washington 25, D. C., for transmittal to the Production and Marketing Administration, a duplicate copy of Census Form M17A, or a copy of such other form or forms as may be prescribed by the Administrator, showing his receipts, production, use or consumption, shipments, and stocks of castor oil during the preceding month.

(e) Each person who is furnished certificates in accordance with the provisions of section 4 (b) or (c) shall submit to the Director, on or before the 10th of the following calendar month, a copy of each certificate received by such person covering the castor oil so delivered.

(f) Each public warehouseman receiving, storing, or shipping castor oil at a rate in excess of 30,000 pounds per calendar quarter shall not later than the 10th day of each calendar month submit to the Director, Bureau of the Census, Washington 25, D. C., for transmittal to the Production and Marketing Administration, a duplicate copy of Census Form M17B, or a copy of such other form or forms as may be prescribed by the Administrator, showing total stocks of castor oil held at the end of the preceding month.

(g) The Director shall be entitled to obtain such information from and to require such reports and the keeping of such records by any person as may be necessary or appropriate, in the Director's discretion, to the enforcement or administration of the provisions of this order.

(h) Every person subject to this order shall, for at least two years (or such other period of time as the Director may prescribe), maintain accurate records of his transactions in, and use of, castor oil.

SEC. 5. *Audits and inspections.* The Director shall be entitled to make such audit and inspection of the books, records, and other writings, premises, and stocks of castor oil of any person, and to make such investigations, as may be necessary or appropriate, in the Director's discretion, to the enforcement or administration of the provisions of this order.

SEC. 6. *Contracts and other obligations.* The limitations and requirements of this order shall be observed without regard to contracts or obligations heretofore or hereafter entered into, or any rights accrued or payments made thereunder.

SEC. 7. *Violations.* Any person who violates any provision of this order, or requirement pursuant hereto, may be prohibited from receiving, making deliveries of, maintaining inventories of, and using castor oil. In addition, any person who wilfully violates any provision of this order, or requirement pursuant hereto, is guilty of a crime and may be prosecuted under any and all applicable laws. Further, civil actions may be instituted to enforce any liability or duty created by, or to enjoin any violation of, any provision of this order, or requirement pursuant hereto.

SEC. 8. *Petition for relief from hardship.* Any person affected by this order who considers that compliance herewith would work an exceptional or unreasonable hardship on him may file a petition for relief with the Director. Petitions shall be in writing and set forth all pertinent facts, the nature of the relief sought, and justification therefor. The Director may take such action with reference to the petition as he deems appropriate. If the petitioner is dissatisfied with the action taken by the Director on the petition, he shall obtain, by requesting the Director therefor, a review of such action by the Administrator. The Administrator, after the review, shall take such action as he deems appropriate and such action shall be final.

SEC. 9. *Delegation of authority.* The administration of this order and the powers vested in the Administrator, insofar as such powers relate to the administration of this order, are hereby delegated to the Director. The Director is authorized to redelegate any or all of the authority vested in him by this order to any officer or employee of the United States Department of Agriculture.

SEC. 10. *Territorial scope.* The provisions of this order shall be applicable within the 48 States and the District of Columbia.

SEC. 11. *Communications.* All reports hereunder and all communications concerning this order shall, unless otherwise provided herein or in instructions issued by the Director, be addressed to the Director, Fats and Oils Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., Ref. DFO 1.

NOTE: All reporting and record-keeping requirements of this order have been approved by, and subsequent reporting and record-keeping requirements will be subject to the approval of, Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Done at Washington, D. C., this 2d day of April 1951, to become effective on April 5, 1951.

[SEAL] HAROLD K. HILL,
Deputy Administrator, Production and Marketing Administration.

APPENDIX A TO DEFENSE FOOD ORDER NO. 1

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Entomology and Plant Quarantine

[7 CFR, Part 301]

WHITE-FRINGED BEETLES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that the Department of Agriculture, pursuant to section 8 of the Plant Quarantine Act of 1912, as amended (7 U. S. C. 161), is considering amending §§ 301.72–2, 301.72–3 (b), and 301.72–8 of the regulations supplemental to the quarantine relating to white-fringed beetles (7 CFR, Supp., 301.72 et seq., as amended, 15 F. R. 3716), and the administrative instructions (15 F. R. 2871) exempting certain regulated articles from the certification requirements of the said quarantine in accordance with the second proviso thereof. The proposed amendments are as follows:

1. Section 301.72–2 would be amended to include the following described counties, cities, and towns, or parts thereof:

Alabama: Baldwin County: All of T. 7 S., R. 6 E.; $S\frac{1}{2}$ T. 7 S., Rs. 4 and 5 E., including all of the town of Foley; secs. 6 and 7, T. 8 S., R. 4 E.; secs. 1, 2, 11, and 12, T. 8 S., R. 3 E.; secs. 35 and 36, T. 7 S., R. 3 E.; and secs. 28, 29, 30, 31, 32, and 33, T. 5 S., R. 4 E.

Clarke County: N½ T. 8 N., R. 3 E., and $S\frac{1}{2}$ T. 9 N., R. 3 E., including all of the town of Grove Hill; and all that area lying within the corporate limits of the town of Jackson.

Coffee County: $S\frac{1}{2}$ T. 4 N., R. 20 E.; that part of T. 3 N., R. 20 E., lying in Coffee County, and secs. 25, 26, 27, 28, 29, and 30, T. 3 N., R. 19 E.

Covington County: That part of the county lying south of the township line between Tps. 5 and 6 N., and east of the Conecuh River; secs. 11, 12, 13, 14, 23, and 24, T. 5 N., R. 14 E.; and secs. 7, 8, 17, 18, 19, and 20, T. 5 N., R. 15 E.

Geneva County: W½ T. 1 N., R. 19 E., and all area south thereof to the Alabama-Florida State line, including all of secs. 21 and 28, T. 6 N., R. 19 W.; $S\frac{1}{2}$ T. 3 N., Rs. 19 and 20 E.; $N\frac{1}{2}$ T. 2 N., R. 19 E.; and secs. 8, 9, 10, 11, 14, 15, 16, 17, 20, 21, 22, and 23, T. 1 N., R. 20 E.

Mobile County: That area included within a boundary beginning at the intersection of the Mobile-Baldwin County line (Mobile River) and the north boundary of $S\frac{1}{2}$ T. 3 S., R. 1 W., thence west along said north boundary to Eight Mile Creek, thence southwesterly along Eight Mile Creek to the point of intersection with the range line between Rs. 1 and 2 W., thence south along said range line to the SW. corner sec. 19, T. 4 S., R. 1 W., thence west along the section line to its intersection with Dawes-Dees Road, thence south along said road to the Alabama-Mississippi State line, thence south to the south line of sec. 17, T. 7 S., R. 4 W., thence east along the section line to Mobile Bay, thence north along Mobile Bay to the Mobile-Baldwin County line, and thence north along said county line to the point of beginning, including all that area lying within the corporate limits of the city of Mobile and Blakely, Pinto, and Sand Islands; secs. 29, 30, 31, and 32, T. 3 S., R. 2 W.; secs. 5, 6, 7, and 8, T. 4 S., R. 2 W.; secs. 1, 2, 11, and 12, T. 4 S., R. 3 W.; and secs. 25, 26, 35, and 36, T. 3 S., R. 3 W.

Florida: Holmes County: $S\frac{1}{2}$ T. 6 N., R. 15 W., except secs. 18, 19, 30, and 31; NE¼ and secs. 22, 23, and 24, T. 5 N., R. 15 W., including all of the town of Smyrna; secs. 5, 6, 7, 8, 17, 18, 19, and 20, T. 5 N., R. 14 W.; secs. 29, 30, 31, and 32, T. 6 N., R. 14 W.; and $SE\frac{1}{4}$ T. 5 N., R. 18 W.

Georgia: Ben Hill County: That area included within a circle having a 2-mile radius and center at the Ben Hill County Courthouse in Fitzgerald, including all of the city of Fitzgerald.

Coffee County: That area included within the corporate limits of the city of Douglas; an area 2 miles wide beginning at the north corporate limits of the city of Douglas and extending northward along U. S. Highway No. 441 with said highway as a center line to and bounded on the north by Seventeen Mile Creek; that area included within a circle having a 2-mile radius and center at the Atlanta, Birmingham and Coast Railroad depot in Ambrose, including all of the town of Ambrose; and an area 3 miles wide beginning at a line projected due east and due west from a point on the Georgia and Florida Railroad 1 mile northwest of the railroad depot in Broxton, and extending northwesterly with said railroad as a center line to and bounded on the north by Georgia State Highway 107.

Fulton County: That area included within the corporate limits of the city of East Point.

Mississippi: George County: Secs. 27, 28, 29, 32, 33, 34, 35, and 36, T. 1 S., R. 6 W., including all of the town of Lucedale; N½ T. 2 S., R. 6 W., except secs. 6, 7, and 18; secs. 5, 6, 7, 8, 17, and 18, T. 2 S., R. 5 W.; and that part of secs. 31 and 32, T. 1 S., R. 5 W., lying south of Mississippi State Highway 15.

Pearl River County: Those parts of Tps. 1 N., Rs. 14, 15, and 16 W., lying in Pearl River County; all of Tps. 1 S., Rs. 14 and 15 W.; $E\frac{1}{2}$ T. 2 S., R. 16 W., and W½ T. 2 S., R. 15 W., including all of the town of Poplarville; all of Tps. 3 and 4 S., R. 15 W.; W½ T. 4 S., R. 14 W.; N½ T. 3 S., R. 16 W.; N½ Tps. 3 S., Rs. 17 and 18 W.; all of T. 5 S., and NE¼ T. 6 S., R. 16 W.; and E½ T. 5 S., and $SE\frac{1}{4}$ T. 4 S., R. 17 W.

Stone County: W½ Tps. 2 and 3 S., and secs. 6, 7, 18, and 19, T. 4 S., R. 10 W.; all of Tps. 2 and 3 S., and N½ T. 4 S., R. 11 W.; secs. 1, 2, 11, 12, 13, 14, 23 and 24, T. 4 S., R. 12 W.; E½ Tps. 2 and 3 S., R. 12 W.; and secs. 3, 4, 5, 8, 9, and 10, T. 2 S., R. 12 W.

Warren County: All that area lying within the corporate limits of the city of Vicksburg, and that area included within a boundary beginning at a point where Halls Ferry Road intersects the corporate limits of the city of Vicksburg, thence southeast along said road to the point of its intersection with the range line between Rs. 3 and 4 E., thence south along the range line to the SE. corner sec. 42, T. 15 N., R. 3 E., thence west along the section line to the Mississippi River, thence north along the east bank of the Mississippi River to said corporate limits, and thence along the south corporate limits to the point of beginning.

North Carolina: Harnett County: An area 4 miles wide bounded on the north by the Harnett-Wake County line and extending along U. S. Highway No. 15–A with said highway as a center line for a distance of 5 miles.

Onslow County: That area included within a circle having a 4-mile radius and center at the Onslow County Courthouse in Jacksonville, including all of the city of Jacksonville; and an area 3½ miles wide beginning at a line projected at right angles to and for a distance of 1¾ miles on each side of U. S. Highway No. 17 from the point where said highway crosses Stanky Creek and extending southwesterly along U. S. Highway No. 17 with said highway as a center line to the northeast boundary of the above-described circular area.

Wake County: An area 4 miles wide bounded on the east by a line projected due north and due south for 2 miles on each side of the point of intersection of U. S. Highway No. 15–A and the Norfolk Southern Railway, approximately 1½ miles east of the Norfolk Southern Railway depot in Fuquay Springs, and extending westerly and southwesterly along U. S. Highway No. 15–A with said highway as a center line to the Wake-Harnett County line, including all of the town of Fuquay Springs.

2. Section 301.72–3 (b) would be amended to read as follows:

§ 301.72–3 *Regulated articles.* * * *

(b) *Articles the movement of which is regulated.* Except as provided in administrative instructions, the movement of the following articles from any regulated area is regulated throughout the year:

(1) Soil, compost, manure, peat, muck, clay, sand, or gravel, whether moved independently of or in connection with or attached to nursery stock, plants, products, articles, or things, except that the movement of processed clay and washed or processed sand and gravel is not regulated.

(2) Nursery stock.

(3) Grass sod.

(4) Plant crowns or roots for propagation.

(5) Uncleaned grass, grain, and legume seed.

(6) Potatoes (Irish), when freshly harvested.

(7) True bulbs, corms, tubers, and rhizomes of ornamental plants, when freshly harvested or uncured.

(8) Hay and straw.

(9) Peanut shells and peanuts in shells.

(10) Seed cotton and cottonseed.

(11) Scrap metal and junk.

(12) Forest products, such as cordwood, stump wood, logs, lumber, timbers, posts, poles, and cross ties.

(13) Brick, tile, stone, concrete slabs, pipe, building blocks, and cinders.

(14) Other articles, products, or things, the movement of which may involve a hazard of spread of white-fringed beetles.

3. Section 301.72–8 would be amended to read as follows:

§ 301.72–8 *Disinfesting vehicles, machinery, and other articles.* When in the judgment of the inspector a hazard of spread of white-fringed beetles is involved, thorough cleaning, disinfestation, or other sanitary treatments of railway cars, trucks, other vehicles, machinery, implements, and other articles will be required by the inspector before they may be moved to points outside the regulated areas.

4. Section 301.72a would be amended to read as follows:

§ 301.72a *Administrative instructions exempting articles from certification.* (a) The following articles are hereby exempted from the certification requirements of §§ 301.72–4 and 301.72–5 when they are free from soil, when they have not been exposed to infestation, and when sanitation practices are maintained as prescribed by or to the satisfaction of the inspector:

(1) Hay and straw, except that peanut hay is not exempt.

(2) Uncleaned grass, grain, and legume seed.

(3) Seed cotton and cottonseed.

(4) Forest products, such as cordwood, stump wood, logs, lumber, timbers, posts, poles, and crossties.

(5) Brick, tile, stone, concrete slabs, pipe, building blocks, and cinders.

(b) Certification will be required for the following articles and materials:

(1) Soil, compost, manure, peat, muck, clay, sand or gravel, whether moved independently of or in connection with or attached to nursery stock, plants, products, articles, or things (processed clay and washed or processed sand and gravel are not regulated).

(2) Nursery stock.

(3) Grass sod.

(4) Plant crowns or roots for propagation.

(5) Potatoes (Irish), when freshly harvested.

(6) True bulbs, corms, tubers, and rhizomes of ornamental plants, when freshly harvested or uncured.

(7) Peanut shells and peanuts in shells.

(8) Peanut hay.

(9) Scrap metal and junk.

During the surveys over a 3-year period no white-fringed beetles have been found in Clayton County, Georgia, or in Robeson County, North Carolina. It is proposed in this amendment of the regulations and administrative instructions supplemental to the Federal quarantine on account of white-fringed beetles to remove these counties from regulation. In 1950 additional infestations of white-fringed beetles were found in the previously regulated counties of Baldwin, Clarke, Coffee, Covington, Geneva, and Mobile, Alabama; in Holmes County, Florida; in the counties of Ben Hill and Coffee, Georgia; in the counties of George, Pearl River, and Stone, Mississippi; and in Onslow County, North Carolina. Infestations were found for the first time in Fulton County, Georgia, in Warren County, Mississippi, and in Harnett and Wake Counties, North Carolina. It is proposed to place these infested areas under regulation.

Section 301.72–3 (b) of the said regulations regulates the interstate movement from the quarantined area of certain articles throughout the year and § 301.72–8 regulates such movement of certain other articles including seed cotton and cottonseed, forest products, building materials and containers, when in the judgment of an inspector a hazard of spread of white-fringed beetles is involved. Circumstances relating to practical and effective quarantine enforcement make it advisable to add seed cotton and cottonseed, forest products, building materials, and containers to the list of articles continuously under regulation, and to make a corresponding reduction in the list of articles subject to regulation in the discretion of the inspector. The proposed amendments of §§ 301.72–3 (b) and 301.72–8 would accomplish that purpose. Simultaneously, it is proposed to revise the administrative instructions contained in § 301.72a so as to exempt seed cotton and cottonseed, forest products, building materials, and containers from the certification requirements of § 301.72–4 when they are handled and maintained under conditions of sanitation which, to the satisfaction of the inspector, would preclude dissemination of white-fringed beetles.

All persons who desire to submit written data, views, or arguments in connection with this matter should file the same with the Chief of the Bureau of Entomology and Plant Quarantine, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., within 15 days after the date of publication of this notice in the FEDERAL REGISTER.

(Sec. 8, 37 Stat. 318, as amended; 7 U. S. C. 161)

Done at Washington, D. C., this 30th day of March 1951.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR, Parts 1, 3]

[Docket No. 9873]

TIME OF FILING OF APPLICATIONS FOR RENEWAL OF BROADCAST STATION LICENSES AND LICENSE PERIODS OF STANDARD BROADCAST, FM BROADCAST, AND TELEVISION BROADCAST STATIONS

NOTICE OF PROPOSED RULE MAKING

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of March 1951;

It appearing, that on December 20, 1950, the Commission adopted a public notice proposing to amend §§ 1.320 (a), 3.220 (a), and 3.620 (a) of the Commission's rules relating to the time of filing of applications for renewal of broadcast station licenses and §§ 3.34 (a), 3.218 (a) and 3.618 of the Commission's rules relating to the license periods of standard broadcast, FM broadcast and television broadcast stations; and

It further appearing, that interested parties were given opportunity to file on or before February 15, 1951, written statements or briefs setting forth comments with respect to the proposed amendments and were given opportunity until March 1, 1951, to file responses to these original comments; and

It further appearing, that the periods for the filing of comments and responses thereto having expired; and

It further appearing, that certain interested parties have filed comments regarding the proposed amendments and have requested oral argument thereon;

It is ordered, That oral argument in the subject proceeding be held before the Commission en banc on the 27th day of April 1951;

It is further ordered, That any person or party desiring to participate in said oral argument file notice of intention to do so on or before the 20th day of April 1951.

Adopted: March 28, 1951.

Released: March 29, 1951.

NOTICES

DEPARTMENT OF STATE

Bureau of German Affairs

[Public Notice 92]

TRANSFER BETWEEN FOREIGNERS OF BLOCKED DM BALANCES LOCATED IN AREA OF FEDERAL TERRITORY

MARCH 29, 1951.

The following general license issued by the Allied High Commission for Germany is deemed to be of interest to certain United States citizens as having legal effect upon them or their property:

GENERAL LICENSE No. 49/51

TRANSFER BETWEEN FOREIGNERS OF BLOCKED DM BALANCES LOCATED IN THE AREA OF THE FEDERAL TERRITORY

1. A General license waiving the prohibitions of Article I of Military Government Law No. 53 (Revised) and French Military Government Ordinance No. 235, and of Article II of Military Government Law No. 52 (to the extent that the prohibitions of Article II of Law No. 52 apply solely by reason of Article I, paragraph 1 (f) of that Law) is hereby issued permitting blocked DM balances with financial institutions in the Federal Territory owned by natural or juridical persons having their ordinary residence, chief place of business or seat outside Germany, to be transferred to other natural or juridical persons having their ordinary residence, chief place of business or seat outside Germany, subject to the proviso that any DM balances thus transferred shall be credited to an "Acquired Blocked DM Account" maintained or to be opened with a financial institution in the area of the Federal Territory or the Western Sectors of Berlin in the name of the person to whom such DM amounts accrue.

2. Unless specifically stated, the General Licenses under Military Government Laws No. 52 and No. 53 (Revised) will not apply to "Acquired Blocked DM Accounts".

3. Subject to the proviso, where applicable, that all revenues (e. g. interest, dividends, rents, capital repayments) shall be credited to an "Acquired Blocked DM Account" with a financial institution in the Federal Territory or the Western Sectors of Berlin in the name of the purchaser, the following General Licenses under Military Government Laws No. 52 and No. 53 (Revised) are hereby declared applicable to "Acquired Blocked DM Accounts":

a. No. 30/50 "Regularization of the Securities System".

b. No. 32/50 "Servicing of German Securities". (Except for paragraph 1 c.)

c. No. 36/50 "Transfer of Blocked DM Balances to Landeszentralbanken".

Provided, That all accounts so transferred remain "Acquired Blocked DM Accounts".

d. No. 45/50 "Transfer of Deutsche Mark Balances and Deposits of Securities from one Financial Institution to another".

Provided, That all DM balances so transferred remain "Acquired Blocked DM Accounts" and that all securities will remain identifiable as having been purchased with funds debited to an "Acquired Blocked DM Account".

4. The payment out of "Acquired Blocked DM Accounts" of bank charges, taxes, fees, and other expenses arising from the acquisition, administration and sale of property acquired for "Acquired Blocked DM Accounts" is herewith permitted. The provisions of General Licenses 15/49 "Payment of Bank Charges", 32/50 "Servicing of German Securities" paragraph 1 c, and 34/50 "Payment of Taxes, Costs, and Fees" apply mutatis mutandis.

5. The transfer of "Acquired Blocked DM Accounts" from persons having their ordinary residence outside Germany to persons having their ordinary residence outside Germany is permitted.

6. The utilization for purposes other than investments of "Acquired Blocked DM Accounts" by account holders transferring their ordinary residence or main place of business to the Federal Republic or the Western Sectors of Berlin is subject to Special Licenses by the Bank Deutscher Laender.

7. This General License is issued with reference to General License No. 8 of United States and British Military Governments under Military Government Law No. 53—also known as General License No. 14 under Military Government Law No. 52 and of General License No. 1 of French Military Government under Military Government Law No. 53 (Ordinance No. 127 dated June 4, 1949 of the Commandant en Chef Francais en Allemagne).

8. This General License shall become effective on March 2, 1951.

Publication of this notice is not intended to and does not in any way add to or detract from the presently existing legal force and effect of the matter quoted above.

For the Secretary of State.

GEOFFREY W. LEWIS,
Deputy Director,
Bureau of German Affairs.

[F. R. Doc. 51-4021; Filed, Apr. 4, 1951; 8:45 a. m.]

[Public Notice 93]

PURCHASE AND SALE OF SECURITIES

MARCH 29, 1951.

The following General License issued by the Allied High Commission for Germany is deemed to be of interest to certain United States citizens as having legal effect upon them or their property:

GENERAL LICENSE No. 50/51

PURCHASE AND SALE OF SECURITIES

1. A General License waiving the prohibitions of Article I of Military Government Law No. 53 (Revised) and French Military Government Ordinance No. 235, and of Article II of Military Government Law No. 52 (to the extent that the prohibitions of Article II of Law No. 52 apply solely by reason of Article I, Paragraph 1 (f) of that law) is hereby issued permitting

(A) Natural or juridical persons whose ordinary residence, principal place of business or seat is outside of Germany, to mark withdrawals from "Acquired Blocked DM Accounts" standing in their name with financial institutions in the Federal Territory in order to:

(i) Purchase from persons, whose ordinary residence is in the Federal Territory or the Western Sectors of Berlin, securities issued by public bodies in the Federal Territories or the Western Sectors of Berlin and their agencies, and securities publicly dealt in at the stock exchanges in the Federal Territory or the Western Sectors of Berlin;

(ii) To purchase or subscribe to such securities as are released by the Bank Deutscher Laender for acquisition out of "Investment Accounts",

Provided, That:

(a) These securities are purchased through a financial institution in the Federal Territory at the official stock exchange or subscription prices and are deposited for the purchaser's account with a financial institution in the Federal Territory or the Western Sectors of Berlin marked as "Acquired Blocked Security Deposit Account";

(b) The purchase price is debited to, and covered by a corresponding credit balance on the purchaser's "Acquired Blocked DM Account" maintained with a financial institution in the Federal Territory.

(B) Natural or juridical persons, whose ordinary residence is outside Germany, to sell securities which have been acquired pursuant to this general license: *Provided*, That:

(i) The sale is effected through the intermediary of a financial institution in the Federal Territory or the Western Sectors of Berlin, at the official Stock Exchange prices, and

(ii) The proceeds are credited to an "Acquired Blocked DM Account" of the seller with a financial institution in the Federal Territory or the Western Sectors of Berlin.

2. This general license does not authorize any further transaction involving securities acquired pursuant to the terms of Paragraph 1 (A) above except the sale of such securities under the conditions specified in Paragraph 1 (B) above, nor does it constitute an exemption from the requirements of full compliance with decartelization and decentralization legislation in force in the Federal Territory.

3. Securities bought pursuant to this General License remain deposited in the purchaser's "Acquired Blocked Security Deposit Account", and the proceeds of securities sold pursuant to this general license continue to be credited to the seller's "Acquired Blocked DM Account" even after the purchaser or seller has transferred his ordinary residence or main place of business to the Federal Republic or the Western Sectors of Berlin.

4. This general license shall become effective on March 2, 1951.

Publication of this notice is not intended to and does not in any way add to or detract from the presently existing legal force and effect of the matter quoted above.

For the Secretary of State.

GEOFFREY W. LEWIS,
Deputy Director,
Bureau of German Affairs.

DEPARTMENT OF THE INTERIOR

Office of Territories

NOTICE OF EXECUTIVE ORDER OF THE GOVERNOR OF GUAM RELATING TO QUARANTINE REGULATIONS

Notice is hereby given that pursuant to Executive Order No. 3-1951[1] of the Governor of Guam, dated and effective February 20, 1951:

Persons entering Guam directly from the United States or from any of its territories or possessions or from any islands of the Trust Territory of the Pacific Islands without having entered en route any foreign port, and persons entering Guam by aircraft or surface vessels of the Armed Forces (whether or not they entered a foreign port en route), shall not be required by the Government of Guam to take inoculations for immunization against any disease nor to obtain a medical certificate that they are free from vermin and communicable diseases.

Commercial aircraft and surface vessels arriving at Guam from the United States, or from any of its territories or possessions, or from any islands of the Trust Territory of the Pacific Islands without having entered en route any foreign port, and public vessels and aircraft operated by any of the Armed Forces of the United States arriving in Guam (whether or not such vessel or aircraft entered a foreign port en route) shall not be required to request pratiques or medical quarantine clearances, on or before arrival in Guam.

The vessels and aircraft described above shall be permitted to enter and discharge passengers and cargo in Guam without the inspection and clearance of any port quarantine officer of the Government of Guam: *Provided*, That the senior port quarantine officer of the Government of Guam whenever he deems it necessary or proper in the public interest, shall order such inspection of any such vessel or aircraft and of its cargo, passengers or crew and may issue such quarantine or other orders as the interest of public health or sanitation may warrant.

The order provides that nothing contained therein shall in any way be deemed to abrogate or waive any authority of the Government of Guam over the protection of Guam against the importation and spread of disease, including the authority to isolate, quarantine or restrict the movement, activities or entry in Guam of persons or animals who suffer from or who have been exposed to any contagious or infectious disease, or to remove or restrict any of the powers otherwise vested by law in the Senior Port Quarantine officer in Guam.

DAN H. WHEELER,
Acting Director,
Office of Territories,
Department of the Interior.

SUBPART A—INTRODUCTION

SECTION 1. *Creation and authority.* (a) The "Civil Aeronautics Administration" is the name administratively assigned in Order No. 52 of the Secretary of Commerce dated August 29, 1940, to the Office of the Administrator of Civil Aeronautics, as a result of Reorganization Plans III and IV of the Reorganization Act of 1939.

(b) The authority of the Civil Aeronautics Administration is derived primarily from the Air Commerce Act of 1926, as amended; Civil Aeronautics Act of 1938, as amended; Reorganization Plan No. III of 1940; Reorganization Plan No. IV of 1940; Federal Airport Act, as amended; Government Surplus Airports and Equipment Act; International Aviation Facilities Act; Administration of Washington National Airport Act, as amended; Alaska Airports Act, as amended; 64 Stat. 770, authorizing the construction and operation of a public airport in the vicinity of the District of Columbia; and 64 Stat. 1090, authorizing action to promote the development of improved transport aircraft.

All functions of the Civil Aeronautics Administration were transferred to, and could be redelegated by, the Secretary of Commerce under Reorganization Plan No. V of 1950. These functions were revested by the Secretary in the Administration under Department Order No. 115 dated May 24, 1950.

SEC. 2. *Addresses.* Headquarters offices of the Civil Aeronautics Administration are located in Tempo Buildings T-4 and T-5, 17th and Constitution Avenue NW., Washington, D. C. The locations of the various field activities of the Civil Aeronautics Administration are listed in Subparts E and F with the functional descriptions of those activities.

SEC. 3. *Inquiries.* Further information regarding the organization and functions of the Civil Aeronautics Administration may be secured from the Aviation Information Office, Civil Aeronautics Administration, Washington 25, D. C. Functional organization charts containing the descriptive text of this regulation are also available from that Office.

SUBPART B—OFFICE OF THE ADMINISTRATOR

SEC. 11. *Functions.* The functional responsibilities of the Office of the Administrator are as follows:

(a) Directs the planning of, approves, and promulgates basic programs and policies, public rules, and the organization structure and assignment of responsibilities within the Civil Aeronautics Administration which are necessary to accomplish the functions authorized by statute or by delegation of statutory authority from the President, Secretary of Commerce, Civil Aeronautics Board, or other Federal agencies.

(b) Directs, evaluates and controls the execution of such programs within the Civil Aeronautics Administration in accordance with management directives established by Congress, the President, the Office of the Secretary of Commerce, and agencies concerned with Federal Government administration as a whole.

(c) Supervises and coordinates the activities of the heads of Washington Offices, Regional Offices, and other field organizations under the immediate control of the Administrator.

(d) Maintains liaison with other agencies of the Government, the Congress, state aviation officials, the aviation industry, and the flying public in general in accordance with policies established by the Secretary of Commerce.

SEC. 12. *Principal officials.* The duties and responsibilities of the principal officials in the Office of the Administrator are as follows:

(a) *The Administrator.* (1) Administers, and is accountable for the conduct and execution of, all functions and duties assigned to the Civil Aeronautics Administration.

(2) Performs those acts and executes those documents which, by statute or delegation of statutory authority, require the exercise of the personal discretion of the Administrator.

(b) *Deputy Administrator for Operations.* (1) Acts for the Administrator in directing and controlling the execution of operating programs of the Civil Aeronautics Administration, and in doing so, serves as the principal deputy to the Administrator in supervising all Washington offices and major field operating organizations.

(2) Acts as Administrator during the absence of the Administrator from duty at his official headquarters in Washington, D. C.

(c) *Deputy Administrator for Program Planning.* (1) Serves as the Administrator's Deputy in the total area of top level planning and evaluating of Civil Aeronautics Administration programs.

(2) Plans, directs, and coordinates the program planning and evaluating activities of the Office of the Administrator.

(3) Acts as Administrator during the simultaneous absence of the Administrator and Deputy Administrator for Operations from duty at their official headquarters in Washington, D. C.

(d) *Executive Assistant.* (1) Acts as the responsible alternate and executive assistant to the Deputy Administrator for Operations in directing the execution of operating programs of the Civil Aeronautics Administration.

(2) Acts as Deputy Administrator for Operations during the absence of the Deputy Administrator for Operations from duty at his official headquarters in Washington, D. C.

(3) Acts as Administrator during the simultaneous absence of the Administrator and his two Deputies from duty at their official headquarters in Washington, D. C.

SUBPART C—SPECIAL STAFF OFFICES

SEC. 21. *Aviation Information Office*—(a) *Functions.* (1) Directs and coordinates the collection and dissemination of information on civil aviation to the public.

(2) Advises the Administrator and other CAA officials on public information policies and procedures.

(3) Produces, provides for, or advises on the development and dissemination of materials such as CAA publications, speeches, training and operational manuals, and audio-visual materials to meet the public information requirements of the various CAA programs.

(4) Provides informational services such as an aeronautical reference library, handling of general inquiry correspondence, translation of foreign language aviation materials, and an aeronautical legislative reference service.

(b) *Subordinate offices.*

Audio-Visual Services Division.
Current Information Division.
Library Division.
Publications Division.

SEC. 22. *General Counsel's Office*—(a) *Functions.* Renders all legal services, including general opinions, the preparation and interpretation of legislation, regulations, and international commitments, and the enforcement of applicable laws and regulations, required by the CAA and by its officers serving in connection with other bodies such as the Air Coordinating Committee and the International Civil Aviation Organization.

(b) *Subordinate offices.*

Legislation and Regulations Division.
General Opinions Division.
Enforcement and Litigation Division.
Airports Division.

SEC. 23. *Budget Office*—(a) *Functions.* Represents and provides special staff assistance to the Office of the Administrator in the development, application, and execution of budgetary policies and in the submission of original and supplemental budget estimates and congressional justifications; provides for the securing and control of funds necessary for authorized CAA operations, and assists in the formulation and revision of fiscal programs.

(b) *Subordinate offices.*

Fiscal Management Division.
Estimates Division.

SEC. 24. *Organization and methods office*—(a) *Functions.* (1) Provides special staff assistance to the Office of the Administrator on all organization and management methods matters of concern at this level of management in the CAA, and in connection therewith surveys and makes recommendations for the improvement of organization, administrative techniques, practices, and management methods in all offices of the CAA.

(2) Provides staff assistance to all other offices of CAA both in Washington and in the field on major organization and management methods matters.

(3) Provides direction to the records, correspondence, and forms management control programs of the CAA.

(4) Coordinates and provides for the release of internal management instructional material applicable to all CAA employees.

SEC. 25. *Personnel Office*—(a) *Functions.* Represents and provides special staff assistance to the Office of the Administrator in the development, application, and execution of personnel policies, and, within policy decisions made by the Administrator, plans, develops, and provides direction to, and evaluates the execution of, the personnel program of the Administrator, which includes recruitment and placement of employees, classification of positions, employee training, and employee-management relations.

(b) *Subordinate offices.*

Placement Division.
Classification Division.
Employee Relations Division.
Training Division.
Procedures and Reports Division.

SUBPART D—PROGRAM STAFF OFFICES

SEC. 31. *Office of Airports*—(a) *Functions.* (1) Plans and coordinates CAA activities for fostering the establishment and development of a national system of airports suitable or adaptable to the future needs of civil aviation and national security.

(2) Prepares and annually revises the National Airport Plan for a national system of airports in the United States and its territories; provides for the granting of federal funds to sponsors in conformity with approved programs and regulations, and furnishes airport advisory service on construction and management problems of other airports.

(3) Determines the necessity for the use of federal land for public airport purposes and requests conveyance of such to sponsors; reviews requests for reimbursement to public agencie for the necessary rehabilitation or repair of public airports damaged by any federal agency, ascertains validity and amount of such requests, and prepares certification of these requests to Congress.

(4) Develops regulations and instructions governing standards of airport location, design, construction, operation, and management.

(5) Provides for liaison within and without the CAA concerning agreements for military use of civil airports. Provides for the disposal of surplus property for public airport purposes, including determination and enforcement of compliance with provisions of the Surplus Property Act.

(6) Consults and advises with federal, state, and local officials, or other interested groups, on legislation, policies, and programs affecting the development, utilization, and protection of airports.

(b) *Subordinate offices.*

Executive Staff Division.
Airport Engineering Division.
Airport Planning Division.
Airport Operations Division.

SEC. 32. *Office of aviation development*—(a) *Functions.* (1) Encourages the development and adoption of improved aircraft, equipment, and related products, especially for personal and agricultural uses.

(2) Encourages the expansion and improvement of air flight facilities, and the elimination of unnecessary restrictions and regulations hampering aviation.

(3) Sponsors or conducts programs for the establishment of a system of "Skyways" and uniform methods of marking ground objects as visual aids to navigation.

(4) Develops and sponsors programs designed to advance civil aviation through educational means.

(5) Sponsors or conducts programs for the collection and dissemination of flight facility information and data in the interest of safe itinerant flight.

(6) In the execution of its programs, this Office, to the greatest possible extent, secures the utilization of the personnel and facilities of other CAA offices; stimulates action by other public or private agencies to accomplish its program objectives; and serves as a primary point of liaison with industry, industry associations, or other governmental agencies.

(b) *Subordinate offices.*

Aviation Extension Division.
Aviation Education Division.
Flight Information Division.

SEC. 33. *Office of Aviation Safety*—(a) *Functions.* (1) Plans and coordinates the development and application of rules, standards, and informative material for the guidance of the public; issues national programs and policies governing CAA Aviation Safety activities as listed below and evaluates their effectiveness, maintaining liaison with or providing information and assistance to other public or private groups with respect thereto:

Design, manufacture, certification, inspection, and maintenance of aircraft and components to assure airworthiness.

Examination and certification of airmen to assure physical fitness and professional competency.

Examination, certification, and inspection of air carriers and other operators of U. S. aircraft engaged in domestic and international operations as well as the development of standards governing foreign air carriers engaged in flight operations within the U. S. to assure safety in operation.

Inspection and certification of air agencies.

Registration of U. S. aircraft and recordation of ownership of U. S. aircraft and components.

Investigation of accidents, as required, to determine if competency of any airmen or operators, airworthiness of aircraft, or violations of the Civil Air Regulations or any certificate issued by the CAA are involved which require initiation of appropriate enforcement or remedial action.

Provision for such operations, testing, and modifications as are required to promote the development of improved transport aircraft pursuant to the terms of Public Law 867, 81st Congress.

(b) *Subordinate offices.*

Technical Staff Division.
Administrative Staff Division.
Performance Standards Staff Division.
Flight Operations Division.
Aircraft Division.
Medical Division.
Airman Division.

SEC. 34. *Office of Federal Airways*—(a) *Functions.* (1) Plans and coordinates the establishment, maintenance, and operation of aids to navigation and traffic control comprising the Common System of the Federal Airways. Formulates programs and prescribes policies, standards, and procedures governing the installation, utilization, operation, and maintenance of facilities for the navigation of aircraft, the control and safety of air traffic, and the provision of an integrated flight assistance and air-to-ground communications service.

(2) Plans, directs, coordinates, and establishes requirements and standards for construction, improvement, maintenance, and operation of landing areas and airports as assigned by the Administrator, utilizing engineering standards for the design of airports approved by the Office of Airports.

(3) Collaborates with military and other government and foreign agencies, and with private and non-government users of the airspace in the adoption of domestic and international airways systems and services, the provision and utilization of necessary facilities, and the collection and dissemination of information on aids and hazards to navigation. Participates in the work of the International Civil Aviation Organization, and the Air Coordinating Committee and other coordinating organizations.

(4) Collaborates with the Department of Defense on planning for military use of the Common System of Federal Airways, the coordination of defense plans and operations and for the military use of CAA facilities.

(5) Is responsible for the planned utilization and allocation of aeronautical radio frequencies for the Department of Commerce.

(6) Plans, coordinates, and directs the development and execution of CAA programs for the security control of aircraft flights within the United States, its territories, possessions, and areas of land or water administered by the United States under international agreement.

(b) *Subordinate offices.*

Planning Staff Division.
Flight Inspection Division.
Administrative Staff Division.
Establishment Engineering Division.
Maintenance Engineering Division.
Communications Division.
Air Traffic Control Division.

SEC. 35. *Office of General Services*—(a) *Functions.* (1) Plans and coordinates the development and application of policies and procedures governing the procurement, management, and maintenance of properties and materials required for CAA operations.

(2) Establishes policies and procedures governing the procurement, utilization, operation, repair and maintenance, modification and overhaul, and disposal of CAA aircraft and equipment.

(3) Provides office services, including the operation of mail, file, and machine tabulating systems, and the procurement and distribution of printed and reproduced material.

(4) Develops, establishes, and maintains a complete set of accounts, fiscal records, and financial reports covering the fiscal operations of the CAA.

(5) Audits and approves for payment all types of public vouchers payable from CAA funds; audits sponsors' accounts and related documents and makes final recommendation as to the Administration's financial obligations in connection with construction for the Federal Aid Airport Program.

(b) *Subordinate offices.*

Accounting Division.
Supply Division.
Special Services Division.
Aircraft Control Division.

SEC. 36. *Office of Aviation Defense Requirements*—(a) *Functions.* Collects and processes all civil aviation defense production requirements so as to present to agencies of higher authority in the defense production program, for appropriate action, consolidated requirements for such defense production, both U. S. and foreign. In carrying out these responsibilities this Office:

(1) Serves as a central point of coordination of all CAA activities with respect to the defense production program.

(2) Provides basic policies, standards and procedures for use by CAA Offices in carrying out their responsibilities in the defense production program.

(3) Develops standard instructions and procedures to be used by CAB, OIT, and ECA in submitting their requirements to CAA for processing and transmission to agencies of higher authority for appropriate action.

(4) Reviews and evaluates, in the light of available materials and facilities, and by utilizing the knowledge and skills of existing CAA Offices, all civil aviation requirements which are filed with CAA as a claimant agency. Sees to it that these requirements are consolidated, insofar as possible, into periodic programs, and submits them to agencies of higher authority for appropriate action.

(5) Maintains such basic records and prepares such reports as the Administrator may require to satisfy the needs of agencies of higher authority with respect to the defense production program.

(b) *Subordinate offices.*

Aircraft Requirements Division.
Airports Requirements Division.
Electronics Requirements Division.
Administrative Staff Division.

SUBPART E—REGIONAL OFFICES

SEC. 41. *General.* The field organization of the Civil Aeronautics Administration consists primarily of ten Regional Offices, each composed of various specialized operating units grouped into an integrated organization structure to serve the regional area. Within each region these field operating units are under the direction of, and accountable to, the Regional Administrator for executing the various operations required to carry out programs and policies established by the Washington Offices.

Nine Regional Offices cover prescribed areas of the United States, its Territories and possessions. The tenth, or International Region, administers Civil Aeronautics Administration activities in the other areas of the world not assigned to the United States Regional Offices. Section 43 contains a description of the organization and functions of a typical Regional Office. Deviations from this description for Regions 8 and 9 are indicated by special subsections. The International Regional Office is described separately in section 44.

SEC. 42. *Locations and areas served.* The designation of the Regional Offices, their locations, and the areas over which they have jurisdiction are as follows:

(a) *Region 1.*

(1) Federal Office Building, New York International Airport, Jamaica, Long Island, N. Y.

(2) Maine, New Hampshire, Vermont, Massachusetts, New York, Connecticut, Rhode Island, Pennsylvania, New Jersey, West Virginia, Maryland, Delaware, Virginia.

(b) *Region 2.*

(1) 50 Seventh Street NE., Atlanta 5, Ga.

(2) Tennessee, North Carolina, Mississippi, Alabama, Georgia, South Carolina, Florida, Puerto Rico, Virgin Islands.

(c) *Region 3.*

(1) Chicago-International Airport, Park Ridge, Ill.

(2) North Dakota, Minnesota, Wisconsin, Michigan, Illinois, Indiana, Ohio, Kentucky.

(d) *Region 4.*

(1) CAA Reservation, Haslet Road, Fort Worth, Tex.

(2) New Mexico, Oklahoma, Arkansas, Texas, Louisiana.

(e) *Region 5.*

(1) City Hall Building, Kansas City, Mo.

(2) Wyoming, South Dakota, Iowa, Nebraska, Colorado, Kansas, Missouri.

(f) *Region 6.*

(1) 5651 West Manchester Avenue, Los Angeles, Calif.

(2) California, Nevada, Utah, Arizona.

(g) *Region 7.*

(1) Exchange Building, Seattle, Wash.

(2) Washington, Oregon, Idaho, Montana.

(h) *Region 8.*

(1) Post Office Building, Anchorage, Alaska.

(2) Territory of Alaska, including the Aleutian Islands.

(i) *Region 9.*

(1) Alexander Young Hotel Building, Honolulu, T. H.

(2) Central and Western Pacific Islands under United States jurisdiction, including

the Territory of Hawaii, and the islands of Canton, Wake, and Guam.

(j) *International region.*

(1) Tempo Building T-4, Seventeenth and Constitution Avenue NW., Washington, D. C.

(2) All other areas of the world not specifically assigned to other Regional Offices.

SEC. 43. *Regions 1–9*—(a) *Office of the Regional Administrator*—(1) *Functions.* Has administrative and technical responsibility for meeting the program objectives for the Region established by Washington Offices.

Has responsibility for the development of regional programs designed to implement Washington program objectives.

Directs and coordinates all regional activities.

Maintains necessary top regional relations with the aviation industry, local government units, and the flying public, to provide that the Civil Aeronautics Administration, through the Region, offers progressive leadership in the field of civil aviation.

Fosters and promotes civil aviation in general through aviation education, informational, and public relations activities.

(b) *Planning and Evaluation Division*—(1) *Functions.* In a staff capacity, advises and assists the Office of the Regional Administrator in the initiation, review, correlation and evaluation of regional plans and planning activities in the Airports, Federal Airways, Aviation Safety, and other program areas devoted to aeronautical service and development in the region.

Advises and assists the Office of the Regional Administrator in the evaluation of program operations in terms of the achievement of basic program goals, the consequences to the region and the aviation public of the efforts to meet such goals, the need for reconsideration of the goals, and the adjustment of program activities in the light of factors and problems developing after program operations have entered the execution stage.

Performs all coordinating and secretarial activities with respect to the use of navigable air space.

Investigates and recommends action on proposed construction of ground structures which might be potential air navigation hazards, and of privately-owned aids to air navigation.

(c) *Legal Division*—(1) *Functions.* Provides counsel to the region on all legal matters.

Represents the Administration in regional legal actions, including actions resulting from violations of Civil Air Regulations and other pertinent regulations.

Provides advisory assistance to State and local law enforcement agencies.

(2) *Regions 8 and 9.* In Regions 8 and 9, these functions are performed in the Office of the Regional Administrator.

(d) *Business Administration Division*—(1) *Functions.* Provides staff assistance to the Office of the Regional Administrator in budget, personnel, fiscal, procurement, and property management administration, and in organization and management methods problems. Conducts the necessary analytical surveys requisite to providing such staff assistance.

NOTE: It should be recognized that for the purpose of carrying out this responsibility, the Business Administration Division acts in a staff capacity for the Office of the Regional Administrator.

Provides the general service functions of the Region in connection with fiscal personnel, property management, procurement, and maintenance of aircraft activities.

(2) *Subordinate offices.*

Budget and Management Branch.
Accounting Branch.
Personnel Branch.
Procurement Branch.
Aircraft Service Branch.
Project Audit Branch.
Property Management Branch.

(3) *Regions 8 and 9.* There is no Project Audit Branch in Regions 8 and 9. In Region 8, there is also a Transportation Branch and an Alaska Supply Branch (located in Seattle, Wash.).

(e) *Airways Operations Division*—(1) *Functions.* Provides staff assistance to the Office of the Regional Administrator on matters pertaining to the operation of air traffic control and communications systems, and the utilization of air navigation facilities.

Executes the regional program relating to the operation of air traffic control and communications systems.

Develops and recommends improved technological procedures relating to assigned activities.

Coordinates assigned operating activities with agencies and/or individuals outside the Civil Aeronautics Administration.

Initiates recommendations for technological improvements of equipment used in the operating activity and for relocation, modification, or additions to the aids to air navigation systems.

Directs the training of traffic control and communications personnel.

Directs the inspection of centers, stations, and towers.

Participates with the Facilities Division in a staff and advisory capacity to the Office of the Regional Administrator in developing over-all policies and programs relating to Federal Airways matters.

(2) *Subordinate offices.*

(i) Air Traffic Control Branch.
Air Route Traffic Control Centers.
Airport Traffic Control Towers.

(ii) Communications Operations Branch.
Interstate Airway Communications Stations.
Overseas Foreign Aeronautical Communications Stations.

(3) *Air Route Traffic Control Centers*—(i) *Functions.* Air Route Traffic Control Centers are responsible for exercising control over air traffic along designated air routes and in designated control zones and control areas within their assigned geographical jurisdiction. All aircraft flying in these designated airspace areas under conditions which require compliance with Instrument Flight Rules are subject to control by these Centers. For a description of these designated airspace areas see 14 CFR Parts 600 and 601.

The geographical jurisdiction of a particular Center coincides with the Flight Advisory Area and Oceanic Control Area boundaries shown on the Civil Airways and Mileage Chart published by the U. S. Coast and Geodetic Survey. Changes in these geographical areas between chart editions are carried in the Airman's Guide published biweekly by the Civil Aeronautics Administration.

These Centers are manned by Air Route Traffic Controllers. These Controllers are responsible for the safe and orderly flow of air traffic being navigated under instrument flight conditions on the air routes within the control areas assigned to the center. Their principal functions are:

To issue instructions to pilots regarding altitudes to be flown, routes to be followed, speeds to be maintained, and holding procedures over specified locations.

To advise pilots of hazardous conditions and other factors which may affect the safety of the flight, and to suggest a change of flight plan.

To maintain a progressive check of aircraft and initiate search and rescue action to locate overdue aircraft.

(ii) *Locations—Region 1.*

Boston Air Route Traffic Control Center, Logan Airport, Boston, Mass.
New York Air Route Traffic Control Center, LaGuardia Field, New York, N. Y.
Pittsburgh Air Route Traffic Control Center, Allegheny County Airport, Pittsburgh, Pa.
Washington Air Route Traffic Control Center, Washington National Airport, Washington, D. C.

Region 2.

Atlanta Air Route Traffic Control Center, Municipal Airport, Atlanta, Ga.
Jacksonville Air Route Traffic Control Center, Municipal Airport, Jacksonville, Fla.
Memphis Air Route Traffic Control Center, 1503 Union Ave., Room 203, Memphis, Tenn.
Miami Air Route Traffic Control Center, Miami International Airport, Miami Springs, Fla.
San Juan Air Route Traffic Control Center, Isla Grande Airport, Sanpurce, P. R.

Region 3.

Chicago Air Route Traffic Control Center, 6013 South Central Avenue, Chicago 38, Ill.
Cincinnati Air Route Traffic Control Center, Citizens Bank Building, 211 East Fourth Street, Cincinnati 2, Ohio.
Cleveland Air Route Traffic Control Center, Second Floor, Bomber Plant Administration Building, Cleveland Municipal Airport, Cleveland 11, Ohio.
Detroit Air Route Traffic Control Center, Detroit Wayne Major Airport, Inkster, Mich.
Minneapolis Air Route Traffic Control Center, Minneapolis-St. Paul International Airport, Minneapolis 19, Minn.

Region 4.

Albuquerque Air Route Traffic Control Center, Kirtland AFB Airport, Albuquerque, N. Mex.
Fort Worth Air Route Traffic Control Center, Majestic Building, 1101–1107 Commerce Street, Fort Worth, Tex.
San Antonio Air Route Traffic Control Center, 409 Bedell Building, San Antonio, Tex.
New Orleans Air Route Traffic Control Center, Federal Land Bank Building, 860 St. Charles Avenue, New Orleans 7, La.
El Paso Air Route Traffic Control Center, El Paso International Airport, El Paso, Tex.

Region 5.

Denver Air Route Traffic Control Center, Municipal Airport, Denver, Colo.
Kansas City Air Route Traffic Control Center, Municipal Airport, 102 Richards Road, Kansas City, Mo.
St. Louis Air Route Traffic Control Center, Wing "C", Building No. 31, Naval Air Station, Lambert Field, St. Louis, Mo.

Region 6.

Los Angeles Air Route Traffic Control Center, 5651 West Manchester Avenue, Los Angeles 45, Calif.
Oakland Air Route Traffic Control Center, Municipal Airport, Oakland 14, Calif.
Salt Lake City Air Route Traffic Control Center, Municipal Airport, Salt Lake City 3, Utah.

Region 7.

Great Falls Air Route Traffic Control Center, Municipal Airport, Great Falls, Mont.
Seattle Air Route Traffic Control Center, King County Airport, Seattle, Wash.

Region 8.

Anchorage Air Route Traffic Control Center, Merrill Field, Anchorage, Alaska.
Fairbanks Air Route Traffic Control Center, Weeks Field, Fairbanks, Alaska.

Region 9.

Guam Island Air Route Traffic Control Center, Agana Airport, Guam Island (Marianas Islands).
Honolulu Air Route Traffic Control Center, Honolulu Airport, Honolulu 12, T. H.
Midway Island Air Route Traffic Control Center, Sand Island Airport, Midway Island.
Wake Island Air Route Traffic Control Center, CAA Intermediate Field, Wake Island.

(4) *Airport traffic control towers*—(i) *Functions.* Airport traffic control towers are operated by the Civil Aeronautics Administration at certain designated airports listed below. They are responsible for the safe, orderly and expeditious flow of air traffic in the vicinity of an airport, and movement of aircraft and vehicles on the airport.

The functions of a majority of these towers have been expanded to include the responsibility for controlling and providing separation between aircraft in the terminal area which are holding or arriving and departing under instrument flight rules. This is termed "Approach Control Service." At such locations, the responsibility for controlling instrument Flight Rule Traffic has been delegated to the tower by an Air Route Traffic Control Center. The purpose of this delegation is to expedite arrivals and departures by means of direct voice communications between the pilot and the approach controller, and by use of special holding, approach, and departure procedures.

These towers are manned by Airport Traffic Controllers, who are responsible for the safe and orderly flow of air traffic in the vicinity of the airport. Their principal functions are:

To issue instructions to pilots for taxiing, take-off, approach for landing, and landing of aircraft.

To inform pilots regarding field and weather conditions, air navigational facilities, emergency landing areas, restrictions to flight, regulations, and other matters which may be of assistance to the pilot.

To relay messages between pilots, airline operations offices, Air Route Traffic Control Centers, Weather Bureau offices, communications stations and other appropriate agencies concerning the operation, dispatch, and control of aircraft.

To invoke emergency procedures when any emergency occurs or appears likely to occur to aircraft under tower control.

When equipped with surveillance and precision beam radar, to monitor aircraft arriving and departing from an airport on instruments, and, in an emergency or upon request, issuing ground controlled approach instructions (GCA) for a let-down.

(ii) *Locations.*

NOTE: Asterisk (*) indicates tower is authorized to exercise approach control.

•Wake Island, Wake Airport.

(5) *Interstate Airway Communications Stations*—(i) *Functions.* The primary purpose of an Interstate Airway Communications Station (INSAC) is to provide aeronautical communications services required to maintain control over and facilitate the flight of aircraft in the United States and Territories. These stations are usually located at airports along the civil airways and are associated with electronic air navigation aids. Communications, flight advisory, and emergency services are generally available within a radius of 100 to 150 miles of the station location. These stations are staffed by Aircraft Communicators whose principal functions are as follows:

Maintains continuous multiple listening watches on designated aeronautical radio frequencies for the purpose of maintaining communications with en route aircraft. Acts as a communications link between aircraft in flight and federal air traffic control facilities during instrument flight rule (IFR) operation. Accepts and transmits flight plans and associated progress and arrival reports, and alerts appropriate Search and Rescue organizations when flights are not successfully concluded.

Observes, reports, and disseminates aeronautical weather data, such as surface weather reports, forecasts, upper air soundings and pilots' weather reports, in cooperation with the U. S. Weather Bureau. Broadcasts pertinent information relative to condition of landing areas, air navigation facilities, and aeronautical weather on scheduled and unscheduled basis as required.

Advises pilots, prior to takeoff, regarding the weather and other hazards along proposed route of flight. Furnishes advisory assistance to pilots landing and taking off from airports not served by an airport traffic control tower. Furnishes emergency navigation assistance to pilots unable to establish their position because of restricted visibility or malfunctioning of airborne electronic equipment.

Monitors federally operated electronic and visual air navigation aids, receives reports of irregularities of non-federal aids, and publicizes operating irregularities when, in his opinion, safety is impaired.

Hilo, Hawaii, T. H., General Lyman Field.
Honolulu, Oahu, T. H., Honolulu Airport.
Port Allen, T. H., Port Allen Airport.
Puunene, Maui, T. H., Maui Airport.

(6) *Overseas Foreign Aeronautical Communications Stations*—(i) *Functions.* Overseas Foreign Aeronautical Communications Stations (OFACS) provides air-ground communication services required to maintain control over and facilitate the long-range flight of aircraft overseas and in foreign countries. Essentially, these communication services are similar to those which are provided by INSACS though greater in scope due to the larger areas of activity. They also provide fixed communications services for the large scale exchange of meteorological and airway information with foreign countries.

(ii) *Locations—Region 1.*

New York, N. Y., LaGuardia Airport.

Region 2.

Miami, Fla., International Airport.
Isla Grande Airport, San Juan, P. R.

Region 4.

Balboa, C. Z., Albrook Field.
New Orleans, La., Municipal Airport.
Swan Island, West Indies.

Region 6.

San Francisco, Calif., San Francisco International Airport.

Region 7.

Seattle, Wash., Seattle-Tacoma Airport.

Region 8.

Anchorage, Alaska.
Annette Island, Alaska.

Region 9.

Canton Island, Pacific Ocean.
Guam Island, Pacific Ocean.
Honolulu, Oahu, Territory of Hawaii.
Wake Island, Pacific Ocean.
Midway Island, Sand Island Field.

(f) *Facilities Division*—(1 *Functions.* Provides staff assistance to the Office of the Regional Administrator on matters pertaining to the establishment and maintenance of Federal Airways facilities.

Develops Regional plans and programs to expand, modernize, or modify Federally-owned or operated air navigation facilities.

Executes the approved programs for the establishment and maintenance of airways facilities within the Region.

Directs the training of maintenance and other personnel, as required.

Directs the inspection of construction projects and maintenance programs.

Participates with the Airways Operations Division in a staff and advisory capacity to the Office of the Regional Administrator in developing over-all Regional policies and programs relating to Federal Airways matters.

Analyzes cost reports furnished by Business Administration Division for purpose of controlling expenditures and adjusting physical programs as required to bring into agreement with approved fiscal programs.

(2) *Subordinate offices.*

Facilities Engineering Branch.
Facilities Construction Branch.
Facilities Maintenance Branch.
Field Maintenance Technicians.
Facilities Flight Inspection Branch.

(3) *Regions 8 and 9.* In Regions 8 and 9 the functions of this division are performed by a Plant and Structures Division, an Electronics Division, and an Airways Flight Inspection Division.

(g) *Airports Division*—(1) *Functions.* Provides staff assistance to the Office of the Regional Administrator in the development and administration of the regional airports programs.

Directs the activities of the district airport offices concerned with the administration of the Federal Airport Act and other Federal statutes relating to the establishment and improvement of civil airports by means of Federal aid.

Advises civic and other public agencies and private enterprises on airport location, planning, design, development, management, maintenance, and approach protection.

Recommends disposal of surplus airports and airport facilities; recommends public land transfers; reviews and recommends for certification, requests for repair and rehabilitation of civil airports for damage caused by Federal agencies.

Directs all administrative action necessary to effect compliance by public agencies with airport agreements, and Federal laws and regulations relating thereto, arising out of Federal aid statutes, surplus property disposal statutes and airport repair and rehabilitation activities.

Furnishes technical data and advice with respect to airport considerations involved in other regional programs, and collaborates with other Divisions in coordinating airport planning and development programs with other regional policies and programs.

(2) *Subordinate offices.*

Airport Engineering Branch.
Airport Planning Branch.
Airport Operations Branch.
Airport District Offices.

(3) *Airport District Offices*—(i) *Functions.* Encourages the establishment and maintenance of airports. Collects and disseminates information on existing airports.

Carries out policies governing standards of location, zoning, design, construction, operation, and management of airports.

Consults and advises with State and local officials or interested parties on airport legislation, location, design, engineering, management, and operation of airports, and all related matters.

Recommends and participates in disposal of surplus airports.

Processes claims for damages under section 17 of the Federal Airport Act.

Checks compliance by local agencies on Federal aid and surplus airports with reference to exclusive rights, maintenance, operation, etc.

Processes requests for Federal aid for airport construction, grant offers, sponsors assurance agreements, letting of contracts, construction payments and all details of Federal-Aid Airport Programs.

Recommends use of Federal lands for airports.

Formulates annual revision of the National Airport Plan at State level.

Administers the Federal-Aid Airport Program under the Federal Airport Act of 1946 and the program for fostering, encouraging, and developing aviation under the Civil Aeronautics Act of 1938 under the general supervision of the Regional Office.

(ii) *Locations and Areas Served—Region 1.*

Augusta, Maine, Augusta State Airport—Maine, New Hampshire, Vermont.
Boston, Mass., 2200 U. S. Customhouse—Massachusetts, Connecticut, Rhode Island.
Albany, N. Y., 112 State Street—New York.
New Cumberland, Pa., Harrisburg State Airport—Pennsylvania.
Wilmington, Del., New Castle County Airport—Delaware, Maryland, New Jersey.
Richmond, Va., Richard E. Byrd Field—Virginia.
Charleston, W. Va., Kanawha County Court House—West Virginia.

Region 2.

Montgomery, Ala., Old Post Office Building—Alabama.
Jacksonville, Fla., 430 Lynch Building—Florida.
Atlanta, Ga., A. G. Rhodes Building—Georgia.
Jackson, Miss., Building 334, Jackson Army Air Base—Mississippi.
Wilmington, N. C., 124 U. S. Customhouse—North Carolina.

Suboffice, Columbia, S. C., Capital Airport—South Carolina.
Nashville, Tenn., Berry Field—Tennessee.
San Juan, P. R., Hangar 20, Isla Grande Airport—Puerto Rico.

Region 3.

Minot, N. Dak., 303 Federal Building—North Dakota.
St. Paul, Minn., 420 Commerce Building—Minnesota.
Madison, Wis., 638 State Street—Wisconsin.
Springfield, Ill., 301 Elks Building—Illinois.
Indianapolis, Ind., 360 Massachusetts Avenue—Indiana.
Louisville, Ky., 334 East Broadway—Kentucky.
Columbus, Ohio, 409 Trautman Building—Ohio.
Lansing, Mich., 407-411 North Washington Avenue—Michigan.

Region 4.

Little Rock, Ark., Adams Field—Arkansas.
Baton Rouge, La., 444 Florida Street—Louisiana.
Santa Fe, N. Mex., 208 East March Street—New Mexico.
Oklahoma City, Okla., 406 Municipal Building—Oklahoma.
Austin, Tex., 1310 Congress Avenue—East Texas.
Big Spring, Tex., Municipal Airport—West Texas.

Region 5.

Kansas City, Mo., 2705 City Hall—Kansas.
Kansas City, Mo., 2705 City Hall—Missouri.
Des Moines, Iowa, 215 Jewett Building—Iowa.
Lincoln, Nebr., 411 Trust Building—Nebraska.
Denver, Colo., Stapleton Airfield—Colorado.

Region 6.

Los Angeles, Calif., 5651 West Manchester Avenue—Southern California.
San Francisco, Calif., 630 Sansome Street—Northern California.
Phoenix, Ariz., 707½ West Thomas Road—Arizona.
Salt Lake City, Utah, Salt Lake City Municipal Airport No. 1—Utah.
Carson City, Nev., 319 North Carson Street—Nevada.

Region 7.

Seattle, Wash., CAA Building, Boeing Field—Washington.
Helena, Mont., Montana Building—Montana.
Salem, Oreg., 460 North High Street—Oregon.
Boise, Idaho, 1412 West Idaho Street—Idaho.

(4) *Regions 8 and 9.* There are no subordinate offices in Regions 8 and 9.

(h) *Aircraft Division*—(1) *Functions.* Provides staff assistance to the Office of the Regional Administrator on all aircraft airworthiness matters.

Directs, or makes engineering and flight test investigations of, newly developed aircraft and components or modification projects, to insure compliance with prescribed airworthiness standards.

Directs the inspection of newly manufactured or modified aircraft and aircraft components and related manufacturing processes to insure compliance with approved technical data and or specifications.

Provides such airworthiness and maintenance information, and performance data, as may be required by the Safety Operations Division.

Provides for the issuance of type, production, and airworthiness certificates.

Prepares airworthiness directives for issuance, and issues specifications for aircraft and components.

Administers the Type Certification Board Program.

Recommends new or modified airworthiness regulations.

Directs the appointment and supervision of CAA-designated factory inspection and engineering representatives.

Provides, as required, technical assistance in the investigation of aircraft accidents.

Participates with the Safety Operations Division in a staff and advisory capacity to the Office of the Regional Administrator in developing over-all policies and programs relating to Aviation Safety.

(2) *Subordinate offices.*

Aircraft Engineering Branch.
Engineering Flight Test Branch.
Manufacturing Inspection Branch.
Aviation Safety District Offices (Factory).

(3) *Aviation Safety District Offices (Factory)*—(i) *Functions.* These Aviation Safety District Offices, located at factories or other locations convenient to the aviation manufacturing industry, specialize in matters concerning the airworthiness of aircraft and components. They are manned by Aviation Safety Agents. These agents are primarily responsible for serving as contact points with designated industry representatives and the general public in the handling of all matters pertaining to the type, production, and original airworthiness certification of new or modified aircraft and components. These agents are also generally familiar with and can furnish information and advice on other aviation safety matters.

(ii) *Locations—Region 1.*

CAA Aviation Safety Factory District Office 1-22, c/o Sikorsky Aircraft Corp, Bridgeport, Conn.

CAA Aviation Safety Factory District Office 1-23, c o Bell Aircraft Corp., Niagara Frontier Division, Buffalo, N. Y.

CAA Aviation Safety Factory District Office 1-24, c o Piper Aircraft Corp., P. O. Box 429, Lock Haven, Pa.

CAA Aviation Safety Factory District Office 1-25, c o Glenn Martin Co. (19), "B" Building Balcony, Middle River, Md.

CAA Aviation Safety Factory District Office 1-26, c o Bellanca Aircraft Corp., New Castle, Del.

CAA Aviation Safety Factory District Office 1-28, Room 102, Federal Building, International Airport, Jamaica, Long Island, N. Y.

Region 3.

CAA Aviation Safety Factory District Office, Akron Municipal Airport, 1800 Triplett Boulevard, Akron 6, Ohio.

CAA Aviation Safety Factory District Office, c o Aeronca Aircraft Corp., Middletown, Ohio.

CAA Aviation Safety Factory District Office, P. O. Box 538, Muskegon, Mich.

CAA Aviation Safety Factory District Office, Detroit-Wayne Major Airport, Romulus Rural Route No. 1, Mich.

Region 4.

CAA Aviation Safety Factory District Office, 241 Terminal Building, Love Field, Dallas, Tex.

CAA Aviation Safety Factory District Office, c/o Tex Engineering & Manufacturing Co., P. O. Box 6191, Dallas 2, Tex.

CAA Aviation Safety Factory District Office, P. O. Box 1689, Meacham Field, Fort Worth, Tex.

Region 5.

CAA Aviation Safety Factory District Office 5-21, c/o Beech Aircraft Corp., Wichita, Kans.

CAA Aviation Safety Factory District Office 5-22, Municipal Airport, Box 370, Wichita, Kans.

Region 6.

CAA Aviation Safety Factory District Office 6-21, c o Consolidated-Vultee Aircraft Corp., Building 4, Mezzanine, San Diego, Calif.

CAA Aviation Safety Factory District Office 6-22, c o Douglas Aircraft Co., Inc., 3000 Ocean Park Boulevard, Santa Monica, Calif.

CAA Aviation Safety Factory District Office 6-23, c o Lockheed Aircraft Corp., Plant A-1, Building 62, Room 326, Burbank, Calif.

CAA Aviation Safety Factory District Office 6-24, c o Northrop Aircraft Inc., Plant 1, Hawthorne, Calif.

CAA Aviation Safety Factory District Office 6-25, c o United Helicopter, Inc., 1350 Willow Road, P. O. Box 1280, Palo Alto, Calif.

Region 7.

CAA Aviation Safety Factory District Office 7-10, P. O. Box 3107, Seattle 14, Wash.

(4) *Regions 8 and 9.* The functions of this division are performed by an Aviation Safety Division in Regions 8 and 9.

(i) *Safety Operations Division*—(1) *Functions.* Provides staff assistance to the Office of the Regional Administrator on Safety Operations matters.

Directs all aviation safety activities relating to airmen, aircraft in service, air agencies, fixed base operators, and air carriers and other operations as are specifically assigned to the Region.

Directs the medical examination and evaluation activities of the Region.

Disseminates essential information to field operators to encourage effective utilization of all available aviation facilities and developments, coordinating such action with all Divisions of the Region.

Advises and assists State and local law enforcement agencies on Aviation Safety matters.

Recommends new and modified regulations affecting safety operations.

Furnishes information to the Aircraft Division, based on maintenance and operations experience.

Supervises and coordinates the activities of Aviation Safety District Offices (other than at factories), and plans and administers regional programs for Safety Operations training and proficiency flying.

Directs or conducts accident and regulation violation investigations.

Participates with the Assistant to the Regional Administrator in the planning of field programs for the fostering of aviation and personal flying.

Appoints and supervises CAA-designated airman, maintenance, and medical representatives.

Participates with the Aircraft Division in a staff and advisory capacity to the Office of the Regional Administrator in developing over-all policies and programs relating to Aviation Safety.

(2) *Subordinate offices.*

Flight Operations Branch.
Airman Standards Branch.
Maintenance Inspection Branch.
Aviation Safety District Offices.

(3) *Aviation Safety District Offices*—(i) *Functions.* Primary operational contact with the public in the conduct of aviation safety activities is the responsibility of Aviation Safety Agents. Aviation Safety District Offices, each under the supervision of a Supervising Agent, serve as headquarters for these agents. These agents are responsible for the initial handling of all matters dealing with the aeronautical competency of airmen, air agencies, and air carriers; maintenance of aircraft airworthiness; and compliance with rules and standards governing flight operations.

The Aviation Safety District Office is also the headquarters and contact point for the several thousand CAA designated industry representatives who receive instructions and materials for carrying out of their special duties asociated with the examination of airmen and the inspection of aircraft.

Promotion of safe flying is also a responsibility of the agents in the district office. This phase involves counseling and participation in all kinds of aeronautical activities. It also includes the investigation of accidents and violations for the purpose of ascertaining complete factual data leading towards the determination of necessary corrective action in the case of accident investigation. In the case of violations and complaints, it involves close liaison with State and local enforcement agencies as well as the ascertaining of factual data leading towards the determination of the appropriate corrective action ranging from no action to revocation of a certificate in the case of the most flagrant and persistent violator.

(ii) *Locations.*

NOTE: Locations of CAA Aviation Safety Factory District Offices are to be found in paragraph (b) (3) (ii) of this section.

Region 1.

CAA Aviation Safety District Office 1-1, Roosevelt Field, Mineola, N. Y.

CAA Aviation Safety District Office 1-2, Beacon Field, 2013 Richmond Highway, Alexandria, Va.

CAA Aviation Safety District Office 1-3, P. O. Box 266, Sandston, Va.

CAA Aviation Safety District Office 1-4, Woodrum Field, Roanoke, Va.

CAA Aviation Safety District Office 1-5, Allentown-Bethlehem-Easton Airport, Allentown, Pa.

CAA Aviation Safety District Office 1-6, Harrisburg State Airport, New Cumberland, Pa.

CAA Aviation Safety District Office 1-7, P. O. Box 1448, Benedum Airport, Clarksburg, W. Va.

CAA Aviation Safety District Office 1-8, Allegheny County Airport, Pittsburgh, Pa.

CAA Aviation Safety District Office 1-9, Municipal Airport, Buffalo, N. Y.

CAA Aviation Safety District Office 1-10, Municipal Airport, Rochester, N. Y.

CAA Aviation Safety District Office 1-11, Hancock Field, Syracuse, N. Y.

CAA Aviation Safety District Office 1-12, Albany Airport, Watervliet, N. Y.

CAA Aviation Safety District Office 1-13, P. O. Box 215, Barnes Westfield Airport Westfield, Mass.

CAA Aviation Safety District Office 1-14, Municipal Airport, Concord, N. H.

CAA Aviation Safety District Office 1-15, Municipal Airport, Norwood, Mass.

CAA Aviation Safety District Office 1-16, Central Airport, Camden 11, N. J.

CAA Aviation Safety District Office 1-17, Teterboro Air Terminal, Teterboro, N. J.

CAA Aviation Safety District Office 1-18, La Guardia Field, Box 575, Jackson Heights, Long Island, N. Y.

CAA Aviation Safety District Office 1-19, North Concourse, Terminal Building, Washington National Airport, Washington 25, D. C.

CAA Aviation Safety District Office 1-20, 287 Marginal Street, East Boston 28, Mass.

CAA Aviation Safety District Office 1-27, Room 202, Administration Building, Municipal Airport, Newark, N. J.

CAA Aviation Safety District Office 1-29, Terminal Building, Municipal Airport, Baltimore 22, Md.

CAA Aviation Safety District Office 1-30, Municipal Airport, Portland, Maine.

CAA Aviation Safety District Office 1-31, Room 103, Federal Building, International Airport, Jamaica, Long Island, N. Y.

Region 2.

CAA Aviation Safety District Office 2-1, P. O. Box 738, Municipal Airport, Atlanta, Ga.

CAA Aviation Safety District Office 2-2, Municipal Airport, Birmingham, Ala.

CAA Aviation Safety District Office 2-3, 1315 Independence Building, Charlotte, N. C.

CAA Aviation Safety District Office 2-4, P. O. Box 1085, Capital Airport, Columbia, S. C.

CAA Aviation Safety District Office 2-5, P. O. Box 1727, Jackson 5, Miss.

CAA Aviation Safety District Office 2-6, 430 Lynch Building, Jacksonville, Fla.

CAA Aviation Safety District Office 2-7, Rural Free Delivery 1, Box 668, Municipal Airport, Memphis, Tenn.

CAA Aviation Safety District Office 2-8, P. O. Box 56 or P. O. Box 1133, Miami Springs, Fla.

CAA Aviation Safety District Office 2-9, Berry Field, Nashville 4, Tenn.

CAA Aviation Safety District Office 2-10, Box 73, Route 1, Springhill, Ala. (Mobile).

CAA Aviation Safety District Office 2-11, P. O. Box 1858, Raleigh, N. C.

CAA Aviation Safety District Office 2-12, P. O. Box 2112, Tampa, Fla.

CAA Aviation Safety District Office 2-13, P. O. Box 839, Municipal Airport, Tallahassee, Fla.

CAA Aviation Safety District Office 2-14, P. O. Box 2511, Municipal Airport, Orlando, Fla.

CAA Aviation Safety District Office 2-15, P. O. Box 2996, Winston-Salem, N. C.

CAA Aviation Safety District Office 2-16, P. O. Box 4764, San Juan, P. R.

Region 3.

CAA Aviation Safety District Office 3-1, 6013 South Central Avenue, Chicago Midway Airport, Chicago 38, Ill.

CAA Aviation Safety District Office 3-2, Wold-Chamberlain Field, Minneapolis, Minn.

CAA Aviation Safety District Office 3-3, Wayne County Airport, Romulus, Mich.

CAA Aviation Safety District Office 3-4, 6200 Rock River Drive, Cleveland, Ohio.

CAA Aviation Safety District Office 3-5, Weir-Cook Airport, Indianapolis, Ind.

CAA Aviation Safety District Office 3-6, Lunken Airport, Cincinnati, Ohio.

CAA Aviation Safety District Office 3-7, Capital Airport, Springfield, Ill.

CAA Aviation Safety District Office 3-8, General Mitchell Field, Milwaukee, Wis.

CAA Aviation Safety District Office 3-9, Bowman Field, Louisville, Ky.

CAA Aviation Safety District Office 3-10, Kent County Airport, Grand Rapids, Mich.

CAA Aviation Safety District Office 3-11, Chicago International Airport, O'Hare Field, Park Ridge, Ill.

CAA Aviation Safety District Office 3-12, Port Columbus Airport, Columbus, Ohio.

CAA Aviation Safety District Office 3-13, Toledo Municipal Airport, Box 37, Toledo, Ohio.

CAA Aviation Safety District Office 3-14, Municipal Airport, Bismarck, N. Dak.

CAA Aviation Safety District Office 3-15, 621 First Avenue, Walker Building, Fargo, N. Dak.

CAA Aviation Safety District Office 3-16, Rochester Airport, Rochester, Minn.

CAA Aviation Safety District Office 3-17, Monsanto Branch, Monsanto, Ill.

CAA Aviation Safety District Office 3-18, St. Joseph County Airport, Bendix Field, South Bend, Ind.

CAA Aviation Safety District Office 3-19, Old City Hall Building, Wausau, Wis.

CAA Aviation Safety District Office 3-20, 6013 South Central Avenue, Chicago Midway Airport, Chicago 38, Ill.

CAA Aviation Safety District Office 3-21, Wold-Chamberlain Field, Minneapolis, Minn.

Region 4.

CAA Aviation Safety District Office 4-1, P. O. Box 1689, Fort Worth, Tex.

CAA Aviation Safety District Office 4-2, 2910 East Central Avenue, Albuquerque, N. Mex.

CAA Aviation Safety District Office 4-3, P. O. Box 2306, Amarillo, Tex.

CAA Aviation Safety District Office 4-4, 241 Terminal Building, Love Field, Dallas, Tex.

CAA Aviation Safety District Office 4-5, 8242 Travelair, Municipal Airport, Houston, Tex.

CAA Aviation Safety District Office 4-6, P. O. Box 426, Little Rock, Ark.

CAA Aviation Safety District Office 4-7, P. O. Box 5158, Farley Station, Oklahoma City 2, Okla.

CAA Aviation Safety District Office 4-8, Route 10, Box 289, San Antonio Airport, San Antonio, Tex.

CAA Aviation Safety District Office 4-9, P. O. Box 86, Shreveport, La.

CAA Aviation Safety District Office 4-10, P. O. Box 2527, Tulsa, Okla.

CAA Aviation Safety District Office 4-11, Municipal Airport, El Paso, Tex.

CAA Aviation Safety District Office 4-12, Airport Branch Post Office, Brownsville, Tex.

CAA Aviation Safety District Office 4-13, Box 8147, Centilly Station, New Orleans 19, La.

CAA Aviation Safety District Office 4-14, P. O. Box 1592, Big Spring, Tex.

CAA Aviation Safety District Office 4-15, P. O. Box 1689, Fort Worth, Tex.

CAA Aviation Safety District Office 4-16, 244 Terminal Building, Love Field, Dallas, Tex.

CAA Aviation Safety District Office 4-17, 8242 Travelair, Municipal Airport, Houston, Tex.

Region 5.

CAA Aviation Safety District Office 5-1, Administration Building, Fairfax Airport, Kansas City 15, Kans.

CAA Aviation Safety District Office 5-2, Administration Building, Lambert-St. Louis Airport, Box 127, St. Louis 21, Mo.

CAA Aviation Safety District Office 5-3, 211 Old Federal Building, Des Moines, Iowa.

CAA Aviation Safety District Office 5-4, Municipal Airport, 3801 Evans Avenue, Cheyenne, Wyo.

CAA Aviation Safety District Office 5-5, P. O. Box 1748, Lincoln, Nebr.

CAA Aviation Safety District Office 5-6, Municipal Airport, 320 Administration Building, Wichita, Kans.

CAA Aviation Safety District Office 5-7, CAA District Office Building, Stapleton Airfield, Denver 7, Colo.

CAA Aviation Safety District Office 5-8, P. O. Box 96, Huron, S. Dak.

CAA Aviation Safety District Office 5-9, Sunderland Building, 403 Fifteenth Street, Omaha, Nebr.

CAA Aviation Safety District Office 5-10, P. O. Box 486, Springfield, Mo.

CAA Aviation Safety District Office 5-11, P. O. Box 550, Dodge City, Kans.

CAA Aviation Safety District Office 5-12, P. O. Box 1907, Cedar Rapids, Iowa.

CAA Aviation Safety District Office 5-13, P. O. Box 581, North Platte, Nebr.

CAA Aviation Safety District Office 5-14, P. O. Box 1046, Grand Junction, Colo.

CAA Aviation Safety District Office 5-15, P. O. Box 27, Rushmore Airport, Rapid City, S. Dak.

Region 6.

CAA Aviation Safety District Office 6-1, 5651 West Manchester Avenue, Los Angeles 45, Calif.

CAA Aviation Safety District Office 6-2, Municipal Airport, Oakland 14, Calif.

CAA Aviation Safety District Office 6-3, Hangar No. 4, Lockheed Air Terminal, Burbank, Calif.

CAA Aviation Safety District Office 6-4, Municipal Airport, Sacramento, Calif.

CAA Aviation Safety District Office 6-5, Fresno Air Terminal, P. O. Box 591, Fresno, Calif.

CAA Aviation Safety District Office 6-6, Municipal Airport, P. O. Box 71, Ontario, Calif.

CAA Aviation Safety District Office 6-7, Municipal Airport No. 1, Salt Lake City 3, Utah.

CAA Aviation Safety District Office 6-8, Administration Building, Municipal Airport, Long Beach, Calif.

CAA Aviation Safety District Office 6-9, P. O. Box 1240, Municipal Airport, Palo Alto, Calif.

CAA Aviation Safety District Office 6-10, Administration Building, Lindbergh Field, San Diego, Calif.

CAA Aviation Safety District Office 6-11, Sky Harbor Airport, P. O. Box 992, Phoenix, Ariz.

CAA Aviation Safety District Office 6-12, 328 Gazette Building, P. O. Box 499, Reno, Nev.

CAA Aviation Safety District Office 6-14, Hancock Field, Santa Maria, Calif.

CAA Aviation Safety District Office 6-15, Administration Building, McCarran Field, P. O. Box 1752, Las Vegas, Nev.

CAA Aviation Safety District Office 6-16, 5651 West Manchester Avenue, Los Angeles 45, Calif.

CAA Aviation Safety District Office 6-17, International Terminal Building, San Francisco Municipal Airport, South San Francisco, Calif.

Region 7.

CAA Aviation Safety District Office 7-1, P. O. Box 534, Georgetown Station, Seattle 8, Wash.

CAA Aviation Safety District Office 7-2, Service Office Building, 5410 Northeast Marine Drive, Portland 13, Oreg.

CAA Aviation Safety District Office 7-3, City Hall, Eugene, Oreg.

CAA Aviation Safety District Office 7-4, 2300 West Washington Avenue, Yakima, Wash.

CAA Aviation Safety District Office 7-5, Felts Field, P. O. Box 26, Parkwater, Wash.

CAA Aviation Safety District Office 7-6, 1412 Idaho Street, Boise, Idaho.

CAA Aviation Safety District Office 7-7, P. O. Box 1167, Municipal Airport, Helena, Mont.

CAA Aviation Safety District Office 7-8, 2191 North Broadway, Billings, Mont.

CAA Aviation Safety District Office 7-9, P. O. Box 17, Boeing Field, Seattle 8, Wash.

Region 8.

CAA Aviation Safety District Office 8-1, Merrill Field, P. O. Box 440, Anchorage, Alaska.

CAA Aviation Safety District Office 8-2, Wien Hangar, Weeks Field, P. O. Box 790, Fairbanks, Alaska.

CAA Aviation Safety District Office 8-3, McKinley Bldg., P. O. Box 2449, Juneau, Alaska.

(4) *Regions 8 and 9.* The functions of this division are performed by an Aviation Safety Division in Region 8 and 9. This division has no subordinate offices in Region 9.

SEC. 44. *International Region*—(a) *Functions.* (1) Provides for the execution on a world-wide basis, of directives, policies, and programs issued by the Washington Office of CAA with respect to:

The inspection and certification of U. S. air carriers as to the adequacy of operating methods, the suitability of facilities and equipment, and the operational competency of carrier personnel for the conduct of international and under permits granted to such carriers and

The inspection and certification of foreign air carriers with respect to their operations to and within U. S. territory under permits granted to such carirers by the CAB.

(2) Analyzes and evaluates the operational problems and the service and facility requirements of U. S. air carriers in their international and overseas operations from the standpoint of intergovernmental agreements and relationships at the operating level and U. S. national interest considerations; advising and assisting such carriers in connection with such problems.

(3) Develops and recommends, to the CAA Washington Headquarters Office, programs or projects or the adoption of new or modified Federal policies to meet the problems and requirements of such carriers as related to public policy and the national interest.

(4) Advises foreign governments, and other agencies whose activities concern U. S. civil aviation, on

(i) Airport site selection, planning, acquisition, development, management, and approach protection;

(ii) Installation, operation, and maintenance of communication and air traffic control systems and aids to air navigation;

(iii) Adoption of regulation, techniques and equipment concerning safety of airmen, aircraft, and air operations; and

(iv) Training requirements for proficieney in the various phases of civil aviation activity.

(5) Activates and supervises technical missions to foreign countries for the execution of approved programs of technical assistance with regard to civil aviation matters.

(b) *Organization.*

Office of the Regional Administrator.
Administrative Staff Division.
Plans and Performance Standards Division.
ICAO Division.
Technical Assistance Division.
Airways and Airports Division.
Safety Division.

(c) *Field establishments.*—Field activities of the International Region are carried out primarily by CAA International District Offices located within the continental United States and CAA International Field Offices located outside the continental United States.

(1) *Functions.* Inspects operations and equipment of U. S. flag air carriers engaged in international air transportation to determine compliance with, and the enforcement of, the applicable safety rules, regulations, and orders issued pursuant to the Civil Aeronautics Act of 1938, as amended.

Directs the investigation of alleged violations of such safety requirements, including accidents when such violations or accidents involve civil aircraft of the United States.

Reviews requests for, and issues amendments to, operating certificates of such carriers.

Issues airworthiness and other aircraft certificates.

Issues certificates and examines applicants for pilot, mechanic, parachute rigger, dispatcher, and other airman certificates.

Assists United States flag international carriers and foreign governments in steps to acquire and provide adequate aeronautical communications facilities and aids to air navigation based on international standards and the requirements of such U. S. carriers.

Promotes United States civil aviation interests through familiarization of foreign officials with United States standards, procedures, and techniques as set forth in the International Civil Aviation Convention or other international agreements to which the United States is a party.

(2) *Locations*—(i) *CAA International District Offices.*

Fort Worth CAA International District Office, CAA Reservation, Haslet Road, Fort Worth, Tex. (P. O. Box 1689).

Kansas City CAA International District Office, Administration Building, Fairfax Airport, Kansas City, Kans.

Miami CAA International District Office, 656 East Drive, Miami Springs, Fla. (P. O. Box 521).

Minneapolis CAA International District Office, Administration Building, Wold-Chamberlain Field, Minneapolis, Minn.

New York CAA International District Office, Federal Building-New York International Airport, Jamaica, Long Island, N. Y.

San Francisco CAA International District Office, Room 203 International Terminal Building, San Francisco Municipal Airport (P. O. Box 299), San Francisco, Calif.

(ii *CAA International Field Offices.*

Balboa CAA International Field Office, Room 301, Building No. 0610, Civil Air Terminal Ancon (P. O. Box "J"), Balboa Heights, C. Z.

Bangkok CAA International Field Office, c/o United States Embassy, 125 Sathorn Road, Bangkok, Thailand.

Buenos Aires CAA International Field Office, c/o United States Embassy, Buenos Aires, Argentina.

Cairo CAA International Field Office, c/o United States Embassy, Cairo, Egypt.

Lima CAA International Field Office, Corpac Terminal Building-Limatambo Airport, c/o United States Embassy, Lima, Peru.

London CAA International Field Office, c/o United States Embassy, No. 1 Grosvenor Square, London, England.

Manila CAA International Field Office, Office Quonset Hut No. 1, U. S. Chancery Compound, Dewey Boulevard, Manila, P. I., APO 928, c/o Postmaster, San Francisco, Calif.

Paris CAA International Field Office, Room 506, Building "D", 58 Rue La Boetie, c/o United States Embassy, Paris, France.

Rio de Janeiro CAA International Field Office, Avenue Presidente Roosevelt, 194/400, c/o United States Embassy, Rio de Janeiro, Brazil.

Tokyo CAA International Field Office, Room 845, Meiji Building, APO 500, c/o Postmaster, San Francisco, Calif.

SUBPART F—OTHER MAJOR FIELD FACILITIES

SEC. 51. *Aeronautical Center*—(a) *Functions.* Plans and conducts such standardization and training courses for CAA employees and other individuals as are required to establish or maintain personnel proficiency for the various programs of the CAA; conducts research and development projects in aviation medicine; modifies, assembles, and distributes equipment and materials for installation or erection of CAA facilities or aids to air navigation.

(b) *Organization.*

Office of the Director.
Technical Assistance Division.
Business Administration Division.
Aviation Safety Standardization Division.
Federal Airways Standardization Division.
Federal Airways Project Materials Division.

(c) *Address.*

CAA Aeronautical Center, (West side of Will Rogers Airport), P. O. Box 1082, Oklahoma City 10, Okla.

SEC. 52. *Technical Development and Evaluation Center*—(a) *Functions.* Conducts applied research and performs service testing and evaluation directed toward eliminating hazards in and improving the safety and efficiency of the operation of aircraft, systems of aids to air navigation and air traffic control, and landing facilities.

(b) *Organization.*

Office of the Director.
Business Administration Division.
Aircraft Division.
Airport Division.
Engineering Shops Division.
Flight Operations Division.
Electronics Division.
Navigation Aids Evaluation Division.

(c) *Address.*

CAA Technical Development and Evaluation Center (new section of Municipal Airport), P. O. Box 5767, Indianapolis, Ind.

SUBPART G—AIR NAVIGATION DEVELOPMENT BOARD

SEC. 61. *Establishment.* The Air Navigation Development Board (hereafter called the "Board") has been established within the Civil Aeronautics Administration by virtue of a charter of agreement cosigned by the Secretary of Defense on October 29, 1948, and the Secretary of Commerce on November 2, 1948. The action to establish the Board was taken pursuant to authority contained in the Civil Aeronautics Act of 1938 and section 161 of the Revised Statutes of the United States, and in accordance with recommendations of the Research and Development Board of the National Military Establishment for the development of a nation-wide air navigation system to serve the needs of civilian and non-tactical military aviation and capable of useful integration with any air defense system established by the National Military Establishment.

SEC. 62. *Powers and duties of the Board.* (a) The Board shall formulate, and from time to time modify as it may deem necessary, a unified program for research on and development of aids for a common national system of air navigation and air traffic control (hereinafter called "the common system") to serve the needs of civilian and non-tactical military aviation but being capable of useful integration with any air defense system established by the National Military Establishment. In so doing, the Board shall have regard to the operational requirements of non-military flying as well as of military, private flying and other civil users, of the air transport, as transmitted by or through the Air Coordinating Committee, and shall evolve a system embracing or related projects to all such types

transmitted by or through the Air Coordinating Committee. Where such classes of requirements are inconsistent, the Board shall determine the relative weight to be accorded to each class and inform the Research and Development Board and the Air Coordinating Committee thereof. No action shall be taken by the Board on the basis of such determinations until a reasonable time has been given to the Research and Development Board and the Air Coordinating Committee for comment.

(c) The Board shall supervise the conduct of all common system research and development projects. Utilizing the contractual and legal facilities of the Administrator of Civil Aeronautics, the Board shall allocate and, with due regard to existing commitments, may reallocate all common system research, development and test projects and funds therefor by contract or other arrangements with government agencies, universities, commercial organizations, or other organizations. The Board shall not itself operate any laboratories or pilot plants.

(d) The Board shall prepare a single comprehensive budget for all research and development on the common system. Funds appropriated for the common system shall be expended only in furtherance of that system pursuant to programs formulated by the Board. No agency or group of the National Military Establishment or the Department of Commerce shall initiate or maintain any research or development projects on the common system or any part thereof without the express authorization of the Board.

(e) The Board shall be guided by the advice of the Research and Development Board with respect to: (i) The economic soundness of such budgetary planning for research and development in connection with the common system as may be within the field of interest of the Research and Development Board; (ii) planning policies from the standpoint of national security; (iii) the balance of emphasis to be placed on the various phases of the common system program; (iv) coordination of the common system program with programs of marine, land, and tactical air navigation and air defense; (v) the maximum amount of research and development effort and facilities which may be made available for the common system by the National Military Establishment; and (vi) which projects shall be classed as common system projects as differentiated from tactical projects.

SEC. 63. *Organization.* (a) In accordance with the terms of the charter, the Board shall consist of four (4)—one representative, one each from the Army, the Navy, the Air Force, and the Civil Aeronautics Administration. Each appointment to the Board shall be subject to the prior concurrence of the heads of the other three constituent departments, and the action shall be [illegible]

man shall be appointed by the Secretary of Commerce with the concurrence of the Secretary of Defense.

(c) The Board shall have a Director of Development selected by the Secretary of Defense after receiving the recommendation of the Board. The Director of Development shall supervise and direct the common system program in accordance with policies and requirements of the Board.

(d) The Administrator of Civil Aeronautics shall, within the limits of available Board appropriations, provide adequate staff for the effective conduct of the work of the Board. In making staff appointments, the Administrator shall consider the recommendations of the Director of Development made with the approval of the Board.

SEC. 64. *Administration.* The Board may establish such rules of administration and procedure as it may need which are not inconsistent with the provisions of its charter; however, except as set forth in (1) through (3) below, the Board is responsible to the Administrator of Civil Aeronautics, and it shall be subject to all administrative policies and procedures to the same extent as any other unit of the Administration, except where specifically exempted therefrom in writing by the Administrator. Exceptions shall exist with respect to: (1) The powers and duties of the Board described in section 62 (e) above; (2) reports to be made by the Chairman to the Secretaries of Commerce and Defense from time to time on the general progress of the Board's work with such recommendations for amendment to the charter as he may deem necessary; and (3) final determinations on substantive matters on which the Board cannot reach agreement, and on which the Administrator's determination is not acceptable to all members of the Board exclusive of the Chairman. Such matters may, at the request of any member of the Board, be referred to the Secretaries of Commerce and Defense jointly for final determination.

SEC. 65. *Public relations.* The public may secure information or make submittals or requests by communicating with the Executive Secretary, Air Navigation Development Board, Civil Aeronautics Administration, W-9, Room 1416, Temporary Building T-4, Washington 25, D. C.

[SEAL] DONALD W. NYROP,
Administrator of Civil Aeronautics.

Approved: March 26, 1951.

CHARLES SAWYER,
Secretary of Commerce.

SUBPART G—AIR NAVIGATION DEVELOPMENT BOARD

SEC. 61. *Establishment.* The Air Navigation Development Board (hereafter called the "Board") has been established within the Civil Aeronautics Administration by virtue of a charter of agreement cosigned by the Secretary of Defense on October 29, 1948, and the Secretary of Commerce on November 2, 1948. The action to establish the Board was taken pursuant to authority contained in the Civil Aeronautics Act of 1938 and section 161 of the Revised Statutes of the United States, and in accordance with recommendations of the Research and Development Board of the National Military Establishment for the development of a nation-wide air navigation system to serve the needs of civilian and non-tactical military aviation and capable of useful integration with any air defense system established by the National Military Establishment.

SEC. 62. *Powers and duties of the Board.* (a) The Board shall formulate, and from time to time modify as it may deem necessary, a unified program for research on and development of aids for a common national system of air navigation and air traffic control (hereinafter called "the common system") to serve the needs of civilian and non-tactical military aviation but being capable of useful integration with any air defense system established by the National Military Establishment. In so doing, the Board shall be guided by the operational requirements of non-tactical military aviation as well as of air carriers, private pilots and other civil users of the air space, as transmitted by or through the Air Coordinating Committee, and shall evolve a system combining the greatest possible utility to all such users.

(b) The Board shall integrate to the maximum extent possible the national security requirements for the common system as transmitted by or through the Research and Development Board and the non-tactical operational requirements of the users of the system as transmitted by or through the Air Coordinating Committee. Where such classes of requirements are inconsistent, the Board shall determine the relative weight to be accorded to each class and inform the Research and Development Board and the Air Coordinating Committee thereof. No action shall be taken by the Board on the basis of such determinations until a reasonable time has been given to the Research and Development Board and the Air Coordinating Committee for comment.

(c) The Board shall supervise the conduct of all common system research and development projects. Utilizing the contractual and legal facilities of the Administrator of Civil Aeronautics, the Board shall allocate and, with due regard to existing commitments, may reallocate all common system research, development and test projects and funds therefor by contract or other arrangements with government agencies, universities, commercial organizations, or other organizations. The Board shall not itself operate any laboratories or pilot plants.

(d) The Board shall prepare a single comprehensive budget for all research and development on the common system. Funds appropriated for the common system shall be expended only in furtherance of that system pursuant to programs formulated by the Board. No agency or group of the National Military Establishment or the Department of Commerce shall initiate or maintain any research or development projects on the common system or any part thereof without the express authorization of the Board.

(e) The Board shall be guided by the advice of the Research and Development Board with respect to: (i) The economic soundness of such budgetary planning for research and development in connection with the common system as may be within the field of interest of the Research and Development Board; (ii) planning policies from the standpoint of national security; (iii) the balance of emphasis to be placed on the various phases of the common system program; (iv) coordination of the common system program with programs of marine, land, and tactical air navigation and air defense; (v) the maximum amount of research and development effort and facilities which may be made available for the common system by the National Military Establishment; and (vi) which projects shall be classed as common system projects as differentiated from tactical projects.

SEC. 63. *Organization.* (a) In accordance with the terms of the charter, the Board shall consist of four full-time representatives, one each from the Army, the Navy, the Air Force, and the Civil Aeronautics Administration. Each appointment to the Board shall be subject to the prior concurrence of the heads of the other three agencies concerned. No action may be put into effect on any matter before the Board without the concurrence of all members, exclusive of the Chairman.

(b) The Board shall have a Chairman who shall not otherwise be employed by the Government and who may serve on a part-time basis. The Chairman shall be appointed by the Secretary of Commerce with the concurrence of the Secretary of Defense.

(c) The Board shall have a Director of Development selected by the Secretary of Defense after receiving the recommendation of the Board. The Director of Development shall supervise and direct the common system program in accordance with policies and requirements of the Board.

(d) The Administrator of Civil Aeronautics shall, within the limits of available Board appropriations, provide adequate staff for the effective conduct of the work of the Board. In making staff appointments, the Administrator shall consider the recommendations of the Director of Development made with the approval of the Board.

SEC. 64. *Administration.* The Board may establish such rules of administration and procedure as it may need which are not inconsistent with the provisions of its charter; however, except as set forth in (1) through (3) below, the Board is responsible to the Administrator of Civil Aeronautics, and it shall be subject to all administrative policies and procedures to the same extent as any other unit of the Administration, except where specifically exempted therefrom in writing by the Administrator. Exceptions shall exist with respect to: (1) The powers and duties of the Board described in section 62 (e) above; (2) reports to be made by the Chairman to the Secretaries of Commerce and Defense from time to time on the general progress of the Board's work with such recommendations for amendment to the charter as he may deem necessary; and (3) final determinations on substantive matters on which the Board cannot reach agreement, and on which the Administrator's determination is not acceptable to all members of the Board exclusive of the Chairman. Such matters may, at the request of any member of the Board, be referred to the Secretaries of Commerce and Defense jointly for final determination.

Winston Shoe Co., Inc., Franklin, N. H., effective 3-26-51 to 12-31-51; 35 learners for normal labor turnover.

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Fashion Embroidery Co., 1307 Washington Avenue, St. Louis, Mo., effective 3-26-51 to 3-25-52; two learners for normal labor turnover; embroidery machine operators, 320 hours; 60 cents per hour (embroidery).

Glen L. Evans, Inc., Caldwell, Idaho, effective 3-22-51 to 9-21-51; 10 learners for normal labor turnover; fly tiers, 480 hours; 60 cents per hour for first 320 hours and 65 cents per hour for remaining 160 hours (fishing tackle).

Gordon & Ferguson, Inc., St. Paul, Minn., effective 3-23-51 to 3-22-52; 10 percent normal labor turnover; machine operating (except cutting) 480 hours, pressing 480 hours, hand sewing 480 hours, finishing operations involving hand sewing 480 hours, and final inspection of assembled garments 160 hours; 65 cents per hour (men's and boys' sportswear and outerwear).

Hygiene Shower Curtain Manufacturing Co. of California, 4202 South Avalon Boulevard, Los Angeles 11, Calif., effective 4-3-51 to 10-2-51; 10 percent normal labor turnover; sewing machine operators, 130 hours; 60 cents per hour (plastic shower curtains and table cloths).

Penn State Cap Co., 614 Washington Trust Building, Pittsburgh, Pa., effective 3-21-51 to 3-20-52; two learners for normal labor turnover; 240 hours machine operating (except cutting); 65 cents per hour (cloth caps).

Reidsville Distributing Co., Reidsville, N. C., effective 3-21-51 to 9-20-51; four learners for normal labor turnover; tufting machine operators, 240 hours; 60 cents per hour (chenille and tufted bedspreads).

Textile Hardwood Manufacturing Co., Inc., Huntsville, Ala., effective 3-23-51 to 9-22-51; three learners for normal labor turnover; woodworking machine operators, 160 hours; 60 cents per hour (wooden parts for textile machinery).

A. J. Weinstein Co., 308 Third Street, Carnegie, Pa., effective 3-22-51 to 9-21-51; two learners for normal labor turnover (vacuum cleaner bags and ironer covers).

Wilson Bros., LaGrange, Ind., effective 4-1-51 to 3-31-52; four learners for normal labor turnover (men's neckties).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificate. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 29th day of March 1951.

ISABEL FERGUSON,
Authorized Representative of the Administrator.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Ceiling Price Regulation 7, Section 43, Special Order 1]

NORTH STAR WOOLEN MILL CO., CEILING PRICES AT RETAIL

STATEMENT OF CONSIDERATIONS

In accordance with section 43 of Ceiling Price Regulation 7, the applicant named in the accompanying special order, North Star Woolen Mill Company, has applied to the Office of Price Stabilization for maximum resale prices for retail sales of certain of its articles. Applicant has submitted the information required under this section and has produced evidence which in the judgment of the Director indicates that the applicant has complied with other stated requirements.

The Director has determined on the basis of information available to him, including the data submitted by the applicant, that the retail ceiling prices requested and which are established by this special order are no higher than the level of ceiling prices under Ceiling Price Regulation 7.

It has been the applicant's custom in the past, borne out by printed lists, to permit retailers in the States of Washington, Oregon, and California to have retail prices on two lines of blankets which were fifty-five ($0.55) cents higher than in the remaining States. This differential applies to two low cost lines in the adult blanket size for which West Coast freight was an appreciable factor. The applicant has requested that this differential now be granted on its lowest price line in the adult blanket size only. This request conforms with the provisions of section 43, Ceiling Price Regulation 7.

The special order contains provisions requiring each article to be marked by the applicant with the retail ceiling price established by the accompanying special order. The applicant is required to send purchasers of the articles a copy of this special order and, in specified cases, of subsequent amendments of this special order.

The special order also requires applicant to file with the Distribution Price Branch regular reports setting forth the number of units of each article covered by this special order which applicant has delivered during that period. This requirement conforms with the provisions of section 43, Ceiling Price Regulation 7.

SPECIAL PROVISIONS

For the reasons set forth in the statement of considerations and pursuant to section 43 of Ceiling Price Regulation 7, this Special Order 1 is hereby issued.

1. The following ceiling prices are established for sales after the effective date of this special order by any seller at retail of all wool blankets manufactured by North Star Woolen Mill Company, 40 West Fortieth Street, New York 18, N. Y., having the brand name "North Star" and described in the manufacturer's application dated February 28, 1951, and supplemented and amended in the manufacturer's application dated March 2, 1951. The manufacturer's prices listed below are subject to a discount of 3/10 EOM.

ALL WOOL BLANKETS

Manufacturer's selling price (per unit)	*Ceiling price at retail (per unit)*
$4.20	$6.95
4.75	7.95
6.00	9.95
6.60	10.95
7.80	12.95
9.00	14.95
12.90	19.95
13.25	21.95
13.50	22.50
14.75	24.50
15.00	25.00
16.50	27.50
17.00	28.50
22.00	37.50
23.50	39.50
24.25	41.50
32.50	55.00

[1] Ceiling price at retail—$20.50 in the States of California, Oregon, and Washington only.

2. The manufacturer's all-wool blanket bearing the style name "Nocturne," size 72 x 90, so long as it has a manufacturer's selling price of $12.00 per unit shall have a ceiling price at retail of $19.95 per unit.

3. The retail ceiling price of an article stated in paragraph 1 of this special order shall apply to any other article of the same type which is otherwise priceable under Ceiling Price Regulation 7 by retailers subject to that regulation, having the same selling price to the retailer, the same brand or company name and first sold by the manufacturer after the effective date of this special order.

4. On and after May 5, 1951, North Star Woolen Mill Company must mark each article listed in paragraphs 1 and 2 of this special order with the retail ceiling price under this special order, or attach to the article a label, tag or ticket stating the retail ceiling price. This mark or statement must be in the following form:

OPS—Sec. 43—CPR 7
Price $--------

On and after June 4, 1951, no retailer may offer or sell the article unless it is marked or tagged in the form stated above.

Upon issuance of any amendment to this special order which either adds an article to those already listed in paragraphs 1 and 2 of this special order or changes the retail ceiling price of a listed article, North Star Woolen Mill Company must comply, as to each such article, with the preticketing requirements of this paragraph within 30 days after the effective date of the amendment. After 60 days from the effective date, no retailer may offer or sell the article unless it is ticketed in accordance with the requirements of this paragraph. Prior to the expiration of the 60-day period, unless the article is so ticketed, the retailer shall comply with the marking, tagging and posting provisions of the regulation which would apply in the absence of this special order.

5. Within 15 days after the effective date of this special order, the manufacturer shall send a copy of this special order to each purchaser for resale to whom, within two months immediately prior to the effective date, the manufacturer had delivered any article covered in paragraphs 1 and 2 of this special order. Copies shall be sent to all other purchasers on or before the date of the first delivery of any such article subsequent to the effective date of the special order, and shall be accompanied by copies of each amendment thereto (if any) issued prior to the date of the delivery. Within 15 days after the effective date of any subsequent amendment to the special order, the manufacturer shall send a copy of the amendment to each purchaser to whom, within two months immediately prior to the effective date of such amendment, the seller had delivered any article the sale of which is affected in any manner by the amendment.

6. Within 45 days of the expiration of the first 6 months period following the effective date of this special order and within 45 days of the expiration of each successive 6 months period, the manufacturer shall file with the Distribution Price Branch, Office of Price Stabilization, Washington 25, D. C., a report setting forth the number of units of each article covered by this special order which he has delivered in that 6 months period.

7. The provisions of this special order establish the ceiling price for sales at retail of the articles covered by it regardless of whether the seller is otherwise subject to Ceiling Price Regulation 7 or any other regulation.

8. This special order or any provision thereof may be revoked, suspended, or amended by the Director of Price Stabilization at any time.

Effective date. This special order shall become effective April 5, 1951.

EDWARD F. PHELPS, JR.,
Acting Director of Price Stabilization.

APRIL 4, 1951.

GENERAL SERVICES ADMINISTRATION

SECRETARY OF THE INTERIOR

DELEGATION OF AUTHORITY WITH RESPECT TO DISPOSAL OF POWER LINES

1. Pursuant to authority vested in me by provisions of the Federal Property and Administrative Service Act of 1949, as amended (Public Laws 152 and 754, 81st Congress), authority is hereby delegated to the Secretary of the Interior to exercise the following authority without regard to regulations and circulars of the General Services Administration in connection with excess transmission facilities of the Department of the Interior no longer needed by that Department, including land, together with buildings, fixtures, facilities, utilities and equipment located on such property or adapted to use in connection therewith:

a. To determine such property surplus: *Provided, however,* That such determination shall in no event be made without prior screening by the Department of Defense, Munitions Board.

b. To dispose of such surplus property by negotiated sale, or otherwise.

2. The authority delegated herein may be redelegated to any officer or employee of the Department of the Interior.

3. This delegation of authority shall be effective as of January 16, 1951. The prior delegation of authority on the same subject to the Secretary of the Interior, dated January 16, 1951 (16 F. R. 557), is hereby superseded.

Dated: March 30, 1951.

RUSSELL FORBES,
Acting Administrator.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 25961]

CONDUIT OR PIPE FROM NEW ORLEANS, LA., TO PENSACOLA, FLA.

APPLICATION FOR RELIEF

APRIL 2, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for The Alabama Great Southern Railroad Company and other carriers named in the application.

Commodities involved: Conduit or pipe, cement, containing asbestos fibre, and fittings, carloads.

From: New Orleans, La.

To: Pensacola, Fla.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1167, Supp. 27.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

APPLICATION FOR RELIEF

APRIL 2, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 950.

Commodities involved: Old iron cans, refuse from garbage dumps, having value for remelting purposes only, carloads.

From: New Orleans, La.

To: Chattanooga and North Chattanooga, Tenn.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 950, Supp. 143.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL,
Secretary.

[4th Sec. Application 25966]

FLAVORING SYRUP FROM BALTIMORE, MD., TO CANTON, OHIO

APPLICATION FOR RELIEF

APRIL 2, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for carriers parties to his tariff I. C. C. No. A-823.

Commodities involved: Syrup, flavoring or fruit, carloads.

From: Baltimore, Md.

To: Canton, Ohio.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: C. W. Boin's tariff I. C. C. No. A-823, Supp. 237.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or

formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 25967]

MALT LIQUORS FROM TERRE HAUTE, IND., TO POINTS IN TENNESSEE

APPLICATION FOR RELIEF

APRIL 2, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. C. Schuldt, Agent, for carriers parties to his tariff I. C. C. No. 3636.

Commodities involved: Malt liquors, carloads.

From: Terre Haute, Ind.

To: Chattanooga, Jackson, Knoxville, Memphis, and Nashville, Tenn.

Grounds for relief: Competition with rail and motor carriers and market competition.

Schedules filed containing proposed rates: L. C. Schuldt's tariff I. C. C. No. 3636, Supp. 245.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

SECURITIES AND EXCHANGE COMMISSION

[File No. 50-39]

NEW ENGLAND ELECTRIC SYSTEM

NOTICE OF FILING AND ORDER GIVING OPPORTUNITY FOR HEARING ON APPLICATION FOR EXEMPTION FROM COMPETITIVE BIDDING REQUIREMENTS

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 29th day of March A. D. 1951.

New England Electric System ("NEES"), a registered holding company, has filed an application, pursuant to Rule U-50 (a) (5) promulgated under the Public Utility Holding Company Act of 1935, for an exemption from the competitive bidding requirements of said Rule U-50 with respect to the disposition of its interest in the gas businesses in its holding company system. All interested persons are referred to said application which is on file in the office of this Commission and which is summarized below:

The application indicates that the gas properties are presently owned and operated by the following subsidiary companies: Malden and Melrose Gas Light Company, Arlington Gas Light Company, Salem Gas Light Company, Northampton Gas Light Company, Gloucester Gas Light Company, Norwood Gas Company, Athol Gas Company, Blackstone Gas Company, Central Massachusetts Gas Company, Wachusett Gas Company, Beverly Gas and Electric Company, Lawrence Gas and Electric Company, Northern Berkshire Gas Company, Suburban Gas and Electric Company, The Narragansett Electric Company, and The Mystic Power Company. All of the above companies are organized and doing business in Massachusetts except the Narragansett Electric Company and The Mystic Power Company, which are organized and doing business in Rhode Island and Connecticut, respectively.

The application states that the net gas plant investment of the above named companies as at December 31, 1950, aggregated $23,121,936 and that the aggregate net income of the gas properties for the year ending December 31, 1950, amounted to $413,283. The application further states that it is expected that natural gas will be available to all or nearly all of these companies by the fall of 1951.

The application states that, in the event this application for an exemption from the competitive bidding requirements of Rule U-50 under the act is granted by the Commission, NEES will invite interested persons or groups to submit proposals to purchase the gas properties, such proposals to specify the properties to be purchased, the price and other details. NEES will reserve the right to reject any and all proposals. If any proposal is accepted, NEES and such of its operating subsidiaries as may be appropriate will file a declaration seeking this Commission's authorization of the sale of the gas properties.

It is ordered, That any interested person may, not later than April 16, 1951, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on NEES' application for an exemption from the competitive bidding requirements of Rule U-50 under the act with respect to the contemplated sale of the gas properties of its subsidiary companies, stating therein the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted or submitted for consideration at any such hearing. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after April 16, 1951, the Commission may grant the application.

It is further ordered, That notice of said filing of NEES' application and of said opportunity for hearing be given to NEES by registered mail and to all other persons by publication in the FEDERAL REGISTER and by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases under the Public Utility Holding Company Act of 1935.

By the Commission.

[File No. 70-2583]

AMERICAN GAS AND ELECTRIC CO.

SUPPLEMENTAL ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

American Gas and Electric Company ("American Gas"), a registered holding company, having filed a declaration, and amendments thereto, pursuant to the Public Utility Holding Company Act of 1935, particularly sections 6 (a), 7 and 12 (c) thereof, and Rules U-42 and U-50 of the rules and regulations promulgated thereunder, regarding the issuance and sale of not in excess of 339,832 shares of its $10 par value common stock, subject to a rights offering to its present stockholders on the basis of one share of additional stock for each 15 shares of common stock of American Gas presently held, such issuance and sale to have been subject to the competitive bidding requirements of Rule U-50 with respect to the compensation proposed to be paid to underwriters, the price at which such stock was to be offered having been fixed by American Gas prior to the time set for receiving bids at $52.25 per share; and

The Commission by order dated March 19, 1951, having permitted said declaration, as amended, to become effective subject to the condition that the proposed issuance and sale of common stock should not be consummated until the results of competitive bidding pursuant to Rule U-50 should be made a matter of record in these proceedings and a further order entered by the Commission in the light of the record as so completed, and subject to a reservation of jurisdiction with respect to the payment of all fees and expenses incurred or to be incurred in connection with the proposed transactions; and

American Gas having filed a further amendment to its declaration setting forth that as a result of its requests for bids for the purchase of said common stock to be offered at a price of $52.25 per share, two bids were received for said stock, proposing aggregate compensation in the respective amounts of $247,962.02 and $244,565; and

Said amendment to the declaration setting forth that American Gas, having rejected both the above bids, proposes to issue and sell the additional common stock on the rights basis heretofore described at the price of $52.25 per share without any underwriting of the transaction; and

Said declaration also stating that American Gas proposes, if considered necessary or desirable, to stabilize the price of its common stock, for the purpose of facilitating the offering and distribution of the additional common stock to its stockholders, such stabilization transactions, if any, to be effected by the purchase and/or sale of common stock and the purchase of rights on the respective exchanges on which such common stock or rights are traded, and such stabilization activities to result in American Gas' not acquiring a net long position of shares of common stock (including for this purpose the equivalent shares represented by rights acquired) in excess of 10 percent of the additional common stock; and

Said amendment setting forth that in the event all shares of the additional common stock are not subscribed for American Gas may issue and sell such unsubscribed for shares, together with such shares as may be acquired pursuant to stabilization activities, in such manner, upon such terms and conditions, and at such price as the company shall then determine to be in its best interests, and that American Gas will notify this Commission of its intentions in this respect at least 24 hours before any such sale or distribution; and

It appearing to the Commission that the transactions proposed in said amendment are in accordance with the applicable standards of the act, and that no adverse findings are necessary thereunder and it appearing appropriate to permit said declaration, as amended, to become effective subject to the terms and conditions hereinafter stated:

It is ordered, Pursuant to the applicable provisions of the act that said declaration be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions contained in Rule U-24 and subject to a reservation of jurisdiction with respect to the payment of all legal fees and expenses incurred or to be incurred in connection with the proposed transactions, and with respect to the entry by the Commission of such further orders as may be appropriate herein.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 702590]

PUBLIC SERVICE COMPANY OF OKLAHOMA

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

Notice is hereby given that an application has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935 ("act"), by Public Service Company of Oklahoma ("Public Service"), a public utility subsidiary of Central and South West Corporation, a registered holding company. Applicant has designated section 6 (b) of the act and Rule U-50 promulgated thereunder as applicable to the proposed transactions.

Notice is further given that any interested person may, not later than April 13, 1951 at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues, if any, of fact or law raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after April 13, 1951, said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Public Service proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $10,000,000 principal amount of First Mortgage Bonds, Series C, -- percent, due 1981. The interest rate on said bonds (to be a multiple of ⅛ of 1 percent) and the price, exclusive of accrued interest, to be received by the company (to be not less than 97.25 percent nor more than 102.75 percent of the principal amount of said bonds) are to be determined by competitive bidding. The bonds are to be issued under and secured by the company's Indenture of Mortgage dated July 1, 1945, as modified by a Supplemental Indenture dated February 1, 1948, and by a proposed Supplemental Indenture to be dated April 1, 1951. The aggregate principal amount of all bonds of all series that may be outstanding at any one time under the Indenture, as supplemented, would be increased from $35,000,000 to $75,000,000.

The application states that the net proceeds, exclusive of accrued interest, to be received by the company from the sale of the bonds will be used to pay or reimburse the company, in part, for the cost of additions, extensions and improvements made or to be made to the company's facilities.

Total fees and expenses to be paid by Public Service in connection with the proposed transactions are estimated at $44,000, including service company charges of $6,000, Trustee's fees of $8,250 and accountants' fees of $1,500. The fee of independent counsel for underwriters, to be paid by the successful bidders, is stated to be $6,500.

It is represented that the Corporation Commission of the State of Oklahoma has jurisdiction over the proposed transactions and that a copy of the order of that Commission approving the transactions will be supplied by amendment.

Public Service requests that the ten-day publication period for inviting bids for the bonds, as provided in Rule U-50, be shortened to a period of not less than six days. Applicant further requests that the Commission's order herein be issued as soon as practicable and that it become effective upon issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 51-4050; Filed, Apr. 4, 1951; 8:49 a. m.]

J. J. LEDONE CO.

MEMORANDUM OPINION AND ORDER DISMISSING PROCEEDING AND PERMITTING REGISTRATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

In the matter of Joseph J. LeDone doing business as J. J. LeDone Co., 280 Madison Avenue, New York, New York.

This is a proceeding pursuant to section 15 (b) of the Securities Exchange Act of 1934 ("the Exchange Act") to determine whether the application for registration as a broker-dealer of Joseph J. LeDone, doing business as J. J. LeDone Co., should be denied or permitted to become effective.

Applicant by stipulation has agreed that the record herein should include certain affidavits and a report of investigation. He has waived a hearing, a trial examiner's report and oral argument.[1] On the basis of the record we make the following findings.

Applicant was previously registered with this Commission as a broker-dealer. Following the institution of proceedings to determine whether his registration should be revoked, we issued our findings and opinion on January 6, 1950, stating that, by reason of certain specific admitted misrepresentations made to customers, applicant had willfully violated the antifraud provisions of the Securities Act of 1933 and the Exchange Act and rules thereunder. We concluded, however, that the public interest and protection of investors would be adequately served by the withdrawal of the applicant's registration on the condition, inter alia, that he would not file an application for registration as a broker-dealer within 12 months from the date of our Order; and that he would accompany any such application with a statement as to the methods he would use in selling securities to his

[1] On March 1, 1951, with applicant's consent, we ordered that the effective date of his registration be postponed pending a final determination on the question whether registration should be denied.

customers. Such an application was filed on February 5, 1951.

It appears from the record that applicant has not engaged in the securities business since the date of our Order permitting his withdrawal from registration. The affidavit accompanying his application states that he intends to engage in the primary and secondary distribution of securities registered with this Commission under the Securities Act of 1933, or exempt from registration by reason of Regulation A or some other exemption provided by that act. He states, in substance, that when engaged in the distribution of securities, whether registered or exempt from registration, he will furnish to customers only such information as is contained in the prospectuses, offering sheets, or written communications prepared in connection with such offerings; and, further, that he intends to join National Association of Securities Dealers, Inc. ("NASD"), and that any transactions he effects in the "secondary market" will be governed by the equitable principles of trade promulgated by the NASD as they bear upon his relations to customers and the mark-ups he may charge in such transactions.

More particularly, applicant states that it is his intention to engage in the sale of oil royalties. In our revocation proceeding against him, the notice and order for hearing alleged, among other things, that applicant had solicited and induced customers to purchase oil royalties by means of implied representations that the royalties would return sums in excess of the prices paid, when in fact applicant knew or should have known and failed to disclose that there was no reasonable probability, on the basis of reasonable estimates of the value of recoverable oil underlying the tracts covered by the royalties, that the royalties would return such sums. Applicant admitted for purposes of that proceeding, while disclaiming any fraudulent intent, that certain of the oil royalties whose purchase he induced were sold at prices which at the time of sale exceeded the estimated value of the recoverable oil underlying them. Applicant now states in his affidavit that he will obtain estimated recoverables on each oil royalty interest sold by him. We take this to mean that the estimated recoverables will be taken into consideration by him in fixing the prices at which oil royalties will be offered to customers. In this connection we note that applicant has been permanently enjoined by the United States District Court for the Southern District of New York from soliciting or recommending the purchase of oil royalties at a price higher than reasonable estimates of the value of the recoverable oil without disclosing that fact and the amount by which the purchase price exceeds such estimate.[2]

Applicant states generally that in all his dealings he will make no misrepresentations, directly or indirectly, and will conduct himself according to just and equitable principles of trade and the rules of this Commission, and that, before forwarding any literature to his customers, he will submit it to expert counsel and receive an opinion concerning it.

Under all the circumstances we find that it is not necessary in the public interest to deny registration to applicant.

Accordingly, it is ordered, Pursuant to section 15 (b) of the Securities Exchange Act of 1934, that this proceeding be, and it hereby is, dismissed and that the registration of Joseph J. LeDone, doing business as J. J. LeDone Co., as a broker and dealer be, and it hereby is, permitted to become effective.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 51-4048; Filed, Apr. 4, 1951; 8:48 a. m.]

[2] The injunction was based on a stipulation between counsel for this Commission and applicant which provides that it should not be used as the basis for any disciplinary or other administrative proceeding under the Exchange Act.

WILLIAM WILKENS AND BARBARA MARIE LEONTINE WILKENS

In re: Real property, property insurance policies and a claim owned by William Wilkens and another. F-28-7954-B-1.

Vesting Order 13141, dated April 13, 1949, is hereby amended as follows and not otherwise:

a. By deleting subparagraph 1 from said Vesting Order 13141 and substituting therefor the following:

1. That William Wilkens and Barbara Marie Leontine Wilkens nee Freiin von dem Bussche-Ippenburg, each of whose last known address is 7 Caspar-David-Friedrich Str., Dresden, Germany, are the sole heirs of Christian Wilkens, deceased, and are residents of Germany and nationals of a designated enemy country (Germany);

b. By deleting the name "Christian Wilkens" from said Vesting Order 13141 wherever it appears and substituting therefor the names "William Wilkens" and "Barbara Marie Leontine Wilkens nee Freiin von dem Bussche-Ippenburg";

c. By deleting the word "national" from subparagraph 2 of said Vesting Order 13141 and substituting therefor the word "nationals";

d. By deleting subparagraph 3 from said Vesting Order 13141 and substituting therefor the following:

3. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany),

All other provisions of said Vesting Order 13141 and all actions taken by or on behalf of the Attorney General of the United States in reliance thereon, pursuant thereto and under the authority thereof are hereby ratified and confirmed.

Executed at Washington, D. C., on March 30, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

[Vesting Order 17577]

RICHARD KRAUTHEIM

In re: Bank accounts owned by Richard Krautheim, also known as Richard Hermann Guenther Krautheim. F-28-31408.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Richard Krautheim, also known as Richard Hermann Guenther Krautheim, whose last known address is 15 Christoph Krautheimstrasse, Selb, Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the property described as follows:

a. That certain debt or other obligation owing to Richard Krautheim, also known as Richard Hermann Guenther Krautheim, by Union Square Savings Bank, 20 Union Square East, New York 3, New York, arising out of a Savings Account, account number 193796, entitled Richard Krautheim, maintained at the aforesaid bank, and any and all rights to demand, enforce and collect the same, and

b. That certain debt or other obligation of Union Square Savings Bank, 20 Union Square East, New York 3, New York, arising out of a Savings Account, account number 184019, entitled Richard Krautheim in trust for Christoph Krautheim, maintained at the aforesaid bank, and any and all rights to demand, enforce and collect the same,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Richard Krautheim, also known as Richard Hermann Guenther Krautheim, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

[Vesting Order 17576]

ERNEST J. KETELSEN

In re: Bank account owned by Ernest J. Ketelsen. D-28-12986-E-1.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Ernest J. Ketelsen, whose last known address is Alkersum Fohr Island Schleswig Holstein, Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the property described as follows: That certain debt or other obligation of Richmond Hill Savings Bank, 115-20 Jamaica Avenue, Richmond Hill 18, New York, arising out of a savings account, entitled Ernest J. Ketelsen, maintained at the aforesaid bank, and any and all rights to demand, enforce, and collect the same,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of, or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on March 23, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

SOCIAL WORKER (PSYCHIATRIC AND MEDICAL)

1. Section 24.16 *Social Worker (Psychiatric and Medical), GS–185–7–11,* is hereby revoked.

2. The headnote and paragraph (b) of § 24.109 are amended. As amended, § 24.109 reads as follows:

§ 24.109 *Social Worker (Psychiatric and Medical), GS–185–7–13 and GS–102–11–13* — (a) *Educational requirement.* Applicants must have completed 2 years of study in an accredited school of social work, including courses in case work, psychiatric information, medical information, and supervised field work in case work.

(b) *Duties.* With duties varying in responsibility in accordance with the grade, Social Workers (Psychiatric and Medical) are responsible for rendering psychiatric and medical social services or for directing operating medical and psychiatric social work programs in hospitals and clinics, including those of a demonstration nature in which new techniques for treatment and preventive services are tested; or are responsible for the development of program standards in the field of medical or psychiatric social work and for working with State agencies in the development and improvement of psychiatric and medical social services.

(c) *Knowledge and training requisite for performance of duties.* The duties require a knowledge of the field of social case work and psychiatric or medical social work. Knowledge and understanding of the emotional aspects of illness and social components in medical care, facilities and organizations established to provide services of a medical or psychiatric nature, community organization and skill in the application of case work methods and techniques are required. This knowledge can be acquired only through study in an accredited school of social work in which the student concurrently receives competent classroom instruction in the technical principles and practices of social work and supervised practices in the application of these principles and practices, reading is directed, and the student's progress is carefuly evaluated.

only to chosen or selected persons in a community or to purchasers submitting letters commending respondent's publications; (3) that encyclopedias or any other publications the cost of which is regularly included in the purchase price of respondent's research services, loose-leaf supplements, or other books sold in combination with such encyclopedias or publications, are offered "free" or as a gratuity; (4) that only a limited number of encyclopedias, works of reference or books are being offered for any reason or in any way in the community or otherwise; (5) that the regular or prevailing selling price for the encyclopedias, works of reference or other books or publications is or will be, when the books are offered for sale to the general public, greater than the price of the combination offer; (6) that the paper and bindings of the encyclopedias, reference works and other books or publications are of different quality in any respect than those which respondent has for sale and delivery or sells and delivers; (7) that he is a publisher except in connection with the sale of books which he has actually published; (8) that United Acceptance Company or any other collection agency conducted and used by him as a means of collecting sums due or alleged to be due to him is an independent collection agency or that any agency or activity used by him for the purpose of collecting money from purchasers is a bona fide purchaser for value without notice and before maturity of purchasers' conditional sales contracts and notes; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Charles U. Branch doing business as National Surveys, etc., Docket 5632, Jan. 16, 1951]

In the Matter of Charles U. Branch, an Individual

Decision of the Commission and order to file report of compliance. Pursuant to the provisions of the Federal Trade Commission Act, the Federal Trade Commission on January 13, 1949, issued and subsequently served its complaint in this proceeding upon the respondent, Charles U. Branch, an individual, charging him with the use of unfair and deceptive acts and practices in commerce in violation of the provisions of that act. After the issuance of said complaint and the filing of respondent's answer thereto, a hearing was held before a trial examiner of the Commission theretofore designated by it, at which a stipulation was received into the record whereunder it was stipulated and agreed between respondent and Daniel J. Murphy, Chief of the Division of Litigation of the Federal Trade Commission, that the statement of facts therein contained might be taken as the facts of this proceeding in lieu of evidence in support of the charges stated in the complaint or in opposition thereto. On September 12, 1950, the trial examiner filed his initial decision.

The Commission, having reason to believe that the initial decision did not constitute an adequate disposition of this matter, on October 24, 1950, issued and thereafter served upon the parties its order placing this case on the Commission's own docket for review and affording the respondent an opportunity to show cause why said initial decision should not be altered in the manner and to the extent shown in the tentative decision of the Commission attached to said order. Respondent not having appeared in response to the leave to show cause, this proceeding regularly came on for final consideration by the Commission upon the record herein on review; and the Commission, having duly considered the matter and being now fully advised in the premises, finds that this proceeding is in the interest of the public and makes the following findings as to the facts, conclusion drawn therefrom, and order, the same to be in lieu of the initial decision of the trial examiner:

Findings as to the Facts

PARAGRAPH 1. Respondent Charles U. Branch is an individual doing business under the trade names National Surveys and Educational Development Company. During the operation of his business as hereinafter described, and until the latter part of 1946, said respondent also used the trade name United Acceptance Company. Respondent's principal office and place of business is located at 416 West Eighth Street, Los Angeles, California, and he maintains branch offices in Seattle, Washington, Portland, Oregon, and San Diego, California.

PAR. 2. Respondent is now and for several years last past has been engaged in selling books and certain research and other services connected therewith by direct mail advertising and through salesmen or house-to-house canvassers.

PAR. 3. Respondent sells approximately fifty-nine different book items, including different sets of reference books or encyclopedias, and other works of reference in combination with research membership certificates, coupon bonds for quarterly loose-leaf extension service, loose-leaf binders, and various other books such as dictionaries, atlases, medical books, cook books, and books of fiction.

PAR. 4. Under the trade name National Surveys, the respondent sells and distributes in connection with the foregoing reference books: (1) Membership in General Research, Inc., for research service for ten years, in accordance with the terms stated in registered certificates; (2) 10-year Quarterly Supplements, including loose-leaf binders to match the encyclopedia set; and (3) other books in the combination offer selected.

The respondent also sells and distributes (1) the Home University Encyclopedia in twelve volumes; (2) membership in General Research for research service for ten years; (3) the Current International Year Book by Funk and Wagnalls; and (4) other books selected in the combination offer. This combination ranges in price from $99.50 to $139.50, depending upon the particular combination selected.

PAR. 5. In the course and conduct of his business as hereinbefore described, respondent utilizes the services of salesmen and solicitors who canvass individual prospective purchasers located in the State of California and also in two or three of the neighboring Pacific Coast States. When signed orders or contracts are received by such solicitors the orders or contracts are forwarded to the Los Angeles office of respondent and the books called for therein are usually shipped from Los Angeles, California, directly to the purchasers thereof located in the aforesaid States. In some instances the books sold as aforesaid are delivered to said purchasers by the respondent or his representatives.

PAR. 6. Respondent's salesmen or solicitors have used and are now using the following methods and practices, and have made and are now making the following representations in soliciting the sale of and in selling respondent's books:

(1) That the respondent is engaged in making or conducting national educational or other surveys, when such is not the fact.

(2) That purchasers or prospective purchasers, because of their prominence or standing in the community, profession or trade, have been selected to receive or be given "free" or at reduced introductory or low prices, the aforesaid reference books or encyclopedia sets, or other books or services, for the purpose of advertising and promoting the sales thereof, on condition that purchasers or prospective purchasers subscribe to a combination offer and furnish respondent with commendatory letters after receipt and examination of the encyclopedias, works of reference or books when, in fact, such purchasers or prospective purchasers are not especially selected or chosen. The encyclopedias, works of reference or books are not given "free" or at reduced introductory or low prices, and no testimonial or commendatory letters are required.

(3) That the price of certain combination offers covers merely the cost or price of the 10-year research service, 10-year quarterly supplements with binders to match the set, or other book or books included in such offers, and that the aforesaid reference sets or encyclopedias are given "free" to the subscriber, when such is not the fact.

(4) That only a limited number of encyclopedias, works of reference, or books are being offered, for any reason or in any way, in the community or otherwise when, in fact, there is no limitation to the offers.

(5) That the regular or prevailing selling price for the encyclopedias, works

of reference or books, is or will be, when the books are offered for sale to the general public, considerably in excess of the price of the combination offer when, in truth and in fact, such is not the case.

(6) That the paper and bindings composing the encyclopedia, works of reference and books are of the finest quality when, in fact, such is not the case.

(7) The respondent has represented by statements in his stationery and otherwise that he is the publisher of the books which are being offered for sale. Although he has published some books and pamphlets, nevertheless, the principal stock of books sold by him has been works that neither he nor any of his companies publish.

PAR. 7. In the conduct of his financial transactions for the purpose of collecting on the notes executed by purchasers of his books, the respondent has represented and now represents that United Acceptance Company is an independent collection agency and the bona fide purchaser for value without notice and before maturity of subscribers' conditional sales contracts and notes from the National Surveys and the Educational Development Company, when such is not the fact. Use of this name and company was abandoned in the latter part of 1946.

PAR. 8. The use by the respondent of the aforesaid means, methods and practices in offering for sale, sale and distribution of said books and services, in commerce as aforesaid, has had and now has a capacity and tendency to mislead and deceive a substantial portion of the purchasing public into the erroneous and mistaken belief that said representations are true, and to induce a substantial number of the purchasing public, because of such erroneous and mistaken belief, to purchase respondent's said books and services.

PAR. 9. The complaint which issued in this proceeding charges also that respondent has used other representations and practices in connection with the distribution of his books which are alleged to be misleading. Such statements and representations pertain, among other things, to the time within which the publications are to be delivered and to the merits of certain of respondent's books in comparison with reference works available to the public from other sources. The stipulation as to the facts contained in the record does not constitute a sufficient basis for a determination of the issues presented by these additional charges and such charges accordingly are dismissed without prejudice to the right of the Commission to institute a new proceeding or to take such further or other action in the future as may be warranted by the then existing circumstances.

Conclusion. The aforesaid acts and practices of the respondent, as herein found, are all to the prejudice and injury of the public and constitute unfair and deceptive acts and practices in commerce within the intent and meaning of the Federal Trade Commission Act.

It is ordered, That the respondent Charles U. Branch, doing business under the trade names National Surveys, Educational Development Company, or any other name, his agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of encyclopedias, periodic supplements thereto, research service memberships, or any other book or books or publications, do forthwith cease and desist from representing, directly or by implication:

(1) That respondent is engaged in making or conducting national educational or other surveys.

(2) That the prices at which respondent's books, supplements, research services, or other publications are customarily or regularly offered for sale or sold, either singly or in combination with others in the regular course of business, are reduced or introductory prices or are available only to chosen or selected persons in a community or to purchasers submitting letters commending respondent's publications.

(3) That encyclopedias or any other publications the cost of which is regularly included in the purchase price of respondent's research services, loose-leaf supplements, or other books sold in combination with such encylclopedias or publications, are offered "free" or as a gratuity.

(4) That only a limited number of encyclopedias, works of reference or books are being offered for any reason or in any way in the community or otherwise.

(5) That the regular or prevailing selling price for the encylopedias, works of reference or other books or publications is or will be, when the books are offered for sale to the general public, greater than the price of the combination offer.

(6) That the paper and bindings of the encyclopedias, reference works and other books or publications are of different quality in any respect than those which respondent has for sale and delivery or sells and delivers.

(7) That he is a publisher except in connection with the sale of books which he has actually published.

(8) That United Acceptance Company or any other collection agency conducted and used by him as a means of collecting sums due or alleged to be due to him is an independent collection agency or that any agency or activity used by him for the purpose of collecting money from purchasers is a bona fide purchaser for value without notice and before maturity of purchasers' conditional sales contracts and notes.

It is further ordered, That the respondent shall within sixty (60) days after service upon him of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which he has complied with this order.

Issued: January 16, 1951.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

TITLE 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

Subchapter L—Irrigation Projects; Operation and Maintenance

PART 97—FLATHEAD IRRIGATION PROJECT, MONTANA

DELIVERY POINT

MARCH 30, 1951.

On February 28, 1951, there was published in the daily issue of the FEDERAL REGISTER, notice of intention to modify § 97.5 *Delivery point,* of Title 25, Code of Federal Regulations, dealing with the irrigable lands of the Flathead Indian Irrigation Project, Montana. Interested persons were thereby given opportunity to participate in preparing the modification by submitting data or written arguments within 30 days from date of publication of the notice. No objections were submitted. Accordingly § 97.5 is modified as follows, to be effective for the season of 1951 and thereafter until further notice.

Pursuant to section 4 (a) of the Administrative Procedure Act approved June 11, 1946 (Public Law 404—79th Congress); the acts of Congress approved August 1, 1914; June 4, 1920; May 26, 1926; March 7, 1928 (38 Stat. 583, 25 U. S. C. 385; 41 Stat. 751; 44 Stat. 658; 45 Stat. 210, 25 U. S. C. 387) the general regulation dealing with the delivery of water on the Flathead Indian Irrigation Project, Montana, is hereby effective for the calendar year 1951 and thereafter until further notice:

§ 97.5 *Delivery point.* The general rules of the project shall be one delivery point at the upper boundary of the farm unit or allotment, and the project shall maintain the lateral system to that extent. In special cases where, from a cost or topographic standpoint, it is impracticable for the landowner or lessee to irrigate the entire irrigable area of his tract from one delivery point, the project engineer is authorized to establish additional delivery points but in no instance shall more than one delivery point be established and maintained when the landowner or the lessee can at a reasonable expense provide for delivery by the construction of suitable head ditches. Delivery points at and through established structures controlled, operated and maintained by the Project, shall be used by the farm unit operators as the points at which they shall take the water they have ordered irrespective of the irrigation method used. Pumping direct from Project canals and laterals will not be permitted.

(Secs. 1, 3, 36 Stat. 270, 272, as amended; 25 U. S. C. 385)

F. M. HAVERLAND,
Acting Area Director.

[F. R. Doc. 51-4086; Filed, Apr. 5, 1951; 8:45 a. m.]

PART 130—OPERATION AND MAINTENANCE CHARGES

CROW INDIAN IRRIGATION PROJECT, MONTANA

MARCH 30, 1951.

On February 28, 1951, there was published in the daily issue of the FEDERAL REGISTER, notice of intention to modify § 130.12 *Charges,* of Title 25, Code of of Federal Regulations, dealing with irrigable lands within the Crow Indian Reservation, Montana, not subject to the jurisdiction of the several irrigation districts.

Interested persons were thereby given opportunity to participate in preparing the modification by submitting data or written arguments within 30 days from date of publication of the notice. No objections were submitted. Accordingly § 130.12 is modified as follows, to be effective for the season of 1951 and thereafter until further notice.

Pursuant to section 4 (a) of the Administrative Procedure Act approved June 11, 1946, Public Law 404—79th Congress; the acts of Congress approved August 1, 1914; June 4, 1920; May 26, 1926; March 7, 1928 (38 Stat. 583, 25 U. S. C. 385; 41 Stat. 751; 44 Stat. 658; 45 Stat. 210, 25 U. S. C. 387) the charges for operation and maintenance on irrigable lands, not subject to the jurisdiction of the several irrigation districts, and to which water can be delivered either from government constructed and operated irrigation systems or from systems constructed or operated by non-government organizations, are hereby fixed on the several units within the Crow Reservation, for the calendar year 1951 and thereafter until further order, as follows:

§ 130.12 *Charges.* For the assessable area of all lands not subject to the jurisdiction of the several irrigation districts, private ditch companies or water-users association:

Under constructed works on all Government operated units excepting Coburn Ditch, per acre	$2.00
Under constructed works on the Two Leggins Unit, per acre	2.21
Under the Bozeman Trail Unit, per acre	.90
For Indian lands only, under the Lodge Grass Units 1 and 2, Reno and Agency Units, for Willow Creek Storage Works Operation and Maintenance, per acre	.10
For certain tracts of irrigable Trust Patent Indian lands within and benefited by the Two Leggins Drainage District (Contract dated June 29, 1932), per acre	.75

(Secs. 1, 3, 36 Stat. 270, 272, as amended; 25 U. S. C. 385)

F. M. HAVERLAND,
Acting Area Director.

[F. R. Doc. 51-4088; Filed, Apr. 5, 1951; 8:46 a. m.]

PART 130—OPERATION AND MAINTENANCE CHARGES

FLATHEAD INDIAN IRRIGATION PROJECT, MONTANA

MARCH 31, 1951.

On March 1, 1951 there was published in the daily issue of the FEDERAL REGISTER notice of intention to amend §§ 130.16 and 130.17 of Title 25, Code of Federal Regulations, dealing with irrigable lands of the Flathead Indian Irrigation Project not subject to the jurisdiction of the several irrigation districts. Interested persons were thereby given opportunity to participate in preparing the amendments by submitting data or written arguments within 30 days from date of publication of the notice. No objections were submitted. Accordingly §§ 130.16 and 130.17, are amended as follows, to be effective for the season of 1951 and thereafter until further order.

§ 130.16 *Charges, Jocko Division.* An annual minimum charge of $2.19 per acre shall be made against all assessable irrigable lands, not included in the Jocko Valley Irrigation District within the Jocko Division, to which water can be delivered regardless of whether water is used.

The minimum charge when paid shall be credited on the delivery of water at the following acre-foot rates:

(a) For assessable irrigable land receiving water from the Lower Jocko and Revais Creek laterals, water will be delivered in amounts equal to one acre-foot per acre for the entire assessable area of the farm unit, allotment or tract, at the rate of one dollar ($1.00) per acre-foot, and additional water will be delivered at the rate of fifty cents ($0.50) per acre-foot.

(b) For assessable irrigable lands in the Upper Jocko area, receiving water from Finley, East Finley, Agency and Big Knife Creeks, water will be delivered at the rate of seventy-five cents ($0.75) per acre-foot at any time during the irrigation season.

(c) For assessable irrigable lands in the Upper Jocko area receiving water from the Jocko River through the Jocko K lateral system, water will be delivered at the rate of fifty cents ($0.50) per acre-foot at any time during the irrigation season.

§ 130.17 *Charges, Mission Valley and Camas Divisions.* (a) A minimum charge of $2.09 per acre will be made against all assessable irrigable lands, not included in any irrigation district within the Mission Valley Division, to which water can be delivered, regardless of whether water is used.

(b) A minimum charge of $2.27 per acre shall be made against all assessable irrigable lands, not included in any irrigation district within the Camas Division, to which water can be delivered, regardless of whether water is used.

(c) The payment of the minimum charges in paragraphs (a) and (b) of this section shall entitle the farm unit, allotment or tract of land to receive one and one-half (1½) acre-feet of water per assessable irrigable acre or, in cases of shortage, the proportionate per acre share of the available water supply. For water delivered in excess of one and one-half (1½) acre-feet per assessable irrigable acre there shall be an additional charge of one dollar ($1.00) per acre-foot.

The foregoing amendments of §§ 130.16 and 130.17 of the non-district operation assessment rate order for the season of 1950 are to become effective for the season of 1951 and continue in effect until further notice.

(Secs. 1, 3, 36 Stat. 270, 272; as amended; 25 U. S. C. 385)

F. M. HAVERLAND,
Acting Area Director.

[F. R. Doc. 51-4087; Filed, Apr. 5, 1951; 8:45 a. m.]

Subchapter Y—Trading With Indians

PART 277—TRADERS ON NAVAJO, ZUNI, AND HOPI RESERVATIONS

LICENSES AND LICENSEES

Sections 277.8, 277.10, and 277.21 are amended to read as follows:

§ 277.8 *Licensee; owner of trading post.* A licensee of a trading post shall be the owner of the business. He shall be responsible to the Commissioner of Indian Affairs for the entire operation of the trading post, including acts of commission or omission of his employees, and for reports required by the Commissioner of Indian Affairs.

§ 277.10 *License period.* Licenses to trade shall not be issued unless the proposed licensee has a right to the use of the land on which the business is to be conducted. The license period shall correspond to the period of the permit or lease held by the licensee on restricted Indian land. The license period in no event shall exceed 25 years. Licenses for periods not to exceed 10 years may be issued by the area director.

§ 277.21 *License fee.* (a) An annual license fee of $50.00 shall be paid in advance by all licensed traders who are not members of the Navajo, Zuni, or Hopi Tribes. The area director shall determine the amount of such license fee to be paid by licensees who are members of the Navajo, Zuni, or Hopi Tribes. No such annual license fee shall exceed $50.00. All fees shall be deposited to the credit of the account "Indian Moneys, Proceeds of Labor, Navajo Agency (or Hopi or United Pueblos Agency)" and may be expended by the administrative official in the enforcement of the regulations in this part.

(b) On the Navajo Reservation, this license fee shall be paid on the basis of a calendar year regardless of any change in ownership of the business covered by the license unless the license be canceled for cause. When a license is issued following the cancellation of a license for cause or when a new business is established after the beginning of a calendar year, the license fee shall be determined on a quarterly basis, but the quarterly fee of $12.50 shall be charged also for a fraction of any quarter of a year. A transfer fee of $5.00 shall be collected whenever an unexpired license is transferred or assigned during a calendar year to a new owner of a trader's business.

(c) Deposits made by a temporary licensee under this part as provided by § 277.12 shall be refunded in the event a license is not issued unless the temporary licensee conducts a trading business during the period of temporary operation in which event the temporary licensee shall be charged a fee on a quarterly basis for the period during which the business was conducted and the balance of the deposit shall be refunded.

(Sec. 5, 19 Stat. 200, sec. 1, 31 Stat. 1066, as amended; 25 U. S. C. 261, 262)

OSCAR L. CHAPMAN,
Secretary of the Interior.

MARCH 30, 1951.

[F. R. Doc. 51-4089; Filed, Apr. 5, 1951; 8:46 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 3, Amdt. 11]

PART 60—AIR TRAFFIC RULES

STANDARD INSTRUMENT APPROACH PROCEDURES

Under sections 205 and 601 of the Civil Aeronautics Act of 1938, as amended, the Civil Aeronautics Board is empowered to delegate to the Administrator of Civil Aeronautics the authority to prescribe rules, regulations, and standards which promote safety of flight in air commerce, and the Administrator of Civil Aeronautics is empowered to make and amend such general or special rules, regulations, and procedures as he deems necessary to exercise and perform his powers and duties under the act. Under § 60.46 of the Civil Air Regulations the Civil Aeronautics Board has authorized the Administrator of Civil Aeronautics to prescribe standard instrument approach procedures.

Acting pursuant to the foregoing statutes and regulations, standard instrument approach procedures were prescribed. Those procedures are hereby amended. This amendment is made effective without delay, in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

1. The low frequency range procedures prescribed in § 60.46–4 are amended to read in part:

LOW FREQUENCY RANGE PROCEDURES

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 3, Amdt. 11]

PART 60—AIR TRAFFIC RULES

STANDARD INSTRUMENT APPROACH PROCEDURES

Under sections 205 and 601 of the Civil Aeronautics Act of 1938, as amended, the Civil Aeronautics Board is empowered to delegate to the Administrator of Civil Aeronautics the authority to prescribe rules, regulations, and standards which promote safety of flight in air commerce, and the Administrator of Civil Aeronautics is empowered to make and amend such general or special rules, regulations, and procedures as he deems necessary to exercise and perform his powers and duties under the act. Under § 60.46 of the Civil Air Regulations the Civil Aeronautics Board has authorized the Administrator of Civil Aeronautics to prescribe standard instrument approach procedures.

Acting pursuant to the foregoing statutes and regulations, standard instrument approach procedures were prescribed. Those procedures are hereby amended. This amendment is made effective without delay, in order to promote safety of the flying public. Co pliance with the notice, procedures, a effective date provisions of section 4 the Adminis rative Procedure Act wo be impracticable and contrary to public interest, and therefore is required.

1. The low frequency range procedu prescribed in § 60.46–4 are amended read in part:

Subchapter B—Economic Regulations

[Regs., Serial No. ER-161]

PART 291—CLASSIFICATION AND EXEMPTION OF IRREGULAR AIR CARRIERS

OPERATIONAL LIMITATIONS ON EXERCISE OF TEMPORARY EXEMPTION BY LARGE IRREGULAR CARRIERS; EXTENSION OF EFFECTIVE DATE

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 2d day of April 1951.

By amendment No. 1 to Part 291, adopted March 2, 1951, and effective on April 6, 1951, the Board modified the operational limitations on the exercise of the temporary exemption to engage in air transportation granted to the Large Irregular Carriers pursuant to Part 291 and section 416 (b) of the Civil Aeronautics Act. These operational limitations relate to the number, frequency and regularity of flights conducted by such Large Irregular Carriers.

Since the adoption of Amendment No. 1 to Part 291 on March 2, 1951, the Senate Small Business Committee has requested that the effective date of Amendment No. 1 be postponed in order that it may study the effect and impact of such amendment on the Large Irregular Carriers. In view of this request the Board has concluded that it should postpone the effective date of Amendment No. 1 until May 6, 1951.

For the reasons stated above notice and public procedures hereon are impracticable. Since no additional bur-

den is imposed on any person, the postponement may be made effective without prior notice.

The Civil Aeronautics Board hereby changes the effective date of Amendment No. 1 to Part 291 from April 6, 1951, to May 6, 1951.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies secs. 401, 416, 52 Stat. 987, 1004; 49 U. S. C. 481, 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter B—Claims and Accounts

PART 536—CLAIMS AGAINST THE UNITED STATES

CLAIMS COGNIZABLE UNDER FEDERAL TORT CLAIMS ACT

In § 536.29, the section heading and paragraphs (c) (2), (e), and (1) (3) and (4) are amended to read as follows:

§ 536.29 *Claims cognizable under Federal Tort Claims Act.* • • •

(c) *Acts or omissions.* • • •

(2) *Scope of employment.* Acts of omissions of military personnel and civilian employees may give rise to claims payable under these regulations only if such acts or omissions occur while such military personnel or civilian employees are acting within the scope of their employment. The question whether activities of military personnel and civilian employees in the course of which such acts or omissions may occur are within the scope of employment must be determined in accordance with the law of the place where the acts or omissions occurred. These activities of military personnel and civilian employees ordinarily are within the scope of employment if the performance thereof is directed, or if of a kind the performance of which is expressly or impliedly authorized, or if the purpose is, at least in part, to serve the Government. In determining whether conduct, although not expressly authorized, is nevertheless within the scope of employment, consideration may be given to all the attendant facts and circumstances, including the time, place, and purpose of the activity; whether the activity was for the furtherance of the general interests of the Government; whether the activity is usual for personnel of the grade and classification involved or reasonably to be expected of such personnel, and whether the instrumentality from which the damage or injury resulted was owned or furnished by the Government.

A slight deviation as to time or place ordinarily will not constitute a departure from scope of employment; such a deviation, to have legal effect, usually must be a material deviation.

• • • • •

(e) *Claims of subrogors, subrogees, and insureds.* (1) Settlement of claims not exceeding $1,000 will be made solely with the subrogated insurer in cases of damage, loss, destruction, injury, or death wholly compensated for by the insurance. Where only partial subrogation exists and the combined claims of the insured and insurer do not exceed $1,000, settlement will be made with the insured, the insurer, or with both the insured and insurer. When one claim has been filed in the names of both the insured and insurer and has been signed by both, the settlement will be joint. Payment of the entire amount approved will be made by one check drawn payable to both and transmitted to the insurer. When either party files individually, separate settlement will be made with that party, whether insured or insurer, to the extent of its respective interest. In support of all claims of insured's, there should be submitted, in triplicate, a written statement, signed by the insured and bearing the same date as the claim, showing the name, address, and policy number of the insurer, whether a claim for the same damage, loss, destruction, injury, or death also has been filed or will be filed with the insurer, the amount thereof, the type and amount of insurance carried by the insured, and whether the insurer has paid or is expected to pay the claim in whole or in specified part. In support of all claims of insurers, there should be submited, in triplicate, an affidavit or other appropriate documentary evidence that payment in the same or a larger amount than that claimed has been made to the insured or on his behalf.

(2) For jurisdictional amount purposes, the claims of the insured and insurer represent merely separable interests in a single claim which interests in the aggregate must not exceed $1,000. See paragraph (b) of this section.

(3) The general principles set forth in subparagraphs (1) and (2) above, with respect to subrogation arising from insurance contracts, are applicable to all cases of subrogation. Information comparable to that indicated in subparagraph (1) above should be submitted in connection with subrogation cases which do not involve insurance.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 7, Amdt. 2]

CPR 7—RETAIL CEILING PRICES FOR CERTAIN CONSUMER GOODS

ADDITIONAL CATEGORIES, LIST DATE, FILING OF CHARTS, AND PERMITTED INCREASES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization General Order No. 2 (16 F. R. 738), this Amendment 2 to Ceiling Price Regulation 7 (16 F. R. 1872) is hereby issued.

STATEMENT OF CONSIDERATIONS

The accompanying amendment to Ceiling Price Regulation 7 adds various categories of articles to the coverage of that Regulation. The categories cover musical instruments, radio and television sets, phonographs and records; housewares, notions, luggage, sporting goods; and silverware, chinaware, glassware, jewelry, watches and clocks. The economic considerations leading to the promulgation of the regulation are equally applicable to the regulation with this extended coverage; those considerations are set forth in the statement of considerations accompanying Ceiling Price Regulation 7 issued February 27, 1951.

Not only will many retailers be required to file supplemental charts, but in addition, some retailers who formerly were not covered by the regulation or who had an option to remain under the General Ceiling Price Regulation because their volume of sales would have been, without the new categories, less than $20,000, will now be required to file "list" date pricing charts under the regulation. The "list" date for the new categories is March 31, 1951.

The new categories added to Ceiling Price Regulation 7 by this amendment bring under its coverage an estimated additional 76,000 retail stores; the extended coverage adds approximately 7 billion dollars to the annual dollar volume of retail sales governed by the regulation.

Under various OPS regulations increases in ceiling prices may be provided for manufacturers and wholesalers, all or part of which retailers may be permitted to pass on to their purchasers. This amendment adds to the regulation a provision which requires the retailer to determine his ceiling price on the basis of the basic price and permits him to add to his price so determined the portion of the increase granted his supplier which the regulation granting the increase designates as a "permitted increase."

AMENDATORY PROVISIONS

Ceiling Price Regulation 7 is hereby amended in the following respects:

1. In the Introduction, the sentence "The list date under this regulation is February 24, 1951." is amended to read:

"The list date under this regulation is February 24, 1951, except where another list date is specified in section 13 (b)."

2. Section 5 (a) is amended to read as follows:

(a) You may begin to use the applicable pricing rules after you file your chart, but you must begin to use the rules not later than April 30, 1951 (unless you are a mail order establishment subject to paragraph (b) of this section). Where under the provisions of section 11 you file a part of your chart separately, you may begin using the rules for pricing the categories in any such part after you have filed it.

3. Section 11 is amended by inserting after the heading "Filing of charts" the letter "(a)" and by adding new paragraphs (b) and (c) to read as follows:

(b) You may at your option prepare a separate list date chart for Categories 860-895; 901-924 and 940-985, and file that as a supplemental chart instead of including those categories as part of the initial list date chart prepared in accordance with this regulation. If you file a supplemental chart, you must prepare it in accordance with this regulation, numbering the pages as if they followed the last page of your original chart. One copy of this supplemental chart must be kept with your original list date chart for your use and for inspection by the OPS, and the other must be filed with your OPS office [2] or on before April 30, 1951.

(c) If, by the addition to this regulation of Categories 860-895; 901-924; and 940-985 you are a seller subject to this regulation, you must prepare two copies of a list date pricing chart in accordance with this regulation. One copy of the chart must be kept for your use and for inspection by the OPS and the other must be filed with your OPS office [1] on or before April 30, 1951.

4. Footnote 2 is amended to read as follows:

Your OPS office is the District Office having jurisdiction over the area in which your store is located. If, however, you are a mail order establishment or the type of chain which under this regulation is a separate seller, your OPS office is the Distribution Price Branch, Office of Price Stabilization, Washington 25, D. C.

5. Section 13 (b) is amended to read as follows:

(b) Your list date or list dates. Your list date is February 24, 1951, except:

(1) it is March 31, 1951, for Categories 860 to 895; 901 to 924; and 940 to 985;

(2) it is March 31, 1951, for all categories if after April 10, 1951, you first become subject to or first elect to become subject to the regulation.

In the event you were not open for business on the appropriate list date, your list date is the most recent date before that day on which you were open for business and offered for sale any article covered by the regulation.

6. Section 16 (a) is amended by substituting the phrase "the list date" for "February 24, 1951."

7. A new section, Section 30a, is added as follows:

SEC. 30a. *"Permitted increase."* Various OPS regulations may provide for increases in your supplier's ceiling prices. Some of these regulations may require your supplier to break down his price to you into two parts, the first part being the basic price and the second part a "permitted increase" (that is, the portion of the increase granted your supplier which the regulation allows you to pass on to the consumer). You must use the basic price (without adding the "permitted increase") to find your net cost for determining your ceiling price under this regulation. Then you may add the amount designated as a "permitted increase" to your ceiling price as otherwise determined under this regulation.

8. Appendix B is amended as follows:

(a) In paragraph (C) amend the title to read "Categories of Consumer Durable Goods and Related Articles."

(b) In paragraph (C) following the text for category 854, add the following categories:

(5) Categories of Musical Instruments

Category 860—Pianos, Electric Organs and Electronic Attachments for Pianos or Organs

This is a "specific" category.

Category 861—Other Musical Instruments

This category includes all musical instruments other than those in Category 860. Including but not limited to the following:

Strings
- Violins
- Violas
- 'Cellos
- Double Basses
- Mandolin
- Guitar

Wood Winds
- Clarinets
- Saxophones
- Oboes
- Bassoons
- English Horns
- Flutes
- Piccolos

Brasses
- Trumpets
- Cornets
- Trombones
- Baritones
- Basses
- Sousaphones
- French Horns

Percussion
- Drums (kettle, bass, and snare)
- Drummers' accessories such as gourds, cymbals, and maracas

Miscellaneous
- Harps
- Marimbas
- Xylophones

(6) Radios

Category 871—Table Radios
Category 872—Portable Radios
Category 873—Table Radio-Phonograph Combinations
Category 874—Amateur or Communications Type Short-Wave Table Radios
Category 875—Console and Consolette Radios
Category 876—Console Radio-Phonograph Combinations, with a net cost of less than $225
Category 877—All types of radios and radio-phonograph combinations (custom cabinet, etc.) with a net cost of $225 or more
Category 878—Radio Replacement Parts

(7) Television Sets and Television Accessories

Category 880—Table Television Sets
Category 881—Console Television Sets up to and Including 16" Picture Tube
Category 882—Console Television Sets, 17" Picture Tube and Larger
Category 883—All Television Combinations
Examples: Television-Radio Combinations
Television-Radio-Phonograph Combinations
Category 884—Television Antennae, Boosters, Accessories, Replacement Parts

(8) Phonographs and Recorders

Combinations are covered by categories 873, 876, 877, and 883.

Category 890—Record Player Attachments with a net cost of less than $17
Category 891—Record Player Attachments with a net cost of $17 and over
Category 892—Portable Phonographs and Separate Phonographs
Category 893—Magnetic Recorders, Tape or Wire (not including office equipment for recording correspondence)
Category 894—Phonograph Records (all types)
Category 895—Tape and Wire for Magnetic Recording

(9) Housewares

Categories 901 to 908 include certain housewares categories similar to those found in the housewares department of a department store or the housewares section of a hardware store. Kitchen furniture which is covered by categories 706 and 706A is not included in these categories. Category 908, a single category, covers 20 classifications of housewares.

Category 901—Household Cleaning Brushes

This category includes all types of household cleaning brushes. Excluded are personal brushes such as toilet brushes, hair brushes, etc. Examples of the articles included are:

Scrubbing brushes	Bathtub brushes
Vegetable brushes	Pastry brushes
Sink brushes	Tumbler brushes
Radiator brushes	

Category 902—Fireplace Equipment

Examples of the articles included are:

Mantels	Fireplace shovels
Screens	Artificial fireplaces
Andirons	Electric logs, etc.
Pokers	

Category 903—Household Thermometers

This category includes all types of household thermometers. Excluded from this category are clinical thermometers. Examples of the articles included are:

Oven thermometers
Outdoor thermometers
Room thermometers
Meat thermometers
Candy thermometers
Deep fat thermometers, etc.

Category 904—Kitchen Cutlery

This category includes all types of kitchen cutlery. Excluded from this category is silver cutlery which is covered by category 940. Examples of the articles included are:

Kitchen forks	Steak sets
Kitchen knives	Kitchen shears
Slicers	Kitchen saws
Carving sets and carving aids	Food choppers
Knife and fork sets	Poultry shears
	Boning shears

Category 905—Power Lawn Mowers

This is a "specific category." Hand lawn mowers (not power driven) are covered by category 908.

Category 906—Small Electrical (Houseware) Appliances

This category includes all types of small electrical houseware appliances. Excluded are large major appliances, such as refrigerators.

Examples of the articles included are:

Electric toasters	Electric roasters
Electric mixers	Electric portable heaters
Electric grills	
Electric waffle irons	Electric bottle warmers
Electric irons (including steam iron and travel irons)	Electric curling irons
	Electric hair dryers
Electric heating pads	Electric casseroles
Electric coffeemakers	Electric chafing dishes
Electric fans	
Electric ventilators	Electric corn poppers
Electric juicers	Electric egg cookers
Electric sun lamps	Electric teakettles, etc.
Electric broilers	
Electric hot plates	

Category 907—Utility Cabinets (Movable)

This category covers movable utility cabinets. Excluded are composition wardrobes which are covered by category 919. Examples of the articles included are:

Steel wardrobes and chests
Steel shelf cabinets
Broom cabinets
Wall cabinets
Base cabinets, etc.

Category 908—General Housewares

The following 20 classifications of housewares are all covered by this one category. Items not to be included in this category are noted following each classification.

1. Bathroom Accessories

Not included in Bathroom Accessories are: shower curtains and matching draperies covered by category 506B; bathroom rugs, toilet lid covers and lid cover sets covered by categories 803A and 503; and bathroom stools and chairs covered by category 716.

Examples of the articles included in Bathroom Accessories are:

Shelves	Glass rods
Towel bars	Bathroom tumblers
Soap dishes	Bathroom scales
Racks	Hampers, etc.

2. Door Chimes

3. Cleansing Equipment

Not included in Cleansing Equipment are: dish cloths covered by category 503; and household brushes covered by category 901.

Examples of the articles included in Cleansing Equipment are:

Brooms	Sponges
Mops	Carpet sweepers
Dust pans	Dusters, etc.

4. Cleaning Supplies

Examples of the articles included are:

Waxes	Deodorizers
Polishes	Powders
Cleaners	Steel wool
Cleansers	Cleansing cloth, etc.

5. Cooking Utensils (pots and pans)

Examples of the articles included are:
Aluminum ware cooking utensils
Cast iron ware cooking utensils
Tin ware cooking utensils
Copper ware cooking utensils
Glass ware cooking utensils
Enamel ware cooking utensils
Stainless steel cooking utensils
Plastic cooking utensils, etc.

6. Food Bags and Covers

Examples of the articles included are:

Bowl covers	Food bags
Bowl cover sets	Appliance covers, etc.

7. Food Preparation Devices

8. Kitchen Aids and Gadgets and Kitchen Tools

Examples of the articles included are:

Cookie cutters	Cheese knife
Corks	Ice picks
Moulds	Ice crushers
Cake turner	Beaters
Can opener	Bottle openers
Strainers	Shredders
Spatulas	Salt and pepper shakers
Measuring cup	
Basters	Tea balls
Peelers	Nut crackers
Mashers	Peppermills
Cork screws	Knife sharpeners
Ladles	Kitchen scales
Sifters	Ice-cream dippers
Slicers	Butter churns
Choppers	Food mills
Juicers	Kitchen tools, etc.
Grapefruit knife	

9. Galvanized Ware

Examples of the articles included are:

Ash cans	Water pails
Garbage cans	Wash boilers, etc.
Washtubs	

10. Garden Equipment

Not included in Garden Equipment are power lawn mowers which are covered by category 905.

Examples of the articles included in Garden Equipment are:

Weeders	Pruning shears
Rakes	Hand lawn mowers
Spades	Garden hose
Garden shovels	Sprinklers, etc.
Garden hoes	

11. Grocery Carts

12. Miscellaneous Household Equipment, Window Ventilators, Radiator Shields

Examples of the articles included are:

Humidifiers	Ventilators
Air Moistener pans	Trays
Radiators shields	Waste baskets, etc.

13. Kitchen Glassware and Pottery (including plastics)

Examples of the articles included are:

Waterbottles	Bowls and Bowl sets
Butterdishes	
Cocktail shakers	Coffeemakers (not electric)
Range sets	
Servers	Refrigerator sets, etc.
Casseroles	

14. Miscellaneous Kitchen Utensils

Examples of the articles included are:

Basins	Percolators
Double boilers	Pitchers
Colanders	Ovens
Teakettles and teapots	Canning accessories, etc.

15. Kitchen Wooden Ware (plain)

Examples of the articles included are:

Rolling pins	Spoons
Knife and fork boxes	Potato mashers
	Cutting or bread boards, etc.
Knife racks	
Pastry boards	

16. Laundry Equipment

Examples of the articles included are:

Outdoor dryers	Washboards
Indoor dryers	Wringers
Clothes baskets	Laundry bags
Clothes props	Ironing boards
Clothes pins	Sleeve boards
Clothes pin bags	Pads and covers
Curtain stretchers	Ladders, etc.

17. Oilcloth and Paper Household Needs

Examples of the articles included are:

Oil cloth	Paper bags
Chair pads	Paper doilies
Paper napkins	Paper drapes, etc.

18. Pantry Ware

Examples of the articles included are:

Cake box	Cookie jars
Canister sets	Vegetable bins
Bread boxes	Dust pans
Step-on cans	Stove mats, etc.
Floor cans	

19. Picnic Supplies

Examples of the articles included are:

Picnic jugs	Paper plates
Picnic grills	Paper cups
Picnic baskets	Vacuum bottles
Fitted picnic suit cases	

20. Rubber Kitchen Ware and Rubber Covered Wire Goods

All kinds of rubber mats and rubber implements for sink and kitchen.
Rubber covered wire goods.

(10) Categories of Notions

Category 915—Sanitary Napkins, Tampons, and Facial Tissue

Category 916—Threads and Similar Items

Examples of articles included are:

Mercerized threads	Mending and Darning Cottons
Sewing Silks	
Cottons	Buttonhole Twists
Basting	Carpet Threads

Category 917—Hair Goods

Examples of articles included are:

Make-up capes	Slumber caps
Shower caps	Hair nets
Curlers and clips	Comb cleaners
Curling irons	Bobbie Pins
Barrettes	Metallic Braids
Wire and bone hair pins	Wigs—Toupees
	Hair Rats and Switches
Combs of all types	Hair Braids
Wave caps	

Category 918—Staple and Novelty Buttons and Buckles

This category includes all buttons and buckles.

Category 919—General Notions

The following 14 classifications of notions are covered by this one category. Items not to be included in this category are noted following each classification.

1. Bathing Accessories

Examples of the articles included are:

Bathing belts
Rubber flowers
Rubber and wooden beach sandals
Cosmetic cases

2. Closet Shop Accessories

Examples of the articles included are:

Garment bags	Glove boxes
Shoe bags	Jewelry boxes
Laundry bags	Handkerchief boxes
Hat boxes	Shelf edging
Blanket boxes	Shoe, mittens, hat stands
Blanket bags	
Paper or plastic covered utility shoe chests	Pants, coat, suit, dress, skirt and blouse hangers
Composition wardrobes	Shoe racks
Hose boxes	Tie racks

3. Elastics and garters

Examples of the articles included are:

Elastic by yard (all widths)
Round garters
Girdle supporters
Hank elastic

4. Household Notions

Examples of the articles included are:

Rubber gloves
Mending cement and glue
Pressure adhesive tapes
Moth preventatives

5. Identification Tapes

This category includes all identification tapes, such as embroidered or printed name tape, tape with initials, etc.

6. Notion Novelties

Examples of articles included are:

Powder puffs	Carry-alls
Sachets	Card table covers
Wooden novelties	Plastic table covers

7. Sanitary Goods

This category does not include the following items covered by Category 204: girdles, brassieres, garter belts, sanitary aprons, and sanitary belts and supports; nor the following items covered by Category 915: sanitary napkins, tampons, facial tissue.

Examples of articles included are:

Dress shields	Rubber bloomers
Back shields	Sanitary petticoats
Chafe guards	Sanitary step-ins

8. Sewing Boxes and Stands

Examples of articles included are:

Spool holders
Knitting boxes and bags
Sewing kits

9. Sewing and gift cutlery sets

This category does not include poultry, boning and other shears which are included in Category 904.

Examples of articles included are:

All scissors, shears
Manicure scissors
Pedicure scissors
Baby scissors
Scissor sets for sewing uses
Scissor sets for manicure uses

10. Replacement Sewing Needs

Examples of articles included are:

Collars	Leather patches
Cuffs	Knitted cuffs
Neck bands	Press on mending tapes
Pockets	

11. Sewing Supplies

Examples of articles included are:

Snaps	Pins
Fasteners by cards or yard; hook and eye tape	Darners
	Tape measures
	Press weights
Carpet Binding	Collar supports
Blanket Binding	Shoulder pads
Belting	Pin cushions
Bias tape	Brassiere straps & replacement parts
Skirt markers	
Featherboning	Other small sewing needs
Seam binding	
Thimbles	
Needles	

12. Shoe Findings and Accessories

Examples of articles included are:

Shoelaces
Polishes
Dyes
Suede Brushes
Shoe trees (Men's and Women's)
Shoe polishing brushes and cloths
Shoe horns
Boot calks

13. Dryer forms

This category includes all sweater, glove and hose dryers.

14. Zippers and other slide fasteners

(11) Luggage and Sporting Goods

Category 920—Luggage and Related Items

Included are men's and women's hard-side and soft-side luggage and other related articles made of plastic, canvas, leather, fiber, nylon, etc. Not included are golf bags included in category 921.

Examples of the articles included are:

Animal carriers	Kit bags
Attache cases	Laundry cases
Binocular and Camera cases	Lockers
	Nurses bags
Boston bags	One suiters
Bottle cases	Overnight and weekend bags and cases
Brief bags and cases	
Club bags	Physicians' bags
Companion bags	Pullman cases
Duffle bags and cases	Sample cases
	Tourists' cases
Fitted cases	Traincases
Fiber cases	Trunks
Fishing rod cases	Two-suiters
Gladstone bags	Wardrobe bags and cases
Gun cases	
Hat and shoe bags	Zipper envelopes
Jackknife cases	

Category 921—Sporting Goods

This sporting goods category does not include the following: golf and tennis balls, which are included in category 922; bicycles which are included in category 923; all athletic clothing, shoes, and accessories which are included in categories 351 and 409.

Examples of articles included are:

Archery equipment
Badminton equipment
Bags (caddy, golf, punching, etc.)
Baseball equipment (bats, balls, masks, etc.)
Basket balls
Boxing, wrestling and striking bag equipment
Croquet sets and equipment
Fishing tackle
Fishing rods
Other fishing accessories
Football equipment
Golf clubs
Handball equipment
Helmets (athletic)
Hockey equipment
LaCross equipment
Shuffle board equipment
Shuttle cock
Skates (ice and roller)
Ski equipment (skis, poles, binding, etc.)
Snowshoes
Soccer balls
Softball equipment (balls, bats and masks)
Squash equipment
Surf boards
Table tennis equipment
Tennis rackets
Toboggans, bob-sleds and equipment
Volley ball equipment

Category 922—Golf and Tennis Balls

This is a "specific" category.

Category 923—Bicycles

This is a "specific" category.

Category 924—Bicycle Accessories

Examples of articles included are:

Horns
Bells
Lights, etc.

(12) Silverware, China and Glassware

Category 940—Sterling Flatware

Examples of articles included are:

Cutlery (sets and separate pieces)
Flatware (sets and individual pieces)
Serving pieces

Category 941—Plated Flatware

Examples of articles included are:

Flatware (individual pieces or sets)
Serving pieces
Cutlery with plated blades or handles (sets or separate pieces)

Category 942—Sterling or Plated Hollowware

This category includes articles of hollowware which are sterling silver, silver-plated, chromium plated, or plated with other materials.

Examples of articles included are:

Butter dishes
Vegetable dishes
Water pitchers
Cheese and cracker dishes
Casseroles
Ice buckets
Cocktail shakers
Salad sets
Salt and pepper shakers
Bowls
Candle holders
Candelabras
Trays and platters
Sugar and creamers

Category 943—Silverware Accessory Items

Examples of articles included are:

Silverware chests
Covered bags for silverware
Silverware Polishing Cloths

Category 944—Chinaware, Earthenware and Plastic Sets

Examples of articles included are:

China and earthenware and plastic sets for table use.

Category 945—Chinaware, Earthenware and Plastic, Open Stock or Individual Pieces

This category includes open stock and individual pieces of china, earthenware and plastic for table use.

Category 946—China and Earthernware Giftware

This category includes individual decorative items made of china and earthenware.

Examples of articles included are:

Vases	Ash trays
Figurines	Artificial fruit
Cigarette sets	Plaques
Bowls	

Category 950—Machine-made Glassware Sets and Individual Glass Pieces

This category does not include glass cooking ware which is covered by category 908.

Examples of articles included are:

Tumblers
Drinkware sets or separate pieces
Salt and pepper sets
Dinner, bridge and luncheon sets
Console sets and individual pieces of these sets.

Category 951—Handmade Glassware Sets and Individual Glass Pieces

This category includes hand-pressed, hand-blown and hand-molded glassware sets and individual glass pieces; and hand-cut, hand-etched, hand-painted and engraved stemware, drinkware items and individual pieces.

(13) Jewelry, Watches, and Clocks

NOTE: Categories 970–985 do not include articles described here as "precious jewelry".

"Precious jewelry" for this purpose means (1) any jewelry a component part of which is a "precious stone"; or (2) a mounting into which a "precious stone" is set when the value of such precious stone exceeds the value of the total of the other component parts of the finished article.

A "precious stone" for this purpose means a natural or cultured pearl, diamond, ruby, sapphire, or emerald. Any other genuine stone, including semi-precious stones, shall be deemed a "precious stone" when the selling price for the stone by the cutter, wholesale dealer, or importer is $25.00 or more.

Category 970—Precious Metal Jewelry (Gold, platinum, etc.)

This precious metal jewelry category does not include sterling silver jewelry which is included in Category 971.

Examples of articles included are:

Rings	Brooches
Bracelets	Lavalieres
Necklaces	Men's jewelry
Earrings	Charms
Lockets	Emblem Pins
Pendants	

Category 971—Costume Jewelry

This category includes articles which are gold filled or gold or silver plated, or are made of base metals.

Examples of articles which are included are:

Rings	Lavalieres
Bracelets	Charms
Necklaces	Emblem Pins
Earrings	Simulated pearl
Lockets	jewelry
Pendants	Bead jewelry
Brooches	Plastic jewelry

Category 972—Ring Mountings and Mountings for Other Jewelry Items

This category includes all mountings for jewelry made from gold, platinum, silver, or any other metal. (Note the exception in the headnote preceding section 970.)

Category 973—Wedding Rings

This category includes all wedding rings made of gold, platinum, silver, or any other metal.

Category 974—Religious Jewelry

Category 975—Watch attachments (Precious Metal)

This category includes articles made of gold, platinum and sterling silver.

Examples of articles included are:

Watch Bands
Watch Fobs
Watch Charms

Category 976—Watch Attachments (Other Than Precious Metal)

This category includes gold-filled, gold-plated, silver-plated, base metal, leather, plastic and any other watch attachments. Not included are watch attachments made of precious metals which are included in Category 975.

Examples of articles included are:

Watch Fobs
Watch Charms
Watch Bands

Category 977—Precious Metal Unfitted Compacts, Cigarette Cases and Miscellaneous Cases

This category includes unfitted compacts, cigarette cases and miscellaneous cases made of gold, sterling silver, platinum and other precious metals.

Examples of articles included are:

Compacts (unfitted)	Match cases
Cigarette cases	Pill boxes
Cigar cases	Snuff boxes

Category 978—Unfitted Compacts, Cigarette Cases and Miscellaneous Cases (Other Than Precious Metal)

This category includes gold-filled, gold-plated, silver-plated unfitted compacts, cigarette cases, and miscellaneous cases, and all such cases made of any base metal, plastic, wood or any other material. Excluded from this category are such cases made of precious metal which are included in Category 977.

Examples of articles included are:

Compacts (unfitted)	Snuff boxes
Cigarette cases	Match cases
	Pill boxes

Category 979—Dresser Sets and Military Sets (Precious Metal)

This category includes dresser sets and military sets made of gold, sterling silver and platinum. Excluded are infants' sets which are covered by Category 310.

Category 980—Dresser Sets and Military Sets (Other Than Precious Metal)

This category includes dresser sets and military sets made of any material other than precious metals. Excluded are the articles covered by Category 979; also excluded are infants' sets, which are covered by Category 310.

Category 981—Watches

This category includes all watches.

Category 982—Men's Jewelry (Precious Metal)

This category includes articles made of gold, sterling silver, platinum, or other precious metal.

Examples of articles included are:

Cuff links	Tie ornaments
Tie clips	Pins
Tie holders	Collar buttons

Category 983—Men's Jewelry (Other Than Precious Metal)

This category includes articles made of any material other than precious metals. Excluded are the articles made of precious metals which are included in Category 982.

Examples of articles included are:

Cuff links	Tie ornaments
Tie clips	Pins
Tie holders	Collar buttons

Category 984—Clocks (Electric)

This category includes all electric clocks.

Examples of articles included are:

Desk and table clocks	Novelty clocks
Kitchen clocks	"Grandfather" clocks
Alarm clocks	

Category 985—Clocks (Non-Electric)

This category includes all non-electric clocks.

Examples of articles included are:

Desk and table clocks	Novelty clocks
Kitchen clocks	"Grandfather" clocks
Alarm clocks	

9. Appendix E is amended by inserting after category 854 therein the following:

Category you are pricing	*Percentage markup on cost*	Category you are pricing	*Percentage markup on cost*
860	58	883	42
861	81	884	58
871	54	890	25
873	56	891	49

[General Ceiling Price Regulation, Supplementary Regulation 5, Amendment 2, Correction]

GCPR, SR 5—RETAIL PRICES FOR NEW AND USED AUTOMOBILES

AMENDMENT 2. ADDITIONAL GUIDE BOOKS FOR USED CARS

Correction

Due to a clerical error, several words were omitted in the list of authorized used car guide books in the General Ceiling Price Regulation, Supplementary Regulation 5, Amendment 2, effective March 19, 1951 (16 F. R. 2548). Accordingly, the list of authorized used car guide books contained in section 4 (g) is corrected as follows:

1. In the column under "Name of guide and publisher," the words "Official Used Car Survey, published by Motor Vehicle Dealers Administration, Nebraska." is corrected to read: "Official Used Car Survey, published by Motor Vehicle Dealers Administration, State of Nebraska."

2. In the column under "Territory for which guide is designated," insert the word "Nebraska" on the same line as "Official Used Car Survey, published by Motor Vehicle Dealers Administration, State of Nebraska."

(Sec. 704, Pub. Law 774, 81st Cong. Interprets or applies Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.)

[General Ceiling Price Regulation Supp. Reg. 16]

GCPR, SR16—ADJUSTMENT OF CEILING PRICES FOR FLUID MILK AND CREAM IN AREAS UNDER JURISDICTION OF STATE MILK CONTROL AGENCIES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stablization Agency General Order No. 2 (16 F. R. 738), this Supplementary Regulation 16 to the General Ceiling Price Regulation (16 F. R. 808) is hereby issued.

STATEMENT OF CONSIDERATIONS

This Supplementary Regulation 16 to the General Ceiling Price Regulation is issued for the purpose of establishing a procedure whereby a state milk control agency may petition the Office of Price Stabilization for adjustment of the ceiling prices in its marketing areas with respect to sales of milk, cream and milk products for fluid consumption. This action is taken because the General Ceiling Price Regulation contains no provision setting forth the procedure and standards for the issuance of adjustment orders applicable to cases involving the pricing of fluid milk and cream in areas subject to the jurisdiction of state milk control agencies.

The laws of several states require that state milk control agencies shall establish minimum prices to be paid to milk producers and minimum resale prices, principally for fluid milk and cream, to be charged consumers. Generally these state laws provide that the prices paid to the milk producers and the prices charged the consumers shall be such as to insure an adequate supply of pure and wholesome milk at fair and reasonable prices.

In order to coordinate the purpose of these state laws with that of the Defense Production Act of 1950, provision is made in this Supplementary Regulation for the submission by a state milk control agency of a petition showing the price adjustments which the agency believes necessary for its area, and for the approval by the Director of Price Stabilization of those price adjustments which are found to be necessary under the Defense Production Act of 1950. This regulation provides that the prices so established shall be in proper relationship with prices in other areas so as to prevent disruption of supply between milk consuming areas.

This Supplementary Regulation further provides that the state milk control agency shall submit with its petition full and complete information and data in support of the price adjustments it proposes for the marketing area involved.

Each petition for adjustment submitted by a state milk control agency will be considered for approval on the basis of the factors applicable to that particular marketing area. Therefore, this regulation does not constitute an over-all exemption of the price orders of state milk control agencies from the provisions of the General Ceiling Price Regulation, as amended.

In the judgment of the Director of Price Stabilization the provisions of this Supplementary Regulation 16 to the General Ceiling Price Regulation are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, and to relevant factors of general applicability.

REGULATORY PROVISIONS

Sec.
1. Adjustment of ceiling prices.
2. Applicability.
3. Definitions.

AUTHORITY: Sections 1 to 3 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105.

SECTION 1. *Adjustments of ceiling prices for fluid milk, cream and milk products for fluid consumption in marketing areas subject to state milk control agencies.*

(a) The Director of Price Stabilization, or any officer to whom he delegates the authority, may upon petition filed by a state milk control agency adjust the ceiling prices established under the General Ceiling Price Regulation for sales and purchases of milk, cream and milk products for fluid consumption in any marketing area under the jurisdiction of such milk control agency where he finds:

(1) That the adjustment is necessary to effectuate the purposes of the Defense Production Act of 1950; and

(2) That the adjustment is necessary to insure a sufficient quantitity of milk in the area involved, and to prevent a disruption of orderly marketing; and

(3) That the adjustment will not tend to disrupt marketing of milk, cream and milk products for fluid consumption in adjacent marketing areas; and

(4) That the adjustment is necessary to effectuate the purposes of the applicable state statutes under which the milk control agency operates.

(b) Where a state milk control agency petitions the Office of Price Stabilization for an adjustment in the ceiling prices for sales and purchases of milk, cream and milk products for fluid consumption in the area under its jurisdiction it shall submit with its petition the following information:

(1) A certified copy of the law, statute or authorization under which it operates and establishes minimum resale prices;

(2) A schedule of the minimum prices in effect during the base period in the area under its jurisdiction;

(3) The cost data substantiating the proposed minimum resale prices. These data shall include information on material costs, labor including sales commissions, services and containers used in the processing, packaging and distribution of the products for which minimum prices are established;

(4) Findings upon which the proposed changes in prices are based, and a copy of the proposed minimum price orders.

SEC. 2. *Applicability of this Supplementary Regulation.* This regulation shall apply only to ceiling prices for sales and purchases of milk, cream and milk products for fluid consumption in a marketing area under the jurisdiction of a state milk control agency where the agency is required by state law or statute to fix minimum prices for the resale of these products to consumers and others.

SEC. 3. *Definitions.* When used in this regulation the term:

(a) State milk control agency means a governmental body established pursuant to state law or statute and authorized to fix or regulate minimum prices for the sales of milk, cream and milk products for fluid consumption to consumers and other users.

(b) Marketing area means that geographical part of a state to which specific price regulations of a state milk control agency are applicable.

Effective date. This Supplementary Regulation 16 to the General Ceiling Price Regulation is effective April 6, 1951.

NOTE: The record keeping and reporting requirements contained in this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

MICHAEL V. DISALLE,
Director of Price Stabilization.

APRIL 5, 1951.

Chapter VIII—Defense Transport Administration

[Limited Temporary Grain Port Handling Permit]

STORAGE AND HANDLING OF BULK GRAIN FOR DOMESTIC SALE OR USE

GRAIN ON HAND OR LOADED FOR MOVEMENT ON OR BEFORE APRIL 16, 1951

Pursuant to authority vested in me by DTA Delegation 3 (16 F. R. 2104) under General Order DTA 2 (16 F. R. 2035):

This limited temporary grain port handling permit is hereby issued authorizing the operator of any port terminal warehouse to store and handle at such warehouse grain intended for domestic sale or use, but not in excess of the quantity of such grain normally stored or handled thereat during 1950: *Provided, however,* That this permit shall be applicable only to grain intended for domestic sale or use received at, or loaded for movement to, such warehouse on or before April 16, 1951.

Grain intended for domestic sale or use not so received or loaded for movement on or before such date may not, under said General Order DTA 2, be stored or handled under this permit at any port terminal warehouse without a permit therefor issued to each operator upon his application.

This limited temporary permit shall become effective immediately.

(Sec. 704, Pub. Law 774, 81st Cong. Interprets or applies Title I, Pub. Law 774, 81st Cong.; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR 1950 Supp., E. O. 10200, Jan. 3, 1951,

16 F. R. 61, E. O. 10219, Feb. 28, 1951, 16 F. R. 1983)

Issued at Washington, D. C., this 5th day of April 1951.

H. K. OSGOOD,
Director, Warehousing and Storage Division, Defense Transport Administration.

APRIL 5, 1951.

Chapter XII—Defense Minerals Administration, Department of the Interior

[MO-6]

MO-6—TUNGSTEN ORE

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

Sec.
1. What this order does.
2. Definitions.
3. Allocation authorizations required.
4. Exemptions from allocation requirements.
5. Records and audit.
6. Reports.
7. Adjustments and exceptions.
8. Directives.
9. Communications.
10. Violations.
11. Revocation of MO-4.

AUTHORITY: Sections 1 to 11 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to conserve and provide for an equitable distribution of the limited supply of tungsten ore and concentrates so as best to serve the interests of the national defense program and essential civilian production. It prohibits, subject to limited exceptions, deliveries of tungsten ore and concentrates not covered by allocation authorizations to be issued monthly by the Defense Minerals Administration, and requires the filing of reports monthly on inventory and anticipated supplies.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, or division thereof, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Tungsten ore" means and includes:

(1) All natural tungsten ore containing 20 percent or more of tungsten trioxide;

(2) All tungsten concentrates containing 20 percent or more of tungsten trioxide; and

(3) Synthetic scheelite, containing 20 percent or more of tungsten trioxide, produced by chemical treatment of natural tungsten ore and/or concentrates.

(c) "Producer" means any person who mines or otherwise produces natural materials containing recoverable quantities of tungsten.

(d) "Processor" means any person who beneficiates, up-grades or purifies tungsten ores.

(e) "Dealer" means any person who procures tungsten ore either by importing or from domestic sources for sale or resale without change in form, whether or not any such person received title to or physical delivery of the material.

(f) "Use" means the conversion of tungsten ore into any tungsten product except synthetic scheelite. It does not mean beneficiating, up-grading or purifying.

SEC. 3. *Allocation authorizations required.* (a) After April 30, 1951, no person shall deliver tungsten ore or accept delivery of tungsten ore in any month except in accordance with the terms of an allocation authorization issued for that month by the Defense Minerals Administration on Form MF-4.

(b) An application for an allocation authorization must be filed with the Defense Minerals Administration on Form MF-4 by the person seeking an allocation of tungsten ore. The first request shall cover requirements for the months of May and June 1951 and must be filed not later than April 15, 1951. For the following months the application must be filed not later than 45 days preceding the first day of the month in which delivery is sought. From time to time changes in the dates of filing may be made. In case of such change applicants will be notified.

(c) The allocation authorization (Form MF-4) issued will be sent by the Defense Minerals Administration to the appropriate supplier or suppliers and a copy furnished to the applicant. The supplier is required to make delivery to the extent of the applicant's purchase order within the limit of the authorization. In placing his order the applicant shall specify the date and serial number of the applicable allocation authorization. An applicant for an allocation authorization shall furnish such information with respect to the intended use of the tungsten ore as the Defense Minerals Administration may request.

(d) To prevent unauthorized consumption or use of tungsten ore in any month, after April 30, 1951, no producer, processor, or dealer shall use or consume tungsten ore except in accordance with the terms of an allocation authorization issued for that month by the Defense Minerals Administration on Form MF-4.

SEC. 4. *Exemptions from allocation requirements.* The provisions of section 3 of this order shall not apply to:

(a) Deliveries of tungsten ore to the General Services Administration for the sole purpose of stockpiling;

(b) Deliveries of tungsten ore for the purpose of resale only; and

(c) Deliveries of tungsten ore by a producer, processor, or dealer to any processor for the sole purpose of being concentrated, up-graded, or purified by the processor receiving such deliveries; however, the concentrated, purified, or up-graded ore shall be subject to allocation.

SEC. 5. *Records and audits.* Each person participating in any transaction covered by this order shall retain in his possession for at least two years records of receipts, deliveries, inventories, and use, in sufficient detail to permit inspection and audit by representatives of the Defense Minerals Administration to determine that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

SEC. 6. *Reports.* (a) Every person who at any time during the month of April 1951 or in any subsequent calendar month, consumed, or had in his possession for consumption, tungsten ore having 50 pounds or more of contained tungsten, and every dealer who at any time during the month of April 1951, or in any subsequent calendar month, had in his possession, or under his control tungsten ore having 50 pounds or more of contained tungsten, for the purposes of sale, shall report to the Defense Minerals Administration on Form MF-5 on or before the 15th day of the following month.

(b) Every producer and every processor, who at any time during the month of April 1951 or in any subsequent calendar month, had in his possession, or under his control tungsten ore having 50 pounds or more of contained tungsten, shall report to the Defense Minerals Administration on Form MF-6 on or before the 15th day of the following month.

SEC. 7. *Adjustments and exceptions.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order consideration will be given to the requirements of public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 8. *Directives.* The Defense Minerals Administration may from time to time issue special directives as to deliveries of tungsten ore, and unless otherwise provided therein, such directives will prevail over the provisions of this order.

SEC. 9. *Communications.* All communications concerning this order shall be addressed to the Defense Minerals Administration, Department of the Interior, Washington 25, D. C.

SEC. 10. *Violations.* Any person who wilfully violates any provision of this order, or furnishes false information or conceals any material fact in the course of operation under it, is guilty of a crime and upon conviction may be punished by fine or imprisonment, or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control, and to deprive him of further priorities assistance.

SEC. 11. *Revocation of Mineral Order MO-4.* Mineral Order MO-4 (Tungsten Concentrates) issued February 15, 1951, 16 F. R. 1585, is hereby revoked.

NOTE: All record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act.

This order shall take effect upon publication in the FEDERAL REGISTER.

JAMES BOYD,
Administrator,
Defense Minerals Administration.

[F. R. Doc. 51-4199; Filed, Apr. 5, 1951; 11:56 a. m.]

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 74—INTERNATIONAL MONEY-ORDER SERVICE

DIRECT EXCHANGE; LIST OF UNITED STATES EXCHANGE OFFICES

Negotiations for the exchange of money orders between the United States and the Republic of the Philippines on the international basis have been completed, and it having been agreed that the service will be put into operation on April 1, 1951, in both directions, and since compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (5 U. S. C. 1003) is impracticable for the reason that such compliance would impede the due and timely execution of the functions of this Department, it is therefore ordered, that, effective April 1, 1951, Part 74 be amended as follows:

a. Amend paragraph (b) of § 74.4 *Direct Exchange* by inserting "Philippines (Republic of)" between "Peru" and "Poland" in the list of countries shown therein.

b. Amend § 74.6 *List of United States exchange offices* to read as follows:

§ 74.6 *List of United States exchange offices.* The following offices are authorized to certify money orders of United States issue: (a) New York for all countries in Africa, Europe, and South America; also for Cape Verde Islands, Lebanon, Malaya, Netherlands Indies, Palestine, Siam and Syria.

(b) New Orleans for the countries of Central America.

(c) El Paso and Laredo, for Mexico.

(d) San Francisco for Philippines (orders issued in continental United States, Alaska, Puerto Rico and the United States Virgin Islands), China, Japan (except as noted in paragraph (e) of this section); the British Crown colony of Hong Kong, New Zealand, and the Commonwealth of Australia, consisting of New South Wales, Queensland, South Australia, Tasmania, Victoria, and Western Australia.

(e) Seattle for Japan only, for all offices in Alaska, Idaho, Minnesota, Montana, North Dakota, Oregon, and Washington.

(f) Honolulu for trans-Pacific countries for offices in Hawaii only.

(g) The postmaster at Pago Pago, Tutuila, Samoa, is authorized to certify orders issued in American Samoa.

(h) Guam for orders issued in Guam payable in China, Japan, Hong Kong and Philippines.

(R. S. 161, 396, 4028, sec. 1, 25 Stat. 654, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369, 39 U. S. C. 712)

[SEAL] V. C. BURKE,
Acting Postmaster General.

TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

Subchapter N—Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels

[CGFR 51-16]

PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OF SUBSTANCES AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

CONTAINERS FOR DANGEROUS CARGO; AUTHORITY TO WAIVE OR RELAX REGULATIONS

The purpose for the amendments to 46 CFR 146.05-4 is to authorize the Commandant to permit the use of certain containers that are not presently authorized for the shipment of hazardous materials, upon a determination by him that the interests of national defense would be served or the interests of safety would not be impaired by such use as well as to permit the Commandant to authorize the use of certain containers in the transportation of explosives or other dangerous articles or substances which have already been authorized for use in land transportation by the Interstate Commerce Commission. Because of the national emergency declared by the President I find an emergency exists and this amendment to the regulations governing explosives or other dangerous articles on board vessels shall be made effective on the date of publication of this document in the FEDERAL REGISTER in accordance with the provisions in R. S. 4472, as amended (46 U. S. C. 170). The cancellation of 46 CFR 146.28-4, regarding authority to waive or relax regulations by the Captain of the Port is necessary since it is in conflict with the policies established under the act of December 27, 1950, Public Law 891, 81st Congress, and the order of the Acting Secretary of the Treasury, dated January 23, 1951, and identified as CGFR 51-1 (16 F. R. 731). These amendments to the regulations governing transportation of explosives or other dangerous articles on board vessels are published without prior general notice of their proposed issuance for the reason that notice, public rule making procedure, and effective date requirements in connection therewith are hereby found to be contrary to the public interest.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), and Order CGFR 51-1, dated January 23, 1951 (16 F. R. 731), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective on the date of publication of this document in the FEDERAL REGISTER:

SUBPART—SHIPPER'S REQUIREMENTS RE: PACKING, MARKING, LABELING, AND SHIPPING PAPERS

1. Section 146.05-4 is amended to read as follows:

§ 146.05-4 *Prescribed containers.* (a) The regulations in this subchapter prescribe four groups of outside containers for use in shipping permitted explosives or other dangerous articles or substances as follows:

(1) I. C. C. specification containers.
(2) M. I. N. specification containers. (See § 146.05-6.)
(3) C. F. C. specification containers (See § 146.05-7.)
(4) Non-specification containers.

(b) In the interest of national defense or at such times at it shall be determined that the interest of safety would not be impaired, the use of containers other than those specified in this part, for the transportation of permitted explosives and other dangerous articles or substances may be authorized in the discretion of and upon special permit to be issued by the Commandant of the Coast Guard.

SUBPART—TEMPORARY AMENDMENTS TO REGULATIONS

2. Section 146.28-4, *Authority to waive or relax regulations,* is canceled.

(R. S. 4405, as amended; 46 U. S. C. 375. Interprets or applies R. S. 4472, as amended; 46 U. S. C. 170)

Dated: March 30, 1951.

[SEAL] MERLIN O'NEILL,
Vice Admiral, U. S. Coast Guard,
Commandant.

[F. R. Doc. 51-4123; Filed, Apr. 5, 1951; 8:53 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[P & S Docket No. 143]

MARKET AGENCIES AT OMAHA UNION STOCK YARDS

NOTICE OF PETITION FOR MODIFICATION

Pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended, (7 U. S. C. 181 et seq.) an order was issued on February 20, 1951, authorizing the respondents to file and put into effect new tariffs providing for the rates currently in effect.

On March 28, 1951, respondents filed a petition requesting "the issuance of a supplemental order under which it will be possible to make certain clarifications and modifications * * * in petitioners' Tariff No. 12 * * *." The petition requests authority to make the following modifications in Tariff No. 12:

1. That section A be amended so as to authorize a charge of $1.05 per head instead of $1 per head in the "next 10 head in each consignment" bracket on cattle.

2. That the paragraph numbered 1 in connection with buying charges for cattle and calves (section F) be stricken and the following substituted in lieu thereof:

1. The minimum charge on a purchase order of cattle and/or calves shipped out by rail shall be $22 × the number of cars in which the animals are shipped out and the maximum charge shall be $28 × the number of cars in which the animals are shipped out.

3. That the paragraphs numbered 1 and 2 in connection with the buying rates for hogs (section F) be stricken and the following substituted in lieu thereof:

1. The minimum charge on hogs for immediate slaughter shipped out by rail shall be $20 per single deck car and the maximum $25 per single deck. The maximum on double deck cars shall be $32 per car.

4. That the paragraphs numbered 2 and 3 of section G be stricken and the following substituted in lieu thereof:

2. When a purchaser of livestock buys and pays for it himself, but has a market agency render any one of the following services, namely, bill it out, drive it directly to the loading-out pens, or indirectly to them by way of the facilities for spraying, vaccinating, testing, branding, castrating, etc., the charge for rendering any one or any of these services combined shall be 30 cents per head for cattle, 20 cents per head for calves, 10 cents per head for hogs, and 6 cents per head for sheep.

5. That the inspection charge of 2 cents per head provided for in section G be amended to read, "2½ cents per head (with a maximum of 50 cents up to each 25 head)."

If authorized, the modifications will produce additional revenues for the respondents and increase the cost of marketing to the shippers. Accordingly, it appears that this public notice should be given of the filing of the petition and its contents in order that all interested persons may have an opportunity to be heard in the matter.

All interested persons who desire to be heard upon the matter requested in said petition shall notify the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., within 15 days from the date of publication of this notice.

Done at Washington, D. C., this 2d day of April 1951.

[SEAL] KATHERINE L. MASON, *Hearing Clerk.*

[F. R. Doc. 51-4136; Filed, Apr. 5, 1951; 8:55 a. m.]

[7 CFR, Part 975]

[Docket No. AO-179-A7]

HANDLING OF MILK IN CLEVELAND, OHIO, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT, AND TO ORDER, AS AMENDED

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR, 900.1 et seq.), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to proposed amendments to the tentatively approved marketing agreement and to the order, as amended, regulating the handling of milk in the Cleveland, Ohio, marketing area, to be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 1844, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 12th day after its publication in the FEDERAL REGISTER.

Preliminary statement. A public hearing was called by the Production and Marketing Administration, United States Department of Agriculture, on the request of the Milk Producers Federation of Cleveland, and was held on December 27-29, 1950. Proposed amendments were submitted by the Milk Producers Federation of Cleveland, the Milk Market Survey Committee, the United Milk Products Company, the Akron Milk Producers, Inc., and the Central Ohio Cooperative Milk Producers, Inc.

The material issues presented on the record of the hearing were whether the order should be amended to provide for:

(1) An increase in the Class I price differentials;

(2) A change in the classification of fluid cream with appropriate price changes;

(3) The elimination of certain transfer provisions applicable to transfers of milk between plants during delivery periods in which other source milk is received and a change in the method of allocating other source milk;

(4) A revision of the delivery performance requirements relating to the qualification of milk plants as "pool plants" and the elimination from the order of a listing of pool plants;

(5) A revision of the location adjustments applicable to producer milk received at country plants and on milk moved by handlers from country plants to the marketing area;

(6) The inclusion of a special provision for the classification and pricing of milk disposed of in other marketing areas covered by a Federal order; and

(7) A change in the pool value computation provisions.

The following findings and conclusions on the issues decided herein are hereby made upon the basis of the record of the hearing:

(1) The average annual minimum Class I price differential should be increased approximately 21 cents per hundredweight.

The present Class I price differentials, which are added to manufacturing milk prices to reflect supply and demand conditions affecting the market for approved fluid milk, average $1.05 per hundredweight. Different amounts are added in the different seasons of the year, primarily to provide seasonal prices to producers as an incentive for more even production throughout the year. These differentials are 85 cents in May and June, $1.00 in March, April, July and August, and $1.15 September through February.

These differentials have not been sufficient to maintain an adequate supply of milk for the Cleveland market. Dairy farmers supplying other fluid markets in Pennsylvania and Ohio and whose farms are located in the same areas as producers who supply the Cleveland market, have received higher prices for milk than the minimum prices provided by Order 75. Handlers subject to Order 75 testified that because of these differences in prices and in order to prevent producers from shifting to these other markets, it has been necessary to pay premiums over order prices. The record shows that premiums have been paid in every month since the order became effective in September 1946.

Because of the large size of the city and its location on Lake Erie, it is necessary to secure about half of the milk supply of the City of Cleveland from production areas so far distant that direct shipment from the farms to marketing area plants is not economical. Milk from these distant areas is received at country stations, minimum prices to the producers who deliver it are subject to location adjustment deductions, and handlers are allowed a location credit

on such milk moved to the marketing area. Most of the country stations receiving this milk are located within the milksheds of smaller cities and receive milk from dairy farms located among farms from which milk is shipped directly to bottling plants in the smaller cities. The price paid for such milk is not subject to location adjustments. A comparison of Class I prices in the areas where the various milksheds overlap (city prices less transportation costs) for the period from August 1949 through July 1950 show that minimum Class I prices under Order 75 were below the other markets by the following amounts: Akron, 24 cents; Columbus, 20 cents; Dayton, 34 cents; Springfield (Grade B), 9 cents; Lima, 24 cents; Toledo, 11 cents. The Cleveland Class I price adjusted to the Fort Wayne production area was six cents higher than for the latter market. In several markets the Class I prices have increased relative to Cleveland prices since the period for which these comparisons were made. Obviously, Class I minimum order prices in the Cleveland market must be increased or substantial premium payments must be continued to keep a large number of producers from shifting to these other Ohio markets. Handlers have been meeting this competitive situation by premium payments. The testimony shows, however, that even with the payment of premiums some producers have already been lost to other markets. The proposed adjustment in the minimum Class I differentials will to a large extent incorporate in the Class I price an amount no greater than that previously returned to producers in the form of premium payments. Handlers' costs, therefore, on the average, will not be increased.

Effective January 1, 1951, all milk used for fluid consumption in the form of milk, skim milk, flavored milk, buttermilk and cream in Cleveland must meet Grade A standards. It was testified that changes in equipment or methods would be required on approximately 10 percent of the farms supplying the market to meet these new requirements. The more strict health regulations will increase the difficulty of holding producers for the Cleveland market in competitive areas.

The amount of milk which is required to supply fluid consumption in the Cleveland area increased each month in 1950 over the corresponding month of 1949. Although total producer milk receipts increased in the early part of 1950 over 1949, the ratio of producer receipts to fluid sales by the fall months of 1950 was less than the corresponding period of a year ago. By November 1950 producer receipts were actually less than November 1949 while Class I utilization increased more than a million pounds. The testimony indicates that during 1951 the demand will be greater and the supply not any more or perhaps less than it was in 1950 and if the present pricing arrangements are not adjusted the market will be confronted with a serious shortage of producer milk. While the basic formula prices to which the Class I price differentials are added have increased in recent months, this increase will be reflected in the prices paid in the other competing markets which have similar pricing arrangements.

Upon the basis of these facts, it is concluded that a twenty-one cent adjustment in the average annual Class I minimum price differential coupled with the other changes provided in this decision is necessary to bring minimum prices under Order 75 in the appropriate relationship with prices in the major competing markets, reflect the prevailing supply and demand conditions and provide the Cleveland market with an adequate supply of milk.

In the interest of promoting a greater inducement for more uniform production throughout the year and to provide relatively higher prices during the seasons of the year when handlers have found it necessary to pay substantial premiums, the increase in the Class I differential should obtain chiefly in the fall and winter months. During March and April and July and August the Class I differential should be increased 10 cents per hundredweight and during the period September through February the increase should be 35 cents per hundredweight. This seasonal arrangement of Class I differentials also will be consistent with the pattern of seasonal pricing followed in most of the other major competing markets.

(2) Cream for fluid consumption should be included in Class I.

Producers proposed that cream for fluid consumption be included in Class I, but at a 45-cent per hundredweight lower price than other Class I milk and that the Class II butterfat price be lowered to the level of the Class III butterfat price. It was contended that since cream must be made from the same quality of milk as that used for fluid consumption, cream should be a Class I product and the prices for skim milk and butterfat so used should be related directly to the regular Class I price.

Milk used for cream was classified as Class I milk in the order initially issued. The order was revised so as to classify this use as Class II milk after a showing that inspection requirements were less rigid for milk used to make cream. A representative of the Cleveland Health Department testified that after the effective date of the new Grade A regulations milk used for cream for fluid consumption must meet the same standards as milk for fluid consumption. A classification and pricing of skim milk and butterfat used for cream identical to that contained in milk for fluid consumption is therefore necessary. The proposal for a lower price on part of the Class I milk which was supported solely on the basis of encouraging cream consumption, is not consistent with the showing of the need for a higher Class I price to secure sufficient approved milk to supply the market. A price for one approved milk use set below the level necessary to secure enough approved milk for all required uses must be offset in the long run by a higher price for the other uses. The long run effects of this proposal would necessitate a slightly higher cost to fluid milk consumers and a lower cost to cream consumers. A pricing arrangement which results in lower prices for one group of consumers at the expense of another group when this is not made necessary by economic or other conditions in the market is not justifiable under the act. It is concluded, therefore, that the Class I and Class II definitions should be revised to include skim milk and butterfat for fluid cream in Class I milk and the regular Class I price should apply to such use.

(3) The provisions pertaining to the allocation of other source milk (§ 975.56) and the transfer of such milk (§ 975.53) should be revised in the manner set forth below.

Under the current provisions of the order other source milk is allocated to the lowest price classification available, except during the months of October through January when each handler who receives less producer milk than 110 percent of his Class I sales is permitted to allocate other source milk received to Class I milk. This exception is permitted to the extent of the difference between 110 percent of Class I sales and producer milk receipts. Milk, the handling of which the Secretary determines to be subject to the pricing and payment provisions of another Federal order is termed exempt milk and allocated as other source milk.

Handlers proposed that other-order milk be allocated to the class in which the handler reported its use. Handlers also proposed that the pool plant qualification provisions of the order be changed to permit a plant to qualify as a pool plant in any month in which 50 percent of the dairy farm receipts are furnished to the market. In conjunction with this proposal, it was suggested that some of the objections to the current pool plant provisions also could be overcome by the proration of the receipts of other source milk, thus classifying other source milk in the same manner as producer milk. The testimony indicated that such a provision is necessary primarily during the months of lowest milk production and its application could very well be limited to that period.

Under the Cleveland health regulations, other source milk and cream which is approved for transfer from a non-pool plant to a pool plant must be produced and handled in accordance with the same health regulations as are applicable to milk designated as producer milk under Order 75. However, to be considered as producer milk under the order, this approved milk must be received at a plant designated as a pool plant. There are some plants which hold Cleveland permits as approved sources of milk and cream but are not qualified as pool plants under the order. The market has not received sufficient milk from designated pool plants to fulfill the requirements at all times of the year, and approved milk has been acquired from these non-pool plants.

There are several problems involved in ascertaining promptly pool plants status on the basis of a single month's performance, particularly of plants which may furnish relatively widely fluctuating quantities of milk or of plants which are not regular sources of supply. Producers opposed the proposal for a single month pool plant status on the

basis that plants which do not conform with the present pool plant qualification provisions of the order demonstrate that their primary interest is in other markets and their receipts should not be included in the market-wide pool. Some assurances should be given regular producers that their milk is not displaced in the higher valued uses by other source milk. Such protection, however, should not place an unreasonable restriction on the use of approved milk which is first received at a non-pool plant and transferred to a pool plant which does not have an adequate supply of producer milk. It is concluded, therefore, that during the months of October through January other source milk and cream which is approved under the applicable health regulations for fluid uses should be prorated in accordance with the total utilization of milk in the receiving handler's plant provided that the handler receives less than 110 percent of his Class I utilization as producer milk. This will replace the present provision for the allocation of other source milk under similar circumstances. During these months when additional milk may be needed it will be allocated to various classifications the same as a regular producer's milk. During the months when other source milk is not needed in the market, regular producers will be assured of securing an appropriate share of the market since the proration provision will apply only in the short supply months. Other source milk will not be allocated to the higher value uses in any month unless the handler receiving such milk does not have an adequate supply of producer milk.

The method of classifying milk transferred from a pool plant to the pool plant of another handler is set out in § 975.53 (a) of the order. Specific provisos are applicable for this classification procedure in plants receiving both producer and other source milk. Handlers proposed that these provisos be deleted from the order.

The first proviso to which objection was made requires the market administrator to classify these transfers so as to return the highest-valued class utilization to producer milk. The second proviso, which applies to transfers of producer and other source milk among several plants, provides for the allocation of the other source milk transferred to each plant on the basis of the percentage which such other source milk bears to the total quantity of the milk transferred to the receiving plant. In case other source milk is involved in transfers of milk to a bottling plant, and interhandler milk may be transferred in any class agreed upon between seller and receiver, it is necessary to prevent the replacement of producer milk in the higher valued uses by other source milk. The testimony indicates that the present provisions are reasonable in accomplishing this intent. Handlers objections go primarily to the method of allocating other source milk. In view of the proposed changes in the method of allocating other source milk during October through January, it is concluded that the transfer provisions should not be changed.

(4) The performance requirements of country plants in order to establish pool plant status should not be changed.

It is now provided that a nonpool plant which does not operate a route in the marketing area may become a pool plant only by delivering to a pool bottling plant 50 percent or more of the milk received from dairy farms during each of 6 consecutive months. It was proposed to also permit a plant to qualify as a pool plant in any single month when such an amount of milk was delivered to a bottling plant. A pool plant qualified under present order provisions remains a pool plant so long as at least 50 percent of its milk receipts from dairy farms is delivered to pool bottling plants in three of the four months of October through January and at least 10 percent in all months except April through July. Revision of the provision was proposed so as to qualify a plant as a pool plant any month in which at least 50 percent of its dairy farm milk receipts were delivered to a pool bottling plant.

A representative of the health department testified that the amount of milk available to the market, other than from country plants, is decreasing and that more country plant milk will be needed to meet increasing requirements. The lowest supply of milk in relation to sales occurs in November and December. The six months qualifying period provided in the current order must include one of the months of January, February, or March and the preceding 5 months. Since a country plant must begin to make the 50 percent shipment not later than October to qualify as a pool plant, it was claimed that present requirements make it extremely difficult to develop new sources of pool milk in the months when additional milk is needed. It was also pointed out that the use of other source milk resulted in a prohibitive cost to handlers because other source milk is allocated to the lowest value uses in the receiver's plant, except for the allocation of a limited amount to Class I milk under certain conditions.

Statistical data indicate that in October 1950 nearly 1.5 million pounds more of country pool plant milk was transferred to bottling plants than in October 1949. Receipts of producer milk at country pool plants for the two periods were about the same but for the two preceding months were over 1.5 million pounds lower in 1950. In October 1949 transfers to city plants were 67.66 percent of country pool plant receipts and 72.58 percent in October 1950.

The need for a more readily available source of approved milk in the short supply season is indicated. However, it has been concluded in connection with other issues decided upon herein that the proration of other source milk to all uses in bottling plants having an inadequate supply of producer milk in October through January should be provided. This would in effect give milk shipments from a nonpool country plant the same status as producer milk in any plant in need of such milk for Class I and Class II uses. This change will accomplish substantially the same purpose that proponents desired to accomplish by amending the pool plant provisions. It is concluded therefore that no further change in pool plant qualification provisions is required at this time.

Handlers proposed that the listing of certain plants in the order and the requirement for the publication of a list of qualified pool plants by the market administrator each month be eliminated. They pointed out that 8 of the 18 plants listed in the order are no longer pool plants. The continuation of an obsolete list is confusing to persons not familiar with the details of the pool plant qualifications provisions of the order. The list which the market administrator is required to publish each month must be determined on the basis of handlers' reports for prior months and such determinations may be changed upon audit of handlers' records. Therefore, handlers who may be interested in the status of individual plants cannot rely solely on the list published by the market administrator. For these reasons it appears that the listing of pool plants in the order and the monthly publication of a list of such plants performs no useful purpose and should be discontinued.

Handlers also proposed elimination of the proviso which exempts from the pool plants disqualification provisions of § 975.32 (b) a plant located within the marketing area owned by the Milk Producers Federation of Cleveland. Certain handlers testified that the association had refused to handle excess milk which they offered to the association during the flush production months in 1950. This plant has not been in operation during the past year. The plant has been qualified in order to permit the Association, in an emergency, to handle milk of member producers and to pay these producers the market blend price. Pool plant status of the association plant may be necessary for this purpose, and the pool plant disqualification provisions should not be made applicable to this plant.

(5) The provisions for making location adjustments in the blend prices paid producers for milk received at country pool plants and location allowances to handlers on such milk moved to the marketing area should be revised.

Under the current provisions of the order pool plants located more than thirty miles from the Public Square in Cleveland may deduct from payments to producers 15 cents per hundredweight for plants located more than 30 but less than 45 miles distant. For each additional 15 miles up to 90 miles the rate of permissible deductions is increased by 2 cents per hundredweight. For each 15 mile zone beyond 90 miles the rate is increased by one cent per hundredweight.

Producers and handlers contend that these rates are not adapted to the needs of the market, since premiums have been paid to country stations shippers at a rate per hundredweight higher than has been paid direct shippers. The higher premium payments at country stations tends to indicate that there is not a proper relationship between minimum prices provided in the order for milk delivered directly to the marketing area and to country stations.

The Cleveland market not only competes with manufacturing plants for milk but, as previously shown, increased requirements of milk in several other fluid markets have caused their milksheds to be extended into areas which formerly were exclusive suppliers for the Cleveland market. In most cases these areas are located nearer to the competing market than to Cleveland. Because of the factor of location the competing markets, even with a somewhat lower level of prices f. o. b. the market, have been able to provide higher prices at the farm than the minimum prices under Order 75.

These differences in prices may be equalized in part by increasing the class prices f. o. b. Cleveland and to a limited extent by reducing the location deductions. It is evident from the record and from the facts previously stated that any significant changes in prices at country points must be accomplished by increasing the Class I price differentials.

Producers proposed that no location deductions be made from the prices paid to producers at plants located not more than 60 miles from the marketing area and no allowance be given to handlers on milk moved from such plants. A major portion of the milk which is received at plants which are located not more than 60 miles from the marketing area is produced in areas from which milk may be safely and economically shipped directly to the marketing area.

A detailed study of hauling rates for the month of March 1949 shows that the average hauling rate on milk which is moved from the farm directly to handlers plants located in the Cleveland marketing area is 33.6 cents per hundredweight. Some direct shipped milk originates as far as 100 miles from the marketing area.

Because the average distance traveled by about three-fourths of the truck routes on which more than 60 percent of the direct shipped milk is moved is less than 70 miles, it is apparent that a major portion of the direct shipped milk originates at farms within a 60-mile radius of the market. The weighted average hauling rate applicable to this milk is 31.6 cents per hundredweight.

The weighted average hauling rate from farms to country pool plants located within 60 miles of the city is 25.3 cents per hundredweight. The present location adjustments in this zone are 15 and 17 cents. Thus, under the provisions of the order and on the average, direct shippers located within 60 miles of the city realize at the farm between 9 and 10 cents per hundredweight more for their milk than shippers to country stations. Under these conditions it would be expected that many of the country station shippers would become direct shippers. The testimony indicated, however, that producers continue to sell their milk to these country stations for several reasons. At times larger premiums have been paid country station shippers than to direct shippers. Farmers have sold their milk through these local plants for a number of years and are reluctant to change their method of sale. Approximately 20 of the bottling plants located within the marketing area have not installed equipment to handle milk received directly from producers and prefer to secure their supplies in tank truck from nearby country plants. Under these circumstances, it would appear that either the handlers who do not maintain receiving facilities should pay the extra cost of acquiring milk through these country plants or producers who are in a position to ship direct to the marketing area and prefer to sell their milk through country stations should bear part of this additional cost. These objectives can be accomplished by eliminating a fixed location adjustment to handlers on milk moved to the marketing area from these nearby plants and permitting the operators of such plants to deduct from the price paid producers, if competitive conditions permit, a location adjustment on such milk. Such a deduction would replace the present handler location allowance. Additional costs of acquiring milk through these nearby country stations would then be contributed by either the individual handlers or the producers involved, rather than by all producers as under the present pooled handler allowances. Such a provision for permissive adjustments in the prices paid to producers should promote costs of milk to bottling plants supplied by the nearby country plants more comparable with costs of milk of competing handlers who receive their supplies either directly from producers or from their own country plants. Producers supplying these nearby country plants may also realize a hundredweight return more nearly in accord with the return of producers who ship their milk directly to the marketing area. It is concluded that a maximum allowable deduction at plants located in the 30- to 60-mile zone should be 13 cents per hundredweight. This rate is the equivalent of the rates recommended for the more distant zones.

Handlers proposed that the location adjustments to producers be reduced to 10 cents on milk received at plants located more than 30 and not more than 75 miles from Cleveland and an additional one cent allowed for each 15-mile zone thereafter. They proposed no change in the location allowance rate to handlers.

The adjustment of prices to be paid producers who may deliver milk to country plants is intended to result in prices which reflect the economic value of this milk to the principal market for which it is produced. The location adjustments to handlers are also intended to equalize the cost of milk among handlers who may procure their supplies at different locations in the production area. The value of milk at the various locations in the milkshed is influenced primarily by differences in transportation costs. This principle was followed in establishing the adjustments which were provided in Order 75 at the time it was issued in 1946.

If, as contended by handlers, location adjustments to producers must be reduced to meet competitive prices for milk of other markets at any particular point in the supply area, it follows that the cost to handlers of milk moved to the marketing area from the same point (f. o. b. price less the location allowance to handlers) should also reflect this competitive situation.

Obviously, any reduction in the producer location adjustment at country points will tend to increase the returns of producers delivering to such points but the effects of such a proposal have several serious long run economic consequences. Under the pooling arrangements of Order 75, any reduction in the producer location adjustment at country plants without a corresponding reduction in the handler location allowance reduces returns to producers who ship milk directly to the marketing area. Slightly more than 50 percent of the total receipts from producers is shipped directly from the farm to pool plants located in the marketing area. In order to encourage and maintain the production of milk in the nearby areas, only minor reductions in prices received by Cleveland producers in these areas relative to the prices received by more distant producers, therefore, should be made. Without other safeguards this would permit the development of more distant sources of fluid milk supplies and increase the costs of acquiring an adequate supply for the market.

The decisions by handlers as to whether or not sources of supply will be developed at country points depends also on the allowances given to handlers on milk moved to the marketing area. If these allowance rates are reduced to correspond with the reduction in location adjustments to producers, to something less than the actual cost of moving milk to the marketing area, some of the advantages of building up supplies at more distant points are removed. The reduction in the prices received by direct shippers relative to country station shippers is maintained at a minimum.

It appears that some adjustment may be made in the relative prices which country station producers receive for milk without encouraging uneconomic developments in securing the milk supply. It appears that a reasonable adjustment may be accomplished by applying in the 60 to 75 mile zone the present 15 cent rate which now applies in the 30 to 45 mile zone and allowing an additional one cent increase in the rate for each additional 15 mile zone. This change will increase the returns of producers who ship milk to the more distant country stations by 4 cents per hundredweight relative to direct shippers. Any increase in handlers' costs from the change in the location adjustments will be limited primarily to the amount of milk and cream moved to the marketing area from country stations while producers delivering milk to these plants will receive a relatively higher return on their total deliveries. This change should assist in eliminating the necessity for the payment of premiums to producers at country plants and promote a more equitable price structure than has prevailed under the present order.

It has been concluded that a 20 cent increase should be made in the Class I price differential. This increase in conjunction with the above mentioned change in location adjustments will result in an increase in the minimum blend

order prices to producers of approximately 15 cents for direct shippers, 17 to 19 cents for producers shipping to country stations within 60 miles of the marketing area and approximately 19 cents for other country station shippers.

(6) No special provision should be made for milk disposed of in other areas covered by a Federal order.

It was proposed that the order provide for pricing milk disposed of in the marketing area of another Federal order at the price for the use of such milk under that order if higher than such price under the Cleveland order. The specific problem presented was the disposition of butterfat and skim milk in the Columbus, Ohio, area by a Cleveland handler for use in ice cream.

In opposition to the proposal it was pointed out that dairy products, particularly cream, are sold by Cleveland handlers in many distant markets and in areas where the conditions determining the use values of milk are greatly different from conditions in the Cleveland area. Prices in these distant areas are not to be appropriately applied to producer milk at Cleveland. Ice cream manufactured and sold in Columbus by a person who does not operate a milk distributing plant is not subject to the order in that market. The proposal, however, would apply certain pricing provisions of the Columbus order to such a person who happened to be a handler under the Cleveland order. It appears that any problems of inequitable pricing may better be handled under the provisions of the order regulating the area where the milk is finally utilized.

(7) No change should be made in the pool value computation provisions.

The order provides that the value of milk of handlers who are in default in payments required to be made to the producer-settlement fund for the preceding period be excluded in computing the uniform price. Handlers proposed that this provision be eliminated. It was shown that under extreme conditions of almost universal default in payments, unwarranted variations in the uniform price might occur. However, such a situation is highly improbable. This same change was proposed at a previous hearing and it was concluded at that time that the provision objected to was intended to insure the solvency of the producer-settlement fund and should not be deleted. No evidence was submitted to indicate that this conclusion should be changed.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers. The briefs contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendment. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions herein before set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts and stated in connection with the conclusions in this recommended decision.

Recommended marketing agreement and amendments to the order. The following amendments to the order, as amended, are recommended as the detailed and appropriate means by which these conclusions may be carried out. The proposed marketing agreement is not included because the regulatory provisions thereof would be the same as those contained in the order, as amended, and as proposed to be further amended:

1. Delete § 975.30 (b) and substitute therefor the following:

(b) A plant which either was a pool plant on December 31, 1950, or has become a pool plant pursuant to paragraph (c) of this section.

2. Delete § 975.51 (a) (1) and substitute therefor the following:

(1) Disposed of in fluid form as milk, skim milk or buttermilk (except for livestock feed); flavored milk or flavored milk drinks; sweet or sour cream; or eggnog;

3. Delete § 975.51 (b) and substitute therefor the following:

(b) Class II milk shall be all skim milk and butterfat used to produce any milk product not specified in Class I milk or Class III milk and containing 8 percent or more of butterfat; ice cream, imitation ice cream, and other frozen desserts and mixes for such products (liquid or powdered); frozen cream; or cottage cheese.

4. Redesignate paragraphs (e) and (f) of § 975.56 as paragraphs (d) and (e) respectively, and delete paragraphs (b), (c) and (d) and substitute therefor the following:

(b) For the delivery periods of October, November, December and January, if the total pounds of butterfat received from producers and pool plants is less than 110 percent of the total pounds of butterfat classified as Class I milk, not including reconstituted skim milk or Class I milk transferred to pool plants or non-pool plants, subtract pro rata from the pounds of butterfat remaining in each class the pounds of butterfat received in other source milk.

(c) Except as provided in paragraph (b) of this section, subtract from the pounds of butterfat remaining in each class in series beginning with the lowest priced utilization the pounds of butterfat received in other source milk.

5. Delete § 975.61 (a) and (b) and substitute therefor the following:

(a) Add to the basic formula price the following amount for the delivery period indicated:

Delivery period:	*Amount*
May and June	$0.85
March, April, July, and August	1.10
All others	1.50

(b) The price of butterfat shall be the amount obtained in paragraph (a) of this section multiplied by 20.

6. Insert "(b)" following the figure "975.81" in paragraph (c) of § 975.73.

7. Delete § 975.71 and substitute therefor the following:

§ 975.71 *Location adjustments to handlers.* With respect to the actual weight of any product named in Class I and Class II which is (a) moved directly to the marketing area from a pool plant located outside the marketing area; and (b) disposed of outside the marketing area as Class I or Class II milk from a pool plant so located there shall be deducted in the computation of the handler's pool value with respect to such amounts moved or disposed of from plants located more than 60 miles but not more than 75 miles by shortest highway distance from the Public Square, Cleveland, Ohio, as determined by the market administrator, 15 cents per hundredweight, from plants located as so determined more than 75 miles but not more than 90 miles, 17 cents per hundredweight and an additional 1 cent for each additional 15 mile zone: *Provided*, That such adjustment shall be limited to an amount of the specified items so moved which could be derived from the milk received from producers at such plants.

8. Delete § 975.81 and substitute therefor the following:

§ 975.81 *Location adjustments to producers.* In making payments pursuant to paragraphs (a) and (b) of § 975.80, a handler may deduct, with respect to all milk received from producers at a plant outside the marketing area and located, as determined by the market administrator, by shortest highway distance from the Public Square in Cleveland, Ohio.

(a) More than 30 miles but not more than 60 miles, an amount not to exceed 13 cents; and

(b) More than 60 miles but not more than 75 miles, an amount not to exceed 15 cents, more than 75 miles but not more than 90 miles, an amount not to exceed 17 cents, and an additional 1 cent for each additional 15 mile zone.

9. Insert following the figure "975.80" in paragraph (a) of § 975.84 the following: "before subtracting any location adjustment pursuant to § 975.81 (a)."

10. Insert following the figure "975.80" in § 975.85 the following: "before subtracting any location adjustment pursuant to § 975.81 (a)."

Filed at Washington, D. C., this 2d day of April 1951.

[SEAL] JOHN I. THOMPSON,
Assistant Administrator.

DIVISION OF ADMINISTRATION

DELEGATION OF AUTHORITY TO CHIEF TO FURNISH COPIES OF RECORDS

SECTION 1. *Copies of records.* The Chief, Division of Administration, or such qualified employee of that Division as he may designate, may furnish in accordance with the applicable regulations and procedures copies and exemplifications of patents, plats and other records of the Bureau.

SEC. 2. *Revocation.* This order supersedes section 9 of Order No. 428 of August 16, 1950 (15 F. R. 5643), which section is hereby revoked.

ROSCOE E. BELL,
Associate Director.

Approved: March 29, 1951.

OSCAR L. CHAPMAN,
Secretary of the Interior.

DEPARTMENT OF COMMERCE

Federal Maritime Board

A/S J. LUDWIG MOWINCKELS REDERI ET AL.

NOTICE OF AGREEMENTS FILED WITH THE BOARD FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended.

Agreement No. 7815, between A/S J. Ludwig Mowinckels Rederi and Bull Insular Line, Inc., covers transportation of general cargo under through bills of lading from ports in the French North Atlantic Range—Bordeaux to Dunkirk—to Puerto Rico, with transshipment at New York, Baltimore or Philadelphia.

Agreement No. 7547-2, between Frank C. Strick & Co., Ltd., and the carriers comprising the Ellerman and Bucknall Associated Lines Joint Service, modifies the approved Strick-Ellerman Joint Service Agreement (No. 7547-1) by substituting therein the carriers comprising said Ellerman and Bucknall Associated Lines (Ellerman Lines, Limited, Ellerman & Bucknall Steamship Co. Ltd., Hall Line, Limited, and The City Line, Limited) for Ellerman & Bucknall Steamship Co., Ltd. Agreement 7547-1 covers the trade from U. S. Atlantic and Gulf ports to ports in the Mediterranean, Adriatic and Black Seas, the Red Sea and the Persian Gulf, and connecting tributary and adjacent waters.

Agreement No. 6010-8, between the member lines of the Straits/New York Conference, corrects certain inconsistent terms and obsolete designations in the basic agreement of said Conference (No. 6010, as amended) which covers the trade from the Colony of Singapore and Federation of Malaya to U. S. Atlantic and Gulf ports.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification together with request for hearing should such hearing be desired.

Dated: April 3, 1951.

By order of the Federal Maritime Board.

[SEAL] A. J. WILLIAMS,
Secretary.

[Docket No. G-1640]

PUBLIC SERVICE CORP. OF TEXAS

NOTICE OF APPLICATION

APRIL 3, 1951.

Take notice that Public Service Corporation of Texas (Applicant), a Delaware corporation, address, Fort Worth, Texas, filed on March 26, 1951, an application for an order pursuant to section 7 (a) of the Natural Gas Act, as amended, directing Northern Natural Gas Company (Northern Natural) a Delaware corporation, address, Omaha, Nebraska, and Cities Service Gas Company (Cities Service) a Delaware corporation, address, Oklahoma City, Oklahoma, or either of them, to establish physical connection of their transportation facilities with the facilities of Applicant, and to sell and deliver to Applicant natural gas for delivery to Applicant's consumers.

Applicant states that its presently available supply of natural gas is limited by its contract with Warren Petroleum Company, and that such supply is inadequate during peak load periods and in times of emergency. Applicant proposes the establishment of a tie-in between its facilities and the lines of Northern Natural or Cities Service at the point where their facilities cross those of Applicant. Applicant states that it has no supply of gas available to it other than that now obtained from Warren Petroleum Company. Applicant proposes to utilize the additional supply of gas requested in its application to continue its present service. A total volume of not in excess of 2,000 Mcf per day of natural gas during peak loads and gas necessary for emergencies on Applicant's system is requested in the application.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 20th day of April 1951. The application is on file with the Commission for public inspection.

[Docket No. G-1643]

CHICAGO DISTRICT PIPELINE CO.

NOTICE OF APPLICATION

APRIL 2, 1951.

Take notice that Chicago District Pipeline Company (Applicant) an Illinois corporation, address, Joliet, Illinois, filed on March 28, 1951, an application for an order pursuant to section 7 (b) of the Natural Gas Act authorizing and approving the abandonment of its gas sales service now being rendered by means of Applicant's natural-gas pipeline system.

Applicant presently purchases natural gas from Natural Gas Pipeline Company of America (Natural Gas) which gas is transported and resold by Applicant to Public Service Company of Northern Illinois (Public Service). The Peoples Gas Light and Coke Company (Peoples Gas) and Northern Indiana Public Service Company (NIPSCO). Applicant takes delivery of such gas at six locations, one each in La Salle County, Lake County, and Will County, Illinois, and three in McHenry County, Illinois. Applicant's customers have each entered into service agreements whereby they will purchase natural gas from Natural Gas and Texas Illinois Natural Gas Pipeline Company (Texas Illinois) and delivery of all or portions thereof into Applicant's pipeline system is proposed to be made at a point near Joliet, Will County, Illinois. Applicant proposes to abandon the service now being rendered to Public Service from the points in La Salle County, Lake County and McHenry County, Illinois. Effective upon abandonment of its gas sales service, Applicant proposes to render transportation service only to its three customers at rates set forth in its proposed F. P. C. Gas Tariff.

No new facilities are proposed to be constructed by Applicant under the new arrangement.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 20th day of April 1951. The application is on file with the Commission for public inspection.

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, King's I. C. C. Order 44]

NASHVILLE, CHATTANOOGA AND ST. LOUIS RAILWAY

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Homer C. King, Agent, the Nashville, Chattanooga and St. Louis Railway because of high water, is unable to transport traffic routed over its lines between Hobbs Island and Guntersville. *It is ordered*, That:

(a) Rerouting NC&StL traffic: The Nashville, Chattanooga and St. Louis Railway is hereby authorized and directed to reroute or divert traffic moving on its lines, routed via its car ferry, over any available route to expedite the movement; the billing covering all such cars rerouted shall carry a reference to this order as authorized for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those

hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 3:00 p. m., March 29, 1951.

(g) Expiration date: This order shall expire at 11:59 p. m., April 30, 1951, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement.

Issued at Washington, D. C., March 29, 1951.

INTERSTATE COMMERCE COMMISSION, HOMER C. KING, *Agent.*

[F. R. Doc. 51-4113; Filed, Apr. 5, 1951; 8:51 a. m.]

[Order No. 30783]

LOUISIANA INTRASTATE RATES AND CHARGES

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 28th day of March A. D. 1951.

It appearing, that in Ex Parte No. 168, Increased Freight Rates, 1948, 272 I. C. C. 695, and 276 I. C. C. 9, the Commission authorized carriers subject to the Interstate Commerce Act parties thereto to make certain increases in their freight rates and charges for interstate application throughout the United States, and that increases under such authorization have been made;

It further appearing, that a petition, dated February 28, 1951, has been filed on behalf of Arkansas & Louisiana, Missouri Railway Company and other common carriers by railroad operating to, from, and between points in the State of Louisiana, averring that the Louisiana Public Service Commission, by various orders, has refused to authorize or permit petitioners to establish for intrastate transportation upon their railroads in Louisiana, for application on certain commodities and as to certain services, increases in freight rates and charges corresponding to those authorized by this Commission and made by petitioners for application on interstate traffic in the proceedings above cited; such refusals being alleged in the manner and to the extent as stated in the said petition dated February 28, 1951, which petition so filed is referred to for greater certainty;

It further appearing, that petitioners allege that the refusal of the said Louisiana Public Service Commission to permit the increases on intrastate traffic referred to in the preceding paragraph causes and results in undue and unreasonable advantage, preference and prejudice as between persons and localities in intrastate commerce on the one hand and interstate commerce on the other hand, and undue or unreasonable and unjust discrimination against interstate commerce, in violation of sections 3, 13 (4), and 15a (2) of the Interstate Commerce Act;

It further appearing, that there have been brought in issue by said petition rates and charges made or imposed by authority of the State of Louisiana;

And it further appearing, that the investigation hereinafter instituted responsive to the requirements of section 13 is without prejudice to subsequent appropriate consideration on their merits of the arguments made by the Louisiana Public Service Commission in its answer to the petition:

It is ordered, That in response to the said petition, an investigation be, and it is hereby, instituted and that a hearing be held therein for the purpose of receiving evidence from the respondents hereinafter designated and any other persons interested, to determine whether the rates and charges of the common carriers by railroad, or any of them, operating in the State of Louisiana for the intrastate transportation of property, made or imposed by authority of the State of Louisiana, cause or will cause, by reason of the failure of such rates and charges to include increases corresponding to those permitted by this Commission for interstate traffic in the proceedings listed above, any undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum, or minimum, or maximum and minimum rates and charges, shall be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, that may be found to exist;

It is further ordered, That all common carriers operating within the State of Louisiana subject to the jurisdiction of this Commission be, and they are hereby, made respondents to this proceeding; that a copy of this order be served upon each of the said respondents; and that the State of Louisiana be notified of this proceeding by sending copies of this order and of said petition by registered mail to the Governor of the said State and to the Louisiana Public Service Commission, at Baton Rouge, Louisiana;

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission at Washington, D. C., for public inspection, and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be assigned for hearing at such times and places as the Commission may hereafter direct.

By the Commission, Division 1.

POTATOES FROM MAINE TO WOODBURY, N. J.

APPLICATION FOR RELIEF

APRIL 3, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin and I. N. Doe, Agents, for carriers parties to Agent I. N. Doe's tariff I. C. C. No. 570.

Commodities involved: Potatoes, carloads.

From: Points in Maine.

To: Woodbury, N. J.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: I. N. Doe's tariff I. C. C. No. 570, Supp. 32.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 70-2499, 70-2498, 70-2512]

CONSOLIDATED NATURAL GAS CO. ET AL.

SUPPLEMENTAL ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE AND RELEASING JURISDICTION

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

In the matter of Consolidated Natural Gas Company and Hope Natural Gas Company, File No. 70-2499; West Penn Electric Company, File No. 70-2498; West Penn Electric Company and State Line Gas Company, File No. 70-2512.

The West Penn Electric Company ("West Penn Electric"), a registered holding company, and West Penn Electric and State Line Gas Company ("State Line"), a subsidiary of West Penn Electric, having filed declarations with this Commission, pursuant to the Public Utility Holding Company Act of 1935 (the "act") and certain rules promulgated thereunder regarding the sale of certain gas utility properties; and

Said filings having been consolidated with a joint application filed by Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and its utility subsidiary, Hope Natural Gas Company ("Hope") with respect to, among other things, the acquisition of the said gas utility properties; and

Notice with respect to the filing of the said applications and declarations having been duly issued on November 7, 1950, and the Commission having on November 29, 1950 issued an order granting the joint application and permitting the declarations to become effective except, at the request of applicants-declarants, with respect to the proposal in File No. 70-2512, as to which jurisdiction was expressly reserved, and which is summarized as follows:

State Line, all of whose capital stock is owned by Monongahela Power Company, an exempt holding company and a public utility subsidiary of West Penn Electric, proposes to sell all of its gas utility properties and related assets to The Peoples Natural Gas Company ("Peoples"), a subsidiary of Consolidated, for $137,919 in cash, subject to adjustments for inventory and supplies on hand at the date of transfer and with respect to additions to, retirements of, and depreciation of property from July 31, 1950 to the date of transfer. Upon the completion of this divestment by State Line, that company proposes, after making provisions for the payment of its debts, to distribute its remaining assets to Monongahela and to dissolve;

An amendment having been filed on March 27, 1951 indicating that The Pennsylvania Public Utility Commission, the state in which State Line and Peoples are organized and doing business, has expressly authorized the acquisition by Peoples, and the divestment by State Line, of said assets; and

The Commission finding with respect to the said declaration regarding the sale of the State Line properties and the liquidation and dissolution of State Line that the requirements of the applicable provisions of the act and rules thereunder are satisfied, and that no adverse findings are necessary thereunder, and deeming it appropriate in the public interest and in the interest of investors and consumers to grant the request of declarants that said declaration be permitted to become effective forthwith;

It is ordered, That the declaration in File No. 70-2512 be, and the same hereby is, permitted to become effective forthwith, and that the jurisdiction heretofore reserved with respect thereto be, and the same hereby is, released forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[File No. 70-2589]

WEST PENN ELECTRIC CO. AND MONONGAHELA POWER CO.

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

Notice is hereby given that a joint application-declaration and an amendment thereto have been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 (the "act"), by the West Penn Electric Company ("West Penn Electric"), a registered holding company, and its direct subsidiary, Monongahela Power Company ("Monongahela"), a public utility company and an exempt holding company. The filing designates sections 6, 7, 9, 10, 12 (d) and 12 (f) of the act and Rules U-43, U-44 and U-50 promulgated thereunder as being applicable to the proposed transactions.

Notice is further given that any interested person may, not later than April 11, 1951 at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter stating the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted; or he may request that he be notified if the Commission should order a hearing thereon. At any time after said date, said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C.

All interested persons are referred to said joint amended application-declaration which is on file in the office of this Commission for a statement of the transactions therein proposed which are summarized as follows:

Monongahela proposes to issue and sell $10,000,000 principal amount of its First Mortgage Bonds, __ percent Series, due 1981, to be issued under and secured by Monongahela's present indenture dated as of August 1, 1945, as heretofore supplemented, and to be supplemented by an indenture to be dated as of April 1, 1951. The bonds are to be sold pursuant to the competitive bidding requirements of Rule U-50 and for a price to the company of not less than 100 percent nor more than 102¾ percent of the principal amount thereof, plus accrued interest.

Monongahela also proposes to issue and sell, and West Penn Electric, the holder of all the issued and outstanding $6.50 par value common stock of Monongahela, proposes to acquire 615,400 additional shares of such common stock for a cash consideration of $4,000,100. West Penn Electric will pledge the additional shares of common stock to be acquired from Monongahela as additional collateral security for West Penn Electric's 3½ percent Sinking Fund Collateral Trust Bonds, pursuant to the terms of the indenture securing such bonds dated as of September 1, 1949.

The filing states that Monongahela and its subsidiaries anticipate making expenditures of approximately $30,000,000 during 1951 and 1952 for the construction of property additions. In order to finance such construction program Monongahela will utilize the net proceeds from the sale of the new bonds and the additional common stock together with treasury cash. Monongahela estimates that, based on the present level of earnings and current expectations as to the progress of the construction program, approximately $8,000,000 of additional cash will have to be provided before the end of 1952 through the sale of additional securities of a type not yet determined.

The filing requests that any order of the Commission authorizing the proposed transactions become effective forthwith upon issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

FEDERAL REGISTER

VOLUME 16 NUMBER 68

Washington, Saturday, April 7, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10231

EXTENSION OF THE PROVISIONS OF PART I OF EXECUTIVE ORDER NO. 10210 OF FEBRUARY 2, 1951,[1] TO THE TENNESSEE VALLEY AUTHORITY

By virtue of the authority vested in me by the First War Powers Act, 1941, as amended by the act of January 12, 1951, entitled "An Act to amend and extend title II of the First War Powers Act, 1941" (Public Law 921, 81st Congress), and as President of the United States and Commander in Chief of the armed forces of the United States, and deeming such action will facilitate the national defense, it is hereby ordered as follows:

The provisions of Part I of Executive Order No. 10210 of February 2, 1951, entitled "Authorizing the Department of Defense and the Department of Commerce to Exercise the Functions and Powers Set Forth in Title II of the First War Powers Act, 1941, as Amended by the Act of January 12, 1951, and Prescribing Regulations for the Exercise of Such Functions and Powers," are hereby extended to the Tennessee Valley Authority; and, subject to the limitations and regulations contained in such part, and under such regulations as it may prescribe, the Board of Directors of the Tennessee Valley Authority is authorized to perform and exercise, as to the Tennessee Valley Authority, all the functions and authority vested in and granted by the said Part I to the Secretaries named therein: *Provided*, that regulations so prescribed need not be approved by the Secretary of Defense: *And provided further*, that nothing contained herein shall prejudice any other authority which the said Tennessee Valley Authority or the Board of Directors thereof may have with respect to procurement.

HARRY S. TRUMAN

TITLE 7—AGRICULTURE

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Orange Reg. 196]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.321 *Orange Regulation 196*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than April 9, 1951. Shipments of oranges, grown in the State of Florida, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since September 11, 1950, and will so continue until April 9, 1951; the recommendation and supporting information for continued regulation subsequent to April 8 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on April 3; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of oranges; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., April 9, 1951, and ending at 12:01 a. m., e. s. t., May 7, 1951, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in Regulation Area I which grade U. S. No. 2 Bright, U. S. No. 2, U. S. No. 2 Russet, U. S. No. 3, or lower than U. S. No. 3 grade;

(ii) Any oranges, except Temple oranges, grown in Regulation Area II which grade U. S. No. 2 Russet, U. S. No. 3, or lower than U. S. No. 3 grade;

(iii) Any oranges, except Temple oranges, grown in Regulation Area II which grade U. S. No. 2 or U. S. No. 2 Bright unless such oranges (*a*) are in the same container with oranges which grade at least U. S. No. 1 Russet and (*b*) are not in excess of 50 percent, by count, of the number of all oranges in such container;

(iv) Any oranges, except Temple oranges, grown in Regulation Area I or Regulation Area II which are of a size larger than a size that will pack 126 oranges, packed in accordance with the requirements of a standard pack in a standard nailed box; or

(v) Any Temple oranges, grown in Regulation Area I or Regulation Area II, which grade U. S. No. 2 Russet, U. S. No. 3, or lower than U. S. No. 3 grade.

(2) As used in this section, the terms "handler," "ship," "Regulation Area I," "Regulation Area II," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 1 Russet," "U. S. No. 2 Bright," "U. S. No. 2," "U. S. No. 2 Russet," "U. S. No. 3," "standard pack," "container" and "standard nailed box" shall each have the same meaning as when used in the revised United States Standards for Oranges (7 CFR 51.192).

(Sec. 5, 49 Stat. 753, as amended, 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of April 1951.

[Grapefruit Reg. 140]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.322 *Grapefruit Regulation 140*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than April 9, 1951. Shipments of grapefruit grown in the State

of Florida, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since September 11, 1950, and will so continue until April 9, 1951; the recommendation and supporting information for continued regulation subsequent to April 8 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on April 3; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit this section, including the effective time thereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., April 9, 1951, and ending at 12:01 a. m., e. s. t., May 7, 1951, no handler shall ship:

(i) Any grapefruit of any variety, grown in Florida which grade U. S. No. 3 or lower than U. S. No. 3 grade;

(ii) Any white seeded grapefruit, grown in Regulation Area I which grade U. S. No. 2 Russet;

(iii) Any white seeded grapefruit, grown in Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(iv) Any pink seeded grapefruit, grown in Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(v) Any seedless grapefruit, grown in Florida, which are of a size smaller than a size that will pack 126 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) As used in this section, "Regulation Area I," "Handler," "variety," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 2 Russet," "U. S. No. 3," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Grapefruit (7 CFR 51.151).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of April 1951.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[Tangerine Reg. 111]

PART 933—ORANGES, GRAPEFRUIT, AND TANNGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.523 *Tangerine Regulation 111*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than April 9, 1951. Shipments of tangerines, grown in the State of Florida, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since October 23, 1950, and will so continue until April 9, 1951; the recommendation and supporting information for continued regulation subsequent to April 8 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on April 3; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time thereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) Tangerine Regulation 110 (7 CFR 933.520; 15 F. R. 2213) is hereby terminated as of the effective time of this regulation.

(2) During the period beginning at 12:01 a. m., e. s. t., April 9, 1951, and ending at 12:01 a. m., e. s. t., July 31, 1951, no handler shall ship:

(i) Any tangerines, grown in the State of Florida that do not grade at least U. S. No. 2 Russet; or

(ii) Any tangerines, grown in the State of Florida, that are of a size smaller than the size that will pack 294 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions 9½ x 9½ x 19⅛ inches; capacity 1,726 cubic inches).

(3) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 2 Russet" and "standard pack" shall have the same meaning as when used in the United States Standards for Tangerines (7 CFR 51.416).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of April 1951.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[Lemon Reg. 377]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.484 *Lemon Regulation 377*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 14 F. R. 3612), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on April 4, 1951, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., April 8, 1951, and ending at 12:01 a. m., P. s. t., April 15, 1951, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 275 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of April 1951.

[Orange Reg. 366]

PART 966—ORANGES GROWN IN CALIFORNIA OR IN ARIZONA

LIMITATION OF SHIPMENTS

§ 966.512 *Orange Regulation 366*—(a) *Findings.* (1) Pursuant to the provisions of Order No. 66, as amended (7 CFR Part 966; 14 F. R. 3614), regulating the handling of oranges grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Orange Administrative Committee, established under the said amended order, and upon other available information, it is hereby found that the limitation of the quantity of such oranges which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of oranges, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Orange Administrative Committee on April 5, 1951, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of oranges grown in the State of California or in the State of Arizona which may be handled during the period beginning 12:01 a. m., P. s. t., April 8, 1951, and ending at 12:01 a. m., P. s. t., April 15, 1951, is hereby fixed as follows:

(i) *Valencia oranges.* (a) Prorate District No. 1: 2333 boxes;

(b) Prorate District No. 2: No movement;

(c) Prorate District No. 3: 80 carloads;

(d) Prorate District No. 4: No movement.

(ii) *Oranges other than Valencia oranges.* (a) Prorate District No. 1: Unlimited movement;

(b) Prorate District No. 2: 1,200 carloads;

(c) Prorate District No. 3: Unlimited movement;

(d) Prorate District No. 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "varieties," "carloads," and "prorate base" shall have the same meaning as when used in the said amended order; and the terms "Prorate District No. 1," "Prorate District No. 2," "Prorate District No. 3," and "Prorate District No. 4" shall each have the same meaning as given to the respective terms in § 966.107, as amended (15 F. R. 8712), of the current rules and regulations (7 CFR 966.103 et seq.), as amended (15 F. R. 8712).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

TITLE 8—ALIENS AND NATIONALITY

Chapter IV—Displaced Persons Commission

PART 702—SELECTION AND ELIGIBILITY

SUBVERSIVES AND UNDESIRABLES

Section 702.8 of Chapter IV, Title 8, is hereby amended to read as follows:

§ 702.8 *Subversives and undesirables.* No person shall be eligible to receive the benefits of the act, who

(a) Is or has ever been a member of the Communist, Nazi or Fascist parties, or of a political or subversive group of an ideological character similar to that of the aforementioned parties; or

(b) Adheres to, advocates, or follows or who has adhered to, advocated, or followed, the principles of any political or economic system or philosophy directed toward the destruction of free competitive enterprise and the revolutionary overthrow of representative government; or

(c) Is or has been a member of any organization which has been designated by the Attorney General of the United States as a Communist organization; or

(d) Is or has been a member of or participated in any movement which is or has been hostile to the United States or the form of government of the United States; such a movement includes but is not limited to the Communist, Nazi or Fascist parties or political or subversive groups of an ideological character similar to that of the aforementioned parties; or

(e) Advocated or assisted in the persecution of any person because of race, religion or national origin; or

(f) Has voluntarily borne arms in armed forces or auxiliary organizations against the United States or its Allies on the Western Front (including North Africa and Italy) during that period of World War II beginning on December 8, 1941; a person, other than a German national, shall not be deemed so to have served voluntarily if he establishes that he was compelled against his will to serve in armed forces or auxiliary organizations, against the United States or its Allies on the Western Front. A person, other than a German national, who establishes that he has been inducted into the armed forces (1) when under 16 years of age or (2) by operation of law, official act, proclamation, order or decree, may be deemed, prima facie, not to have served voluntarily in such armed forces during the period covered by such compulsory service. The term "borne arms" shall apply to persons who served in armed forces or auxiliary organizations.

(g) The terms "member of" or "participated in" where used in paragraphs (a) and (d) of this section shall include only membership or participation which is or was voluntary, and shall not include membership or participation which is or was solely (1) when under sixteen years of age, (2) by operation of law, or (3) for purposes of obtaining employment, food rations, or other essentials of living, and where necessary for such purposes: *Provided, however,* That nothing in this section shall affect the prohibition contained in section 13 of the act against the issuance of visas under the act to any person who is or has been a member of the Communist Party.

(h) The terms "adheres to", "adhered to", "advocates", "advocated", "follows", "followed", where used in paragraph (b) of this section shall include only adherence, advocacy, or following which is or was voluntary, and shall not include adherence, advocacy or following which is or was solely (1) when under sixteen years of age, (2) by operation of law, or (3) for purposes of obtaining employment, food rations, or other essentials of living, and where necessary for such purposes.

The foregoing amendment shall be effective upon the date of publication in the FEDERAL REGISTER. Compliance with the provisions of section 4 (a) of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003) as to notice of proposed rule making is found to be contrary to the public interest because Public Law 774, 80th Congress (62 Stat. 1009), as amended by the act of June 16, 1950, which was implemented by the regulations which became effective on June 17, 1950, and which is further implemented by the foregoing amendment, and the execution of functions of the Displaced Persons Commission under that statute would be unduly impeded by such notice. For the same reason it is found that the provisions of section 4 (c) of the Administrative Procedure Act providing for delayed effective date are inapplicable.

(Sec. 8, 62 Stat. 1012, as amended; 50 U. S. C. App., 1957. Interprets or applies Sec. 13, 62 Stat. 1014; 50 U. S. C. App., 1962)

JOHN W. GIBSON,
Chairman, Displaced Persons Commission.

[F. R. Doc. 51-4167; Filed, Apr. 6, 1951; 8:51 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter F—Personnel

PART 571—RECRUITING AND ENLISTMENTS

REGULAR ARMY AND AIR FORCE

Section 571.2 (h) (8) is amended as follows:

§ 571.2 *Qualifications for enlistment.*

* * *

(h) *Classes ineligible for enlistment.*

* * *

(8) (i) *Conviction or imprisonment for other than a felony.* The Adjutant General may authorize enlistment in the Regular Army of especially desirable men who have been tried, convicted, and or imprisoned under the sentence of a civil court for other than a felony and men who have had frequent difficulty with law enforcement agencies or who have criminal tendencies, a history of antisocial behavior, or who are of questionable moral character, and who have been unconditionally released from civil control for a minimum period of 6 months. An investigation will be made and a report, including letters from at least three reputable citizens who are acquainted with the individual, will be submitted through channels to The Adjutant General, Washington 25, D. C., Attention: AGSE–W. The report of investigation will include information concerning the applicant's current character and habits; date unconditionally released from civil control; a statement that the offense for which convicted was not a felony; his reputation in the community in which he resides; and a record of his employment since his release from the control of civil authorities, as well as the recommendation of the investigating officer. If a waiver is granted, notation thereof will be made under item 40 of the enlistment record, and a copy of the report of investigation on which waiver is predicated will be attached to the original copy of the enlistment record. No waivers will be granted for Air Force enlistees.

(ii) *Juvenile delinquency and minor traffic violations.* Waivers also may be granted in meritorious cases of male applicants, in which juvenile delinquency or imprisonment for minor traffic violations are involved. Waivers of offenses involving juvenile delinquency or minor traffic violations may be granted by the commanding generals of major commands for Army applicants, and by the Chief of Staff, United States Air Force, for Air Force applicants, if as a result of investigation it is determined that the applicant will be an asset to the service. The investigation will include letters from at least three reputable citizens who are acquainted with the individual, information concerning the applicant's current character and habits, his reputation in the community in which he resides, and a record of his employment since his release from the control of civil authorities, as well as the recommendations of the investigating officer. Only those juvenile delinquents and minor traffic violators whose cases are individually determined to be especially meritorious and who have served the period of parole or probation decreed by the court plus a minimum period of 6 months as law-abiding members of a civil community will be accepted. If waiver is granted, notation thereof will be made under "Remarks" on the enlistment record and a copy of the report of investigation on which waiver is predicated will be attached to the original enlistment record. A record of adjudication of conduct by a juvenile court in the State of Ohio under Section 1639–30, Supplement to the General Code of Ohio, 1936, June 1938, or by a juvenile court of any other State having a similar law is not a bar to enlistment. Recruiting officers will scrutinize carefully the juvenile court record of an applicant for enlistment to determine whether he is of good character and otherwise eligible for enlistment and will submit to higher authority any case in which doubt arises as to the effect of a particular statute.

(iii) *Contracts.* Army commanders and oversea commanders will not enter into a contract, implied or otherwise, to effect the enlistment of an individual whose actions have brought him into the probative custody of a court and whose subsequent conduct has not been of such worthy caliber as to have caused the court having jurisdiction to release him from the unexpired period of probation prior to the time of application for enlistment.

* * * * *

[C1, SR 615–105–1, Mar. 22, 1951] (Sec. 6, 39 Stat. 169, as amended; 10 U. S. C. 42)

[SEAL] EDWARD F. WITSELL,
Major General, U. S. Army,
The Adjutant General.

Chapter VII—Department of the Air Force

Subchapter F—Reserve Forces

PART 861—OFFICERS' RESERVE

PART 864—ENLISTED RESERVE

IDENTIFICATION CARDS

1. Section 861.12 is amended by changing paragraph (b), adding subparagraph (3) to paragraph (d), and changing subparagraph (2) of paragraph (e) as follows:

§ 861.12 *Identification cards.* * * *

(b) *Application.* Air Force Form 279, "Application for Identification Card," will be used by officers in applying for an identification card.

NOTE: The term "officer" used in this section refers to both commissioned and warrant officers.

* * * * *

(d) *To whom issued.* * * *

(3) *Personnel on the Temporary Disability Retired List.* DD (formerly NME) Form 2AF (Res) will be issued to retired officers of the Air Force of the United States (AFUS) whose names have been placed on the Temporary Disability Retired List. The words "Temporary AFUS Retired" will be stamped plainly across the Department of the Air Force seal on the right side of the front of the card. The date of expiration will be a date which is five years from the date the name was placed on the Temporary Disability Retired List. All personnel are enjoined to return the identification card to the Air Adjutant General when their names are removed from the list.

(e) *Issue and replacement procedures.*

* * *

(2) *Applications submitted to the Air Adjutant General.* Retired Air Force Reserve officers, retired Air Force of the United States officers, personnel on the Temporary Disability Retired List, and officers of the Honorary Air Reserve will submit Air Force Form 279, "Application for Identification Card," to Headquarters United States Air Force, Air Adjutant General, Attention: Personnel Records Service Division, Washington 25, D. C., who will issue the instructions, prescribe the action to be taken, and arrange for the issuance of the card.

* * * * *

[AFR 45–47B] (R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a. Interprets or applies secs. 4, 6, 62 Stat. 89, 91; 10 U. S. C., Sup., 422, 5 U. S. C., Sup., 626k)

2. Section 864.15 is added to Part 864 as follows:

§ 864.15 *Identification cards.* Recipients must carry their identification cards on their persons on all official occasions.

(a) *Authorized form.* DD (formerly NME) Form 2AF (Res) is authorized for issue to airmen of the Air Force Reserve and will replace all identification cards previously issued by military agencies.

(b) *Application.* AF Form 279, "Application for Identification Card," will be used by airmen in applying for an identification card.

(c) *Delegation of authority.* Authority to issue DD (formerly NME) Form 2AF (Res) to airmen of the Air Force Reserve not on extended active duty is delegated to the Commanding General, Continental Air Command, who may redelegate the authority to subordinate commanders as required.

(d) *To whom issued—*(1) *Airmen of the Air Force Reserve.* DD (formerly NME) Form 2AF (Res) will be issued to airmen of the Air Force Reserve as follows:

(i) Airmen not on extended active duty when located within the Continental limits of the United States, or within the limits of oversea bases and commands.

(ii) Retired airmen of the Air Force Reserve: The word "Retired" will be stamped plainly across the Department of the Air Force seal on the right side of the front of the card.

(2) *Retired Airmen of the Air Force of the United States.* DD (formerly NME) Form 2AF (Res) will be issued to retired airmen of the Air Force of the United States (AFUS). The words "AFUS Retired" will be stamped plainly across the Department of the Air Force seal on the right side of the front of the card.

(3) *Personnel on the Temporary Disability Retired List.* DD (formerly NME) Form 2AF (Res) will be issued to retired airmen of the Air Force of the United States (AFUS) whose names have been placed on the Temporary Disability Retired List. The words "Temporary AFU Retired" will be stamped plainly across the Department of the Air Force seal on the right side of the front of the card. The date of expiration will be a date which is five years from the date the name was placed on the Temporary Disability Retired List. All personnel are enjoined to return the identification card to the Air Adjutant General when their names are removed from the list.

(e) *Issue and replacement procedures—*(1) *Applications submitted to Regular organization.* Airmen not on extended active duty will submit Air Force Form 279, "Application for Identification Card," to the Regular Air Force organizations having custody of their field personnel files. (Application blanks may be obtained at any Air Force activity). Upon receipt of applications, issuing authorities will furnish appropriate instructions regarding specifications for photographs and identification information which must appear on the cards. Blank identification cards with appropriate instructions may be furnished applicants. Applicants will enter the necessary data; obtain fingerprints on the cards, from any civil or military authority with appropriate facilities; and one photographic print, size 1 x 1¼ inches; and will forward the cards and photographs to the issuing authorities for countersigning and processing. The completed cards will be returned to the applicants through the Regular Air Force organizations having custody of the applicants' field personnel files.

(2) *Applications submitted to the Air Adjutant General.* Retired airmen of the Air Force Reserve, retired airmen of the Air Force of the United States, and personnel on the Temporary Disability Retired List will submit Air Force Form 279, "Application for Identification Card," to Headquarters United States Air Force, Air Adjutant General, Attention: Personnel Records Service Division, Washington 25, D. C., who will issue the instructions, prescribe the action to be taken, and arrange the issuance of the card.

(3) *Obtaining photographs.* Airmen may obtain photographs without cost at any Army or Air Force installation having appropriate photographic facilities, otherwise photographs must be obtained at no cost to the Government.

(4) *Loss and replacement.* Airmen will report loss of identification cards promptly to the issuing authority, through channels, setting forth the circumstances. If the lost card is not recovered in 30 days, the airman may apply for a replacement. Procedures to be followed in applying for replacement are the same as in applying for the original card except reference will be made to the report of loss.

(f) *When issued.* Upon application:

(1) At time of initial enlistment.

(2) When reenlisted at expiration of enlistment.

(3) When retired.

(4) To replace a lost or multilated card.

(5) To correct an error.

(6) To change identification data other than change in grade or change in weight due to normal gains and losses.

(g) *Surrender—*(1) *When surrendered.* Airmen will surrender DD (formerly NME) Form 2AF (Res):

(i) Upon discharge.

(ii) Upon expiration of enlistment.

(iii) Upon retirement.

(2) *Cards previously issued.* Identification cards previously issued by military agencies will be surrendered by airmen upon receipt of DD (formerly NME) Form 2AF (Res).

(3) *Cards not to be surrendered.* Airmen will not be required to surrender DD (formerly NME) Form 2AF (Res) when called to extended active duty even though they subsequently are issued another type of card.

[AFR's 45–47; 45–47B] (R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a. Interprets or applies secs. 4, 6, 62 Stat. 89, 91; 10 U. S. C., Sup., 422, 5 U. S. C., Sup., 626k.)

[SEAL] K. E. THIEBAUD,
Colonel, U. S. Air Force,
Air Adjutant General.

[F. R. Doc. 51–4143; Filed, Apr. 6, 1951; 8:46 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 17]

CPR 17—GASOLINES, NAPHTHAS, FUEL OILS AND LIQUEFIED PETROLEUM GASES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Ceiling Price Regulation 17 is hereby issued.

STATEMENT OF CONSIDERATIONS

The rapidity with which the inflationary pressures incident to the outbreak in Korea and the announced stepped up rearmament program were being reflected in price increases throughout the economy during the latter part of 1950 required immediate action in the field of direct controls. Accordingly, a General Ceiling Price Regulation was issued on January 26, 1951 to stop the mounting inflation. However, it was realized at the time that a single, comprehensive regulation could hardly cope with the multitude of prices and the diverse practices of many sellers and industry. It was, therefore, the express intent of the Director of Price Stabilization to replace the General Ceiling Price Regulation as rapidly as possible with specific price regulations tailored to meet the needs of different industries.

Petroleum products are extensively used throughout the nation by the armed forces, and for many civilian purposes, including the carrying on of industrial processes essential to national defense. It is of the utmost importance that no obstruction be placed in the normal flow of these products through the industrial machine. The provisions of the General Ceiling Price Regulation are particularly unsuited for the pricing practices and problems of the petroleum industry and many requests have been received from members of the industry for immediate action to remove the products of the industry from the coverage of the General Ceiling Price Regulation. Accordingly, five regulations covering the products of the petroleum industry have been formulated, each of which corresponds, as consistently as administratively practicable, to the customary marketing structure of the industry. These regulations are as follows: (1) Crude Oil; (2) Gasolines, Naphthas, Fuel Oils, and Liquefied Petroleum Gases; (3) Asphalt and Asphalt Products; (4) Lubricating Oils, Waxes and certain related products; (5) Sales of Petroleum Products at retail establishments.

All of these proposed regulations, at the present time, are of the formula freeze type although it is the intention of the Director of Price Stabilization to establish specific area price ceilings for as many of these products as is feasible. Common to them all is a base period of December 19, 1950, to January 25, 1951. In general, the level of prices established by the adoption of this period are equal to or less than the level of prices prevailing for petroleum products during the year 1948 and part of 1949. Where prices are higher for certain products, the increases reflect for the most part higher labor costs which have been experienced since the aforementioned period.

This Ceiling Price Regulation No. 17 covers sales at all distribution levels, except service station sales at retail, for the principal products of the petroleum industry including automotive and aviation gasoline, residual and distillate fuel oils, naphthas, solvents and natural gasoline as previously indicated. It does not cover crude oil, asphalt and asphalt products, lubricating oils and related products which are covered by separate price regulations corresponding to the normal marketing practices of the petroleum industry which customarily segregate these products in the marketing structure. By removing these products from the coverage of the General Ceiling Price Regulation, the segment of the petroleum industry affected by this regulation is provided with pricing methods and techniques which conform, within the framework of general price controls, to customary practices in the industry.

Certain sales or exchanges are excluded from the coverage of the regulation. Sales between affiliated corporations and exchanges of petroleum products between refiners or other petroleum sellers are excluded. In addition, 100 octane aviation gasoline sales to defense agencies, certain specialized hydrocarbon fractions and inter-refinery sales of petroleum fractions when such sales are made at the direction of the Petroleum Administrator for Defense are excluded. These exclusions have been made to facilitate transfers of petroleum products in accordance with the customary practice of the industry in meeting varying market conditions, and to

stimulate the industry in the expansion of new facilities and modifications of existing facilities necessary to meet the intensified demand for special hydrocarbon fractions attendant upon the defense program. The regulation establishes a seller's ceiling price for a petroleum product at the highest price charged by him to a purchaser of the same class for a product during the period December 19, 1950, to January 25, 1951, inclusive. Where a seller has no price based upon an actual sale during the base period, his ceiling price is predicated upon his highest offering price during the base period to a purchaser of the same class.

Thus the basic provisions of this regulation are the same as the basic provisions of the General Ceiling Price Regulation. However, the General Ceiling Price Regulation has in a number of situations frozen into ceilings a set of badly distorted price relationships. Representative members of the industry have stated such ceiling price distortions will result in dislocations of supply vital to the defense program. The latter view has been supported by the Petroleum Administrator for Defense which is the government agency charged with the responsibility for assuring adequate supplies of petroleum products for the economy. Accordingly, the regulation makes provision for adjustment of individual seller's prices:

(1) Where a seller's ceiling price is inconsistent with his customary price practice or price relationship to other sellers, or his ceiling prices are not in their customary relationship to other prices in his market area due to temporary conditions;

(2) Where a seller demonstrates that an existing ceiling price threatens a local shortage in the supply of a petroleum product, and such shortage can be alleviated consistent with the purposes of the Defense Production Act of 1950; and

(3) In connection with government contracts, where a seller believes that his ceiling price impedes the defense program.

Prior to the formulation of this regulation the Director of Price Stabilization advised with a large number of persons representing a substantial part of the industry and the regulation has been reviewed by the National Petroleum Advisory Committee and the Petroleum Administration for Defense.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950; to prices prevailing during the period from May 24, 1950, to June 24, 1950, inclusive; to relevant factors of general applicability.

REGULATORY PROVISIONS

INTRODUCTION

ARTICLE I—GENERAL PROVISIONS

Sec.
1 Products covered.
2 Transactions and persons covered.
3 Geographical coverage.
4 Products and transactions excepted from the General Ceiling Price Regulation.
5 Exports.
6 Imports.
7 Secret contracts.
8 Transfers of business or stock in trade.
9 Adjustable pricing.
10 Petitions for amendment.
11 Applications for adjustment.
12 Price revisions incident to orders establishing specific prices.
13 Shifts which must be reported.
14 Records.
15 Compliance with this regulation required.
16 Definitions.

ARTICLE II—CEILING PRICES

17 Aviation Gasoline.
18 Automotive and Marine Gasoline.
19 Petroleum Naphthas and Solvents.
20 Kerosenes, Tractor Fuels, Distillates and Heating Oils.
21 Residual Fuels.
22 Liquefied Petroleum Gases.
23 Natural Gasoline.
24 All other petroleum products included under this regulation.

ARTICLE III—INCREASES PERMITTED OR REDUCTIONS REQUIRED

25 Transportation.
26 Taxes.
27 Sales in territories of the United States.

ARTICLE IV—FINAL PRICING METHOD

28 Seller unable to determine ceiling price.

AUTHORITY: Sections 1 to 28 issued under Sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

ARTICLE I

SECTION 1. *Products covered.* This regulation covers the following products:

Any fraction of crude petroleum which is a source of or is used to produce any of the products listed below.

Any fraction of petroleum which is sold for the same end use as any of the products listed below.

Liquefied petroleum gases
Natural gasoline
Aviation gasoline
Automotive and marine gasoline
All petroleum naphthas and solvents
Benzine, toluenes and xylenes
Stove and lamp gasoline and pressure appliance fuel
Condensate or distillates extracted in natural gasoline or cycling plants or not moved as crude petroleum
Jet propulsion fuel
Tractor fuel
Kerosene
Range oil, stove oil or heater oil
All other distillate burning, heating or fuel oils
Diesel fuels
Gas oils
Gas enrichment oil
Residual fuel oils and blends thereof with distillate fuel oils

Crude petroleum when sold: (1) to a processor for use as gas enrichment oil, (2) to a tank wagon reseller by sellers other than crude oil producers for resale to a consumer for a purpose other than the production of more than one petroleum fraction therefrom, or (3) to a consumer for a purpose other than the production of more than one petroleum fraction therefrom; provided, however, this regulation shall not be applicable to sales of crude petroleum to a refiner or to a person using such crude petroleum in oil and gas field operations.

SEC. 2. *Transactions and persons covered.* This regulation covers all types of sales and deliveries of the products listed in Sec. 1 either by refiners, producers, processors, natural gasoline or cycling plant operators, blenders, resellers, or any other person, with the following exceptions:

(a) Retail sales at retail establishments, including transactions through stationary retail facilities which are in conjunction with bulk plants, terminals or refineries.

(b) Exchanges of petroleum products between refiners or other petroleum sellers, provided prices at which such sales are made do not affect the level of existing ceiling prices.

(c) Sales between corporations when one is a wholly owned subsidiary of the other, or when both are wholly owned subsidiaries of a third corporation, and sales between such other affiliated or controlled corporations as are especially excepted by order in writing of the Director of Price Stabilization or his duly authorized representative, provided prices at which such sales are made do not affect the level of existing ceiling prices.

(d) Sales of aviation gasoline of 100 octane ASTM or higher when made to a defense agency or to any person for use in connection with a defense contract or subcontract.

(e) All sales of benzine, toluene and xylenes.

(f) Interrefinery sales of petroleum fractions when such sales are made at the direction of the Petroleum Administration for Defense.

(g) Sales of special hydrocarbon fractions or liquefied petroleum gas when sold for use in manufacturing the following products or components of such products:

(1) Synthetic rubber.

(2) Aviation gasoline of 100 octane ASTM or higher, toluene, benzine or their components, when sold to a defense agency or to any person for use in connection with a defense contract or subcontract.

SEC. 3. *Geographical coverage.* The provisions of this regulation are applicable to the United States, its territories and possessions and the District of Columbia, except the Canal Zone.

SEC. 4. *Products and transactions excepted from the General Ceiling Price Regulation.* Any products or transactions excepted from the coverage of this regulation are also exempt from the provisions of the General Ceiling Price Regulation.

SEC. 5. *Exports.* The ceiling price at which a person may export any product covered by this regulation shall be determined by this regulation plus the additions permitted for export sales of the commodities covered by this regulation by any applicable export regulation which may hereafter be issued.

SEC. 6. *Imports.* Ceiling prices in this regulation shall apply even though the product involved originated outside of the area covered by the regulation and was imported into such area.

SEC. 7. *Secret contracts.* The provisions of this price regulation shall not apply to sales of any product pursuant to a contract which is officially classified as "secret" or above.

SEC. 8. *Transfers of business or stock in trade.* If the business, assets or stock in trade of any business are sold or otherwise transferred after January 26, 1951, and the transferee carries on the business, or continues to deal in the same type of products, in an establishment separate from any other establishment previously owned or operated by him, the ceiling prices of the transferee shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available, or turn over, to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record provisions of this regulation. If the prices for the establishment are not in line with prices which would be arrived at under the in-line ceiling price method of Article II, the transferee may nevertheless arrive at his ceiling prices by use of this "in-line method."

SEC. 9. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the ceiling price in effect at the time of delivery. Where a petition for adjustment or amendment is pending the buyer and seller may agree that prices for deliveries made during the pendency of the petition shall be determined in accordance with the disposition of the petition.

SEC. 10. *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Price Procedural Regulation No. 1.

SEC. 11. *Applications for adjustment.* (a) The Director of Price Stabilization may adjust by order any ceiling price established under this regulation for a seller or group of sellers or for a general area when it appears:

(1) *Local shortages.*

(i) That there exists or threatens to exist in a particular locality a shortage in the supply of a petroleum product which aids directly in the present defense program or is essential to a standard of living consistent with the maintenance of the defense program;

(ii) That such local shortage will be substantially reduced or eliminated by adjusting the ceiling prices of such seller and of like sellers for such product; and

(iii) That such adjustment will not create or tend to create a shortage, or a need for increase in prices, in another locality, and will effectuate the purposes of the Defense Production Act of 1950.

(iv) Applications for adjustment for local shortages shall be filed with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C.

(2) *Depressed price areas and price inequities.*

(i) That due to temporary conditions a seller has a ceiling price which is not in line with his customary pricing practice or with his customary price relationship with other sellers in the same marketing area, or

(ii) That prices charged for petroleum products in a particular area have customarily followed the pattern of prices in nearby or surrounding areas, but due to temporary conditions ceiling prices have been established by this regulation which are not in line with the level of prices which would have prevailed had the area been free to adjust itself to normal conditions.

(b) The seller in applying under (a) (2) (i) or (a) (2) (ii) above shall show to the satisfaction of the Director:

(1) The basis upon which it is concluded that the ceiling prices are below normal, with a statement of how long the inequity has been in existence.

(2) The ceiling prices proposed.

(3) Information supporting why the proposed ceiling prices would be normal.

(4) A statement that the proposed ceiling prices will be in line with the level of ceiling prices otherwise established by the regulation.

(5) Applications for adjustment for depressed price areas and price inequities shall be filed with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C.

(c) *Government contracts.* Any person who has entered into or proposes to enter into a contract with an agency of the United States Government who believes that a ceiling price contained in this regulation impedes or threatens to impede production, manufacture or distribution of a commodity essential to the defense program may file an application for adjustment with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C.

SEC. 12. *Price revisions incident to orders establishing specific prices.* Notwithstanding the provisions of this regulation, the Director of Price Stabilization may by written order provide specific ceiling prices to replace ceilings established by this regulation.

SEC. 13. *Shifts which must be reported.* Where a seller has established a ceiling price on a delivered-at-destination basis at a given point for a particular petroleum product to a purchaser and thereafter sells such purchaser on an f. o. b. shipping point price basis he shall report such shift to the Director of Price Stabilization within thirty days after the date such sale is made, if, but only if, the effect of selling on an f. o. b. shipping point price basis is to increase the laid-down cost to the purchaser above the seller's delivered-at-destination ceiling price to such purchaser.

SEC. 14. *Records.* (a) The following records must be preserved and kept available for examination by the Director of Price Stabilization:

(1) Records in the seller's possession showing the prices charged by him for the petroleum products which he sold or offered for sale in the base period. In addition, the seller must prepare within 90 days after the effective date of this regulation and preserve a statement of any of his customary allowances, discounts, and other price differentials.

(2) Records indicating clearly the basis upon which the seller determined the ceiling price for any petroleum product not sold or offered for sale by him during the base period.

(3) Records, for a period of two years, of the kind the seller customarily keeps, showing the prices which the seller charges on sales of products covered by this regulation.

(b) Compliance with these record keeping provisions shall be deemed compliance with the record keeping requirements of the General Ceiling Price Regulation during the period when petroleum products were covered by that regulation.

SEC. 15. *Compliance with this regulation required.* (a) *Prohibitions against selling or delivery of petroleum products at prices above the ceiling.* On and after the effective date of this regulation regardless of any contract or other obligation, no person shall sell or deliver and no person shall buy or receive in the course of trade or business any petroleum product covered by this regulation at prices higher than the ceiling prices fixed by this regulation, and no person shall agree, offer, solicit, or attempt to do anything prohibited by this section. Prices lower than the ceiling prices may be charged, demanded, paid, or offered.

(b) *Evasion.* The ceiling prices established by this regulation shall not be evaded either by direct or indirect methods in connection with the purchase, sale, delivery or transfer of petroleum products alone or in conjunction with any other materials, or by way of any commission, service, transportation, or any other charge, or discount, premium or other privilege, or by tie-in agreement or other trade understanding, or by a change in the quality of the product, or otherwise, except when such change in quality results from order of an agency of the United States Government.

(c) *Enforcement.* Any person who violates any provision of this regulation is subject to the criminal penalties, civil enforcement actions, and suits for damage provided for by the Defense Production Act of 1950.

SEC. 16. *Definitions.* (a) *"Person"* includes an individual, corporation, partnership, association, or any other organized group of persons or legal successors and representatives of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing.

(b) *"Product of the same grade."* For a product of a particular seller to be regarded as of the same grade as the product of another seller it must cus-

tomarily have been so regarded in trade practice in the general area where such products are sold.

(c) *"Contract"* means an agreement, the existence of which is established by written evidence.

(d) *"Base Period"* means the period from December 19, 1950 to January 25, 1951, inclusive.

(e) *"Tank Wagon Price"* means a particular price level as customarily established by a seller, regardless of the type or size of equipment that may be used for making deliveries, as distingulshed from the retail service station price, or the "tank car" price, or other large lot quantity price levels. The tank wagon price is a delivered-at-destination price. However, if at a particular bulk plant or terminal the operator had a tank wagon price to consumers who picked up their supply at such bulk plant or terminal then the operator thereof may continue to charge or offer the tank wagon price to consumers at the particular bulk plant or terminal.

(f) *"Retail establishment"* means a store, shop, garage, service station (land or marine) or other stationary place of business at which the major portion of the sales of petroleum products is sold in customary small quantities to consumers. Any facility making deliveries of fuel into fuel tanks of aircraft at an airport (or other landing area) shall be considered a retail establishment for the purpose of this regulation.

(g) *"Defense Agency."* This term as used in this regulation means the Department of Defense (including the Department of the Army, the Department of the Navy, and the Department of the Air Force), the Maritime Administration of the Department of Commerce, the United States Coast Guard, and the Atomic Energy Commission.

(h) *"Defense contract"* means any purchase order or written agreement with a Defense Agency.

(i) *"Subcontract"* means any purchase order, or agreement to perform all or any part of the work required under a defense contract or to make or furnish any commodity needed for the performance of a defense contract.

(j) *"Delivery point"* for sales made at the tank wagon price level whenever referred to in this regulation means the customary tank wagon price area of the seller. If a seller customarily maintains different price areas within the area customarily supplied from a bulk or distributing plant, such prices areas being reflected by the seller on a stated price or differential basis, then each such price area shall be interpreted as a delivery point and the ceiling price of each seller in each such price area shall reflect his customary differentials or differences in prices.

(k) *"Offering price."* The price at which a product was offered means the price shown in the seller's price list, or if a particular price was not included therein, or if he had no price list, the price at which he offered products in any other written manner. Such prices shall be subject to seller's customary allowances, discounts, and price differentials.

(l) *"Sale."* This term for purposes of using the "ceiling price based on sales" method of Article II shall include:

(1) Sales in the base period pursuant to oral or written contracts, including spot sales, made during such period.

(2) Written contracts made during the base period whether or not any deliveries were made thereunder, and written contracts made during the period June 1, 1950, to December 19, 1950, inclusive, under which no deliveries were made in the base period but which provided for performance to begin during or after the base period.

(3) Deliveries made during the base period under a contract made between June 1, 1950, and December 19, 1950, if such contracts were adjustable to reflect market conditions during the base period, or in the case of tank wagon resellers if such contracts provided for varying the price to the reseller in accordance with a stipulated posted market price (or prices) at the point or points where such buyer resells.

Provided, however, that in all cases deliveries made in the base period under contracts entered into prior to June 1, 1950, shall not be considered as a "sale," unless the buyer and seller agree to continue such contracts, in which case the ceiling price may be established on the basis of such contracts.

(m) *"Purchaser of same class"* refers to the practice adopted by the seller in setting different prices for a product for sales to purchasers performing different functions (for example, refiner; jobber; distributor, commercial, industrial or private consumer; service station tank car dealer; divided or undivided tank wagon dealer; etc.), or for purchasers performing the same functions but located in different areas or buying in different quantities or grades or under different conditions of sale. Price is prima facie evidence but not conclusive evidence to be considered in determining if a purchaser belongs to a particular class; however, a lower price to a particular purchaser which was to meet competition and was otherwise inconsistent with the seller's practice in setting the same price to purchasers in the same functional class shall neither result in placing the particular purchaser in a lower price class nor be considered in determining a seller's ceiling price.

(n) *"Posted purchase price"* means a price schedule posted by a purchaser who, during the period December 19, 1950, to January 25, 1951, inclusive, actually purchased any of the products covered in Sec. 23 produced from any field, or delivered or tendered by a natural gasoline or cycling plant operator, refiner, blender, reseller or any other person and to which purchase the posted price was applicable.

ARTICLE II—CEILING PRICES

NOTE: In determining ceiling price the ceiling price shall reflect customary discounts, allowances and differentials based upon terms and conditions of sale or delivery.

SEC. 17. *Aviation gasoline.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of aviation gasoline to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of aviation gasoline to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for aviation gasoline under (1) or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for aviation gasoline which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch. Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 18. *Automotive and marine gasoline.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of automotive or marine gasoline to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point

during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of automotive or marine gasoline to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for automotive or marine gasoline under (1) or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for automotive or marine gasoline which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, inclusive, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 19. *Petroleum naphthas and solvents.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of petroleum naphthas or solvents to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1) the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of petroleum naphthas or solvents to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for petroleum naphthas or solvents under (1), or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for petroleum naphthas or solvents which is not in line with the price he would have arrived at by use of his customery pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 20. *Kerosenes, Tractor Fuels, Distillates and Heating Oils.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of kerosene, tractor fuel, distillate or heating oil to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of kerosene, tractor fuel, distillate or heating oil to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for kerosene, tractor fuel, distillate or heating oil under (1) or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for kerosene, tractor fuel, distillate or heating oil which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 21. *Residual fuel oils and blends thereof with distillate fuel oils.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of residual fuel oil to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of residual fuel oil to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for residual fuel oil under (1) or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for residual fuel oil which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he

may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* (See Section 28 of this regulation.)

SEC. 22. *Liquefied petroleum gases.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of liquefied petroleum gas to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of liquefied petroleum gas to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for liquefied petroleum gas under (1) and (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling prices.* If under this method (i) of pricing a seller arrives at a ceiling price for a liquefied petroleum gas which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 23. *Natural gasoline.* (a) *Specific prices.* (Reserved.)

(b) *Posted prices:*

(1) In areas where natural gasoline is customarily purchased and sold on the basis of posted purchase prices the ceiling price for natural gasoline so sold and purchased shall be:

(i) *Posted purchase price.* The ceiling price for natural gasoline from any given field shall be the posted purchase price as of January 25, 1951, for said field.

(ii) *Two or more posted purchase prices.* Where there was for any field more than one posted purchase price, the ceiling price for natural gasoline shall be the highest of the posted purchase prices.

(iii) *Contract in excess of posted purchase price.* Notwithstanding (i) and (ii), above where a contract was in effect on January 25, 1951, and was made prior to December 9, 1950, for the purchase of natural gasoline at the receiving tank at a price in excess of the highest posted purchase price for the given field and deliveries were made prior to January 25, 1951, in accordance with such contract, then the price actually charged on January 25, 1951, shall be the ceiling price for the natural gasoline covered by the contract. On termination of the contract establishing the ceiling price for the production involved, any purchaser may purchase the production involved at the price charged under the contract on January 25, 1951, regardless of any posted purchase price.

(c) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of natural gasoline to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of natural gasoline to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine a ceiling price for natural gasoline under (1) or (2) above, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling price.* If under this method (i) of pricing a seller arrives at a ceiling price for natural gasoline which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final pricing method.* See Section 28 of this regulation.

SEC. 24. *All other petroleum products included under this Regulation.* (a) *Specific prices.* (Reserved.)

(b) *Formula prices:*

(1) *Ceiling price based on sales.* The ceiling price for each seller at each shipping or delivery point shall be the highest price charged at that point by him during the period December 19, 1950, to January 25, 1951, inclusive, for a sale of a particular grade of any other petroleum product included under this Regulation but not listed under one of the foregoing sections to a purchaser of the same class.

(2) *Ceiling price based on offering price.* If a seller is unable to determine a ceiling price under (1), the ceiling price for such seller at each shipping or delivery point shall be the highest offering price at the shipping or delivery point during the period December 19, 1950, to January 25, 1951, for a sale of a particular grade of any other petroleum product included under this Regulation but not listed under any of the foregoing sections to a purchaser of the same class.

(3) *Ceiling price based on competitive or in-line ceiling price.*

(i) *Ceiling price of another seller.* When a seller at a given shipping or delivery point is unable to determine under (1) or (2) above a ceiling price for any other petroleum product included under this Regulation but not listed under any of the foregoing sections, his ceiling price at the particular shipping or delivery point shall be the highest ceiling price of any seller of the same class to a purchaser of the same class for the same shipping or delivery point. This method of determining a ceiling price cannot be used unless the seller's records show that for the purpose of such sale he has adopted as his ceiling the ceiling price of such other seller.

(ii) *In-line ceiling prices.* If under this method (i) of pricing a seller arrives at a ceiling price for a petroleum product included under this Regulation but not listed under any of the foregoing sections which is not in line with the price he would have arrived at by use of his customary pricing practices in the same general area during the base period December 19, 1950, to January 25, 1951, he may nevertheless sell at a price in line with his price for the product at other comparable points which reflects his customary pricing practices. The seller shall within 15 days after making a sale file this in-line price with the Petroleum Branch, Office of Price Stabilization, Washington 25, D. C., stating his proposed ceiling price and in what way the ceiling price determined according to the price of a competitive seller of the same class is inconsistent with the customary pricing practices of the seller. Such price shall be the seller's ceiling price for the particular product unless it is disapproved in writing or a substitute price is established by the Office of Price Stabilization. A ceiling price established under this section may be changed at any time by order of the Office of Price Stabilization.

(4) *Final Pricing method.* See Section 28 of this regulation.

ARTICLE III—INCREASES PERMITTED OR REDUCTIONS REQUIRED

SEC. 25. *Transportation.* (a) There may be added to the applicable ceiling prices determined under other sections of this Regulation an amount not in excess of the following:

(1) The increased costs to the seller or his reseller customer resulting from transportation rate increases after January 25, 1951, permitted by Federal or State regulatory bodies or by the Office of Price Stabilization.

(2) Where transportation is in facilities owned or controlled by the seller the same increases as provided in (1) above where the movement involved is in lieu of transportation by such regulated carrier.

Provided, however, there may be added by the seller to the applicable ceiling price established herein an amount not in excess of the transportation tax imposed by Section 620 of the Revenue Act of 1942 if the seller incurred such tax.

SEC. 26. *Taxes.* Any tax increase, or new tax after January 25, 1951, imposed upon or incident to the sale, production, gathering, severance, transportation, delivery, processing or use of any petroleum product covered by this regulation, excepting import duties, may be collected by a seller in addition to the ceiling prices established under this regulation, if the seller is required by law to collect or pay such tax.

SEC. 27. *Sales in the territories of the United States.* There may be added to the ceiling prices determined under the provisions of this regulation the additions permitted for export sales of the commodities covered by this regulation by any applicable export regulation which may hereafter be issued.

ARTICLE IV—FINAL PRICING METHOD

SEC. 28. *Seller unable to determine ceiling price.* (a) If under other provisions of this regulation, a seller is unable to determine his ceiling price at a given shipping or delivery point for any product covered by this regulation, then the seller may nevertheless make a sale of such product at that point. If he wishes he may request a ceiling price before making a sale. Within 15 days of the making of the sale, the seller shall file with the Petroleum Branch of the Office of Price Stabilization, Washington 25, D. C., a written request for approval of a ceiling price including a statement setting forth:

(1) The sale price with careful details of the sale, or if no sale is made the ceiling price which is requested.

(2) An explanation as to why the seller is unable to establish a ceiling price under preceding articles of this regulation.

(3) Whenever applicable, that the ceiling price is in line with his own ceiling price for the same product at three other points nearest the point at which the sale is made.

(4) Whenever (3) is not applicable, an explanation, supplemented by specifications as to how the particular product differs from the two products having the most nearly similar specifications for which ceiling prices are established under preceding articles of this Regulation, the ceiling prices of such products and a statement showing the method of evaluating the product used by the seller.

(b) The price filed shall be the seller's ceiling price at the shipping point or delivery point for the particular product until the price is disapproved in writing by the Office of Price Stabilization or until the seller is notified in writing that a substitute ceiling price has been set by the Office of Price Stabilization. Either an approved ceiling price or a substituted ceiling price set by the Office of Price Stabilization may be replaced by another ceiling price upon written notice to the seller from the Office of Price Stabilization.

(c) If a seller shall fail to report a sale as required by this section, the Office of Price Stabilization may at any time upon written notice to the seller establish his ceiling price for the particular product at the particular point effective retroactively to a date 15 days after the making of the sale.

Effective date: This Ceiling Price Regulation shall become effective on April 10, 1951.

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in according with the Federal Reports Act of 1942.

MICHAEL V. DISALLE,
Director,
Office of Price Stabilization.

APRIL 5, 1951.

[F. R. Doc. 51-4223; Filed, Apr. 5, 1951; 4:00 p. m.]

[Ceiling Price Regulation 18]

CPR 18—MANUFACTURERS' PRICES FOR WOOL YARNS AND FABRICS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6165), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Ceiling Price Regulation 18 is hereby issued.

STATEMENT OF CONSIDERATIONS

During 1950 the price of wool moved up steadily on the world market. This movement has been severely intensified since the opening of the Australian auctions in early September. The general price trend since June 1950 is illustrated by the landed equivalent price in this country of fine Australian wool, Type 77, as follows:

June 30, 1950	$2.12
July 28	2.12
Aug. 25	2.13
Sept. 29	2.93
Oct. 27	2.93
Nov. 24	3.05
Dec. 29	3.23
Feb. 9, 1951	3.90
Mar. 9	4.18

The prices of other imported wools, and of domestic wools, up to January 25, 1951, have closely followed those of Australian wools.

At the present time wool constitutes approximately 60 to 75 percent of the total cost of wool yarns and from 55 to 65 percent of the cost of wool fabrics; 70 percent of the raw wool requirements of the Nation are imported, and are not subject, at their source, to the price regulations issued by the Office of Price Stabilization.

The General Ceiling Price Regulation fixed ceiling prices for manufacturers of wool yarn and woven and knitted wool fabrics at the highest prices at which they delivered their products between December 19, 1950, and January 25, 1951.

Since, in the absence of an international agreement, the prices of this Nation's largest suppliers of wool cannot be controlled at their source, manufacturers of wool yarns and woven and knitted fabrics have fixed ceiling prices on their products but at the same time have been confronted with rapidly rising raw material costs. Contracts of sale by these manufacturers normally call for delivery three to five months after the contract is made. Consequently the prices at which yarns and fabrics were delivered during the base period, and which have been fixed as ceiling prices, reflected wool purchase contracts made at a time when wool prices were 25 to 45 percent lower than those in existence at the end of the base period. Dealers and topmakers on the other hand generally have ceiling prices based on sales contracts which called for more immediate delivery. Their ceiling prices reflect more closely the price of wool reached in the last half of December 1950.

This regulation covers yarn and knit and woven fabrics containing 25 percent or more wool by fiber weight. As to woven fabrics, however, it covers only those woven on the woolen or worsted system. It allows manufacturers of

wool yarns and fabrics to add to their pre-Korean prices (based on their highest contract price during the three months ending June 24, 1950) dollars-and-cents increases in the cost of manufacturing materials up to December 31, 1950, and the dollars-and-cents increase in labor cost up to December 31, 1950. A method is also provided for establishing ceiling prices for yarns and fabrics not sold during the base period. If they are comparable to those which were sold during the base period, a markup over December 1950 costs is permitted in line with the December 1950 markup of the comparable yarn or fabric sold in the base period. It is believed that the first two methods will be adequate for pricing most yarns and fabrics. For the unusual case, however, a third method is provided which permits a dollars-and-cents markup over December costs in line with the December 1950 dollars-and-cents markup of the most nearly like yarn or fabric sold during the base period. Reports must be furnished in advance of delivery by all sellers who use any of these three methods. New sellers, whose ceiling prices are based upon those of their most closely competitive sellers, are required to submit reports to the Office of Price Stabilization at least 15 days in advance of any deliveries.

Since this regulation only allows increases of manufacturing material costs up to December 31, 1950, the new ceiling prices will not pass on to the consumer of wool yarns and fabrics the additional 25 percent to 30 percent increase in wool since that date. At the same time manufacturers who own wool at prices below the December 31, 1950, level may give purchasers the advantage of any lower priced wool on hand. While yarn and fabric prices under this regulation will reflect December 31, 1950, costs of wool, they will be substantially below prices based on current replacement costs. In addition, those mills which have sufficient raw material inventories will have new ceiling prices which may serve as a basis for making forward sales.

The provistons of this regulation and their effect upon business practices, cost practices, or methods, or means or aids to distribution in the industry have been carefully considered. Generally only such changes in such practices or methods have been effected as are necessary to prevent circumvention or evasion of the regulation and to effectuate the policies of the Defense Production Act of 1950.

In formulating this regulation the Director has consulted with representatives of the industry to the extent practicable under the circumstances and has given consideration to their recommendations.

He has also given due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950; to prices prevailing during the period from May 24, 1950, to June 24, 1950, inclusive; and to relevant factors of general applicability.

In the judgment of the Director, based upon an analysis of the presently available data, the provisions of this regulation and the ceiling prices established are generally fair and equitable and will effectuate the purposes of Title IV of the Defense Production Act of 1950.

REGULATORY PROVISIONS

Sec.

1. What this regulation does.
2. Ceiling prices for yarns or fabrics sold or offered for sale between March 24 and June 24, 1950.
3. Ceiling prices for yarns or fabrics comparable to those sold or offered for sale between March 24 and June 24, 1950.
4. Ceiling prices for new yarns or fabrics.
5. Ceiling prices for new sellers.
6. Manufacturers who cannot price under other sections.
7. Prohibition against redetermination of ceiling prices.
8. Application for authorization to perform certain contracts.
9. Excise, sales, and other similar taxes.
10. Records.
11. Reports.
12. What acts are prohibited by this regulation.
13. Enforcement.
14. Petitions to amend this regulation.
15. Definitions.

AUTHORITY: Sections 1 to 15 issued under sec. 705, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does.* This regulation fixes ceiling prices for sales of wool yarn or fabric by manufacturers. It applies in the 48 States and the District of Columbia. During the period between April 9 and April 16, 1951, you may use either this regulation or the General Ceiling Price Regulation. On and after April 16, 1951, you must use this regulation. This regulation shall not apply to deliveries under a military contract or subcontract for yarn or fabric covered by Supplementary Regulation 1, as amended, to the General Ceiling Price Regulation.

SEC. 2. *Ceiling prices for yarns or fabrics sold or offered for sale between March 24 and June 24, 1950.* Your ceiling price for a yarn or fabric which you sold during the base period (March 24 to June 24, 1950, inclusive) shall be computed as follows:

(a) *Step 1.* Find the class of purchaser which, during the base period, contracted in writing to buy from you the largest dollar amount of that yarn or fabric. Then take all the written contracts you entered into during the base period with that class of purchaser (other than sample quantity contracts), and find the highest contract price for a unit of that yarn or fabric. If during the base period, you did not contract to sell that yarn or fabric, but you did make a written offer to sell it, find the highest unit price at which, during the base period, you made a written offer to sell it to the class of purchaser which during the base period contracted in writing to buy from you the largest dollar amount of all yarns or fabrics.

(b) *Step 2.* Find the physical amount of each manufacturing material (see definition, section 15 of this regulation) used in a unit (pound of yarn, yard of fabric) of that yarn or fabric and multiply that amount by your dollars-and-cents increase in unit cost of that material between June 24 and December 31, 1950. This increase is the difference between (1) the highest unit price at which you contracted to buy that material between May 24 and June 24, 1950, inclusive, and (2) the highest unit price at which you contracted to buy it during December 1950. (These prices should not be taken from sample quantity contracts.) In computing your increase in the cost of any manufacturing material, take waste credits according to your customary accounting procedure. If you did not contract to buy this material between May 24 and June 24 (or during December), 1950, use the highest unit price at which your customary source of supply contracted in writing to sell it during such period to the class of purchaser in which you fall, or if he made no written contract, use the highest price at which, during such period, he made a written offer to sell it to the class of purchaser in which you fall. Add together the increases you have calculated for each material. This gives you the total cost-of-materials increase per unit of that yarn or fabric.

Add to this amount the increase between June 24, 1950, and December 31, 1950, in your cost of labor (see definition section 15 of this regulation) per unit of that yarn or fabric. This gives you the total unit cost increase (material and labor).

(c) *Step 3.* Add this total unit cost increase to the base period price of a unit of that yarn or fabric found in paragraph (a) of this section. The result is your ceiling price for a unit of that yarn or fabric. This ceiling price must carry the same delivery terms, discounts, and other conditions of sale as your base period price. If you have classes of purchasers other than the class of purchaser you used in determining your base period price, your ceiling prices for sales to such other classes of purchasers are fixed by applying your customary price differentials to your ceiling price as found in this paragraph (c).

This section is applicable only when the yarn or fabric you are pricing now is the same as the yarn or fabric you sold during the base period. One yarn is the same as another, regardless of differences in color or put-up, if the first is the same size or count as the second and is manufactured from the same blends of raw material. One fabric is the same as another, regardless of differences in color or pattern, if the first has the same weave as the second, contains the same total number of ends and picks per finished inch, the same yarn sizes, weight per yard, width and finish, and is manufactured from the same blends of raw material.

EXAMPLE OF COMPUTATION USED IN THIS SECTION

(1)	Highest price per yard of 15-ounce wool filled, worsted warp, men's wear fabric taken from a written contract with member of the class of purchaser which purchased largest dollar amount, e. g. cutters	$3.85
(2)	Raw material per unit: (i) .45 pound 64's top per finished yard. (ii) .84 pound 60-58's wool per finished yard. (iii) .04 pound noils per finished yard.	
(3)	Highest cost of 64's top per pound, adjusted for waste credits: Dec. 1-Dec. 31, 1950 $3.80; May 24-June 24, 1950 2.35; Increase 1.45	
	Highest cost of 60-58's wool per pound, adjusted for waste credits: Dec. 1-Dec. 31, 1950 2.75; May 24-June 24, 1950 1.85; Increase .90	
	Highest cost of noils per pound, adjusted for waste credits: Dec. 1-Dec. 31, 1950 1.40; May 24-June 24, 1950 1.00; Increase .40	
(4)	Top cost increase per finished yard (.45 x $1.45)	.653
	Wool cost increase per finished yard (.84 x .90)	.756
	Noils cost increase per finished yard (.04 x .40)	.016
	Total cost-of-materials increase (assuming no increase in cost of other manufacturing materials)	1.201
(5)	Cost of labor per unit: Dec. 31, 1950 $0.708; June 24, 1950 .680; Cost of labor increase per unit .109	
(6)	Total unit cost increase	1.400
(7)	New ceiling price to class of purchaser specified in (1) above	5.250
(8)	Assume that you customarily sell to jobbers at $0.05 under your price to cutters	.050
	New ceiling price to jobbers per per yard of 15 ounce wool filled worsted warp, men's wear fabric	5.200

SEC. 3. *Ceiling prices for yarns or fabrics comparable to those sold or offered for sale between March 24 and June 24, 1950.* If you want to sell a yarn or fabric which, during the base period, you did not contract in writing to sell or make a written offer to sell, your ceiling price for such yarn or fabric shall be computed as follows:

(a) *Step 1.* Find the physical amount of each manufacturing material used in a unit (pound of yarn, yard of fabric) of that yarn or fabric and multiply that amount by the highest unit price at which you contracted to buy that material during December 1950 (exclude sample quantity contracts). If, during December 1950, you did not contract to buy the material, use the highest price at which your customary source of supply contracted in writing to sell it during that month to the class of purchaser in which you fall, or if he made no written contract, use the highest price at which, during that month, he made a written offer to sell it to the class of purchaser in which you fall. Add together the costs you have calculated for each manufacturing material. Add to the result your cost of labor for a unit of that yarn or fabric, calculated at your highest December 1950 wage rates. This gives you your "December cost" of a unit of the yarn or fabric.

(b) *Step 2.* Select a yarn or fabric from those which, during the base period, you made a written contract to sell or if you made no written contract, a written offer to sell, which is "comparable" to the yarn or fabric being priced. One yarn is comparable to another, regardless of differences in color or put-up, if the first does not vary from the second in respect of size or count by more than 10 percent, and is manufactured from substantially the same blends of raw material as the second, and does not vary from the second by more than 10 percent in respect of any of the following elements: the sum of ends and picks per finished inch; weight per finished yard; and yarn sizes.

Of this group of comparable yarns or fabrics, the yarn or fabric to be used in pricing under this section shall be the first of the following which is available to you:

(1) A yarn or fabric you are presently manufacturing whose December cost (see paragraph (a) of this section) is the same as or lower than the December cost of the yarn or fabric you are pricing;

(2) A yarn or fabric you are presently manufacturing whose December cost is next higher than the December cost of the yarn or fabric you are pricing.

(c) *Step 3.* Compute, in accordance with the method prescribed in section 2, the ceiling price of a unit of the comparable yarn or fabric selected in paragraph (b) of this section. Then divide its ceiling price by its December cost. This gives you the "multiplication factor."

(d) *Step 4.* Multiply the December cost (see paragraph (a) of this section) of a unit of the yarn or fabric you are pricing by the "multiplication factor." This gives you the ceiling price for a unit of that yarn or fabric. This ceiling price must carry the same delivery terms, discounts, and other conditions of sale as the base period price for the comparable yarn or fabric selected in paragraph (b) of this section. If you have classes of purchasers other than the class of purchaser you used in determining the base period price for the comparable yarn or fabric, your ceiling prices for sales to such other classes of purchasers are fixed by applying your customary price differentials to your ceiling price found in this paragraph (d).

SEC. 4. *Ceiling prices for new yarns or fabrics.* If you made written contracts or offers to sell yarns or fabrics during the base period but you cannot use sections 2 or 3 of this regulation to fix a ceiling price for a yarn or fabric you now want to sell, your ceiling price for the yarn or fabric you now want to sell shall be computed as follows:

(a) *Step 1.* Find your December cost of a unit (pound of yarn, yard of fabric) of that yarn or fabric, in accordance with the method prescribed in section 3 (a) of this regulation.

(b) *Step 2.* From the yarns or fabrics which during the base period you contracted in writing to sell, or made a written offer to sell, select the first of the following which is available to you:

(1) A yarn or fabric you are presently manufacturing which is most nearly like, and whose December cost (see section 3 (a) of this regulation) is the same as or lower than the December cost of, the yarn or fabric you are pricing.

(2) A yarn or fabric you are presently manufacturing which is most nearly like, and whose December cost is next higher than the December cost of, the yarn or fabric you are pricing.

(3) A yarn or fabric you are no longer manufacturing which is most nearly like, and whose December cost would be the same as or lower than the December cost of, the yarn or fabric you are pricing.

(4) A yarn or fabric you are no longer manufacturing which is most nearly like, and whose December cost would be next higher than the December cost of, the yarn or fabric you are pricing.

(c) *Step 3.* Compute in accordance with the method prescribed in section 2, the ceiling price of a unit of the yarn or fabric selected in paragraph (b) of this section. Then subtract from its ceiling price its December cost. This gives you the "dollars-and-cents difference."

(d) *Step 4.* Add this "dollars-and-cents difference" to the December cost (see paragraph (a) of this section) of a unit of the yarn or fabric you want to sell. This gives you the ceiling price for a unit of that yarn or fabric. This ceiling price must carry the same delivery terms, discounts, and other conditions of sale as the base period price for the yarn or fabric selected in paragraph (b) of this section. If you have classes of purchasers other than the class of purchaser you used in determining the base period price for that yarn or fabric, your ceiling prices for sales to such other classes of purchasers are fixed by applying your customary price differentials to your ceiling price as found in this paragraph (d).

SEC. 5. *Ceiling prices for new sellers.* (a) If you did not, during the base period, contract in writing to sell, or make a written offer to sell, yarn or fabric, your ceiling price for a particular yarn or fabric is the same as the ceiling price of your most closely competitive seller of the same class selling that particular yarn or fabric to the same class of purchaser. You cannot sell any yarn or fabric under this section, however, until 15 days after you have filed, by registered mail return receipt requested, the report required in paragraph (b) of this section, with the Consumer Soft Goods Division, Office of Price Stabilization, Washington 25, D. C. Thereafter you may sell at your proposed ceiling price unless and until notified by

the Director of Price Stabilization that your proposed price has been disapproved, or that more information is required. The Director may disapprove or revise ceiling prices reported under this section, at any time, even after the 15-day period, so as to bring them into line with the ceiling prices otherwise fixed by this regulation.

(b) Your report shall contain the following:

(1) The name and address of your company;

(2) A statement of whether you or the principal owner of your business is now or during the past twelve months has been engaged in any capacity in the same or a similar business at any other establishment, and if so, the trade name and address of each such establishment;

(3) Your proposed ceiling price and a description of the yarn or fabric you are pricing, the manufacturing processes involved, the December cost (see section 3 (a) of this regulation) for that yarn or fabric, the classes of purchasers to whom you will be selling, and the price differentials, if any, you propose to adopt;

(4) The name, address and type of business of your most closely competitive seller of the same class, and your reasons for selecting him as your most closely competitive seller.

SEC. 6. *Manufacturers who cannot price under other sections.* If you claim that you are unable to determine your ceiling price for a yarn or fabric under any of the foregoing provisions of this regulation, you may apply in writing to the Director of Price Stabilization, Washington 25, D. C., for the establishment of a ceiling price. This application shall contain an explanation of why you are unable to determine your ceiling price under any other provision of this regulation; all pertinent information describing the yarn or fabric and the nature of your business; your proposed ceiling price and the method used by you to determine it; and the reason you believe the proposed price is in line with the level of ceiling prices otherwise established by this regulation. You may not sell the yarn or fabric until the Director of Price Stabilization, in writing, notifies you of your ceiling price.

SEC. 7. *Prohibition against redetermination of ceiling prices.* Once you have determined your ceiling price for a yarn or fabric in accordance with this regulation you may not thereafter redetermine it.

SEC. 8. *Application for authorization to perform certain contracts.* (a) If, between January 26 and April 16, 1951, you entered into a written contract to sell yarn or fabric at a ceiling price fixed by sections 3 or 4 of the General Ceiling Price Regulation, as amended, which is higher than the ceiling price fixed by this regulation, you may file an application for authorization to carry out that contract after April 16, 1951, at the contract price. Your application shall contain the information required in paragraph (b) of this section, and shall be filed with the Consumer Soft Goods Division, Office of Price Stabilization, Washington 25, D. C. You may not deliver under any such contract after April 16, 1951, at a price higher than the ceiling price fixed by this regulation until you are notified by the Director of Price Stabilization that you are authorized to do so.

(b) Your application shall include:

(1) A copy of each contract which you propose to carry out, a description of the yarn or fabric, and a statement showing that the contract price is at or below the ceiling price established in sections 3 or 4 of the General Ceiling Price Regulation, as amended. This statement shall include the date of delivery and delivery price (or the offering price) if you used section 3 of the General Ceiling Price Regulation, or a description of the comparison commodity and your method of computation, if you used section 4 of the General Ceiling Price Regulation;

(2) As to each yarn or fabric sold under each contract, the ceiling price fixed by this regulation, together with a reference to the section of this regulation under which you computed that ceiling price.

SEC. 9. *Excise, sales, and other similar taxes.* (a) If the price for a yarn or fabric you are to use under any of the sections of this regulation for the purpose of determining your ceiling price either for that yarn or fabric or another yarn or fabric includes any excise, sales or other similar tax which is not separately stated, you must first ascertain the amount of any such tax and exclude it from the price. The price, with any such tax so excluded, many then be used by you in connection with any appropriate computations under this regulation. After completing the computations involved in determining your ceiling price, you may then add on the appropriate amount of any such tax for inclusion as part of your ceiling price.

(b) In addition to your ceiling price determined under this regulation, you may collect the amount of any excise, sales or other similar taxes paid by you as such only if it has been your practice to state and collect such taxes separately from your selling price for the same or similar yarns or fabrics. In the case of such a tax imposed by law which is not effective until after the effective date of this regulation, you may collect the amount of the tax actually paid as such by you, if not prohibited by the tax law. You must in all such cases state separately the amount of the tax.

SEC. 10. *Records.* (a) You must keep and make available for examination by the Office of Price Stabilization for a period of two years the records you customarily maintain showing the prices you charge for yarn or fabric sold or delivered after the effective date of this regulation. You must also preserve until two years after the expiration of the Defense Production Act all of the data required to be reported by section 11 of this regulation, and in addition:

(1) All contracts of sale of yarn or fabric entered into during the base period (March 24 to June 24, 1950, inclusive). For yarns or fabrics for which you had no contracts of sale but have established a base period price through a written offer to sell, preserve a copy of each such written offer to sell.

(2) All contracts which you entered into between May 24, 1950, and June 24, 1950, inclusive, and between December 1, 1950, and December 31, 1950, inclusive, to buy manufacturing materials used in yarns or fabrics. If you are establishing, for the purpose of computations in sections 2, 3 or 4 of this regulation, a purchase price for such a material through a supplier's price, obtain and preserve a statement, signed by the principal owner, or an officer, of the supplying company, of the highest unit price at which your supplier contracted in writing, or made a written offer, to sell such a material between May 24, 1950, and June 24, 1950, inclusive (or between December 1, 1950, and December 31, 1950, inclusive), to a purchaser of the class in which you fall.

(b) You shall continue to preserve all records required to be preserved by section 16 (a) of the General Ceiling Price Regulation and, for the period specified in section 16 (b) of the General Ceiling Price Regulation, all records required by section 16 (b) of the General Ceiling Price Regulation relating to sales of yarn or fabric made between January 26, 1950, and April 16, 1951.

SEC. 11. *Reports.* Prior to making any deliveries of yarns or fabrics for which ceiling prices are established by sections 2, 3 or 4 of this regulation, you must file by registered mail return receipt requested, the report required by this section, with the Consumer Soft Goods Division, Office of Price Stabilization, Washington 25, D. C. You may deliver, upon filing the required report, unless and until notified by the Director of Price Stabilization that your proposed price has been disapproved or that more information is required. The Director of Price Stabilization may at any time disapprove or revise ceiling prices reported under this section so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

Your report shall contain the following information:

(a) Your name and address;

(b) The ceiling price, under the General Ceiling Price Regulation, as amended, of the yarn or fabric for which you are computing a ceiling price under section 2 of this regulation. State which section of the General Ceiling Price Regulation you used to fix that ceiling price;

(c) With respect to each yarn or fabric for which you are computing a ceiling price under section 2 of this regulation, your report should include the following:

(1) A description of the class of purchaser which bought the largest amount of that yarn or fabric during the period of March 24, 1950, through June 24, 1950, inclusive, and your customary differentials, if any, between that class of purchaser and your other classes of purchasers;

(2) The highest price at which you contracted to sell the yarn or fabric to that class of purchaser, including the name and address of the purchaser and the date of the contract. For a yarn or fabric for which you had no contract of sale but have established a base period price through a written offer to sell, your report should include the offering price, the date of the offer and the name and address of the recipient of the offer;

(3) A computation sheet showing how you arrived at your ceiling price. This sheet shall be in the same form as that used in the example, set forth in section 2 of this regulation;

(d) With respect to each yarn or fabric which you are pricing under section 3 (or 4) of this regulation and with respect to the comparable (or most nearly like) yarn or fabric used in computing your ceiling prices, your report should include the following:

(1) A description of the yarn or fabric;

(2) A description of the types or grades and amounts of each manufacturing material used in the yarn or fabric, and the highest December 1950 purchase price for a unit of each such material.

(3) The cost of labor for a unit of that yarn or fabric calculated at your highest December 1950 wage rates;

(4) The ceiling price under section 2 of this regulation of the comparable yarn or fabric (or the most nearly like yarn or fabric);

(5) The "multiplication factor" as computed under section 3 of this regulation (or the "dollars-and-cents difference" as computed in section 4 of this regulation);

(6) The ceiling price for the yarn or fabric you are pricing;

(7) If the ceiling price is for a fabric which is being priced under section 3 of this regulation, supply the information called for in the following table:

	Fabric you are pricing	Comparable fabric found under section 3
Sum of ends and picks per finished inch		
Weight per finished yard		
Yarn sizes		

SEC. 12. *What acts are prohibited by this regulation.* On and after April 16, 1951, regardless of any contract or other obligation, the following practices are forbidden:

(a) *Charging more than ceiling prices.* Except as provided in sections 1 and 8 of this regulation, you are prohibited from selling or delivering yarn or fabric at a price higher than that permitted by this regulation. A lower price may, of course, be charged.

(b) *Buying for more than ceiling price.* All persons are prohibited from buying or receiving, in the course of trade or business, any yarn or fabric sold or delivered in violation of this regulation.

(c) *Evasion.* No person shall evade or circumvent this regulation by any direct or indirect methods in connection with the sale, purchase, delivery or tranfer of yarn or fabric alone or in conjunction with any other commodity or material, or by way of commission, transportation charge, or other charge, or discount, premium, or other privilege, or by upgrading, tying-agreement, trade understanding, or otherwise.

(d) *Attempts to violate.* All persons are prohibited from agreeing, offering, soliciting, or attempting to do any of the acts prohibited by this regulation.

SEC. 13. *Enforcement.* If you violate any provision of this regulation, you are subject to the criminal penalties, civil enforcement actions, and suits for damages provided for by the Defense Production Act of 1950.

SEC. 14. *Petitions to amend this regulation.* Any person seeking an amendment of this regulation may file a petition for amendment in accordance with Price Procedural Regulation 1.

SEC. 15. *Definitions.* (a) "Manufacturer" means a person who for his own account sells yarn or fabric he produces or has produced for him.

(b) "Wool" means the fibers from the fleece of the sheep or lamb, or the hair of the Angora or Cashmere goat or of the camel, alpaca, llama, or vicuna, and shall include wool noils, and re-processed and re-used wool and wool wastes.

(c) "Fabric" means knitted fabrics, woven fabrics woven on the woolen or worsted system, and blankets, if such fabric contains 25 percent or more wool by fiber weight. Soft surface floor coverings subject to Supplementary Regulation 11 of the General Ceiling Price Regulation and industrial felts are not included.

(d) "Yarn" means yarn containing 25 percent or more wool by fiber weight, other than carpet yarn.

(e) "Cost of labor" means the cost of labor that enters directly into the product and is paid at hourly or piece rates. In addition it includes the cost of labor for factory supervision, ordinary maintenance, repair of plant or equipment, materials control, and testing and inspection. It may include the equivalent, on an hourly or piece rate basis, of so-called fringe benefits (for example, pension plans, paid vacation and insurance programs). It does not include the cost of labor for general administration, sales, advertising, research, major repairs or replacement of plant or equipment and expansion of plant or equipment. In computing the cost of labor for a unit of yarn or fabric under this regulation, you shall allocate the permitted labor costs according to your customary accounting method. The same method must be used in all calculations of unit costs of labor.

(f) "Manufacturing material" means material entering directly into the yarn or fabric being priced or used in the manufacturing process from which the yarn or fabric results, together with purchased fuel, steam or electric power, packaging materials, and subcontracted industrial services which are directly related to the yarn or fabric. It does not include materials used in replacing, maintaining or expanding your plant and equipment, nor other materials or supplies the use of which is not directly dependent upon the rate at which you manufacture the yarn or fabric being priced. In computing the cost of manufacturing material for a unit of yarn or fabric under this regulation, you shall allocate the permitted manufacturing material costs according to your customary accounting method. The same method must be used in all calculations of unit costs of manufacturing material.

(g) "Class of purchaser" refers to the practice adopted by a seller in setting different prices for sales to different purchasers or kinds of purchasers (for example, manufacturer, wholesaler, jobber, retailer, government agency, public institution or individual consumer), or to purchasers located in different areas.

(h) "Most closely competitive seller of the same class" means the seller with whom you are in most direct competition, even though he may perform a different function with respect to the yarn or fabric (for example, as a manufacturer your most closely competitive seller might be a wholesaler). You are in direct competition with another seller who sells the same types of yarn or fabric to the same classes of purchasers in similar quantities, on similar terms, and you supply approximately the same amount of service.

(i) "Written offer to sell" means an offer in writing to a customer to sell yarn or fabric at a specified price. It does not include a price list which, although announced or distributed within the seller's own organization, is not communicated in writing to a substantial number of the seller's customers in the seller's ordinary manner.

(j) "Person" means an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representatives of any of the foregoing, and includes the United States or any other government and their political subdivisions or agencies.

(k) "Sell" includes sell, supply, dispose, barter, exchange, lease, transfer, and contracts and offers to do any of the foregoing. The terms "sale," "selling," "sold," "seller," "buy," "purchase," and "purchaser" shall be construed accordingly.

(l) The pronoun you as used in this regulation indicates the person subject to the regulation.

(m) All other trade terms used in this regulation have the meanings generally accepted in the trade.

Effective date: This regulation shall become effective on April 9, 1951.

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

EDWARD F. PHELPS, JR.,
Acting Director of Price Stabilization.

APRIL 5, 1951.

[F. R. DOC. 51-4224; Filed, Apr. 5, 1951; 4:00 p. m.]

[Ceiling Price Regulation 19]

CPR 19—TUNGSTEN CONCENTRATES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), and Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R.

738), this Ceiling Price Regulation 19 is hereby issued.

STATEMENT OF CONSIDERATIONS

Tungsten concentrates, produced from the ore by physical or chemical processes which remove the gangue and associated rock, are the principal raw materials used in the production of ferrotungsten, tungsten metal powders, and various other tungsten compounds. These concentrates are the source of tungsten used in the manufacture of tool steels and other alloys (both ferrous and nonferrous), in electrical wire filament and contacts and in many other chemical and metallic products. Tungsten concentrates are a strategic material vitally needed for the production of the tools of war and many items important in our civilian economy.

Under ordinary circumstances, the United States does not produce enough tungsten to satisfy its needs and substantial quantities must be imported. Thus in the five year period from 1945 to 1949 current consumption and stockpiling required an average of 11 million pounds of contained tungsten a year, of which less than 5 million pounds a year, on the average, were produced domestically. In 1948 and 1949, the United States imported an average of 4,750,000 pounds of tungsten annually from China alone while substantial additional tonnages were obtained from Korea, Thailand, and other countries.

As a consequence of the substantially increased demand arising out of our defense program and the loss of our most important foreign sources, tungsten is in critically short supply, and it is imperative that domestic production be expanded to the fullest extent possible. Normally, the ores mined and milled in the United States contain 0.5 to 2.5 percent WO_3 (tungsten trioxide, the basic tungsten compound) although there are substantial deposits of lower grade ores, principally in the Rocky Mountain area. The needed increase in domestic supply will have to come from expansion in the output of currently operating mines (in part through the working of lower grade ore bodies), the reopening of mines now closed, and the mining of new deposits. Since a large part of the needed tonnage may have to be obtained from low grade ores, it is necessary to establish ceiling prices at a level which will compensate for the increase in costs and investment which this will entail.

Unfortunately, very little data is available to measure with any degree of precision the ceiling price level necessary to bring about the required expansion and the exigency of the situation does not permit of any extended study. In the pre-Korean period, prices fluctuated within a range of $20–$25 per unit, but they rose sharply thereafter, both in the United States and in foreign markets, with some sellers charging more than $65 per unit. Present ceiling prices, established by the General Ceiling Price Regulations, range between $28 per short ton unit for tungsten produced domestically from relatively high grade deposits and $70 per short ton unit for imported material and it has been determined after consultation with, and largely upon the advice of, the Defense Minerals Administration that a ceiling price of $65 per short ton unit will be adequate, in conjunction with other programs being adopted, to encourage a substantial increase in output from existing mines and the exploitation of deposits not now in production. It is believed that this price will also result in an increase in shipments of foreign produced tungsten to the United States.

In the judgment of the Director of Price Stabilization, the provisions of Ceiling Price Regulation 19 are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

So far as practicable, the Director has given due consideration to the national effort to achieve maximum production in the furtherance of the objectives of the Defense Production Act of 1950; to prices prevailing during the period from May 24, 1950, to June 24, 1950, inclusive; and to relevant factors of general applicability.

In formulating Ceiling Price Regulation 19, the Director consulted with industry representatives, including trade association representatives, to the extent practicable under existing circumstances, and has given full consideration to their recommendations.

The provisions of Ceiling Price Regulation 19 and their effect upon business practices, cost practices, or means or aids to distribution in the industry have been considered. It is believed that no changes in such practices or methods have been effected. To the extent, however, that the provisions of the regulation may operate to compel changes in such practices or methods, such provisions are necessary to prevent circumvention or evasion of the regulation and to effectuate the policies of the act.

REGULATORY PROVISIONS

Sec.
1. Coverage of the regulation.
2. Applicability and prohibitions.
3. Ceiling prices.
4. Definitions.
5. Record-keeping requirements.
6. Enforcement.
7. Petitions for amendment.

AUTHORITY: Sections 1 to 7, issued under sec. 704, Public Law 774, 81st Cong., interpret or apply Title IV Public Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

SECTION 1. *Coverage of the regulation.* This regulation establishes ceiling prices for sales and deliveries of tungsten concentrates by any person, including importers and exporters.

SEC. 2. *Applicability and prohibitions*—(a) *Applicability.* This regulation applies in the 48 States of the United States, its Territories and Possessions, and the District of Columbia.

(b) *Prohibitions*—(1) *Against transactions above ceiling prices.* Regardless of any contract or other obligation, on and after the effective date of this regulation no person shall sell or deliver, and no person shall buy or receive in the regular course of trade or business, tungsten concentrates at a price in excess of the ceiling price established in this regulation. No person shall offer, solicit, attempt, or agree to do any of the foregoing.

Lower prices than those set forth in this regulation may be charged, demanded, paid, or offered.

(2) *Against evasion.* No person shall evade or circumvent the provisions of this regulation by direct or indirect methods in connection with the sale, purchase, delivery, or transfer of tungsten concentrates, alone or in conjunction with any other commodity, or by way of commission, service or transportation charge or discount, premium or other privilege, or by up-grading, tie-in agreements, trade understanding or otherwise.

SEC. 3. *Ceiling prices.* The ceiling price, f. o. b. shipping point, for tungsten concentrates is $65.00 per short ton unit. A short ton unit is 20 pounds of WO (tungsten trioxide).

SEC. 4. *Definitions.* When used in this regulation the term:

(a) "Exporter" means a person who sells tungsten concentrates which are transported from a place inside the United States, its Territories, or Possessions to a place outside thereof.

(b) "Importer" means a person who first sells tungsten concentrates which are transported from a place outside the United States, its Territories or Possessions to a place inside thereof.

(c) "Person" includes any individual, corporation, partnership, association or any other organized group of persons, or legal successor or representative of the foregoing, and the United States or any other Government or their political subdivisions or agencies.

(d) "Shipping point" means the point within the United States at which tungsten concentrates are first loaded on a conveyance for transportation directly to the buyer. In the case of tungsten concentrates sold by an importer and transported directly to the buyer from a location in Canada or Mexico, the shipping point shall be the freight station in the United States at or nearest the point at which the shipment enters the United States.

(e) "Tungsten concentrates" means wolframite, Hubnerite, ferberite, or natural or synthetic scheelite which has been separated from gangue or associated rocks by physical or chemical processes.

SEC. 5. *Record-keeping requirements.* Every person selling or purchasing tungsten concentrates shall keep for inspection by the Director of Price Stabilization, for a period of two years, complete and accurate records of each such sale and purchase showing: the date thereof; the name and address of the seller and buyer; the shipping point; the price paid; and the quantity and WO_3 content.

SEC. 6. *Enforcement.* Persons violating any of the provisions of this regulation shall be subject to the criminal penalties, civil enforcement actions, and suits for damages provided for by the Defense Production Act of 1950.

SEC. 7. *Petitions for amendment.* Any person seeking an amendment of this regulation may file a petition for amendment in accordance with the provisions of Price Procedural Regulation No. 1.

NOTE: All record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Effective date. This regulation is effective April 6, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

APRIL 6, 1951.

[F. R. Doc. 51-4244; Filed, Apr. 6, 1951; 8:45 a. m.]

[Ceiling Price Regulation 20]

CPR 20—FUTURES TRADING ON WOOL EXCHANGE

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738) this Ceiling Price Regulation 20 is hereby issued.

STATEMENT OF CONSIDERATIONS

The Wool Associates of the New York Cotton Exchange is a commodity futures exchange upon which wool and wool top are traded. The exchange provides the only central market place upon which buyers and sellers of wool and wool top may hedge commercial purchases and sales of these commodities. This exchange has been closed since January 26, 1951, when the General Ceiling Price Regulation was issued. That regulation fixed the price at which each seller might trade on the Exchange at the highest price at which the seller delivered wool or wool top during the period December 19, 1950, to January 25, 1951. For a commodity which is bought and sold in an organized market, a freeze regulation is inapplicable because the wide variety of individual ceilings established do not provide a basis upon which normal trading may take place.

With the Exchange closed, individuals who customarily trade on this exchange have not been able to carry on a normal hedging business. Thus, many dealers, top makers, and mills supplying both military and civilian needs have been unable to protect themselves against changes in price of their wool and wool tops. Moreover, significant quantities of wool and wool tops have been barred from normal channels of trade since contracts under which they were committed could not be bought back through normal trading.

During the period in which the exchange has been closed, financial arrangements, which are usually available through banking channels and which are contingent upon hedging, have been curtailed.

This regulation, which establishes a uniform ceiling price for trading wool and wool top futures, is applicable to all transactions on the exchange. It will eliminate the disparity between the levels at which the ceilings of individuals had been fixed, and thus establish a basis for hedging operations. Wool and wool top, now covered by contracts which could not be bought back, will be available for use in trade channels. The reopening of the exchange will also permit the financing and building of inventories of many wool products and thereby help satisfy the large military and civilian needs within the country.

Sales of wool or wool top on a spot basis will continue to be governed by existing individual ceilings established under the General Ceiling Price Regulation.

The ceiling prices fixed by this regulation are the highest prices at which contracts for May delivery traded during December 19, 1950–January 26, 1951 on the Wool Associates of the New York Cotton Exchange. These prices are approximately 3 percent lower than the highest prices at which March futures were traded. They will nevertheless enable all currently open contracts to be liquidated, since contracts for months prior to May have already been settled. In addition these ceilings reflect prices 10 percent to 15 percent below current world levels for wool and wool tops.

In formulating this regulation the Director of Price Stabilization has consulted with representatives of industry to the extent practicable under the circumstances, and has given consideration to their recommendations.

In the judgment of the Director of Price Stabilization the provisions of this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Wool and Wool Top Futures Contracts.
3. Deliveries of Wool and Wool Top on Futures Contracts.
4. Prohibitions.
5. Evasion.
6. Enforcement.
7. Petitions for Amendment.

AUTHORITY: Sections 1 to 7 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950.

SECTION 1. *What this regulation does.* This regulation fixes dollars-and-cents ceiling prices for Exchange Standard wool and wool top traded and delivered on the Wool Associates of the New York Cotton Exchange.

SEC. 2. *Wool and wool top futures contracts.* The ceiling price at which Exchange Standard wool and wool top covered by futures contracts may be traded on the Wool Associates of the New York Cotton Exchange is $3.535 per pound for wool futures, and $4.265 per pound for wool top futures.

SEC. 3. *Deliveries of wool and wool top on futures contracts.* If you deliver Exchange Standard wool or wool top pursuant to a futures contract on the Wool Associates of the New York Cotton Exchange, your ceiling price is $3.535 per pound for wool and $4.265 per pound for wool top. For computing the ceiling price for deliveries of other than Exchange Standard wool or wool top pursuant to futures contracts on the Exchange apply the differentials established under the by-laws and rules of the Wool Associates of the New York Cotton Exchange in effect on January 24, 1951.

SEC. 4. *Prohibitions.* On and after the effective date of this regulation you shall not buy or sell wool or wool top futures contracts, or deliver wool or wool top on a futures contract on the Wool Associates of the New York Cotton Exchange at a price exceeding the prices established by this regulation.

SEC. 5. *Evasion.* You shall not evade or circumvent the provisions of this regulation by direct or indirect methods in connection with the sale, purchase, delivery, or transfer of wool or wool top, alone or in conjunction with any other commodity or material, or by way of any commission, service, transportation charge, or discount, premium, or other privilege, or by up-grading, tying-in agreement, trade understanding or otherwise.

SEC. 6. *Enforcement.* If you violate any provision of this regulation you are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided for by the Defense Production Act of 1950.

SEC. 7. *Petitions for Amendment.* If you wish to have this regulation amended, you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1 (15 F. R. 9055).

Effective date: This regulation shall become effective April 6, 1951.

EDWARD F. PHELPS, JR.,
Acting Director of Price Stabilization.

APRIL 6, 1951.

[F. R. Doc. 51-4255; Filed, Apr. 6, 1951; 10:46 a. m.]

[General Ceiling Price Regulation, Amdt. 5 to Supplementary Regulation 1]

GCPR, SR 1—DEFENSE AGENCY PRICING

EXTENSION OF TEMPORARY EXEMPTION

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Order No. 2 (16 F. R. 738), this Amendment 5 to Supplementary Regulation 1 to the General Ceiling Price Regulation (16 F. R. 808) is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment 5 to Supplementary Regulation 1 to the General Ceiling Price Regulation extends until May 1, 1951, the temporary exemption from the General Ceiling Price Regulation of certain wool products and of commodities and services normally produced and supplied only for military use.

When the General Ceiling Price Regulation was originally issued, it was recognized that there might be an adverse effect upon the military procurement program until specific ceiling price regulations were issued. As a result Supplementary Regulation 1, issued February 1, 1951, contained a temporary exemption of commodities and services nor-

mally produced and supplied only for military use. Amendment 1 issued February 7, 1951, extended the exemption to include certain wool products when sold to Defense Agencies and their suppliers.

A number of regulations have been issued since then establishing specific ceiling prices for certain commodities and transactions, but there remain certain areas in which military procurement is vital and for which ceiling price regulations have not as yet been issued. If the exemption is not extended, sales and deliveries of these commodities and services would immediately become subject to the General Ceiling Price Regulation with the result that the military procurement program would be adversely affected to a substantial degree.

Many of the commodities now covered by the exemption will shortly be placed under ceiling price regulations and it is felt that an extension of the present exemption is not only necessary to the defense program but will have no material effect on the cost of living or on the general level of prices.

AMENDATORY PROVISIONS

1. Section 2 of Supplementary Regulation 1 to the General Ceiling Price Regulation is amended by changing the dates "April 1, 1951", "May 1, 1951", and "July 1, 1951", to "May 1, 1951", "June 1, 1951", and "August 1, 1951", respectively.

2. Section 2 of Supplementary Regulation 1, as amended, reads as follows:

SEC. 2. *Temporary exemptions, commodities and services for military needs.* (a) The provisions of the General Ceiling Price Regulation shall not apply to sales or deliveries, under a defense contract entered into prior to May 1, 1951, or pursuant to a sub-contract entered into thereunder prior to June 1, 1951, of commodities and services normally produced and supplied only for military use.

(b) The provisions of the General Ceiling Price Regulation shall not apply to sales or deliveries of the following commodities under a defense contract entered into prior to May 1, 1951, or pursuant to a sub-contract entered into thereunder prior to August 1, 1951; (1) Woolen and worsted yarns and textiles; (2) raw, scoured, and pulled wool, wool top, noils, mohair, and wool waste; (3) articles which are made principally from woolen or worsted yarns and textiles (except those in which the woolen material is supplied by a Defense Agency).

(Sec. 704, Pub. Law 774, 81st Cong. Interprets or applies Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.)

Effective date: This amendment is effective April 1, 1951.

MICHAEL V. DI SALLE,
Director of Price Stabilization.

APRIL 6, 1951.

[F. R. Doc. 51-4254; Filed, Apr. 6, 1951; 10:16 a. m.]

[General Ceiling Price Regulation, Supplementary Regulation 2, Revision 1]

GCPR, SR 2—RETAIL COAL DEALERS

Pursuant to the Defense Production Act of 1950 (Public Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Supplementary Regulation No. 2, Revision 1 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATION

This Supplementary Regulation 2, Revision 1, to the General Ceiling Price Regulation contains amendments and revisions to the original Supplementary Regulation No. 2. Because the amendments and revisions are substantial and extensive, it was deemed wise, from a practical standpoint, to reissue the amendments and revisions in the form of a revised supplementary regulation.

The statement of considerations accompanying Supplementary Regulation 2 to the GCPR discussed the need and justification for that regulation. The same reasons apply equally in justification of authority for retail coal dealers to increase their ceiling prices by the dollar-and-cents amount of increases in the prices they pay for other types of solid fuels which have been or will be authorized by the Director to the producers thereof. Supplementary Regulation 13 to the GCPR, Supplementary Regulation 1 to CPR 3 and Supplementary Regulation 1 to CPR 4 have been issued by the Director authorizing increases in ceiling prices to reflect increases in certain costs of coke, bituminous briquets produced at plants at or near the mines, and anthracite briquets produced at plants at the mines, respectively.

Several of the definitions contained in Supplementary Regulation 2 are herein revised to apply to their dealings in all solid fuels rather than bituminous and anthracite coal only.

The Interstate Commerce Commission, by its decision in Ex Parte 175, issued on March 13, 1951, has given authority to the bulk of common carriers to increase interstate rates on coal and coke effective upon 15 days' notice generally by 2 percent per net ton with a maximum of 6 cents per net ton. Such freight increases will become effective on April 4, 1951. This increase in transportation costs will in all cases be a direct charge upon the retail coal dealer which, if he is not permitted to add to his price, must be absorbed by him.

The provision in section 3 (c) of this regulation provides that rail and/or water transportation costs which have been increased by order of the Director, of the Interstate Commerce Commission, or of a regulatory agency of any State, Territory or possession, which have or may become effective since January 1, 1951, and on or before June 30, 1951, may be reflected in the dealer's prices.

The retail coal industry is a highly competitive one and has consistently been a low profit industry. Office of Price Administration surveys in the period of 1942–46 disclose that the industry operated at a loss on an over-all basis during the period of 1936–39, that the net profit margin of the industry in 1941 was 7 cents per net ton, and that the net profit position in 1945 was 18 cents per net ton. The Office of Price Administration found it necessary and provided in its Maximum Price Regulation 122, applying to the retail coal industry, to permit the retail coal industry to add to retail maximum prices all mine maximum price increases and freight rate increases made effective during the OPA period.

Information presently available indicates that the retail coal industry has continued in a depressed financial condition. The absorption of the 2 percent or 6 cents per net ton increase would have the effect of forcing a substantial number of retail coal dealers to operate at a loss and to reduce profit margins to the vanishing point for a further substantial group of retail coal merchants. It is clear that in every case the 2 percent or 6 cents per net ton freight rate increase is an amount which constitutes a very substantial percentage of the entire net profit per ton earned by the retail coal industry. The Director is convinced that in the case of this particular industry it would be inequitable to compel the retail coal industry to absorb the amount of these freight rate increases.

This revised supplementary regulation permits retail solid fuels ceiling price increases based entirely upon actual advances in solid fuel prices and freight charges paid by the retail coal dealer and it does not increase his retail margin.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization the provisions of Supplementary Regulation 2, Revision 1 to the GCPR are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950; to prices prevailing during the period from May 24, 1950, to June 24, 1950, inclusive; and to relevant factors of general applicability.

In formulating this revised supplementary regulation the Director has consulted with representatives of the industry to the extent practicable under the circumstances and has given consideration to their recommendations.

REGULATORY PROVISIONS

Sec.
1. Applicability of revised supplementary regulation.
2. Definitions.
3. Authority to increase ceiling prices.
4. Miscellaneous.

AUTHORITY: Sections 1 to 4 issued under sec. 704, Public Law 774, 81st Cong. Interpret or apply Title IV, Public Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.

SECTION 1. *Applicability of revised supplementary regulation.* This revised supplementary regulation grants authority to retail coal dealers to increase the ceiling prices on certain sizes and kinds of solid fuel sold by them in the 48 States of the United States, the District of Columbia, and the territories and possessions of the United States.

SEC. 2. *Definitions.* When used in this part, the term: (a) "Retail coal dealer" means any person (including the retail outlet, branch or department, of one who is also a producer, wholesaler, lake coal dock operator or tidewater coal dock dealer) to the extent he sells, delivers, or disposes of solid fuel in a transaction involving the disposal of solid fuel physically handled in a truck, wagon or other less-than-carload facility, without regard to quantity or frequency of delivery.

(b) "Producer" means: (1) A person engaged in the business of mining solid fuel or preparing solid fuel at a mine or preparation plant operated as an adjunct of a mine, a coke oven, a briquet plant, a packaged fuel plant, a petroleum coke plant, a place or plant where wood or wood products which are used for fuel are cut or processed, and a place or facility (except a retail coal yard) where coal is rescreened, and (2) any person acting as an agent of a producer in the sale of solid fuel.

(c) "Solid fuel" or "solid fuels" means: (1) Bituminous coal, including all bituminous, semi-bituminous, sub-bituminous and cannel coal; (2) lignite coal; (3) Virginia anthracite; (4) Pennsylvania anthracite; (5) all coke, including beehive, oven, low temperature, semi-distilled coal and petroleum coke; (6) all briquets and packaged fuel made from coke or coal; (7) sea coal used for foundry facings; and (8) wood and wood products used for fuel.

(d) "Distributor" means a person who purchases solid fuel f. o. b. transportation facilities at a mine or preparation plant, a lake or tidewater dock, a coke oven or plant, a briquet or packaged fuel plant or other loading facility, and resells the same in not less-than-cargo or railroad carload lots, or the equivalent thereof, without physically handling such coal, and any person acting as an agent of a distributor.

(e) "F. o. b. mine" and "f. o. b. plant" mean free on board transportation facilities at a mine, a preparation plant, lake or tidewater dock, ovens, and other plant or loading facilities (not including ground storage facilities).

(f) "Ton" means a short or net ton of 2,000 pounds.

(g) "GCPR" means the General Ceiling Price Regulation issued by the Director of the Office of Price Stabilization on January 26, 1951 (16 F. R. 809), as amended.

All definitions used in the GCPR which are pertinent to this revised supplementary regulation are incorporated in this revised supplementary regulation by this reference, except those which are more particularly defined and used herein.

SEC. 3. *Authority to increase ceiling prices.* (a) On and after the third day of February, 1951, in respect of coal, and on and after April 11, 1951, in respect of all other solid fuels, each retail coal dealer may increase the ceiling prices of each size and kind of solid fuel he sells and delivers, determined under the provisions of the GCPR by the actual dollars-and-cents per ton amount of increase in the f. o. b. mine or f. o. b. plant price on each such size or grade of solid fuel charged by the retail coal dealer's supplier, whether producer, sales agent, distributor, tidewater coal dock operator, lake coal dock operator, or equipped dealer in the case of purchases by unequipped dealers, under the authority of any regulation, supplementary regulation, or order issued by the Director on or after February 1, 1951.

(b) The authority to increase base period ceiling prices of any size or kind of solid fuel shall be effective only upon receipt by the retail coal dealer of an acknowledgment of an order for any such size or grade of solid fuel, the shipping notice, and the written statement of the price increase on each such size or grade of solid fuel required of the producer or other supplier under any regulation, supplementary regulation or order of the Director, showing the exact dollars-and-cents amount of increase in price the producer or supplier has added to the price of such size or grade of solid fuel under such regulation, supplementary regulation or order issued by the Director on or after February 1, 1951.

(c) Each retail coal dealer may increase the ceiling price of each size and kind of solid fuel he sells and delivers under this revised supplementary regulation by the exact amount of increase in transportation costs, rail and/or water that have or may become effective since January 1, 1951, and on or before June 30, 1951: *Provided*, Such increase in transportation costs were authorized by the Director, an order of the Interstate Commerce Commission or any regulatory body of a state, territory or possession of the United States: *And provided further*, That the authority to increase the ceiling prices of each size or kind of solid fuel by the exact amount of increase in transportation costs shall be effective only upon receipt by the retail coal dealer of a carrier's invoice, freight bill or other statement of transportation charges, for each such size or grade of solid fuel, reflecting the increased freight charges and required to be paid by the retail coal dealer.

(d) Where purchases of solid fuels are made by a retail coal dealer from suppliers from which no purchases were made during the base period, the retail coal dealer's ceiling price on such solid fuels shall be determined by adding his base period dollars-and-cents margin on a sale of a comparable solid fuel customarily handled which is most nearly like the sale he will make of the new solid fuel.

(e) An unequipped dealer, who is a retail coal dealer without yard facilities or scales, may increase his base period ceiling prices for each size and kind of solid fuel by the exact dollar-and-cents amount of the increase in price charged to him by the equipped retail coal dealer. On sales to unequipped dealers the equipped retail coal dealer shall certify on the sales slip or invoice the exact amount of the increase in price he is allowed hereunder to charge on each such size or grade of solid fuel.

SEC. 4. *Miscellaneous.* The retail coal dealer subject to this revised supplementary regulation shall be subject to all other provisions of the GCPR which are not inconsistent with the provisions of this regulation, including, but not limited to the enforcement and penalty provisions thereof, and the requirement of keeping on file for inspection a statement of his ceiling prices.

Effective date: This revised supplementary regulation to the GCPR shall become effective on the 11th day of April 1951.

EDWARD F. PHELPS, JR.,
Acting Director of Price Stabilization.

APRIL 6, 1951.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 207—NAVIGATION REGULATIONS

BISCAYNE BAY, COCONUT GROVE, MIAMI, FLA.

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.172 establishing and regulating the use of a seaplane restricted area in Biscayne Bay at Dinner Key, Miami, Florida, is hereby amended, as follows:

§ 207.172. *Biscayne Bay, Coconut Grove, Miami, Fla.; seaplane restricted area, Coast Guard Air Station*—(a) *The area.* The waters of Biscayne Bay in the vicinity of Dinner Key Channel within an irregular area described as follows: Beginning at the intersection of the easterly extension of the line of the north wall of the Coast Guard hangar and the sheet steel bulkhead; thence 13° 33', along the bulkhead, 160 feet; thence 51° 00', 128 feet; thence 141° 00', 390 feet; thence 74° 02', 257 feet; thence 136° 53', 186 feet; thence 74° 02', 945 feet; thence 151° 49', 1,041 feet; thence 214° 07', 250 feet; thence 124° 08', 2,680 feet; thence 214° 07', 600 feet; thence 304° 08', 2,660 feet; thence 214° 07', 290 feet; thence 304° 08', 1,615 feet, to the sheet steel bulkhead; thence 341° 48', along the bulkhead, 701 feet; and thence 13° 33', along the bulkhead, 165 feet, to the point of beginning. (All bearings are referred to true meridian.)

(b) *The regulations.* (1) Watercraft shall not anchor or moor within the restricted area. Fishing in the area is prohibited.

(2) Watercraft shall use the area to the minimum extent practicable, and only for the purpose of passing through as expeditiously as possible. No watercraft shall use the channel from one-half hour after sundown to one-half hour before sunrise except in case of an emergency involving danger to life or property.

(3) Watercraft in the area shall give seaplanes the right-of-way at all times. All watercraft shall promptly clear the area when seaplanes are observed approaching the area or when warned by the siren of a crash boat, and shall remain clear of the area while seaplanes are operating in the area.

(4) The enforcing agency will send out a crash boat or boats to warn watercraft in or near the area of impending operations within the area. Each crash boat will sound a siren to attract the attention of watercraft, and the crew will display a sign reading "Plane approaching: Clear channel at once."

(5) The enforcing agency will post at each end of the area a large sign reading "Danger! Coast Guard planes have right-of-way in this channel. Use channels to south if practicable. Clear channel promptly when planes are observed approaching or when warned by siren of crash boat." Notices covering the regulations in this section will also be posted at the nearby marina and wharves and at boat basins in Miami and adjoining towns.

(6) The regulations in this section shall be enforced by the Commanding Officer, United States Coast Guard Air Station, Miami, Florida, and such agencies as he may designate.

[Regs. 21 Mar. 1951, 800–2121–ENGWO] (Sec. 4, 28 Stat. 362, as amended; 33 U. S. C. 1)

[SEAL] EDWARD F. WITSELL,
Major General, U. S. Army,
The Adjutant General.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART A—REGISTRATION AND RESEARCH

SUBPART B—EDUCATION AND TRAINING

MISCELLANEOUS AMENDMENTS

1. In § 21.5 of Subpart A, the title and paragraphs (a) and (b) are amended and paragraphs (c) and (d) are deleted so that § 21.5 reads as follows:

§ 21.5 *Jurisdiction and authority of the registration officer*—(a) *Regional office.* The registration officer in the regional office will be responsible for all determinative actions involving individual veterans, including veterans who are Veterans' Administration employees, in matters under the jurisdiction of the registration and research section and acts as the authorizing officer executing all original and amended authorizations over his signature.

(b) *Central Office.* The registration officer will be responsible for all determinative actions involving individual veterans in matters for which the foreign operations division of the registration and research service, central office, is the agency of original jurisdiction and acts as authorizing officer executing all original and amended authorizations over his signature.

2. In § 21.7, paragraph (a) (2) is amended to read as follows:

§ 21.7 *Application for a course of institutional on-farm training.* (a) • • •

(2) The receipt of VA Form 7–1921 in the Veterans' Administration is a prerequisite to the determination of eligibility and entitlement to institutional on-farm training, and in no instance will any action to authorize payment of subsistence allowance be completed prior to the filing of the formal application. The effective date of the veteran's entrance into training will be that date on the application certified to by the approved institution as the beginning date of his course. However, when change of course to institutional on-farm training is involved, the provisions of § 21.9 will govern the effective date.

• • • • •

3. Section 21.9 is amended to read as follows:

§ 21.9 *Application for change of course and/or change of institution.* (a) Any veteran who desires additional education or training, a change of institution or establishment, or a change of course is required to make application on VA Form 7–1905e and to submit it to the regional office in possession of his records. The date of receipt of the VA Form 7–1905e in the regional office holding the veteran's records will be considered the date of the veteran's request, where such request involves a second change to a different general field, for the purpose of determining the beginning day of the 45-day period in which the Veterans' Administration must make a decision and notify the veteran as provided in paragraph 9 C, Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note). (See § 21.61.)

(b) The effective date of a supplemental Certificate of Eligibility and Entitlement issued to authorize a change of course, additional training, or a change in place of training will not be prior to the date the veteran's application for such change (formal or informal) is received in any office of the Veterans' Administration, except that if the application is for a course which the veteran is required to justify as not being avocational or recreational in character, the effective date of the supplemental certificate will be the date such course is approved by the Veterans' Administration.

4. A new § 21.11 is added as follows:

§ 21.11 *Certificate of eligibility and entitlement.* As a condition precedent to the issuance of a Certificate of Eligibility and Entitlement to any veteran who desires education or training benefits under Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note), or who desires to make any change in a course or institution, the veteran will be required to show in his application (VA Form 7–1950) or his request for change of course, change of institution, or additional education or training (VA Form 7–1905e) the name of the course of education or training he desires to pursue and the institution where he wishes to pursue such course. When a veteran has requested educational and vocational guidance under the provisions of § 21.730 (b) by inserting "Counseling Requested" on the appropriate form (VA Form 7–1950 or 7–1905e), a statement on Certificate C (VA Form 7–1902d) of the name of the course and the name and address of the school or establishment selected, or the same information in a memorandum signed and submitted by the veteran, will fulfill this condition precedent to the issuance of the Certificate of Eligibility and Entitlement.

5. In § 21.51, new paragraphs (c) and (d) are added as follows:

§ 21.51 *Continuing entitlement.* • • •

(c) Where the evidence of record establishes that a veteran by reason of his unsatisfactory progress will no longer be retained or would not be permitted to reenroll in the course by the institution in accordance with its regularly prescribed standards and practices or where a veteran discontinues his course at a time when his progress was unsatisfactory in accordance with the regularly prescribed standards and practices of the institution, there will be no further entitlement to education or training under the law, unless:

(1) The veteran, upon application for additional education or training or for a change of course, is able to establish facts to show that his failure to progress was not due to his own misconduct, negligence, or lack of application; and

(2) It is determined by application of advisement and guidance procedures that the veteran has need of the desired course to complete his educational or job objective and that his aptitudes are such as to give reasonable assurance that he can successfully complete the requested course.

(d) No further consideration will be given to a veteran's request for an additional course of education or training under Part VIII if his record shows that there has been discontinuance of more than one course of study under either Part VII or Part VIII because of unsatisfactory progress, or where he has discontinued more than one course under either Part VII or Part VIII at a time when his progress was unsatisfactory in accordance with the regularly prescribed standards and practices of the institution.

6. A new center head is added immediately following § 21.56 to read as follows:

COURSES OF EDUCATION AND TRAINING UNDER PART VIII, VETERANS REGULATION 1 (A), AS AMENDED (38 U. S. C. CH. 12)

7. New §§ 21.57 through 21.61 are added as follows:

§ 21.57 *Definition of course of education or training.* The education or training to which a veteran is eligible and entitled under paragraphs 1 and 2, Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note), is defined in paragraph 3 of Part VIII as "such course of education or training, full-time or the equivalent thereof in part-time training" as the veteran may elect to pursue "at any approved educational or training institution at which he chooses to enroll."

(a) Based on the particular terms as used in Part VIII, only one course at one institution may be pursued at any one time, except as otherwise provided in §§ 21.57 to 21.61, inclusive. The one course may consist of such curriculum, program of study, or combination of unit courses or subjects as are prescribed or recommended by the institution as constituting the course or the one course may consist of a single unit course or subject. The course will be directed toward a predetermined objective not necessarily vocational in nature. In school courses such an objective may be educational, as obtaining a high school diploma or a college degree; or it may be vocational, as preparing for the occupation of teacher or other professional occupation, or as preparing for the occupation of plumber or other trade. In school courses, the educational or vocational objective also may be stated in terms such as "a 4-year course of study, the first 2 years of which are to be preparatory to specializing in a field of study which may be determined at the initiation of the course or which will be determined with the school at or before the completion of the preparatory portion of the course." In training on the job, based upon provisions of paragraph 11 (b) of Part VIII, the objective will be vocational. Very different unit courses or subjects may form a part of the elected course, provided they are prescribed or recommended by the institution as necessary or desirable functional parts of the course or as elected parts of the veteran's course for which credit is granted. This would permit a veteran to include as a part of his course not only the required major or minor unit courses and such elective courses as are necessary or desirable functional parts of his course, but also such other elective unit courses as are clearly established as available to other students enrolled for similar over-all courses. For example, a course of stenography or typing, although not usually functional as part of a course for the objective lawyer, where a veteran plans to practice law in such a way as to make the use of stenography or typing a practical benefit or even a necessity, such unit course or courses may well be a part of the veteran's one over-all course. Likewise, while a course of Spanish ordinarily would not be a functional part of a course in refrigeration, where the veteran planned to practice the occupation refrigeration mechanic in Latin America, if that fact and the facts of his plan were established, then the course in Spanish could well form a part of his over-all course, still subject to prescription or recommendation of the institution offering the refrigeration course. The one course often may consist of training on the job supplemented by related studies in a school or college. There is also the cooperative course involving alternate periods of work in school or college and in a business or industrial establishment. Such cases will require concurrent enrollment in two institutions. (See § 21.59.)

(b) A veteran having completed a course under Part VIII, Veterans Regulation 1 (a), as amended, according to the standards and practices of the institution and having subsequently failed to pass an examination to qualify for license to practice a profession or trade, is not entitled to enroll in and pursue again at the expense of the Government the course which he has already completed except as provided in subparagraph (1) of this paragraph. However, an eligible veteran who has completed a course of education or training under Part VIII may pursue a review course under that part provided the review course is a separate and distinct course specifically organized and established as a review course and, therefore, does not constitute a repetition of a course which the enrollee has already completed. Such a course to be recognized as a review course commonly may be identified by the common characteristics of such a course; namely, concentration of content, intensified application to the pursuit, and the short period required for the course compared to the time required for the primary course. Representative of courses in this category are bar review courses for preparing veterans who have already completed the prescribed course in law for taking the bar examination.

(1) Subject to the limitations set forth in subparagraph (2) of this paragraph, a Part VIII veteran may be authorized not only to pursue a review course for the purposes stated in this paragraph, but to repeat a review course when such repetition is necessary in order to accomplish the veteran's vocational or educational objective and there is good promise that such repetition will enable him to pass the examination and attain licensure. Otherwise, repeating the course should be denied.

(2) For purposes of the limitations of paragraph (3) (b) of Part VIII on payments when the principal course pursued under Part VIII is a short course of less than 30 weeks in length and the review course is a review in whole or in part of that short course of less than 30 weeks, the maximum amount which may be paid for the total course—the short course of less than 30 weeks plus the review course and any repetitions of the review course—cannot exceed $500. However, when the principal course pursued under Part VIII is 30 weeks or more in length and is followed by a review course of less than 30 weeks, the $500 limitation imposed by paragraph 3 (b) of Part VIII will apply only to the cost of the review course. In the latter case, however, the number of times a veteran may be authorized to pursue a review course under Part VIII, including the initial pursuit of the review course plus any approved repetitions, either in whole or in part, as provided for under subparagraph (1) of this paragraph will be limited to a total expenditure of $500.

(3) The provisions of this paragraph have no reference to and do not preclude the repetition of a unit course or unit subject where the veteran has failed the subject or course and the school or training establishment requires him to repeat the unit course or unit subject as a requisite for continuing in his elected course, or otherwise.

§ 21.58 *Types of courses of education and training.* For purposes of Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note), the types of courses of education and training are:

(a) *School course.* A course which is pursued at an institution or a part thereof devoted exclusively to educational or training purposes. The courses would include not only those offered by schools but would include also those offered by such parts of a business or industrial establishment as are operated within the plant as training situations devoted exclusively to educational or training purposes as distinguished from the regular production activities of the establishment.

(1) *Noncredit course.* A unit course or unit subject pursued without credit at an accredited collegiate institution, which various educational institutions refer to as an "audit" course, and "auditor" course, and "auditing" course, a "hearer" course, etc. Such unit courses or unit subjects may be prescribed or recommended by the institution as a part of an enrollee's course or may constitute the enrollee's entire course.

(b) *Training on-the-job course.* A course which is pursued at an establishment devoted primarily to productive agricultural, business, industrial, or professional activities rather than to giving courses of instruction. In such course, the training is pursued toward a specified occupational objective and the learning method is primarily by being told and shown and by observing and assisting, gradually increasing the participation in the productive activities and doing more and more of the productive work with increasing independence of instruction as the course progresses. For purposes of Part VIII, as amended, there are two categories of training on the job, as follows:

(i) *Apprentice training courses.* Apprentice training courses are those which are under the supervision of a State apprenticeship agency, a State apprenticeship council, or the Federal Apprentice Training Service and those which although not under the supervision of a State apprenticeship agency, a State apprenticeship council, or the Federal Appentice Training Service nevertheless are recognized and approved as apprentice training courses by the State approving agency or are approved by the Administrator as apprentice training courses, the approval being based upon the fact that the courses possess the following characteristics:

(a) The course leads to an occupation, the performance of the duties of which requires the use of skills which commonly are learned through training on the job and in which occupation the obtaining of an appointment to a job is based upon having been trained on the job rather than being based on such elements as length of service, normal turn-over, personality, and other personal characteristics.

(ii) The course is definitely identified as an apprentice training course by the establishment offering it.

(iii) The course meets the requirements and criteria of paragraph 11

(excepting paragraph 11 (b) 2e) of Part VIII.

(iv) The course provides for a well-defined, written agreement between the establishment and the trainee setting forth the terms and conditions of training.

Paragraphs 11 (b) 1 and 11 (b) 2 of Part VIII do not apply to apprentice training courses, but the course or program of the veteran will be judged on the basis of the requirements and criteria in paragraphs 11 (b) 1 and 11 (b) 2 of Part VIII, except that the criterion in paragraph 11 (b) 2e of Part VIII shall not apply. Where deficiencies are found, a reasonable opportunity will be given the establishment to make correction.

(2) *Other training on-the-job.* Courses of other training on the job are those courses which, in addition to meeting the definition indicated in this paragraph meet the conditions of paragraph 11 (b), (b) 1, and (b) 2 of Part VIII, as amended.

(c) *Combination course.* A course which is a combination of training on the job and training in school, including related instruction and/or instruction in additional skills, pursued concurrently. Three variations of combination courses are cited as follows:

(1) *Training on-the-job and in school.* A course which is primarily training on the job with supplemental related instruction, usually in school.

(2) *Cooperative course.* A course which is pursued primarily at a school; the objective commonly is attainable through school instruction alone, and the training on-the-job portion of the course is strictly supplemental to the school course. This arrangement is characteristic of cooperative courses on the collegiate level and junior college level and in some technical high schools. Commonly the division of time between the school portion of the program and the training on-the-job portion is such that the student devotes at least one-half of the total time to the school portion, and the periods in school and training on the job are relatively long, such as a full term in school and an alternate term on the job, although shorter periods are also in practice. In some localities there are arrangements where part of each day is spent in school and part on the job and other arrangements where a full day is spent on the job and part time is spent in school one or more times a week. These arrangements sometimes are referred to as cooperative courses. Although the institution offering such a course is quite free to call the course a cooperative course, this type of situation may not be considered as a cooperative course for purposes of Part VIII, but rather as a combination course, training on the job and in school, as in subparagraph (1) of this paragraph. Such a determination will be made despite the fact that the veteran is enrolled, at least nominally, with the school for the on-the-job training as well as the training in school.

(3) *Institutional on-farm course.* For purposes of Part VIII, a course which is specifically defined in paragraph 11 (c), Part VIII.

(d) *Correspondence course.* A course conducted by mail, consisting of one or more written lesson assignments furnished by a school and requiring submittal of written lessons by the trainee. Such lessons usually are corrected and graded by the school and returned to the trainee.

§ 21.59 *Concurrent enrollment in two institutions.* (a) Concurrent enrollment in two educational institutions may be allowed when:

(1) The one complete course as contemplated by Part VIII Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note) is not available at the principal training institution at which the veteran is enrolled.

(2) The principal institution prescribes or recommends the course of training and approves the enrollment in the second institution.

(3) The training furnished by the second institution is part of the veteran's one elected course and can be scheduled satisfactorily.

(4) Books, supplies, and equipment furnished the veteran in connection with his course of training at the principal institution and which may be used in the second institution are not duplicated.

(b) Concurrent enrollment in an approved training on-the-job establishment (principal institution) and an educational institution may be allowed when:

(1) The instruction to be given in the educational institution (including correspondence schools) is related to the training being provided in the training establishment in that it provides the veteran that theory and/or technical information which is directly related to and functional in the practice of the occupation for which the veteran is being trained.

(2) The training establishment in which the veteran is receiving his primary training prescribes or recommends the course of related instruction (i) as a part of the approved training program, and (ii) as necessary to attain the job objective of the individual veteran.

Where provision for related instruction is not included in the training program of the establishment as currently approved, the addition of related instruction to the training program must be approved by the State approving agency before concurrent enrollment is authorized by the Veterans' Administration.

(3) Books, supplies, and equipment furnished the veteran in connection with his training at the training establishment which may be used in the educational institution are not duplicated.

(c) Concurrent enrollment allowed under paragraphs (a) and (b) of this section will be authorized and effected in accordance with vocational rehabilitation and education procedures. (For effective beginning dates see § 21.100.)

§ 21.60 *Restrictions on the pursuit of courses avocational or recreational in character—(a) Courses avocational or recreational in character.* The pursuit of any course elected or commenced by a veteran under Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note), subsequent to July 1, 1948, which is determined to be avocational or recreational in character is prohibited. The following courses shall be presumed to be avocational or recreational in character: dancing courses; photography courses; glider courses; bartending courses; personality-development courses; entertainment courses; music courses, instrumental and vocal; public-speaking courses; and courses in sports and athletics such as horseback riding, swimming, fishing, skiing, golf, baseball, tennis, bowling, and sports officiating (except applied music, physical education, or public-speaking courses which are offered by institutions of higher learning for credit as an integral part of a course leading to an educational objective); but no such course shall be considered to be avocational or recreational in character if the veteran submits complete justification that such course will contribute to bona fide use in his present or contemplated business or occupation.

(b) *Other courses declared avocational or recreational in character by manager.* Managers are authorized to declare other courses to be avocational or recreational in character if they are well known to managers to be frequently pursued for avocational or recreational purposes within their regional office areas. But no such course will be considered to be avocational or recreational in character if a physically qualified veteran submits either (1) complete justification that such course will contribute to bona fide use in his present or contemplated business or occupation, or (2) a certificate in the form of an affidavit by the veteran supported by corroborating affidavits by two competent disinterested persons that such education or training will be useful to him in connection with earning a livelihood. No evidence of physical qualification will be required except in those occupations for which physical standards are prescribed. In such cases a physician's certificate that the veteran is not suffering from any disease or disability that would disqualify him for the job for which training is desired will be required.

(c) *Flight courses.* (1) An elementary flight or private pilot course or a commercial pilot course elected by a veteran in an approved school shall not be considered avocational or recreational in character if the veteran submits to the regional office a certificate showing that he is physically qualified in accordance with the standards of the Civil Aeronautics Administration to obtain the type of license which will enable him to attain his employment objective together with (i) complete justification that such course is in connection with his present or contemplated business or occupation, or (ii) a certificate in the form of an affidavit by the veteran supported by corroborating affidavits by two competent, disinterested persons that such flight training will be useful to him in connection with earning a livelihood, which affidavits, in the absence of substantial evidence to the contrary, will be accepted as constituting compliance with the law.

(2) An elementary flight, private pilot, or commercial pilot course or part thereof, which is provided by an institution of higher learning as a voluntary elective course for which academic credit is given as partial fulfillment of the institution's standard credit-hour requirement for the veteran's degree objective, shall be subject to the provisions contained in this paragraph and as heretofore held by the Veterans' Administration shall be considered as separate courses. Flight courses which are required by the institution as a part of the institution's standard credit-hour requirement for the veteran's degree objective shall not be considered avocational or recreational in character when the institution certifies to the Veterans' Administration that the veteran is required to pursue such course for credit in order to complete his degree requirement.

(3) A flight instructor course, an instrument rating course, a multiengine class-rating course, or an airline transport pilot course elected by a veteran in an approved school shall not be considered avocational or recreational in character for a veteran who satisfies the regional office that he possesses a valid commercial pilot's license and the medical certificate which he is required to possess in order to obtain the license or certificate for which the course is pursued.

(d) *Adjudications of evidence.* In all adjudications under this section the expression "substantial evidence to the contrary" means evidence of a nature ordinarily acceptable as competent to establish facts or circumstances contrary to the matter sought to be established by the claimant and may consist of matters of record in the Veterans' Administration or otherwise properly within the knowledge of those charged with the adjudication. The expression "competent, disinterested persons" means persons who are qualified by reason of their personal knowledge of facts and circumstances to testify concerning the use of the course of training by the veteran in connection with his earning a livelihood, and who, except as to present or prospective employers, have no interest whatsoever, either personal or by association, in the pursuit or nonpursuit by the veteran of the desired course. For the purpose of this definition, supporting affidavits by members of a veteran's family or by employees or owners of schools will not constitute evidence of disinterested persons. In any event, corroborating affidavits must establish clearly and definitely the identity of the affiant, the character of his relationship or association with the claimant, and the basis and source of his asserted knowledge of the matters to which he testifies.

(1) In any case wherein a veteran makes application to pursue any course comprehended by paragraphs (a), (b), or (c) of this section, the registration officer will determine whether the justification or affidavit evidence meets the requirement of this section. If the registration officer's determination is favorable, the course will not be considered avocational or recreational in character, but if the determination is unfavorable, the registration officer will disapprove pursuit of the course and will notify the veteran. In any case where the veteran has previously pursued a course of education or training, the provisions of §§ 21.51 and 21.61 will also be for application as appropriate, but an adjudication under the provisions of those sections will not be invoked in any case unless the registration officer has first determined that the justification or affidavit evidence submitted has met the requirements of this section.

(2) Complete justification and affidavit evidence required by this section must be submitted to the regional offices and approved by the registration officer prior to the veteran's entrance into training. No payments for subsistence allowance or tuition may be authorized for any period prior to the date of such approval.

§ 21.61 *Changes of course or additional education or training.* (a) With respect to the pursuit of courses on and after July 25, 1951, or the date 4 years after the veteran's separation from active service, whichever is the later, § 21.35 is for application.

(b) In accordance with paragraphs 3 (a) and 9 B and C, Part VIII, Veterans Regulation No. 1 (a), as amended (3 U. S. C. ch. 12 note), the Administrator may for reasons satisfactory to him disapprove a change of course of instruction except that a veteran who has completed or discontinued a course (for any reason other than unsatisfactory conduct or progress) may, prior to the statutory delimiting dates, change his course or secure an additional course in the same general field and may make one change from one general field to another general field provided he has not previously made one change from one general field to another.

(c) There are three situations in which veterans who have previously entered education or training may wish new or extended benefits. The three situations are:

(1) A veteran who is enrolled in or pursuing a course and wants to change to another course either in the same institution or in another approved institution;

(2) A veteran who has discontinued a course and desires to resume education or training;

(3) A veteran who has completed a course and wishes an additional course of education or training.

(d) In all three situations the veteran, otherwise eligible, and whose conduct and progress were satisfactory, will be permitted additional education or training within the period of his entitlement in accordance with the provisions of this section.

(e) There is no prohibition against additional education or training which is commonly recognized as being in the same general field as the veteran's original educational or job objective or a normally related progressive objective. The veteran's course under such circumstances fits naturally into general fields of related subjects in accordance with the following:

(1) The length of a veteran's course is its progressive continuation along a straight line. An illustration of this is a veteran who wishes to pursue a science course. He may progressively follow his course to his B. S. degree, then to his M. S. degree and then on to his Ph. D. degree insofar as his entitlement will permit.

(2) The breadth of a veteran's course is the specific course undertaken and such other related subjects or manipulative skills as are in the same general field. An illustration of this is a veteran, approved to pursue a course of automobile mechanics who would be permitted related courses of body and fender work, or similar subjects or skills required in the same general field of occupation.

It is intended that these illustrative and similar situations be covered by this paragraph.

(f) For the purposes of this section any change of course or additional education or training not encompassed by the provisions of paragraph (e) of this section will constitute a change from one general field to another.

(g) Course adjustment is a change of one or more unit subjects without a change to a veteran's vocational or educational objective, including the dropping of a unit subject without replacing it with another, or the adding of a unit subject, or a change in the sequence in which unit subjects are taken. These course adjustments may be effected by the institution at which the veteran is pursuing the course of education or training without the prior approval of the Veterans Administration, but the institution shall notify the Veterans Administration immediately of any such adjustments made, except that institutions of higher learning need report only those adjustments which affect the amount of subsistence allowance payable or the debits to be made against the veteran's entitlement.

(h) All requests for a change of course or for additional education or training will be referred to a registration officer for determination. If the veteran has not previously made a change of course and his conduct and progress have been satisfactory, the request will be approved without regard to whether the desired course is in the same or a different general field. If the desired course is in a different general field and the veteran has already made one change from one general field to another, the case will be immediately forwarded to the advisement and guidance section where, upon the basis of a counseling interview conducted in accordance with advisement and guidance procedures under Part VIII, a determination will be made as to whether the veteran has need of the desired course to complete his educational or job objective and whether his aptitudes are such as to give reasonable assurance that he can successfully complete the course. The decision of the vocational adviser will govern. If the veteran is not notified as to the decision within 45 calendar days from the date the VA Form 7–1905e is received in the Veterans' Administration office holding the veteran's records, the veteran's request for the second change of

general field shall be deemed to have been approved, provided he has not failed to appear at the time required for advisement and guidance or has not otherwise failed to cooperate in receiving the service.

(i) A request for a third change from one general field to another may be approved only upon the established need for a short, intensive course which will prepare the veteran for employment in a critical occupation for which there is a known shortage of trained workers. The burden of proof will be upon the veteran to establish these facts and the decision will be made by the registration officer on the basis of the evidence of record.

(j) If a veteran requests advisement and guidance for the purpose of assisting him in arriving at the most suitable course, a decision on the request for change cannot be made until advisement and guidance is completed since the veteran will not previously have designated the course to which he desires to change. The 45-day limitation will not apply in such cases.

(k) Advisement and guidance will not be required in cases of veterans who at the time of making application for a change of general field are located in any foreign country or other area not under the jurisdiction of a regional office. In such cases, the registration officer will, upon determination that a change in general field is involved, and that the veteran has previously had a change from one general field to another, inform the veteran that he will be required to submit complete justification to establish (1) that he has need of the desired course to complete his educational or job objective, and (2) that his educational qualifications are such as to give reasonable assurance that he can complete the course successfully. On the basis of the veteran's submission and the other evidence of record the registration officer will determine whether the requested course will be approved or disapproved and will notify the veteran.

(l) Under the provisions of this section, no benefits will be authorized for any period prior to the date of first receipt of the veteran's application, formal or informal, in any office of the Veterans Administration, or the date the veteran enters training, whichever is the later. While prior approval is not required, no payment will be made to either veteran or an institution in cases where the application is disapproved. These benefits may not be extended in any instance where their extension would be in conflict with the avocational or recreational provisions of the law and regulations thereunder.

8. In the Provisional Regulations of Subpart A, paragraphs (a) (1), (b), (c), and (d) of § 21.189 are canceled.

9. In Subpart B, §§ 21.300, 21.301, 21.302, 21.303, 21.304, 21.305, and 21.307 are canceled.

§ 21.300 *Definition of course of education or training.* [Canceled.]

§ 21.301 *Types of courses of education and training.* [Canceled.]

§ 21.302 *Full-time training for purposes of Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12).* [Canceled.]

§ 21.303 *Part-time training for purposes of Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. VB).* [Canceled.]

§ 21.304 *Measurement of noncredit courses for purposes of Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12).* [Canceled.]

§ 21.305 *Repetition of a course.* [Canceled.]

§ 21.307 *Changes within the course not considered to be changes of course.* [Canceled.]

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. and Sup. 11a, 701, 707, ch. 12 note. Interprets or applies secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. and Sup. 693g, 697–697d, 697f, g, ch. 12 note)

This regulation is effective April 7, 1951.

[SEAL] O. W. CLARK,
Deputy Administrator.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 1—ESTABLISHMENT AND ORGANIZATION OF THE POST OFFICE DEPARTMENT

COMPTROLLER, BUREAU OF ACCOUNTS

In § 1.9, amend paragraph (j) (3), as amended (15 F. R. 4686), to read as follows:

§ 1.9 *Office of Postmaster General.*

* * *

(j) *Comptroller, Bureau of Accounts.*

* * *

(3) *Divisions of the Bureau of Accounts, and assignment of duties.* There shall be in the Bureau of Accounts a Division of Cost Ascertainment, a Division of Accounts, and twelve Regional Accounting Offices, each of which shall be comparable to a Division. A Regional Accounting Office shall be located at each of the following cities:

Atlanta, Ga.	Minneapolis, Minn.
Boston, Mass.	New York, N. Y.
Chicago, Ill.	Philadelphia, Pa.
Cleveland, Ohio.	Richmond, Va.
Dallas, Tex.	Saint Louis, Mo.
Kansas City, Mo.	San Francisco, Calif.

The Division of Cost Ascertainment, the Division of Accounts, and each of the twelve Regional Accounting Offices shall be under the supervision of a Director. The Director of the Division of Cost Ascertainment, the Director of the Division of Accounts, and the Director of each Regional Accounting Office, and the other personnel of the Bureau of Accounts, the various Divisions and the Regional Accounting Offices shall perform such duties as may be assigned by the Comptroller.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369. Interprets or applies Pub. Law 712, 81st Cong.)

[SEAL] J. M. DONALDSON,
Postmaster General.

[F. R. Doc. 51-4144; Filed, Apr. 6, 1951; 8:46 a. m.]

PART 6—SUPPLY CONTRACTS; SERVICE PROPERTY; TELEGRAMS

WASTE PAPER AND TWINE

In § 6.22 *Waste paper and twine* (39 CFR 6.22) amend the third sentence of paragraph (a) to read as follows: "All proposals, except as provided for in paragraph (b) of this section, for the sale of such material accumulated in Federal buildings in which post offices are located and in classified stations and branches thereof, and also in post offices and classified stations and branches thereof located in leased quarters, shall be procured and handled by the custodians of the Federal buildings and by the postmasters of post offices located in leased quarters in accordance with instructions of the Assistant Postmaster General, Bureau of Facilities."

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25, 5 U. S. C. 22, 369)

[SEAL] V. C. BURKE,
Acting Postmaster General.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR, Part 925]

[Docket No. AO-226]

HANDLING OF MILK IN PUGET SOUND, WASHINGTON, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Seattle, Washington, during the period August 14–September 6, 1950, pursuant to notice thereof duly published in the FEDERAL REGISTER (15 F. R. 4508; Doc. 50-6161; 15 F. R. 4694; Doc. 50-6342) upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Puget Sound, Washington, marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on January 29, 1951, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto which was published in the FEDERAL REGISTER on February 1, 1951 (16 F. R. 935; Doc. 51-1587).

Within the period reserved for exceptions a number of producer organizations and handlers filed exceptions to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings, conclusions and actions decided upon herein are at variance with the exceptions, such exceptions are overruled.

The major issues developed at the hearing were concerned with the following matters:

1. Whether the handling of milk produced for the Puget Sound marketing area is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether the issuance of a milk marketing agreement or order will tend to effectuate the declared policy of the act; and

3. If an order is issued, what its provisions should be. With respect to this issue, several primary points were developed. These were concerned with:

(a) The proper size of the marketing area;

(b) The proper scope of regulation;

(c) The classification of milk;

(d) The level of class prices to be paid and the methods for determining such prices;

(e) The type of pool to be used in distributing returns to producers; and

(f) Administrative provisions.

Findings and conclusions. The following findings and conclusions on the material issues decided herein are hereby made upon the basis of the record of the hearing:

Character of the commerce. (1) The handling of milk produced for the Puget Sound marketing area is in the current of interstate commerce and directly burdens, obstructs, or affects interstate commerce in milk and its products.

There are substantial interstate movements of milk produced for the Puget Sound marketing area and of milk products manufactured from such milk. Fresh fluid milk and frozen fluid milk processed in plants of handlers are transported by ship or van to the Territory of Alaska for use there by both Army and commercial establishments.

During 1949 the Seattle Quartermaster Market Center procured 2,892,068 quarts of Grade A milk from the area and in 1950, 1,115,366 quarts (to August 1). Such milk was processed from milk of the type (Grade A) proposed to be covered by the order and in plants of Seattle, Everett and Tacoma handlers. At least 90 percent of the volume of milk so purchased was frozen and exported in paper containers to Alaska for consumption there by the Army. Such purchases have been made by the Center regularly since July 1946.

A plant operated by a cooperative association of producers shipped by air and water 209,763 pounds of Grade A fresh and frozen fluid milk to commercial accounts in Alaska between January 1 and June 15, 1950. Occasional shipments of Grade A milk have been made also to the Portland, Oregon, market. Occasional shipments of Grade A milk to the Pullman and Spokane, Washington, markets have been combined with, and have entered into competition with, milk produced in Idaho. In addition, interstate rail and airlines, steamships and other ocean-going vessels are provisioned with locally produced Grade A milk.

When fluid milk plants located in the proposed marketing area have excesses of Grade A milk above their needs for fluid milk uses, which occur particularly during the months of seasonally high milk production, such excesses normally are disposed of to manufacturing milk plants in the form of milk where they are processed primarily into evaporated milk, nonfat dry milk solids, butter and cheese. Over 52 million pounds were so diverted to milk product uses by cooperatives in the area in 1949 while more than 92 million were diverted by such organizations up to June 15 in 1950. The products containing such milk are shipped in large part to other states and to foreign countries. Some additional Grade A milk is disposed of by proprietary handlers in similar channels. Such milk products (butter, cheese, evaporated milk and nonfat dry milk solids), produced in part from Grade A milk received by cooperatives and proprietary handlers in the Puget Sound area, compete for markets both locally and in other states with similar products produced in other states. Substantial amounts of both Grade A milk in fluid form and milk products are sold also to military authorities and commercial accounts on military reservations which have been ceded to the United States by the State of Washington.

Need for order. (2) The issuance of a marketing agreement or order will tend to effectuate the declared policy of the act.

The problems encountered by producers supplying the Puget Sound market in maintaining a satisfactory price level to all producers or groups of producers and in providing an adequate supply of milk are not uncommon in fluid milk markets. These problems have reached an acute state. They arise from the presence of factors of instability as described below and generally inherent in the fluid milk industry. Voluntary attempts of producers to maintain an orderly market have been disappointing and ineffective.

Milk produced for the Puget Sound market for consumption in fluid form as Grade A milk must be produced under rigid sanitation requirements. Producers must incur heavy operating expenses not only for extra labor and equipment to attain the required cleanliness and quality of milk but also for purchased feed to keep production at the necessary levels through the fall and winter and for transportation to assure prompt, sanitary and reliable delivery to the market. For the market as a whole the demand for milk for consumption as fluid milk is relatively stable. There are other uses of milk, such as butter, cheese, evaporated milk, ice cream, etc., however, which may be made from "factory" or manufacturing milk which is not required to meet such high sanitation standards as Grade A milk. The production of factory milk is less costly to the farmer.

Although consumer demand for milk for consumption as fluid milk is quite constant throughout the year, there is a wide seasonal variation in the production of milk eligible for such purposes. The breeding characteristics of dairy cattle and the varying availability of fresh pasturage seasonally causes production in the milkshed to follow a pronounced seasonal cycle. Vastly more milk is produced in the spring and summer than in the fall and winter. To meet the winter requirements for Grade A milk in fluid form, including a necessary "reserve," producers produce in the summer about twice as much milk as is needed for fluid consumption, causing extreme market surpluses of supply of a seasonal nature. The need for a "reserve" or "cushion" of supply which on a market-wide basis must approximate 10 to 15 percent of the amount of milk sold in fluid form is created by the variation

in fluid milk consumption from day to day depending upon such factors as the weather, 6-day milk delivery, and holidays, and by the existence of many distributors operating independently of each other, who attempt to carry the necessary daily reserves in their varying operations. Since there has been no practicable way of correlating supplies to fluid consumption more closely, there must be available to handlers at all times more milk than they expect to sell for fluid use.

The presence of market surplus above fluid milk and cream needs caused by these recurring conditions and from time to time by price maladjustment has produced difficult pricing and marketing problems. Significant also is the fact that milk is highly perishable and bulky. Because of the latter characteristics, farmers cannot retain milk on their farms to await favorable price conditions. The milk must be shipped every day irrespective of whether prices are favorable or unfavorable. Since the total supply of Grade A milk produced cannot find a ready market as fluid milk, particularly in flush periods, the surplus quantities, even though of Grade A standard, must find outlets in butter, cheese or other manufactured milk products in competition with similar products produced in other production areas or locally from factory grade milk, and, therefore, cannot command as high a price to producers as milk disposed of in fluid form. Because milk as a food beverage has a value higher than for most other uses, producers of Grade A milk for the Puget Sound area strive in competition for this outlet.

During and immediately following World War II there was a shortage of milk in this market. In such period the competition for milk supplies was keen. Handlers as a group competed among themselves and with the proponent cooperatives for the available supply of Grade A milk. Some handlers purchased milk from such cooperatives, some bought all or nearly all of their requirements from independent producers, and others purchased milk from both sources. The proponent cooperative associations, selling through a single marketing agency, offered milk for fluid use to handlers at a uniform price established by the agency. The proceeds of the sale of milk by such associations have been "pooled" and then apportioned among the individual associations in accordance with a "base and surplus" plan (additional discussion of base and surplus plans is set forth hereinafter). The final "settling price" with member producers by the individual association became the major factor in establishing the returns received by all producers of Grade A milk in the segment of the milkshed in which the association had membership whether the producer was a member or an independent shipping to a proprietary handler. The price paid for milk purchased by handlers from independent producers tended to follow the settling price of the association in the local area of the milkshed. Although variations in the associations' monthly settling prices occurred, such variations, except those caused by differences in cost of plant operation, were offset through the distribution to the members of (a) a thirteenth check, (b) an added increment in his share of ownership in the association or its assets, or (c) a certificate of debt payable at a later date. The tendency of handlers to follow the prices announced monthly by the associations in the different parts of the milkshed resulted in the payment to independent producers of various prices for milk. A substantial proportion of the supply was being utilized in fluid form even in the flush production season and little surplus remained to fall into lower-valued uses. Because the settling prices to producers were not widely different from the fluid milk price of the associations as the result of the short supply, the situation was not critical in this period.

However, there have been times since when the production of Grade A milk has exceeded greatly the area's requirements for fluid use. Volumewise this has been caused mainly by the wide seasonal increases in production during the spring and summer months. However, even in the short production seasons of 1948–1949 and 1949–1950 some surplus above the necessary daily reserve requirements existed. In this situation handlers buying from independent producers have tended to adjust supplies carried in their plants as close as practicable to actual short period needs while cooperatives, not restricting membership or refusing to accept Grade A milk offered by members, have been unable to avoid assuming an increasing proportion of the total surplus present. The larger handlers also have tended to favor buying from independent producers rather than from the proponent cooperatives wherever possible even to the extent of developing additional sources of supply instead of using the existing facilities of such cooperatives. Such developments in buying practices, as discussed more in detail hereafter, introduced and aggravated price variations and inequities between producers of the essential milk supply which, if not corrected, could lead ultimately in this market to the kind of extreme competitive conditions that cause the Congress to make available the type of regulatory program under consideration here.

In the fall of 1949 one of the largest companies cancelled a contract for 11,000 pounds of milk daily purchased from one of the cooperatives and another company cancelled its contract for 23,400 pounds daily purchased from another association. This had the effect of reducing the ability of the several associations selling through the marketing agency to pay members by 10 cents per hundredweight. This trend reached a peak in May 1950 when several handlers, including the two handlers referred to, and the marketing agency of the associations could not agree on a contract for the sale of milk of certain producers who in prior months had been independent shippers to such handlers but whose membership in a newly-formed cooperative association had just been activated. The surplus carried by such handlers in the flush season of 1950 was reduced to very small proportions as compared with those of the proponent cooperatives. The milk transferred to cooperative plants as a result of the failure to agree on contract terms of sale is estimated at 150,000 pounds daily. Lower-valued manufacturing milk products provided the only available outlet for this milk. Although one of the handlers resumed purchases through the cooperative marketing agency for a volume of milk to satisfy his needs in the short production months of 1950 (under a contract to expire June 30, 1951 in the middle of the coming flush production season), the proponent cooperatives as a group were relieved only in part of their disproportionate share of the surplus burden of the market.

It appears that the ability of the cooperatives to divert and utilize in the cooperatives' own plant facilities the member milk dropped by handlers was the major factor responsible for preventing a further decrease in the price charged for milk for fluid use in the spring and summer months of 1950. On the other hand, the settling prices of the cooperatives were lowered by the increase in supply in the cooperative pool to be disposed of in manufacturing uses, and this resulted in widening the differentials between the settling prices and the price charged by the cooperatives for milk for fluid use. It is recognized that handlers should not be expected to carry physically in their plants more milk than can be handled reasonably in terms of the plants' requirements. It is equally true, however, that the lower returns from either the necessary reserve or the seasonal surplus of fluid quality milk must be reflected in the price of all such milk irrespective of the plant in which it is received, if a stable market is to exist. Whenever surpluses have occurred, severe pressure has been felt by the cooperatives to lower their price to handlers for milk for fluid use, or in the alternative, to lose their market for fluid milk, since those handlers making payment for milk for fluid use at or near the cooperative blended price have, under the circumstances, a definite and substantial advantage in the purchase of milk for sale competitively on wholesale and retail routes. Either path leads to disorderly marketing and results in an unreasonable price situation for producers as a whole. Extreme competition for fluid milk outlets has developed among producers and, except in times of a real shortage of milk, organized producers have no apparent means to bring about reasonable uniformity in prices among all handlers at a satisfactory level or to prevent one group of handlers from obtaining milk for the same purposes at substantially lower costs than are paid by others, and thus to prevent recurrences of disorder in this market.

The prevailing buying practices have resulted also in wide variations in producer returns both within the ranks of independent producers and between the independent producers and cooperative members. Milk statements of producers submitted for recent months indicate that in many instances independent producers have been paid higher returns per hundred weight than cooperative members in comparable circumstances as to location and the butterfat test of milk.

A handler may well be in a position to pay a higher return to the independent producer and yet have a price advantage, in terms of his own utilization, over other handlers in the purchase of milk. Also, the large companies purchasing milk from independent producers in more than one county in the milkshed follow the practice of paying different returns to such producers depending on the county from which the milk is drawn, which variations are not related strictly to differences in transportation and handling costs. It appears that, even among handlers buying independent milk, the cost of acquiring milk varies with the location of the farms from which the particular handler draws his supply. The higher returns paid to independent producers as compared with payments made by the associations that are based on their smaller share of the fluid milk market have caused extreme dissatisfaction among the member producers who represent between 65 and 85 percent of the total number supplying the market.

Lack of uniformity among handlers in the cost of milk has made it impossible in recent months for handlers buying all or most all of their milk for fluid use from the proponent cooperatives to bid on equal cost terms for the large volume business of supplying military and other public establishments in the area. Because of substantial variations in the quantities of milk required by these establishments, supplying handlers need to maintain substantial reserve supplies. Many handlers in the area rely on the cooperative plant facilities to handle the backlog supplies. After paying for their milk the fluid milk price of the cooperatives, such handlers cannot compete effectively with handlers who have a price advantage buying independently. A similar situation has existed also in the wholesale market generally.

In the face of increasing costs with respect to certain important items in the production of milk, such as feed and farm labor, a restriction of the labor supply, and improve alternative opportunities, all resulting in a curtailment of production in the milkshed during the past summer, the proponent cooperatives indicated their intention to raise their selling price of milk for fluid use from $4.75 to $5.56 per hundredweight.[1] It may be possible in view of currently existing supply and demand conditions for producers to maintain the increased price level for a temporary period. However, an increased price at this time constitutes no complete or lasting remedy for recurring unstable market conditions. The market has no framework for orderly price making at such times as surpluses are the dominating factor in price determination. Past experience indicates that the inclination of handlers to carry on bargaining negotiations with the cooperatives which will assure cooperative members a proportionate share of the higher-valued market for milk for fluid consumption depends to a large extent on their inability to obtain adequate supplies elsewhere and on the existence of a shortage of total supply for the market. Under the conditions described, the restoration of an orderly market for all producers, including members of cooperatives, appears unlikely by voluntary means. From the experience of this market, as well as that of large urban markets generally, it is concluded that a fair division of the returns from fluid milk sales among all producers supplying the market and an equitable sharing of the lower returns from the necessary reserve and seasonal excesses is essential for the maintenance of stable market conditions. The adoption of the classified price plan based on the audited utilization of handlers and a market-wide pool will effectively accomplish this purpose. The record discloses also that producers lack detailed market information which is important to the efficient marketing of milk and in arriving at reasonable price levels. Prices are being established at present with limited milk production and consumption data. Under an order, more complete information would become available to all interested parties and would provide the background for price-making under public procedures which afford opportunity to consider complete and reliable marketing information and which encourage a full expression of views by all concerned.

It is concluded, therefore, that the issuance of a marketing agreement and order for the Puget Sound marketing area will tend to effectuate the declared policy of the act, namely, to establish and maintain, by means of the regulatory provisions expressly provided for in the act for such purposes, such orderly marketing conditions in such area as will tend to establish prices to the producers of milk for the marketing area at a level as will reflect the factors set forth in section 8c (18) of the act, insure a sufficient quantity of pure and wholesome milk for the marketing area, protect the interests of the consumer, and be in the public interest.

Marketing area. (3) (a) The marketing area should be defined to include all territory lying (a) west of range 8E in Whatcom, Skagit, Snohomish, and King Counties; (b) west of range 8E and north of township 18N, in Pierce County, except the islands of Anderson, McNeil and Fox and the peninsulas on which Gig Harbor and Lake Bay are located northward to the Kitsap County line; (c) within Thurston County; (d) west of range 5E in Lewis County; (e) east of range 10W and north of township 12N in Pacific County; and (f) south of township 19N in Grays Harbor County, all in the State of Washington. As used in the definition, "territory" would include all municipal corporations; Federal military reservations, facilities and installations, and State institutions lying wholly or partly within the above-described area.

The major fluid milk markets in the Puget Sound marketing area, as defined in the attached order, are the cities of Seattle and Tacoma. The smaller markets proposed for coverage in addition to Seattle and Tacoma, and the plants from which a substantial portion of their supplies of milk are drawn, however, are an integral part of the business of milk handling and distribution in the latter cities. Most of the Grade A milk for local distribution in communities of the marketing area other than Seattle and Tacoma comes from plant sources which also supply handlers operating in the latter two cities. Milk is furnished from country plants in Whatcom County to distribution plants in communities in such county and also to plants in Seattle. Similarly country plants in Skagit and Snohomish Counties supply milk to both local distributing plants and to Seattle plants. As increased supplies above "direct-shipped" quantities are needed in Seattle and Tacoma seasonally, the added milk comes for the most part from plants located in Whatcom and Skagit Counties. A plant in King County sends bulk milk regularly to Seattle and distributes bottled milk locally in Enumclaw. Tacoma, Olympia, and Puyallup plants are supplied throughout the year with milk from a receiving, or country, plant in Lewis County. The latter plant is also the primary source of supply for certain handlers distributing in markets in Lewis and Pacific Counties. A plant at Satsop in Grays Harbor County furnishes milk to buyers in Hoquiam, Aberdeen, Montesano, Fort Lewis, Tacoma, and other communities in the proposed area. Milk assembled at a loading platform at Elma is sometimes received at the Aberdeen plant of a handler for use in serving Grays Harbor County outlets for bottled milk and at other times is shipped to a plant of such handler at Seattle for bottling purposes. Milk qualified for sale in fluid form in one part of the marketing area is equally qualified for sale in other segments of the area with the exception that milk for sale in fluid form in Grays Harbor County must meet health requirements slightly at variance with those in other communities covered. Such difference in requirements, however, is not a barrier to the disposition of milk from plants located in Grays Harbor County to plants serving other counties.

The milk distribution routes, as well as the procurement areas, of handlers in the larger communities of the marketing area overlap to an appreciable extent. This is becoming increasingly so as population between the cities grows. Everett distributors sell in King County, even within the city limits of Seattle. Tacoma and Seattle handlers both serve a residential area between Seattle and Tacoma. A handler at Auburn distributes locally and in Seattle, and in other markets in the proposed area. One Seattle handler, selling through 83 store outlets in the marketing area, distributes in nearly all of the sizable communities, such as Tacoma, Seattle, Everett, Olympia, Burlington, and Bellingham, milk processed in a Seattle plant. Another large handler distributes out of its Bremerton and Tacoma plants milk which is processed at its Seattle plant. Handlers, both proprietary and cooperative, in Seattle, Tacoma and other parts

[1] Official notice is taken that the prevailing price of milk used for fluid milk in Seattle has been increased since the hearing to $5.56 per hundredweight.

of the marketing area compete for the bid business of the military reservations and other Federal procurement agencies in the Puget Sound area. In view of the above circumstances, it is concluded that the entire area described should be included in the defined marketing area.

The record contains proposals to include also in the marketing area the counties of Kitsap, Mason, Clallam and Jefferson, on the Olympic Peninsula and the eastern half of Whatcom County. The recommended decision recommended the exclusion of such areas.

In the exceptions filed objection was raised to the exclusion of the counties on the Olympic Peninsula. It is contended that the exclusion of Kitsap and Mason Counties would "result in the setting up of trade barriers within that territory for the benefit of the local cooperative at the expense of the public interest." The further contention is made that regulated handlers are left to face destructive competition at the hands of unregulated handlers in the excluded area. In this connection it was pointed out that the Navy Yard at Bremerton provides an outlet for substantial quantities of milk and milk products (presumably a possible outlet for milk to be regulated as well as for locally-produced milk). It is alleged also that milk is moved regularly into such counties from territory to be covered by the order and that for this reason such counties are a part of the whole Puget Sound territory and should be treated accordingly.

As heretofore indicated, the marketing problems to be dealt with are concerned primarily with the major markets of Seattle and Tacoma and their sources of milk. In contrast with plants to be regulated, plants located in Kitsap and Mason counties which supply milk for local distribution are not also sources of supply for such major cities. Milk produced in Kitsap and Mason Counties is distributed locally and the supply of such milk is not sufficient to meet local requirements in full. In 1949 the local dairy farm supply was approximately 40 percent short of meeting local needs.

The record indicates the regular import by a local handler in such counties of about 95 percent of his milk needs from a plant in Skagit County which will be under regulation as a supplement to production from his own farm. This milk has been purchased on a price basis equivalent to the highest prices paid for milk for fluid use in the area to be regulated, and such milk has been sold competitively with locally produced milk. There is indication also of the distribution in this area of a small volume of milk processed in plants in Seattle and the importation at times by the local cooperatives of raw milk from producers in the Grays Harbor County area. At least some of the latter milk distributed from Seattle plants on routes in such counties has been purchased on a price basis similar to that applicable to the imported Skagit County milk. Also, prices paid to local producers supplying Kitsap and Mason Counties and for the Grays Harbor imports have been generally higher than prices to producers supplying the principal markets east of Puget Sound.

A milk marketing order is a type of regulation requiring a specific determination of the boundaries of the area to be covered, and the question of the appropriate size of the Puget Sound marketing area was considered at length on the basis of the proposals made. Contrary to the handlers' position, the prevailing level of prices paid in such counties for Grade A milk received from farmers, the deficit supply situation, the dependency of such areas on sources to be regulated for supplemental milk supplies, particularly to serve Navy Yard requirements, the relatively small quantity of milk disposed of in such counties from Seattle plants, and the price basis on which most of the milk has been sold in these counties in the past from plants to be regulated leads to the conclusion that the omission of such counties from the marketing area at this time will not constitute a significant handicap to regulated handlers. It is concluded further from the record that dairy farmers supplying such counties do not require the benefits of an order at this time and the inclusion of the milk of such dairy farmers under the order would not alter appreciably its effects with respect to producers whose milk is to be priced or assist materially in the establishment and maintenance of orderly marketing conditions in Seattle, Tacoma and the other markets covered. Whether or not a different conclusion in this respect may be warranted in the future must rest upon market developments not indicated by the present record.

It was contended in the exceptions in regard to Clallam and Jefferson counties also that regulated handlers would be faced with destructive competition at the hands of unregulated handlers if such counties were excluded. Clallam and Jefferson Counties are only sparsely populated except for a few small port communities. Certain milk originating in these counties will be regulated because of direct shipment to a fluid milk plant in the marketing area or receipt at country plants serving the marketing area. The volume of milk in such counties left unregulated is negligible. The record does not justify a conclusion that such disposition of regulated milk as there is in such counties will be affected materially by the exclusion of the handling of such negligible quantity of milk from the regulation.

The area east of range 8E in Whatcom County is largely an unpopulated area and lacks important outlets for fluid milk.

In view of the evidence presented the specified counties on the Olympic Peninsula and the area east of range 8E in Whatcom County should not be included in the defined marketing area.

Scope of regulation. (b) The minimum class prices established should apply only to milk (exclusive of milk of producer-handlers as hereinafter indicated) which is qualified under applicable health authority regulations for consumption as fluid milk, fluid milk products, and cream in the marketing area, and only to that portion of the milk so qualified which is either actually so utilized in the marketing area or is produced primarily to satisfy the need for these products in the marketing area. Only those farmers producing milk meeting such conditions should be considered to be producers of milk to which the minimum class prices apply, and to the producers eligible to share, under the market-wide pool, in the returns from the sale of milk for fluid purposes by being given assurance of payment for their base milk at not less than the uniform price for base milk.

The establishment of minimum prices for milk which are required to be paid by handlers, and the distribution to producers of the returns from the sale of milk by means of a market-wide pool as herein provided, make it necessary to identify rather precisely (a) the milk to which such minimum prices apply, and (b) the farmers or producers who are to share in the returns from the sale of milk for which minimum prices are established. Primarily for this purpose an order should include definitions of "dairy farmer," "producer," "fluid milk plant," "country plant," "nonpool plant," "producer milk" and "other source milk."

It is also necessary, of course, to define the term "handler" essentially for the purpose of identifying those persons on whom obligations and requirements are, or may be, imposed by the order, including the obligation to pay the minimum prices established. It is provided, however, that a "producer-handler" shall be exempt from all the regulatory provisions of the order except that requiring the filing of reports as requested by the market administrator. The producer-handler maintains control of his milk until ultimate disposition and in this respect his situation is entirely different from the regular producer whose milk is marketed through a handler. On the other hand, such persons frequently change their status and it is necessary for the market administrator to have authority to require reports from the producer-handler in order to verify his continued status as such as well as to supplement other market information. The proponent cooperatives proposed the pooling and pricing of milk of producer-handlers (who do not receive milk from other producers) in the same manner as producer milk received by other handlers. The testimony of several witnesses indicates, however, that this would add to the administrative burden without assisting in a substantial measure to a solution of the market difficulties of which proponents complain. Exceptions were taken to such exemption on the grounds that it constitutes discrimination against other producers and handlers and that the burden of carrying surplus milk should be extended to producer-handlers. It was suggested that the number of persons to which the exemption applies might be reduced by revision of the "producer-handler" definition to exclude at least persons who receive milk from other handlers. After further consideration it is concluded that the exemption of producer-handlers will not discriminate against other producers or handlers and that the basic objectives of the regulation may be achieved

without the application of the order to producer-handlers on the same basis as other handlers.

The Washington State Uniform Fluid Milk Act, together with county and municipal milk ordinances and codes, requires that milk for consumption in the marketing area in the form of milk and the milk products defined herein (§ 925.41 (a)) as Class I milk be derived exclusively from Grade A milk. Such laws and regulations prescribe the conditions under which such milk may be produced and distributed. In general, however, any Grade A milk is eligible for distribution within the marketing area, insofar as health authority regulations are concerned, regardless of whether or not it was produced primarily for, and as a part of the regular supply for, markets within the marketing area.

Virtually all milk utilized as Class I milk in the marketing area during recent years, however, has come from farms and plants located within and immediately adjacent to the marketing area, or on the Olympic peninsula. With or without an order regulating the handling of milk in the Puget Sound area, there appears to be no immediate necessity for or prospect of expanding the area from which current requirements of Grade A milk are obtained because of relatively large potential supplies within the area. While it is not the purpose of the order to prescribe the area from which milk may be obtained for distribution in the marketing area, it must be recognized that a market-wide pooling arrangement is subject to certain abuses against which reasonable safeguards must be provided.

The institution of a market-wide pool could create incentive for producers and handlers who had not previously supplied milk for the marketing area to become eligible to share in the Class I sales of the market without actually supplying the market with fluid milk or assuming any responsibility for maintenance of the necessary reserve supply. Such a development would not only fail to contribute to the orderly marketing of milk in the area or to any of the purposes sought to be accomplished by the order but would tend to conflict with such objectives. On the other hand, all sources from which milk is obtained as a necessary part of the supply for the area during the season of lowest production should be entitled to participation in the pool on a year-round basis. Otherwise, milk from producers in outlying areas most distant from the centers of population within the area and needed during the season of shortest production would have to continue to be distributed in the area at times when the necessary supply could be obtained more economically and efficiently from nearby sources. It seems apparent, however, that no significant abuse will result from permitting, without restriction, participation in the pool on a year-round basis of all Grade A milk received at plants within the present, and historical, supply area.

Accordingly, "producer milk" (intended to identify the milk for which minimum prices are required to be paid) is defined as Grade A milk received at (or caused to be diverted from) either a "fluid milk plant" or a "country plant." The terms "fluid milk plant" and "country plant" in turn are defined in a manner designed to include all of those plant sources, and only those sources, of Grade A milk which in the past have been, or in the future may become, an integral part of the year-round supply for the marketing area. As these terms are defined, all Grade A milk received directly from producers at a plant located in the marketing area, duly approved by health authorities, and from which milk in the form of fluid milk, fluid milk products or cream is distributed within the marketing area would be milk to which the minimum class prices apply, and such producers would be eligible to receive the minimum payments established. The definition of this type of plant (fluid milk plant) is designed, by being applicable only to plants located in the marketing area, to include only those plants customarily and regularly engaged in the distribution of milk and cream in the usual manner within the marketing area. All of such plants currently known to exist are located within the marketing area. Furthermore, an out-of-the-area plant which might later engage in direct distribution in the area would be eligible for pool participation as a country plant on the same basis as a plant similarly located from which bulk shipments were made to a fluid milk plant in the marketing area.

Distribution, in this connection, is intended to include but not to be limited to delivery on wholesale or retail routes, or delivery at the plant or plant store, in customary consumer packages to various types of consumers such as homes, stores, hotels, restaurants, or miscellaneous other establishments which themselves are not primarily engaged in the handling and processing of milk or milk products.

It is apparent that the total volume of Grade A milk produced and received at plants in the territory from which the marketing area is currently, and historically has been, supplied (the marketing area and the Olympic peninsula) is an integral part of the supply for the marketing area. That being the case, it is concluded that all such milk received at plants approved for the receiving of milk qualified for consumption within the marketing area should be included in the pool on a year-round basis. It seems inevitable that the imposition of restrictions designed to exclude any of such milk from the pool would merely result in modification of the manner in which it is marketed and handled so as to comply with the restrictions imposed. Such modifications made merely for that purpose would be unlikely to be in the direction of more orderly marketing and efficient handling.

The limitations on pool participation embodied in the proviso of the definition of "country plant" should apply only to plants located outside of the area from which Grade A milk is currently, or historically has been, supplied to the marketing area. Since such plants have no record of having supplied the marketing area with Grade A milk, they should be included in the market-wide pool under the order only in those months in which they either actually supply a substantial quantity of milk to the area or may reasonably be considered to constitute an integral part of the market supply.

The definition of "country plant" as set forth in the recommended decision would include all plants in Clallam and Jefferson Counties approved by a health authority having jurisdiction within the marketing area for the receiving of milk qualified for consumption as fluid milk within the marketing area. This could result in the inclusion in the pool of plants handling milk entirely for local distribution within such counties, and although milk so handled may be acceptable for sale in the marketing area, it actually is not, and never has been, a part of the regular supply for the marketing area. Accordingly the country plant definition is changed herein to exempt from the shipping requirements specified in such definition only those two plants in Clallam County (at Dungeness and Sequim) known to constitute regular sources of supply for the marketing area.

Pursuant to the country plant definition, a plant not located in the current production area would be included in the pool in the months of October, November and December of any year (period of seasonally lowest production) if 50 percent or more of the milk received at the plant directly from producers was either distributed as Class I milk within the marketing area or shipped in the form of milk to a fluid milk plant. A plant supplying the marketing area with at least 50 percent of the milk received directly from dairy farmers for the entire period of October through December would be eligible for pool participation without additional requirements during the following months of January through September. A plant supplying the marketing area with less than 50 percent of its receipts in the season of shortest production is a source primarily for some other market. Such a plant could nevertheless participate in the pool during any of the following months of January through September if 20 percent or more of the milk received from producers at the plant was either distributed directly in the marketing area or shipped to a fluid milk plant in the area. Withdrawal from the market of the milk received at a particular plant during the relatively high production months of February through September would not be likely to seriously threaten the marketing area with an insufficient supply. There seems to be no justification, therefore, for not permitting voluntary withdrawal of any country plant from the pool during that period.

If milk other than producer milk as defined and to which minimum class prices apply is distributed within the marketing area, it is necessary to require payments to be made into the producer-settlement fund on such milk in order to maintain reasonable uniformity of cost of milk and equity among handlers, and to avoid undue displacement of producer milk in Class I by milk from other sources without offsetting compensation. Accordingly, there is included in § 925.70 of the order a provision for including in the

value of milk computed for each handler a payment at the difference between the Class I price and the Class II price per hundredweight of Class I milk which is either distributed within the marketing area or, in the case of a handler receiving milk from producers, which is "other source milk" received by him in excess of his total volume of Class II milk.

Classification of milk. (c) Two classes of milk should be established.

Class I milk should include skim milk and butterfat disposed of in fluid form as milk or skim milk, flavored milk and milk drinks, cream, and cream products. It should include also all skim milk and butterfat not specifically accounted for as Class II milk, except for a reasonable allowance for shrinkage associated with Class II milk operations. Class II milk should include skim milk and butterfat used in manufactured milk products such as cottage cheese, ice cream, evaporated milk, cheddar cheese, nonfat dry milk solids, aerated cream products, etc., and a reasonable shrinkage allowance.

Milk disposed of in fluid form and certain products of milk, including cream and cream products for consumption in fluid form, are required under the health regulations in effect in the marketing area to be made from Grade A milk. The extra expense necessary to produce milk for these purposes warrants their inclusion in Class I milk to be priced above the price level for milk for Class II uses. The products included in Class II milk are those which are not required under the applicable health regulations to be processed from Grade A milk. Such products, although they may contain Grade A milk, must be disposed of in the same competitive field as products made from factory or manufacturing milk. It is considered necessary to permit the free movement of any excess milk into manufacturing channels without burdensome competitive disadvantage to handlers when producer receipts are in excess of the market needs for Grade A milk for fluid uses.

Two proposals for classifying milk "shrinkage" were offered. One would classify all unaccounted-for milk, including operating shrinkage, in Class I milk; the other would classify in Class II milk unaccounted-for milk in an amount up to 3 percent of the total volume of producer milk and other source milk received by the handler, and any remaining quantity in Class I milk.

In paying for factory grade milk, local manufacturing plants pay a stated price per hundredweight of milk received from dairy farmers and thus the same price for the shrinkage associated with such milk as for that portion disposed of in products made. The inevitable shrinkage which results from the manufacture of milk products is reflected in the level of prices paid to dairy farmers for the milk received by these manufacturing plants. The bulk of Grade A milk disposed of in the uses covered by Class II milk is diverted to manufacturing plants where it is commingled with factory milk in the production of milk products such as butter, cheese, evaporated milk, and nonfat dry milk solids. The price paid for such milk is equivalent to the prevailing price to dairy farmers for factory milk. It must be presumed that a given volume of Grade A milk so processed results in a yield of product no less than that produced from factory milk of similar solids content. It is reasonable to presume that the normal shrinkage resulting from the manufacture of Class II milk products will not exceed 3 percent of the skim milk and butterfat so utilized. Handlers who purchase Grade A milk for Class II products, such as ice cream and cottage cheese, to be made in fluid milk plants customarily pay a price for such milk, f. o. b. the seller's plant, at least as high as the going price paid to dairy farmers at representative manufacturing plants in the milkshed. Further, the Class II price formula set forth in the order is designed to produce a price level for Class II milk products substantially equivalent to representative manufacturing milk prices in the production area. It is concluded that equity among handlers with respect to customary shrinkage on Class II operations will result from the application of the Class II price to skim milk and butterfat actually utilized in milk products covered by Class II milk as defined under the order in conjunction with an allowance in such class for actual shrinkage up to 3 percent of such skim milk and butterfat.

Some shrinkage, percentagewise ordinarily a lesser amount than results from the manufacture of the products covered by Class II milk, will result also from Class I operations. The record indicates that in the past handlers purchasing milk from producers at the Class I price established by the proponent cooperative associations have paid such price without discount, or special allowance, of any kind for the portion of such milk lost in shrinkage. Also, both of the order proposals submitted contemplate that abnormal losses of milk from any operation would be priced as Class I milk. In order to achieve equity among handlers with respect to the price of milk lost in shrinkage resulting directly from Class I operations and to avoid an excessively generous allowance (above that discussed above) in Class II milk for shrinkage which normally results from Class II operations, it is concluded that the above pricing practice followed by the associations in selling milk to certain handlers for fluid purposes should be extended to all handlers. Thus, all unaccounted-for milk other than actual shrinkage in Class II operations within the specified limits should be classified as Class I milk. Shrinkage on other source milk will be deducted, however, from the lowest available use classification under the allocation provisions since other source milk is deducted on the basis of receipts rather than on product use.

In the case of transfers or diversions of milk, it is provided that the responsibility for correct classification be placed on the handler who first receives the milk from producers. In the event milk is transferred without adequate proof of utilization, such milk will be classified as Class I milk. Administratively a method of classifying milk transferred between plants of different types is necessary since such transactions are frequent. In this connection the necessity for providing price differentials between districts within the marketing area by means of "location adjustments" (later discussed) creates a need for specific methods of classifying milk transferred between plants in the districts where the location adjustment applies and plants in the district having no such adjustment in order that the producers' uniform price will not be reduced by excessive allowances for the transportation of milk. The method adopted offers the simplest and most feasible solution to the matter of accounting correctly for such milk.

It is necessary further to fix some reasonable distance beyond which the market administrator is not required to send auditors to verify the utilization of milk. The record does not disclose shipments of milk, skim milk, or cream from Grade A milk for manufacturing to locations outside the defined marketing area or the counties of Clallam, Jefferson, Grays Harbor, Kitsap Island, or Mason in the State of Washington although shipments for emergency fluid use to such markets as Pullman, Spokane, and Portland have been made. There are adequate facilities within the marketing area and the above-named counties to absorb all the surplus associated with supplies of Grade A milk produced for the marketing area. Accordingly, skim milk or butterfat derived from producer milk and moved in the form of any of the products covered by the definition of Class I milk to locations more distant should be classified as Class I milk. In the case of products moved to nonpool plants within the marketing area or the above counties, it is concluded that they should be included in Class II milk if the receiving plant does not distribute milk for consumption as fluid milk. In the case of milk transferred to nonpool plants outside the marketing area but within the above-named counties and from which plant milk is distributed for consumption as fluid milk, classification of the milk transferred would depend on the verified use of milk in the transferee plant with the transferred producer milk first allocated to Class I milk uses, or, if verification were not permitted, all of the transferred producer milk would be classified as Class I milk.

Provision is made also for the reclassification of milk originally classified in one class but ultimately used or reused in other class. The general plan for the classification of milk is designed particularly to assure producers of the proper return for milk utilized in the products of each class and to place handlers on an equitable cost basis. The handler, being the person who receives and disposes of the producers' milk, should carry the responsibility of properly accounting for the use of such milk. It follows that he should be required to prove the use made of such milk. This will be facilitated by requiring that he show an actual Class II use of milk or as an alternative have such milk placed in Class I. Other source milk should be allocated first to Class II uses in the handler's fluid milk plant or country plant. This is to prevent other source milk from displacing in Class I milk the milk of producers on

which the market relies for a continuous milk supply.

Class prices. (d) (1) Class I price: The Class I price should be arrived at by adding $1.45 to a basic formula price per hundredweight.

Producer proponents submitted a proposal to price Class I milk by adding $1.45 to the highest of the following prices per hundredweight (to be known as a "basic formula price"): (a) The paying price of 18 Wisconsin and Michigan condenseries, (b) a price based on the market values of butter and cheese, and (c) a price based on the market values of butter and nonfat dry milk solids. Such proposal was supplemented by one to establish an alternate Class I price of $5.56.

The act provides that prices must be fixed at a level which will reflect the price of feeds, the available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, insure a sufficient supply of pure and wholesome milk, and be in the public interest. Prices of several of the major feeds for dairy animals have increased in recent months. The outlook is for higher feed prices in 1951. Farm stocks of principal feeds in the State of Washington are lower than in 1949. The supply of farm labor in the Puget Sound milkshed has tightened rapidly in recent months as the result of the Korean conflict, the expansion of defense industry, and military requirements. Airplane factories, lumber mills and logging operations in the Puget Sound area provide attractive alternative opportunities for farm labor. Farm wages have tended to rise in the past few months. Farm machinery prices are higher than in 1949. Official notice is taken that the index of prices paid by farmers for commodities bought (including interest, taxes, and wage rates) increased from 246 to 265 between December 1949 and December 1950 (1910–14=100). These developments have resulted in a more unfavorable cost position for the milk producer. Beef cattle and hog prices have been relatively high for some time and have attracted an unusually large number of dairy animals in the milkshed to slaughter. Large numbers of milk cows also are being shipped from farms in the supply area to other west coast areas. Milk prices have not kept pace with increased price levels for most other farm commodities offering competition for the milk producer's capital and labor. Grade A milk supplies declined following the flush production months of 1950 to a greater degree than might be expected from normal seasonal change.

The present volume of purchasing power among consumers is high. Population has expanded in and around the major communities of the marketing area and increased business activity has resulted from the Korean conflict. Employment is high as a result of defense activity. Expanded military operations in the marketing area require increased quantities of milk as compared with requirements in 1949. Fluid milk sales may reasonably be expected to remain at present or increased levels for an indefinite period.

It is recognized further that prices paid for inspected milk for fluid purposes are related in a high degree to prices paid for milk for manufacturing purposes. Such relationships are quite pronounced in areas where milk is produced in relatively large quantities and where manufacturing plants serve as alternative outlets for inspected milk produced. Such a relationship has existed in the Puget Sound milkshed. The production and marketing of milk for each type of outlet are subject to many of the same economic factors. Since the market for most manufactured products is nation-wide, the prices of such products reflect some of the changes in general economic conditions affecting the supply and demand for market milk. For these reasons fluid milk markets have long used butter, nonfat dry milk solids, and cheese prices, and the prices paid by condensery plants, as the foundation for establishing prices for inspected milk for fluid use. Differentials over these basic, or manufacturing, prices frequently have been employed to arrive at the price of milk for fluid use. Such differentials have as their purpose to reflect, over the long run, the costs of meeting quality requirements in the production of inspected milk and to furnish the necessary incentive to get such milk produced. Such underlying factors and price relationships must be taken into account as well as other conditions such as are outlined above, which are pertinent to the production of an adequate supply of inspected milk. Therefore, it is concluded that a differential over the price level for manufacturing milk should be adopted as the means of maintaining the price of inspected milk for fluid use in this market at all times reasonably above manufacturing milk prices and of providing the necessary incentive to the production of inspected milk, in the quantities required. In consideration of the relationship between market supplies and prices in recent years it is concluded that a differential of $1.45 over the price level to result from the basic price formula adopted will serve this purpose.

(2) Class II price: The Class II price formula should reflect the value of milk for manufacturing purposes in the supply area.

Producer milk in excess of the amount necessary to satisfy Class I milk needs is either moved from fluid milk plants to manufacturing plants for processing or competes for outlets with milk produced for manufacturing purposes (factory milk). In some instances, particularly during the flush production season, milk is diverted directly from producers' farms to manufacturing plants without being physically received in a country plant or fluid milk plant of a handler. As stated previously, large quantities of producer milk are commingled with factory milk to make butter, cheese, evaporated milk, and other milk products. Ice cream and cottage cheese for sale in any part of the marketing area may be made from factory milk. Thus, producer milk utilized in the products named competes directly with factory milk and since such products are the principal outlets for producer milk in excess of Class I milk requirements, it is concluded that Class II milk should be priced at a level equivalent to prices paid dairy farmers for factory milk by representative manufacturing plants in the area.

Proponents of the order proposed that the Class II milk price be computed on the basis of a formula employing central market prices of butter and nonfat dry milk solids with an allowance to reflect a reasonable operating margin for the manufacture of such products.

Butter, nonfat dry milk solids and cheese constitute the major outlets for surplus milk in the milkshed, although some of the products of Class II milk customarily result in higher returns to the plant operator than are afforded by the manufacture of such named products. Evidence concerning prices paid dairy farmers by representative cooperative associations operating milk manufacturing plants in the milkshed was offered. Such prices were compared with the gross returns which might have been realized in the same period from sale of butter and nonfat dry milk solids at the central market prices for butter (San Francisco) and nonfat dry milk solids (Chicago area) employed in the proposed formula. This testimony indicated an operating margin at manufacturing plants in the area of about 84.5 cents per hundredweight based on the twelve-month period preceding the hearing. It was testified also that a study of costs of plant operation showed a cost of about 82 cents per hundredweight of milk received.

The record indicates, however, that the plants represented were not engaged solely in the manufacture of milk products and that some of the net proceeds accruing to dairy farmers for the period covered resulted from other activities. The basis on which the cost figure of 82 cents was computed was not shown. Such cost figure therefore cannot be properly appraised in terms of the diversified activities of the plants, including the sale of milk from time to time for Class I uses. Similar difficulty is found with respect to the comparison between the monthly prices paid dairy farmers and the proceeds from the sale of butter and nonfat dry milk solids possible under the formula which resulted in the average difference of 84.5 cents per hundredweight. It is not possible to analyze such figure in relation to the activities of the plants during the period involved in the comparison, particularly in relation to the production of butter, nonfat dry milk solids, or other manufactured milk products as compared with their other activities.

On the other hand proponents of the formula indicated their willingness to handle milk in excess of Class I needs under a Class II price formula which includes an operating margin, or allowance, of 80 cents per hundredweight. Such an allowance should assure producers of a market for all milk not utilized as Class I milk. In view of this a higher allowance is not warranted. Further study of plant operations in the milkshed and of the formula factors suggested may be necessary, after a period of experience, to determine the

propriety of the formula as conditions change. It is quite possible that such factors as changing price relationships for butter and nonfat dry milk solids between the midwest and west coast areas over a period of time, for the need for encouraging milk to flow into uses providing higher returns to producers, will have a marked effect upon the operation of the formula and will require further appraisal of the Class II price situation. Actual monthly paying prices by local manufacturing plants are not considered an appropriate yardstick for Class II milk prices because the principal manufacturing plants in the milkshed are operated by proprietary companies and cooperatives which would be handlers under the order also.

Because of variations in the butterfat content of (a) fluid milk and milk products sold by different handlers, and (b) milk delivered by individual producers, it is necessary to provide "butterfat differentials" to provide equitable payment with respect to such variations in butterfat. The class prices and uniform prices are established with reference to a butterfat content of 4.0 percent. Thus, a butterfat differential should be employed to reflect differences in values based on the variations in butterfat content of milk and its products from 4.0 percent. It was originally proposed to employ for Class I milk a butterfat differential equivalent to .14 times the average price per pound of 92-score butter (San Francisco) in the preceding month. Exception was taken, however, to a Class I butterfat differential as high as such formula would produce. On the basis that there has been a trend toward reduced butterfat content in certain items included in Class I milk referred to in connection with the exception, it is deemed appropriate to lower the butterfat differential rate for Class I milk to .13 to the average price of San Francisco 92-score butter. The butterfat differential to be applied to the Class II price should be such butter price at San Francisco times .115. The use of butterfat differentials in this manner follows the standard practice of fluid milk markets in adjusting for butterfat variation, and the particular percentages assigned in relation to the market price of butter will reflect reasonable values for butterfat utilized in the individual classes of milk. One proposal made would provide the same butterfat differential (.115 times the price of butter) for both classes of milk. It is concluded, however, that a somewhat higher butterfat differential for Class I milk is necessary to provide an appropriate relationship between the values of skim milk and butterfat in such class.

Base milk is designed to provide the quantity of milk needed for Class I uses. It is appropriate then to adjust for variations of butterfat in base milk at the Class I butterfat differential and to employ the Class II differential in adjusting for butterfat variations in excess milk delivered by the individual producer. However, during that portion of the year when base milk of a producer is equivalent to his total deliveries the producer butterfat differential should reflect a value for butterfat based on the percentage uses of butterfat in each class.

The hearing developed some discussion as to the "basic test" to be used in establishing the class prices and uniform price. Proponents of the order proposed 4.0 percent as the butterfat test on which prices should be announced while a handler proposal suggested 3.5 percent. The average test of milk received from producers on a year-round basis approximates 4.0 percent. The weighted average test of all products covered by Class I milk appears to vary between 4.1 and 4.6 percent. Grade A milk is produced primarily to meet the needs for products covered by Class I milk. The customary practice in the area has been to announce prices on the basis of 4.0 percent butterfat. In view of these facts, it is concluded that a test basis of 4.0 percent is preferable to a 3.5 percent basis for this market.

The parity price of all milk sold at wholesale in the United States, which is the applicable parity price under present legislation, was $4.58 per hundredweight as of December 15, 1950. Such price does not reflect what the record shows to be the price of feeds, the available supplies of feeds, and other economic conditions which affect market supply and demand for milk or its products in the marketing area, nor would it insure a sufficient quantity of pure and wholesome milk for the marketing area or be in the public interest.

(3) Location adjustments: Provision should be made in the order for location adjustment credits to handlers on Class I milk and for some variation in the amount of payment required to be made to producers for base milk, depending upon the location of the plant at which the milk is received from producers in relation to the principal consuming centers in the area. For the purpose of implementing this conclusion the marketing area is divided into three districts: District No. 1 including that part lying within the counties of Grays Harbor, King, Pierce, Snohomish and Thurston; district No. 2 including that part lying within the counties of Skagit and Whatcom; and district No. 3 including that part lying within the counties of Lewis and Pacific.

Exception was taken to the inclusion of Grays Harbor County in district No. 3 rather than in district No. 1. It was pointed out in the exception that (1) all milk produced in Grays Harbor County is received directly at fluid milk plants, (2) a high percentage of such milk is consumed within the county, and (3) historically the price paid at fluid milk plants in the county has been at least as high as in those counties included in district No. 1. The pattern of marketing in the remaining portion of district No. 3 is somewhat different in that fluid milk plants there rely in a large measure on country plant milk and a substantial proportion of the locally produced milk is shipped from a country plant to fluid milk plants in district No. 1. After review of the evidence incident to the consideration of the exception it is concluded that the application of a location adjustment in Grays Harbor County is inappropriate and consequently the county should be included as a part of district No. 1.

The cities of Seattle and Tacoma, located about midway between the northern and southern extremes of the production area, are the largest consuming centers of the marketing area. The quantity of Class I milk required at fluid milk plants in the principal consuming centers within the marketing area is in part received directly at such plants from farms and in part from other plants throughout the production area. The proportion from each source varies materially throughout the year depending upon the volume of direct-shipped milk in relation to total Class I requirements. Ordinarily, but with some exceptions, milk is brought in from country plants only when necessary to supplement the supply of direct-shipped milk.

Except for occasional brief periods, the total supply of milk produced in district No. 1 as a whole is insufficient to meet the entire requirements of the district for milk for fluid consumption. District No. 2 and, to some extent, district No. 3 and the Olympic peninsula produce, on the other hand, greater quantities than can be consumed in fluid form in local communities and constitute the principal reserve supply areas for markets in district No. 1.

Because of the necessity of drawing a portion of the district No. 1 supply from distant reserve supply areas the price of Class I milk at plants in the reserve supply areas should allow for the cost of transporting milk from such areas to fluid milk plants in the principal consuming centers when needed to supplement direct-shipped supplies. Much of the milk moved into fluid milk plants from country plants is hauled in tank trucks operated by cooperative and proprietary handlers. Substantial quantities of milk are moved, however, by contract haulers or common carriers at rates published by or on file with the State of Washington Public Service Commission. It appears on the basis of these contract rates that the prevailing charge for hauling milk by tank truck is 10 cents per hundredweight for hauls up to 20 miles and 25 cents for hauls of more than 20 miles, with an additional 10 cents applicable to milk moved by ferry into the marketing area from the Olympic peninsula. Since the distance to the principal consuming centers in district No. 1 from plants in areas from which the reserve supply is obtained is substantially more than 20 miles, it is concluded that 25 cents per hundredweight is the appropriate amount of the location adjustment credit to be allowed handlers per hundredweight of Class I milk in milk received at plants located outside of district No. 1 with an additional 10 cents at plants in Clallam and Jefferson counties. Sales in Kitsap and Mason counties of milk received from dairy farmers at plants in those counties are not included in the pool, and therefore, no location adjustment is provided for Class I milk at plants located in those counties.

If location adjustment credits were to be allowed on a greater volume of milk than is necessary to meet the Class I requirements of markets in district No. 1 the returns to producers (collectively) would be unnecessarily reduced. In order to avoid that result Class I milk at a district No. 1 fluid milk plant is assigned (pursuant to § 925.44) to sources outside of district No. 1 only to the extent to which the quantity of Class I milk at the transferee plant in district No. 1 exceeds the quantity of milk received at the plant from district No. 1 sources. A proposal was made to allow this credit on a quantity of milk greater than that indicated in view of relative fluctuations within a given month in the quantity of Class I milk sold and the amount of milk received directly from farms in the direct-ship area for district No. 1.

The inclusion of cream (a storable product) in Class I, and the ability to vary quantities of milk received at district No. 1 fluid milk plants from district No. 1 sources (both by direct delivery and from other plants) on a daily basis during a given month, afford handlers reasonable opportunities to closely adjust their receipts from sources outside district No. 1 to the quantity assigned to Class I milk from such sources on a monthly basis. Provision for location adjustments on a greater quantity of milk would have the effect of reducing the returns to producers in every month on some Class II milk moved to fluid milk plants below a level representing its minimum value at the plant of receipt from producers. No justification is found for reflecting in the returns to producers any part of the cost of transporting milk between plants for Class II uses. In view of these considerations it is concluded that the suggested provision for allowance of location adjustment credits on a larger volume of milk should not be adopted.

Associated with the fixing of location adjustment to handlers, by which process, together with the fixing of class prices, the amount of money to be paid by handlers to producers (collectively) is established, is the question of the manner in which that sum of money is to be distributed to producers. Elsewhere herein it is concluded that returns to producers should be distributed by means of a market-wide pool and "base and excess" plan. There is also the question of whether all producers should receive the same base price for milk of the same butterfat test without regard to the location of the plant at which the milk is first received.

Transportation rates for milk moved in tank trucks to Seattle are 25 cents per hundredweight from plants located in districts Nos. 2 and 3 or outside of the marketing area, plus an extra 10 cents ferry cost from points on the Olympia peninsula. Prevailing rates for hauling milk in cans for direct delivery from farms or loading platforms to Seattle are established by zones and appear to range from 18 cents per hundredweight in the nearby territory just south of Seattle to about 27 cents in other parts of the direct-ship territory in district No. 1. Substantially the same rates apply generally to farm to plant hauls in other segments of the production area.

In order to reflect the approximate transportation disadvantage associated with the location of such plants and their farm supplies as sources of supply for the principal consuming centers in the marketing area, it is concluded that the base price payable to producers for milk delivered to plants located in district No. 1 should be 35 cents per hundredweight higher than for milk delivered to plants located in Clallam and Jefferson Counties and 25 cents higher than for milk delivered to plants in districts Nos. 2 and 3 or outside of the marketing area at locations other than in the counties of Clallam, Jefferson, Kitsap, and Mason.

In connection with proposals considered at the hearing for an additional allowance on Class I milk in country plants, it was found in the recommended decision that the costs of services performed at country plants, such as for receiving, weighing, testing, cooling, and can washing, are incurred also at fluid milk plants with respect to milk received directly from farms of producers, but are avoided at fluid milk plants when milk is received in tanks from country plants. It was then concluded in the recommended decision that since the cost of such services is inherent in the receiving of milk from individual producers at any plant, there is no justification for a charge against the producers' price to cover the cost of such services when performed at a country plant.

Exceptions were taken to such recommended findings and conclusions on the grounds that the 25-cent location adjustment credit allowed handlers and the associated producer location adjustments (of 25 and 35 cents) do not, in fact, reflect all, but only a portion, of the location disadvantage of milk received at plants outside of district No. 1. It was contended in the exceptions that country plants outside district No. 1 constitute facilities absolutely essential in the procurement of adequate milk supplies, that otherwise certain producers delivering to such plants could not participate in the market, and that because most handlers maintain direct-delivery facilities at district plants and also at distant country plants, country plants tend to duplicate fluid milk plant facilities and therefore entail extra costs for which some additional allowance from producers should be provided.

The cost of handling milk at country plants was represented at the hearing to be 25 cents per hundredweight of milk moved although in the exceptions some difference of opinion on the amount necessary to cover such cost was indicated. It is apparent, however, that not all, but only a portion, of the receiving costs of direct-delivery milk may be incurred in connection with the receipt of milk when received in tanks from country plants. After consideration of the exceptions and a review of the evidence, it is concluded that in order that the plant operator may be afforded an opportunity for reimbursement for whatever additional costs are incurred for such plant handling, provision should be made permitting recovery from those producers whose milk is handled at plants not located in district No. 1 (or in Kitsap and Mason counties) of an amount of money not to exceed 15 cents per hundredweight of butterfat and skim milk shipped from such plants to a fluid milk plant in district No. 1 and classified as Class I milk.

It is concluded that no handler location adjustment credits or location adjustments in connection with payments to producers should be allowed for milk received at country plants located in district No. 1. Country plants in district No. 1 are located within the area from which milk is shipped directly from farms to fluid milk plants in the main consuming centers. Such plants do not appear to be essential to district No. 1 producers as a means of making their milk available for the principal consuming centers in the marketing area. The alternative of direct delivery to city plants is entirely feasible and practical for all or nearly all producers delivering to such nearby country plants. Country plants in district No. 1 exist primarily as alternative facilities for the procurement by handlers of milk originating in the district either for use in centrally located fluid milk plants or for distribution locally in the area surrounding the plants at which the milk is received from producers. If the marketing of the producers' milk by means of these plants is more expensive than by direct delivery to fluid milk plants such additional expense should not be charged to producers.

The assembly of milk at loading platforms is considered to be a part of the process of delivery from farms to a plant. Prices should apply at the plant of first receipt rather than at a loading platform. No location adjustment against the uniform price associated with loading platform assembly is necessary or appropriate since the delivery from his farm to the first plant, whether or not by way of a loading platform, is a responsibility of the producer.

Type of pool. (e) The "market-wide" type of pool should be established for the purpose of distributing among producers returns from the sale of their milk.

With only minor exception (milk entering Grays Harbor County), all Grade A milk produced for the marketing area as defined is eligible for sale in fluid form as milk and cream in all parts of such marketing area. However, much of the milk supply is concentrated in plants where it is held off the market and disposed of for manufacturing when not needed for fluid use. "Stand-by" plant facilities for receiving milk appear necessary as insurance against an inadequate market supply in view of inadequate supplies of "direct-shipped" milk during several months of the year and to provide an efficient method of handling seasonal surpluses. The use of the market-wide pool, under which the burden of surplus will be proportionately distributed among qualified producers, will permit such producers to receive a uniform price (with appropriate adjustments for location and differences in butterfat content of milk produced) and at the same time permit the efficient country handling of milk when it is not

needed for shipment to city distribution plants for sale in fluid form as milk or cream. A market-wide pool also will permit all interested handlers to bid on large blocks of bid business, such as that offered by military installations and other public institutions, and to obtain the necessary supplies for such outlets without upsetting the market at such time as the business might shift from one handler to another. The use of "individual-handler" pools, under which producers delivering to each handler receive a uniform price based on such handler's individual utilization of milk, would not facilitate orderly marketing under circumstances now prevailing in the milkshed.

A "base and excess" plan of distributing among producers the market returns for milk should be employed in connection with the market-wide pool. The record reveals a wide seasonal variation in the production of milk and a need for the production of more milk in the fall and winter months relative to spring and summer levels. Deliveries of milk are more nearly equated to fluid milk and cream sales in the fall and winter months than in spring and summer. Some handlers in the market have difficulty in utilizing efficiently all milk delivered to them in the months of seasonally high production. By providing returns related directly to a producer's ability to deliver additional milk in the fall and winter as compared with deliveries in the spring and summer, a production pattern more nearly fitted to the sales pattern of fluid milk and cream will be encouraged. Base and excess plans in one form or another are operating widely within the market at the present time although individual producer bases are not established in a uniform manner. Such a means of distributing milk returns was proposed by the order proponents and has wide support among producers.

Study of the particular plan submitted by proponents disclosed some features which would tend to prevent full achievement of the objectives sought. Such plan would not guarantee the opportunity for full return at the base price in the fall months to those producers who increase deliveries at that time (this is the time of the year when the market supply is lowest, and also the period when the producer is to make his base for the coming year). In comparison the plan adopted will provide an "open period" each year from October through February, inclusive, in which all producers will receive a uniform, or blended, price for all milk delivered. All milk of a producer who delivered on at least 90 days during the months of October through January, inclusive, will become the foundation for computing his daily base to be applicable in the following March-September period.

Such base will be equivalent to his deliveries in such four-month period divided by the number of days from the date of the first delivery to the close of the period and thus continued deliveries will be encouraged throughout the months when milk supplies are normally at their lowest level seasonally. By providing an open period each year producers will receive a similar price for all milk delivered during the months they are competing to establish bases for future months. New producers enter the market from time to time, and, therefore, a method of computing bases for such producers is necessary. Accordingly, it is provided that such a producer will receive as a temporary base for the current month (in the March-September period) a percentage of his production in such month equivalent to the market-wide percentage between deliveries for the preceding base-making period and for the current month, less 10 percentage points. Such producer will establish a base in the regular manner as soon as he has delivered at least 90 days in the base-making period of October through January and thus has demonstrated his ability to deliver when the market most needs his milk.

It would be preferable to provide some advance notice to producers regarding the original period to be used for establishing bases. However, both producer organizations and the major handlers urge that bases be employed under the order from the outset in order not to interrupt a method of payment which has been customary for both cooperative and independent producers over a long period. In order to adopt the plan immediately as requested it is necessary to require handlers to report delivery information concerning each producer's milk in the recent period October 1950 through January 1951, inclusive, and to place the burden of computation of bases for use in 1951 on the individual handler, subject to verification by the market administrator. It is necessary also to specify, for 1951, the percentages of deliveries in the current month to be used in the determination of bases for those producers who were not on the market for 90 days or more in the October 1950-January 1951 period, and for producers for whom information concerning such deliveries in the latter four-month period is not available.

Contingencies such as changes in the operation of a farm because of the death, retirement, or entry into military service of a producer, and changes in partnership or tenant-landlord arrangements, also should be provided for to give clarity and workability to the plan. Therefore, certain rules in connection with the establishment of bases have been included.

Administrative provisions. (f) Certain other provisions should be included in order to carry out administratively the purposes of the regulation.

Expense of administration. Each handler should be required to pay to the market administrator, as his prorata share in the costs of administration of the order, not more than 4 cents per hundredweight, or such amount not to exceed 4 cents per hundredweight as the Secretary may from time to time prescribe, on receipts of (a) producer milk and (b) other source milk classified as Class I milk.

The market administrator is required to verify the disposition of milk from all sources and therefore other source milk, as well as producer milk, should bear an appropriate share of the administrative cost. A charge on other source milk used as Class I milk will apportion appropriately the expenses among handlers.

Both handlers and producers recognize that the market administrator must have the necessary funds to enable him to administer properly the terms of the order. Proponents of the order suggested a rate of 4 cents per hundredweight. In view of the anticipated volume of milk on which the rate would apply, a maximum rate of 4 cents per hundredweight should be adopted to guarantee sufficient administrative income. In the event a lesser amount proves upon experience to be sufficient for proper administration, provision should be made to enable the Secretary to revise the assessment accordingly within the 4-cent maximum without the necessity of amending the order. The act provides that such assessments shall be the means of financing costs of administration.

Marketing services. Provision should be included for furnishing marketing services for producers who do not belong to a cooperative association performing such services, with appropriate deductions therefor. Orderly marketing will be promoted by assuring individual producers accurate payments based on the classification, price, and pooling provisions previously discussed. To accomplish this fully, it is necessary to determine that the butterfat tests and weights of their milk are accurate. In the case of producers who are members of cooperatives having plants, the matter of milk-testing and milk-weighing is under the complete control of such producers and is assessed against such producers either through an association check-off or as a plant operating cost. Bargaining associations in the area are performing check-weighing and check-testing services for their members under their association check-off. In order to place such services on a market-wide basis, the market administrator should provide them for producers not otherwise receiving services through a cooperative association. The additional service of providing market information to producers is carried on to some extent at present by the cooperatives although detailed information regarding market prices, supplies and the utilization of milk is not available to either the cooperative associations and their members or the independent producers. The record indicates that the furnishing to producers of additional data regarding prices, supplies, and utilization also would assist in orderly marketing.

Such a provision is specifically authorized by the act, and the proponents of the order proposed a rate of deduction of 5 cents per hundredweight with respect to the milk of producers who receive such services to cover expenses incurred. The cost of performing services will vary with the amount of milk involved at any given time and with the number and location of producers by plants. In view of the fact that independent producers are scattered among plants widely separated, it appears that the cost of such services will be relatively high and cannot be performed in the near future on less income than the proposed rate of deduction will afford. It is determined that the deductions for these services should be made from payments to producers and should be at the rate of 5 cents per hundredweight of milk until such time as it can be determined from experience that a lower rate will suffice. In the event any qualified cooperative association of producers is determined by the market administrator to be performing such services for its members, handlers would be required to pay to the cooperative association such deductions as are authorized by the members of the association.

Records and reports. Provisions should be included in the order for the purpose of requiring handlers to maintain adequate records and to make certain reports. Such records and reports are necessary for the purpose of determining proper classification, pricing and payment relative to the milk of producers. Producers proposed that such reports be filed with the market administrator on or before the 7th day after the end of the month. It is necessary to allow sufficient time following the month for the compiling and filing of reports by the handler but not to delay unduly the computation of the uniform price and payments to producers. It is concluded that the 6th day following the end of the month is the latest date on which such reports may be filed with the market administrator to permit a uniform price announcement by the 12th day after the end of the month.

The order should provide for the verification of each handler's reports to insure producers the proper returns for milk as provided for in the other sections of the order. It is necessary that the handler provide also whatever facilities are necessary to verify reports or to ascertain the correct information regarding the receipts and utilization of milk and payments to producers.

The proposal called for payment on or before the 15th day after the end of the month in the case of individual producers and on or before the 13th day after the end of the month when payment is made to a cooperative association authorized to collect for milk marketed through it. These dates, in view of the necessity of allowing adequate time for the filing of handler reports and for the necessary computation and announcement of producer prices, do not appear, however, to allow sufficient time for handlers to make the required payments to producers and cooperative associations. It is concluded, therefore, that handlers should be allowed until the 18th to make payment to individual producers and until the 16th to make payment to cooperative associations.

The prevailing practice in the market is for the major bargaining cooperatives to collect payment from operating handlers for milk delivered by their members to such handlers' plants and to distribute such payments to individual members through a pooling plan in which both bargaining and operating cooperatives participate. In order to preserve this appropriate function for cooperatives, it is concluded that the order should provide an opportunity for cooperatives to continue to distribute the returns from the sale of the milk of their members. Accordingly, the order requires a handler operating a fluid milk plant or a country plant to pay, upon request of a cooperative association, to the cooperative association the aggregate amount of the payments otherwise required to be made by the handler to individual producers who are members of the cooperative. A proposal made at the hearing to consider a bargaining cooperative to be a handler with respect to milk of its members received at fluid milk plants and country plants of proprietary operating handlers, thus requiring payment to the cooperative of the class utilization value of the milk and establishing the cooperative as the party primarily responsible for making a report of utilization to the market administrator and for payments to the producer-settlement and administrative assessment funds, should not be adopted. Its adoption would result in unnecessary administrative complications and duplication with respect to matters of reporting, classification, allocation, and payments by introducing a third party in transactions between the market administrator and those persons primarily to be regulated and who have first hand knowledge of the receipt and disposition of the milk to be priced. Moreover, it was not shown that the essential purposes of the order could not be effectuated without this complicating provision. The status of non-operating cooperatives and the opportunity for performance by them of appropriate bargaining functions is fully preserved without assignment to such cooperatives of certain unrealistic and cumbersome functions which would follow from their designation as handlers.

Exception was taken to that provision of the recommended order (§ 925.22 (l)) providing for the reporting by the market administrator to each cooperative association, upon request of the cooperative, of the classification of milk caused by the cooperative to be delivered directly from farms of its members to each handler to whom it sells milk. The exception was made on the grounds that such reports furnish cooperative handlers with valuable competitive information which is denied to proprietory handlers. The allegation that information on the utilization of the milk of its members constitutes information of particular value to the cooperative in connection with competitive relations of cooperative and proprietary handlers is not convincing. In this connection it may be noted that the cooperative associations to which the information in most instances will be furnished are not handlers and do not operate milk receiving or processing facilities. The inclusion of the provision is justified as a means of facilitating the performance by the producer (through his cooperative association) of the proper and desirable function of arranging for the efficient utilization of his milk and for furnishing all handlers with adequate supplies of milk for Class I utilization. The exception is denied.

Retention of records. The order provides also for the retention of necessary records by handlers and for the ultimate termination of obligations. It is necessary for handlers to retain records in order to prove the utilization of milk and the payments made to producers. It is necessary that these records be kept for a substantial period of time since some transactions with respect to the handling of the producers' milk are not completed and audited until several months after producers have delivered the milk to the handler's plant. Detailed records of this kind soon assume tremendous physical proportions and become burdensome for this reason. It is necessary that a definite time period be provided within which handlers must maintain their records and after which they will be relieved of so doing. The order should provide that handlers shall retain records for three years after the end of the month to which such records related. In terms of the volume of records which would be retained and the types of transactions involved in disposing of milk, the retention of records for three years is concluded to be a reasonable requirement. If litigation is in progress, it may be necessary to require records to be retained for a longer period and provision should be made for this contingency.

Termination of obligations. The order should provide for the termination of obligations to handlers after a reasonable period of time has elapsed. Without such a provision handlers may file claims which, because the period involved might extend back over many years, could be in substantial amounts. This creates uncertainties which would endanger the stability of the market and lead to serious inequities. The order should provide that any obligation to pay a handler shall terminate two years after the month in which the milk was received if an underpayment is claimed, or within two years after payment was made if a refund is claimed, unless within such period of time the handler files a petition, pursuant to section 8c (15) (A) of the act, claiming such money. Handlers also need the protection of provisions terminating their obligations to make payments. Since handlers cannot be forewarned always as to contingent liabilities, it is extremely difficult and burdensome for them to make adequate provisions therefor by setting up reserves or by taking other precautionary measures. The obligation of any handler to pay money should, except under certain extraordinary conditions, such as litigation, terminate two years after the last day of the month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. It is concluded that in general, a period of two years is a reasonable time within which a market administrator should complete his auditing and inspection work and render any billings for money due under the order. Provisions are necessary also, as contained in the order included herewith, to meet such contingencies as failure of the handler to submit required books and records and to deal with situations where fraud

or willful concealment of information may be involved.

It was proposed that if a handler fails to make the required reports or payments, his name shall be publicly announced at the discretion of the market administrator. Such announcement is provided for by the act, and it is concluded that its adoption will facilitate the enforcement of the terms of the order.

General findings. (a) The proposed marketing agreement and the order and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings. Exception was taken to some of the findings and conclusions and to certain provisions of the recommended order contained in the recommended decision in addition to those hereinbefore ruled upon. To the extent that the findings and conclusions or the order contained herein are at variance with any of the exceptions pertaining thereto, such exceptions are denied for the reasons set forth above and in the findings and conclusions relating to the issue to which the exception refers.

Rulings contained in the recommended decision upon proposed findings and conclusions submitted and upon motions filed by interested persons are confirmed except as modified by the findings, conclusions and rulings set forth herein. To the extent that findings and conclusions proposed by interested persons and not ruled upon in the recommended decision are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

A motion to reopen the hearing to permit the introduction of evidence showing the complete disappearance since July 1950 of any prior disproportion between cooperative and other handlers in the sharing of surplus Grade A milk, is denied on the grounds that (1) such evidence, if submitted, could not possibly insure against, or preclude, a reversion to the disproportion situation which previously prevailed, and therefore, would not alter the basic conclusions reached, and (2) there would unavoidably be involved an unanswerable question as to the extent to which changed conditions may have been induced by the pendancy of a proposed marketing order.

Motions were also filed to reopen the hearing to permit the introduction of evidence (1) with respect to a country plant handling allowance, and (2) to show that fresh and frozen milk is no longer transported to Alaska in relevant quantities. Evidence already in the record is adequate for the determination and use in the order at the outset of a country plant handling allowance. Experience in operation of the order will provide better evidence concerning the proper amount of the allowance than can possibly exist at this time. Jurisdiction to regulate the handling of milk produced for the Puget Sound marketing area by no means rests exclusively on evidence of shipments of milk to Alaska. The motions to reopen the hearing are denied for the reasons indicated.

The procedure followed in this proceeding, including the hearing, the filing of briefs, and the issuance of a recommended decision with opportunity for the filing of written exceptions thereto leaves no useful purpose to be served by reply briefs or oral argument on the recommended order and exceptions thereto. Full opportunity has been provided for interested parties to present their views and arguments. Accordingly, motions to file reply briefs and to have oral argument are denied.

Determination of representative period. The month of December 1950 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order regulating the handling of milk in the Puget Sound, Washington, marketing area in the manner set forth in the attached order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Puget Sound, Washington, Marketing Area," and "Order Regulating the Handling of Milk in the Puget Sound, Washington, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 5th day of April 1951.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Regulating the Handling of Milk in the Puget Sound, Washington, Marketing Area

Sec.
925.0 Findings and determinations.

DEFINITIONS

925.1 Act.
925.2 Secretary.
925.3 Department.
925.4 Person.
925.5 Cooperative association.
925.6 Pudget Sound, Washington, marketing area.
925.7 Plant.
925.8 Fluid milk plant.
925.9 Country plant.
925.10 Nonpool plant.
925.11 Dairy farmer.
925.12 Producer.
925.13 Producer milk.
925.14 Other source milk.
925.15 Handler.
925.16 Producer-handler.
925.17 Base.
925.18 Base milk.
925.19 Excess milk.

MARKET ADMINISTRATOR

925.20 Designation.
925.21 Powers.
925.22 Duties.

REPORTS, RECORDS, AND FACILITIES

925.30 Monthly reports of receipts and utilization.
925.31 Payroll reports.
925.32 Other reports.
925.33 Records and facilities.
925.34 Retention of records.

CLASSIFICATION

925.40 Skim milk and butterfat to be classified.
925.41 Classes of utilization.
925.42 Shrinkage.
925.43 Responsibility of handlers and reclassification of milk.
925.44 Transfers.
925.45 Computation of the quantity of producer milk in each class.

MINIMUM PRICES

925.50 Basic formula price to be used in determining Class I prices.
925.51 Class prices.
925.52 Butterfat differential to handlers.
925.53 Location adjustment credit to handlers.

DETERMINATION OF BASE

925.60 Computation of daily base.
925.61 Base rules.

DETERMINATION OF UNIFORM PRICE

925.70 Computation of value of milk.
925.71 Computation of uniform price.

PAYMENTS

925.80 Time and method of payment to producers and cooperative associations.
925.81 Location adjustment to producers.
925.82 Producer butterfat differential.
925.83 Producer-settlement fund.
925.84 Payments to the producer-settlement fund.
925.85 Payments out of the producer-settlement fund.
925.86 Adjustments of accounts.
925.87 Marketing services.
925.88 Expense of administration.
925.89 Termination of obligations.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

Sec.
925.90 Effective time.
925.91 Suspension or termination.
925.92 Continuing obligations.
925.93 Liquidation.

MISCELLANEOUS PROVISIONS

925.100 Agents.
925.101 Separability of provisions.
925.102 Producer-handlers.

AUTHORITY: §§ 925.1 to 925.102 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

§ 925.0 *Findings and determinations*—(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Puget Sound, Washington, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in the Puget Sound, Washington, marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 925.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

§ 925.2 *Secretary.* "Secretary" means the Secretary of Agriculture, or other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 925.3 *Department.* "Department" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in this part.

§ 925.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 925.5 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers, duly organized as such under the laws of any state, which includes members who are producers as defined in § 925.12 and which the Secretary determines, after application by the association:

(a) To be qualified under the standards set forth in the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have its entire organization and all of its activities under the control of its members; and

(c) To be currently engaged in making collective sales of or marketing milk or its products for its members.

§ 925.6 *Puget Sound, Washington, Marketing Area.* "Puget Sound, Washington, Marketing Area" (hereinafter called the "marketing area") means all territory lying west of range 8E in Whatcom, Skagit, Snohomish, and King Counties; all territory lying west of range 8E and north of township 18N in Pierce County, except Fox, McNeil, and Anderson Islands and the peninsulas on which Lake Bay and Gig Harbor are located northward to the Kitsap County line; all territory lying within Thurston County; all territory lying west of range 5E in Lewis County; all territory lying east of range 10W and north of township 12N in Pacific County; and all territory lying south of township 19N in Grays Harbor County; all in the State of Washington. As used in this section, "territory" shall include all municipal corporations, Federal military reservations, facilities and installations, and state institutions lying wholly or partly within the above-described area: "District No. 1" of the marketing area shall include that part of the marketing area lying within the counties of King, Pierce, Snohomish, Thurston, and Grays Harbor. "District No. 2" of the marketing area shall include that part of the marketing area lying within the counties of Skagit and Whatcom, and "District No. 3" of the marketing area shall include that part of the marketing area lying within the counties of Lewis and Pacific.

§ 925.7 *Plant.* "Plant" means the land, buildings, surroundings, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment which is maintained and operated primarily for the receiving, handling and processing of milk or milk products.

§ 925.8 *Fluid milk plant.* "Fluid milk plant" means any plant located in the marketing area which is approved by any health authority having jurisdiction in the marketing area as a plant from which milk may be distributed for consumption as fluid milk in the marketing area, and from which during the month Class I milk pursuant to § 925.41 (a) (1) is disposed of (including sales at such plant, plant store or eating place) within the marketing area.

§ 925.9 *Country plant.* "Country plant" means any plant, other than a fluid milk plant, which is approved by any health authority having jurisdiction within the marketing area for the receiving of milk qualified for consumption as fluid milk within the marketing area (but excluding that portion of any plant used to receive or process milk or milk products required by applicable health authority regulations to be kept physically separate from milk so qualified): *Provided,* That any such plant located outside of the marketing area other than the plant of Kristofferson, Inc., at Sequim and the plant of the Dungeness-Sequim Cooperative Creameries at Dungeness shall not be a country plant if the percentage of either butterfat or skim milk in milk so qualified which is received at the plant from dairy farmers and moved in fluid form as milk to a fluid milk plant, or disposed of within the marketing area as Class I milk pursuant to § 925.41 (a) (1), is less than:

(a) 50 percent in the current month during the period October through December;

(b) 20 percent in the current month during the period January through September, except that if the percentage was more than 50 percent for the entire period of October through December immediately preceding no percentage shall be required for such months of January through September;

And provided further, That any plant which otherwise meets the requirements of this section may withdraw from country plant status for any month in the February-September period if the operator of the plant files with the market administrator, prior to the first day of such month, a written request for such withdrawal.

§ 925.10 *Nonpool plant.* "Nonpool plant" means any plant other than a fluid milk plant or a country plant.

§ 925.11 *Dairy farmer.* "Dairy farmer" means any person who is engaged in the production of milk.

§ 925.12 *Producer.* "Producer" means any dairy farmer, other than a producer-handler, who produces milk qualified by any health authority having jurisdiction in the marketing area for consumption as fluid milk in the marketing area.

§ 925.13 *Producer milk.* "Producer milk" or "milk received from producers" means milk qualified as described in § 925.12 and either received directly from a farm at a fluid plant or country plant or caused to be diverted by a handler for his account from such a plant to a nonpool plant: *Provided,* That milk so diverted shall be deemed to have been received by the diverting handler at the plant from which it was diverted.

§ 925.14 *Other source milk.* "Other source milk" means all skim milk and butterfat other than in (a) producer milk, and (b) milk and milk products received from fluid milk plants and country plants,

§ 925.15 *Handler.* "Handler" means:

(a) Any person engaged in the handling of milk in his capacity as the operator of a fluid milk plant, a country plant, or any other plant from which milk in any of the forms specified in § 925.41 (a) is disposed of to any place or establishment within the marketing area other than a plant, and

(b) Any cooperative association, which is not a handler pursuant to paragraph (a) of this section, with respect to producer milk caused to be diverted for the account of such cooperative association from a fluid milk plant or a country plant to a nonpool plant.

§ 925.16 *Producer-handler.* "Producer-handler" means any person who is both a dairy farmer and a handler, but who receives no milk from producers: *Provided*, That (a) the maintenance, care and management of the dairy animals and other resources necessary to produce milk is the personal enterprise of and at the personal risk of such person in his capacity as a dairy farmer, and (b) the processing, packaging, and distribution of the milk is the personal enterprise of and at the personal risk of such person in his capacity as a handler.

§ 925.17 *Base.* "Base" means a quantity of milk, expressed in pounds per day, computed pursuant to § 925.60.

§ 925.18 *Base milk.* "Base milk" means (a) milk delivered by a producer during the month in the period March through September, inclusive, of each year which is not in excess of his base multiplied by the number of days of delivery in such month: *Provided*, That with respect to any producer on "every-other-day" delivery to a fluid milk plant or country plant the days of nondelivery intervening days of delivery shall be considered as days of delivery for the purposes of this paragraph; and (b) all milk delivered by a producer in each of the months of October, November, December, January and February.

§ 925.19 *Excess milk.* "Excess milk" means milk delivered by a producer in excess of base milk.

MARKET ADMINISTRATOR

§ 925.20 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be designated by, and shall be subject to removal at the discretion of the Secretary.

§ 925.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 925.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of funds provided by § 925.88 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 925.87) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not:

(1) Made reports pursuant to §§ 925.30 to 925.32, inclusive; or

(2) Made one or more of the payments pursuant to §§ 925.80 to 925.88, inclusive.

(i) On or before the 12th day after the end of each month, report to each cooperative association (or its duly designated agent) which so requests the class utilization of milk caused to be delivered by such cooperative association directly from farms of producers who are members of such cooperative association to each handler to whom the cooperative association sells milk. For the purpose of this report, the milk caused to be so delivered by such a cooperative association shall be prorated to each class in the proportion that the total receipts of producer milk by such handler were used in each class;

(j) On or before the 12th day after the end of each month, notify:

(1) Each handler whose total value of milk is computed pursuant to § 925.70 (a) of:

(i) The amounts and values of his producer milk in each class and the totals of such amounts and values;

(ii) The amount of any charge made pursuant to § 925.70 (a) (5);

(iii) The uniform prices for base milk and excess milk;

(iv) The totals of the amounts computed in the manner provided by § 925.80 (a);

(v) The amount due such handler from the producer-settlement fund or the amount to be paid by such handler to the producer-settlement fund, as the case may be; and

(vi) The totals of the amounts required to be paid by such handler pursuant to §§ 925.87 and 925.88.

(2) Each handler whose total value of milk is computed pursuant to § 925.70 (b) of the pounds of other source milk on which payment is required to be made and the amount due the producer-settlement fund from such handler.

(k) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate the prices determined for each month as follows:

(1) On or before the 5th day of each month the minimum price for Class I milk pursuant to § 925.51 (a) and the Class I butterfat differential pursuant to § 925.52 (a), both for the current month; and the minimum price for Class II milk pursuant to § 925.51 (b) and the Class II butterfat differential pursuant to § 925.52 (b), both for the preceding month; and

(2) On or before the 12th day of each month, the uniform price computed pursuant to § 925.71 and the butterfat differential computed pursuant to § 925.82, both applicable to producer milk received during the preceding month; and

(l) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS AND FACILITIES

§ 925.30 *Monthly reports of receipts and utilization.* On or before the 6th day of each month and in the detail and on forms prescribed by the market administrator, each person who is a handler pursuant to § 925.15 (a), except a producer-handler, shall report for the preceding month to the market administrator with respect to milk and milk products received at each of such handler's fluid milk plants and country plants, and at each of his plants where milk or milk products subject to payments required under § 925.70 (b) were handled, and each cooperative association which is a handler pursuant to § 925.15 (b) shall report with respect to milk diverted on its account during the preceding month, as follows:

(a) The quantities of skim milk and butterfat contained in milk received from producers and dairy farmers;

(b) The quantities of skim milk and butterfat contained in milk and milk products received from other handlers;

(c) The quantities of skim milk and butterfat contained in other source milk received (except Class II milk products disposed of in the form in which received without further processing by the handler);

(d) The utilization of all skim milk and butterfat required to be reported pursuant to this section, including the pounds of skim milk and butterfat on hand at the beginning and end of each month as milk and milk products;

(e) The aggregate quantities of base milk and excess milk received; and

(f) Such other information with respect to such receipts and utilization as the market administrator may prescribe.

§ 925.31 *Payroll reports.* On or before the 20th day of each month, each handler shall submit to the market administrator his producer payroll for deliveries of the preceding month which shall show:

(a) The total pounds of base milk and the total pounds of excess milk received from each producer, the pounds of butterfat contained in such milk, and the number of days on which milk was delivered by such producer in such month.

(b) The amount of payment to each producer and cooperative association; and

(c) The nature and amount of any deductions or charges involved in such payments.

§ 925.32 *Other reports.* At such times and in such manner as the market administrator may prescribe:

(a) Each handler shall report to the market administrator such information in addition to that required under § 925.30 as may be requested by the market administrator with respect to milk and milk products handled by him;

(b) Each producer-handler shall report to the market administrator relative to his receipts and utilization of milk and milk products.

(c) As requested by the market administrator, each handler operating a fluid milk plant or country plant shall report the total quantity of milk received from each producer and the number of days of such delivery for each of the months of October 1950 through January 1951, inclusive, together with such other information relating to the computation of bases to be in effect in the March–September 1951 period as the market administrator may prescribe.

§ 925.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or to establish the correct data with respect to the information required to be reported pursuant to §§ 925.30, 925.31, and 925.32 and to payments required to be made pursuant to §§ 925.80 through 925.88.

§ 925.34 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That, if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 925.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received within the month by a handler which is required to be reported pursuant to § 925.30 shall be classified by the market administrator pursuant to the provisions of §§ 925.41 to 925.45, inclusive.

§ 925.41 *Classes of utilization.* Subject to the conditions set forth in §§ 925.42, 925.43 and 925.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat (1) disposed of in the form of milk (including milk frozen), skim milk, buttermilk, yogurt, flavored milk, flavored milk drinks, and cream (sweet or sour) except that disposed of pursuant to paragraph (b) (3) of this section, (2) disposed of as any fluid mixture containing cream and milk or skim milk (but not including ice cream or other frozen dessert mixes disposed of to a commercial processor, any mixture disposed of in containers or dispensers under pressure for the purpose of dispensing a whipped or aerated product, or evaporated or condensed products), and (3) not specifically accounted for under paragraph (b) of this section.

(b) Class II milk shall be all skim milk and butterfat (1) disposed of (or used to produce, in the case of ice cream and frozen desserts and mixes for such products (liquid or powdered), and aerated cream products) as any product other than those included under paragraph (a) (1) and (2) of this section, (2) disposed of for livestock feed, (3) disposed of in bulk in any of the forms specified in paragraph (a) (1) of this section to bakeries, soup companies, and candy manufacturing establishments in their capacity as such, (4) contained in monthly inventory variations, (5) in actual shrinkage of producer milk computed pursuant to § 925.42 but not in excess of 3 percent of the quantity of skim milk and butterfat, respectively, accounted for pursuant to subparagraph (1) of this paragraph (except that accounted for pursuant to the parenthetical provision in such subparagraph), and (6) in actual shrinkage of other source milk computed pursuant to § 925.42.

§ 925.42 *Shrinkage.* The market administrator shall determine the shrinkage of skim milk and butterfat, respectively, in producer milk and in other source milk in the following manner:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, for each handler; and

(b) Prorate the total shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (a) of this section, between the pounds of producer milk and other source milk after deducting receipts from other handlers.

§ 925.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat proves that such skim milk and butterfat should be classified as Class II milk.

(b) The burden shall rest upon each handler to establish the sources of milk and milk products required to be reported by him pursuant to § 925.30.

(c) Except as provided in § 925.44 (a) (3) and (c) (1), any skim milk or butterfat classified in one class shall be reclassified if used or reused by any handler in another class.

§ 925.44 *Transfers.* Skim milk and butterfat moved in any of the forms specified in § 925.41 (a) (1) from one plant to another shall be assigned (separately) to each class in the following manner:

(a) From country plants to fluid milk plants and between fluid milk plants:

(1) As Class I milk to the extent Class I milk is available at the transferee plant if the transfer is (i) from a country plant or fluid milk plant located in District No. 1 to any fluid milk plant, (ii) from a country plant not located in district No. 1 to a fluid milk plant located in district No. 2 or district No. 3, or (iii) between fluid milk plants not located in district No. 1.

(2) As Class 1 milk to the extent Class I milk is available at the transferee plant if the transfer is from a country plant or fluid milk plant not located in district No. 1 to a fluid milk plant located in district No. 1: *Provided*, That the quantity of Class I milk at the transferee plant available for assignment to the transferor plant shall be limited to the amount remaining after Class I milk in the transferee plant has been assigned first to receipts from country plants located in district No. 1, and then to receipts directly from producers at the transferee fluid milk plant: *And provided further*, That if such transfers originate with more than one plant not located in district No. 1 the total quantity of Class I milk available for assignment to such plants shall be prorated among such plants in proportion to the respective quantities transferred.

(3) As Class I milk if the transfer is to the plant of a producer-handler.

(b) From a fluid milk plant or country plant to a country plant: As Class II milk: *Provided*, That (1) the skim milk or butterfat so assigned to Class II milk shall be limited to the amount thereof remaining in Class II milk in the transferee plant after the subtraction, pursuant to § 925.45 (b) (2), of other source milk received at such plant, and (2) any additional amounts of such skim milk or butterfat shall be assigned to Class I milk.

(c) From a country plant or fluid milk plant to a nonpool plant:

(1) As Class I milk if the transfer is to a nonpool plant not located in the marketing area or in the counties of Clallam, Jefferson, Grays Harbor, Kitsap, Island, or Mason in the State of Washington.

(2) As Class I milk if the transfer is to a nonpool plant not located in the marketing area but within the counties named in subparagraph (1) of this paragraph which is engaged in the distribution of milk for consumption as fluid milk, unless the receipts and utilization of milk and milk products at the nonpool plant are reported to the market administrator and he is permitted to audit the records of such nonpool plant for the purpose of verification; and if such conditions are met, the milk transferred shall be classified as follows:

(i) The classification of all skim milk and butterfat at such nonpool plant shall be determined on the basis of the classes of utilization set forth in § 925.41; and

(ii) The skim milk and butterfat so transferred shall be allocated to Class I milk to the extent available at such plant and any remaining quantity to Class II milk.

(3) As Class II milk if the transfer is to a nonpool plant located in the marketing area or within any of the counties specified in subparagraph (1) of this paragraph which is not engaged in the distribution of milk for consumption as fluid milk: *Provided*, That if such plant disposes of skim milk or butterfat in any of the forms specified in § 925.41 (a) (1) to any other nonpool plant distributing milk in fluid form which is not located in the marketing area or in the counties specified in subparagraph (1) of this paragraph, such disposition up to the quantity of producer milk transferred to the first nonpool plant shall be classified as Class I milk.

§ 925.45 *Computation of the quantity of producer milk in each class.* For each handler the market administrator shall:

(a) Correct for mathematical and for other obvious errors the monthly report submitted by such handler and compute the total pounds of skim milk and butterfat in each class;

(b) Allocate skim milk in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk shrinkage allowed pursuant to § 925.41 (b) (5);

(2) Subtract from the pounds of skim milk in Class II milk the pounds of skim milk in other source milk received: *Provided*, That if the receipts of skim milk in other source milk are greater than the pounds of skim milk in Class II milk, an amount equal to the difference shall be subtracted from the pounds of skim milk in Class I milk;

(3) Subtract from the remaining pounds of skim milk in each class, respectively, the skim milk received from other fluid milk plants and country plants and assigned to such class pursuant to § 925.44;

(4) Add to the remaining pounds of Class II milk, the amount subtracted pursuant to subparagraph (1) of this paragraph; and

(5) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk in milk received from producers, subtract such excess (hereinafter referred to as "overage") from the remaining pounds of skim milk in each class beginning with Class II milk.

(c) Allocate butterfat in accordance with the procedure prescribed for skim milk in paragraph (b) with this section.

(d) Add together for each class the quantities of skim milk and butterfat in such class computed pursuant to paragraphs (b) and (c) of this section and compute the weighted average butterfat content of such class.

MINIMUM PRICES

§ 925.50 *Basic formula price to be used in determining Class I prices.* The basic formula to be used in computing the price per hundredweight of Class I milk for the current month shall be the highest of the prices computed pursuant to paragraphs (a), (b), and (c) of this section for the preceding month.

(a) Divide by 3.5 and then multiply by 4.0 the average of the basic, or field, prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from dairy farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Present Operator and Location

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Greenville, Wis.
Borden Co., Black Creek, Wis.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Jefferson, Wis.
Pet Milk Co., New Glarue, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by the market administrator from the following formula:

(1) Multiply the simple average of the daily average wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month, by 6;

(2) Add 2.4 times the simple average, as published by the Department, of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, for the trading days that fall within the month;

(3) Divide by 7;

(4) Add 30 percent thereof; and

(5) Multiply by 4.

(c) The price per hundredweight computed by the market administrator from the following formula:

(1) Multiply by 4.8 the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month: *Provided*, That, if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the simple average of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph, subtract 67 cents.

§ 925.51 *Class prices.* Subject to the differential provided in § 925.52, the following are the minimum prices per hundredweight to handlers for Class I milk and Class II milk:

(a) *Class I milk.* The price for Class I milk shall be the basic formula price plus $1.45.

(b) *Class II milk.* The price for Class II milk shall be that computed by the market administrator from the following formula:

(1) Multiply by 4.8 the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at San Francisco, as reported by the Department during the month: *Provided*, That, if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the simple average of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph, subtract 80 cents.

§ 925.52 *Butterfat differential to handlers.* If the average butterfat content of the producer milk of any handler allocated to any class pursuant to § 925.45 is more or less than 4.0 percent, there shall be added to the respective class prices computed pursuant to § 925.51 for each one-tenth of 1 percent that the average butterfat content of such milk is above 4.0 percent, or subtracted for each one-tenth of 1 percent that such average butterfat content is below 4.0 percent, a butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at San Francisco as reported by the Department during the preceding month by the applicable factor listed below and dividing the result by 10:

(a) Class I milk: 1.30;

(b) Class II milk: 1.15.

§ 925.53 *Location adjustment credit to handlers.* In computing the value of each handler's milk there shall be credited with respect to skim milk and butterfat, respectively, in producer milk received at a plant not located in district No. 1 or in the counties of Kitsap and Mason and classified as Class I milk, 25 cents per hundredweight: *Provided*, That an additional 10 cents shall be credited with respect to skim milk and butterfat so received and classified at any plant located in Clallam or Jefferson Counties.

§ 925.60 *Computation of daily base.* Subject to the provisions of paragraph (c) of this section and to the rules set forth in § 925.61, the market administrator shall determine daily bases for producers in the manner provided in paragraphs (a) and (b) of this section:

(a) During each of the months of March through September, inclusive, of each year beginning with 1951, the daily base of each producer whose milk was received by a handler(s) on not less than 90 days during the immediately preceding months of October through January, inclusive, shall be a quantity computed by dividing such producer's total pounds of milk delivered in such four-month period by the number of days from the date of first delivery to the end of such four-month period: *Provided*, That with respect to any producer on "every-other-day" delivery the days of non-delivery intervening days of delivery shall be considered as days of delivery for the purpose of ascertaining whether delivery was made on 90 days or more pursuant to this paragraph.

(b) During the period from March through September, inclusive, of each year beginning with 1951, the daily base for the current month of any producer who is not eligible to receive a base computed pursuant to paragraph (a) of this section (including any producer for whom a base may not be computed pursuant to paragraph (a) of this section because of lack of available information regarding such producer's deliveries in the October 1950–January 1951 period) shall be a quantity computed by dividing such producer's total pounds of milk delivered to a handler(s) in the current month by the number of days from the date of first delivery to the end of such month, and multiplying the result by the percentage applicable for such month computed by the market administrator as follows: Divide the daily average deliveries of milk to handlers by all producers in the period from October of the preceding year through January of the current year, inclusive, by the daily average deliveries of all producers to handlers in the current month and subtract 10 from the figure so obtained: *Provided*, That for the period March through September 1951 the following percentages shall be used respectively:

Month:	Percentage
May	55
June	60
July	65
August	70
September	85

(c) For the period from the effective date of this part through September 1951 the computations provided by paragraphs (a) and (b) of this section shall be made by the handler, subject to verification by the market administrator. In the event more than one handler has received the milk of any producer during the month, the computations applicable for such month shall be the responsibility of the last handler to receive such milk during the month. Beginning with October 1951 all computations required pursuant to this section shall be made by the market administrator.

§ 925.61 *Base rules.* The following rules shall be observed in the determination of bases:

(a) A base may be transferred during the period of March through September upon written notice to the market administrator on or before the last day of the month of transfer, but only under the following circumstances:

(1) Upon the death, retirement or entry into military service of a producer, the entire base may be transferred to a member (or members) of his immediate family who continues to supply producer milk from the same farm.

(2) If a base is held jointly and such joint holding is terminated the entire base may be transferred as a unit to one of the joint holders or to another producer.

(b) A producer who ceases deliveries to a fluid milk plant or country plant for more than 45 days shall lose his base if computed pursuant to § 925.60 (a) and if he resumes deliveries to such a plant he shall be paid on a base determined pursuant to § 925.60 (b) until he can establish a new base under § 925.60 (a), to begin the next March 1.

(c) By notifying the market administrator prior to the last day of any month in the period March through September, inclusive, a producer having a base established pursuant to § 925.60 (a) may relinquish such base by cancellation, and effective from the first day of the month in which notice is received by the market administrator until the end of such seven-month period such producer's base shall be computed in the manner provided by § 925.60 (b).

(d) As soon as bases computed by the market administrator are allotted, notice of the amount of each producer's base shall be given by the market administrator to the handler receiving such producer's milk and to the cooperative association of which the producer is a member. Each handler, following receipt of such notice, shall promptly post in a conspicuous place at each of his plants a list or lists showing the base of each producer whose milk is received at such plant.

(e) If a producer operates more than one farm he shall establish a separate base with respect to producer milk delivered from each such farm.

DETERMINATION OF UNIFORM PRICE

§ 925.70 *Computation of value of milk.* (a) Except as provided in paragraph (b) of this section, the total value of milk received during any month by each handler, including a cooperative association, shall be a sum of money computed by the market administrator as follows:

(1) Multiply the pounds of producer milk in each class for such month by the class price (§ 925.51) and add together the resulting amounts;

(2) Deduct the total amount of all location adjustment credits computed in accordance with § 925.53;

(3) Add or subtract, as the case may be, the amount necessary to correct errors as disclosed by the verification of reports of such handler of his receipts and utilization of skim milk and butterfat in previous months for which payment has not been made;

(4) Add, if such handler had overage, an amount computed by multiplying the pounds of overage deducted from each class pursuant to § 925.45 by the applicable class price; and

(5) Add, with respect to other source milk received at such handler's fluid milk plant(s) and country plant(s), respectively, in excess of the total volume of his Class II milk (except allowable shrinkage) at such plant an amount computed by multiplying the hundredweight of such other source milk by the difference between the Class I milk and Class II milk prices adjusted respectively, by the butterfat differentials provided in § 925.52 (based on the butterfat test of such other source milk), and in the case of a fluid milk plant or country plant not located in district No. 1 or in the counties of Kitsap or Mason, reduced by 25 cents per hundredweight.

(b) The value of milk of each handler at any plant where only other source milk was received and from which, during the month, some other source milk was disposed of within the marketing area as Class I milk pursuant to § 925.41 (a) (1) shall be a sum of money computed by the market administrator by multiplying the hundredweight of such other source milk so disposed of by the difference between the Class I milk and Class II milk prices adjusted, respectively, by the butterfat differentials provided in § 925.52 (based on the butterfat test of such other source milk), and, in the event disposition within the marketing area was only within districts Nos. 2 and 3, reduced by 25 cents per hundredweight.

§ 925.71 *Computation of uniform price.* For each month the market administrator shall compute the uniform prices per hundredweight for base milk and excess milk received from producers as follows:

(a) Combine into one total the values computed pursuant to § 925.70 for all handlers who made the reports prescribed in § 925.30 and, after this order has been in effect for two months, who made the payments pursuant to § 925.84 for the preceding month;

(b) Add the aggregate of the values of the location adjustments on base milk allowable pursuant to § 925.81 (a).

(c) Add an amount representing not less than one-half the unobligated cash balance in the producer-settlement fund;

(d) Subtract, if the average butterfat content of the milk represented by the values included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 925.82 and multiplying the resulting figure by the total hundredweight of such milk;

(e) Multiply the hundredweight of excess milk by the Class II price for 4.0 percent milk;

(f) Compute the total value of base milk by subtracting the amount computed pursuant to paragraph (e) of this section from the net amount computed pursuant to paragraph (d) of this section: *Provided*, That if such result is greater than an amount computed by multiplying the hundredweight of base milk by the Class I milk price (for 4.0 percent milk), such amount in excess thereof shall be subtracted from the result obtained prior to this proviso;

(g) Divide the net amount obtained in paragraph (f) of this section by the total hundredweight of base milk and subtract not less than 4 cents nor more than 5 cents. This result shall be known as the uniform price per hundredweight of base milk of 4.0 percent butterfat content; and

(h) Divide the amount obtained in paragraph (e) of this section plus any amount subtracted pursuant to the proviso of paragraph (f) of this section by the hundredweight of excess milk and subtract not less than 4 cents nor more than 5 cents. This result shall be known as the uniform price per hundredweight of excess milk of 4.0 percent butterfat content.

PAYMENTS

§ 925.80 *Time and method of payment to producers and to cooperative associations.* (a) On or before the 18th day after the end of each month, each handler, including a cooperative association which is a handler, shall make payment to each producer, for milk received at his plant from such producer during such month, pursuant to subparagraphs (1) and (2) of this paragraph: *Provided*, That such payment shall be made, upon request, to a cooperative association, or to its duly authorized agent, qualified under § 925.5 with respect to milk received from each producer who has given such association authorization by contract or by other written instrument to collect the proceeds from the sale of his milk, and any payment made pursuant to this proviso shall be made on or before the 16th day after the end of such month; *And provided further*, That if by such date such handler has not received full payment for such month pursuant to § 925.85, he shall not be deemed to be in violation of this paragraph if he reduces uniformly for all producers his payments per hundredweight pursuant to this paragraph by a total amount not in excess of the reduction in payment from the market administrator; however, the handler shall make such balance of payment uniformly to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payment is received from the market administrator:

(1) At not less than the uniform price for base milk for the quantity of base milk received, adjusted by the butterfat differential computed pursuant to § 925.82 and by the applicable location adjustment provided in § 925.81; and

(2) At not less than the uniform price for excess milk for the quantity of excess milk received, adjusted by the butterfat differential computed pursuant to § 925.82.

(b) On or before the 16th day after the end of each month each handler shall pay to each cooperative association which operates a fluid milk plant or country plant, for skim milk and butterfat received from such cooperative association during such month, an amount of money computed by multiplying the total pounds of such skim milk and butterfat in each class (pursuant to § 925.41) by the class price less the amount of the location adjustment credits pursuant to § 925.53.

(c) None of the provisions of this section shall be construed to restrict any cooperative association qualified under section 8c (5) (F) of the act from making payment for milk to its producers in accordance with such provision of the act.

§ 925.81 *Location adjustments to producers.* In making payments to producers pursuant to § 925.80 (a) (1), deductions may be made per hundredweight of base milk received from producers at the plants and at a rate not in excess of the sum of the rates specified in paragraphs (a) and (b) of this section.

(a) 35 cents at plants located in Clallam and Jefferson Counties, and 25 cents at other plants not located in district No. 1 or in the counties of Kitsap and Mason.

(b) A rate at plants not located in district No. 1 or in the counties of Kitsap and Mason computed by (1) multiplying by 15 cents the hundredweight of butterfat and skim milk shipped to a fluid milk plant in district No. 1 and classified as Class I milk, and (2) dividing the result by the hundredweight of base milk received from producers at the plant from which such shipment was made.

§ 925.82 *Producer butterfat differential.* In making payments pursuant to § 925.80 (a) for base milk and for excess milk, there shall be added to, or subtracted from, the uniform prices thereof for each one-tenth of 1 percent that the average butterfat content of the milk received from the producer is above or below 4.0 percent, a butterfat differential computed by the market administrator as follows: Multiply the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at San Francisco, as reported by the Department during the month in which the milk was received, by 1.3 in the case of base milk, and by 1.15 in the case of excess milk, and, in each case, divide the resulting amount by 10, and round to the nearest tenth of a cent: *Provided*, That in the months of October through February, inclusive, the butterfat differential to be used pursuant to this section shall be computed by multiplying the butterfat differential for Class I milk by the percentage of butterfat in producer milk classified in such class and the butterfat differential for Class II milk by the percentage of butterfat in producer milk classified in such class, and adding together the resulting amounts.

§ 925.83 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to § 925.84 and out of which he shall make all payments to handlers pursuant to § 925.85.

§ 925.84 *Payments to the producer-settlement fund.* On or before the 14th day after the end of the month during which the milk was received, each handler, including a cooperative association which is a handler, shall pay to the market administrator the amount, if any, by which the total value of such handler's milk as determined pursuant to § 925.70 is greater than the value of such handler's producer milk computed at the minimum uniform prices as specified in § 925.80 (a) prior to application of any location adjustment allowed pursuant to § 925.81 (b).

§ 925.85 *Payments out of the producer-settlement fund.* On or before the 16th day after the end of the month during which the milk was received, the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the total value of such handler's milk as determined pursuant to § 925.70 is less than the value of such handler's producer milk computed at the minimum uniform prices as specified in § 925.80 (a) prior to application of any location adjustment allowed pursuant to § 925.81 (b), and less any unpaid obligations of such handler to the market administrator pursuant to §§ 925.84, 925.86, 925.87, and 925.88: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 925.86 *Adjustments of accounts.* Whenever verification by the market administrator of reports or payments of any handler discloses errors resulting in moneys due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred following the 5th day after such notice.

§ 925.87 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than with respect to milk of such handler's own production) pursuant to § 925.80 (a), shall make a deduction of 5 cents per hundredweight of milk, or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, with respect to the following:

(1) All milk received from producers at a plant not operated by a cooperative association; and

(2) All milk received at a plant operated by a cooperative association from producers who are not members of such association.

Such deductions shall be paid by the handler to the market administrator on or before the 14th day after the end of the month. Such moneys shall be expended by the market administrator for the verification of weights, sampling, and testing of milk received from producers and in providing for market information to producers; such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of each producer (1) who is a member of, or who has given written authorization for the rendering of marketing services and the taking of deduction therefor to, a cooperative association, (2) whose milk is received at a plant not operated by such association, and (3) for whom the market administrator determines that such association is performing the services described in paragraph (a) of this section, each handler shall deduct, in lieu of the deduction specified under paragraph (a) of this section, from the payments made pursuant to § 925.80 (a) the amount per hundredweight on milk authorized by such producer and shall pay over, on or before the 13th day after the end of the month, such deduction to the association entitled to receive it under this paragraph.

§ 925.88 *Expense of administration.* As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 14th day after the end of each month 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within such month of (a) other source milk classified as Class I milk, and (b) milk received from producers, including such handler's own production.

§ 925.89 *Termination of obligations.* The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler falls or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 925.90 *Effective time.* The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 925.91.

§ 925.91 *Suspension or termination.* The Secretary may suspend or terminate this part or any provision of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the act. This part shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 925.92 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 925.93 *Liquidation.* Upon the suspension or termination of the provisions on this part, except this section, the market administrator, or such other liquidating agent as the Secretary may

designate, shall if so directed by the Secretary liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 925.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 925.101 *Separability of provisions.* If any provision of this part, or its application to any person or circumstances, is held invalid, the application of such provision and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

§ 925.102 *Producer-handlers.* Sections 925.40 to 925.45, inclusive, 925.50 to 925.53, inclusive, 925.70 to 925.71, inclusive, and 925.80 to 925.89, inclusive, shall not apply to a producer-handler.

[7 CFR, Part 925]

[Docket No. AO-226]

HANDLING OF MILK IN PUGET SOUND, WASHINGTON, MARKETING AREA

ORDER OF SECRETARY DIRECTING THAT REFERENDUM BE CONDUCTED AMONG PRODUCERS AND DESIGNATION OF AGENT TO CONDUCT SUCH REFERENDUM

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the order regulating the handling of milk in the Puget Sound, Washington, marketing area) who, during the month of December 1950 were engaged in the production of milk for sale in the marketing area specified in the aforesaid order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed simultaneously herewith.[1]

N. L. Keyock is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177).

Done at Washington, D. C., this 5th day of April 1951.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

[F. R. Doc. 51-4183; Filed, Apr. 6, 1951; 8:51 a. m.]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR, Part 3]

[Docket Nos. 8736, 8975, 8976, 9175]

TELEVISION BROADCAST SERVICE

THIRD NOTICE OF FURTHER PROPOSED RULE MAKING

In the matters of amendment of § 3.606 of the Commission's rules and regulations, Docket Nos. 8736 and 8975; amendment of the Commission's rules, regulations and engineering standards concerning the television broadcast service, Docket No. 9175; utilization of frequencies in the band 470 to 890 Mcs. for television broadcasting, Docket No. 8976.

1. Notice is hereby given of further proposed rule making in the above-entitled matters. For purposes of identification the proceedings to be conducted pursuant to this notice shall be designated as "Part III". The proceedings heretofore conducted pursuant to the "Notice of Further Proposed Rule Making" (FCC 49-948) issued by the Commission on July 11, 1949, have been designated as "Part II." The proceedings heretofore conducted pursuant to the "Notice of Proposed Rule Making" (48-1569) issued by the Commission on May 6, 1948, have been designated as "Part I."

2. Appendix A of the Commission's notice of July 11, 1949 (FCC 49-948) is revised to the extent set forth in Appendix A set forth below. Appendix B of said notice is revised to the extent set forth in Appendix B set forth below.[1] Appendices C and D of said notice are withdrawn and new Appendices C and D are set forth below.

3. In view of the withdrawal of the proposals set forth in Appendices C and D of the Commission's notice of July 11, 1949 (FCC 49-948) all comments, counterproposals and oppositions filed by interested parties with respect to said proposals are rendered moot and will not be considered further in these proceedings. All petitions heretofore filed with the Commission requesting leave to file late appearances, comments and engineering statements with respect to the Commission's proposals in Appendices C and D of the Commission's notice of July 11, 1949 (FCC 49-948) are likewise rendered moot. Interested parties may hereafter participate in the proceedings initiated by this notice only by complying with the procedures set forth herein.

4. The Commission proposes to amend Parts 2 and 3 of its rules and regulations, and its "Standards of Good Engineering Practice Concerning Television Broadcast Stations" as set forth below in Appendices A, B, C, and D.

5. It is evident that an understanding must be reached between the United States of America and Canada and Mexico with respect to the assignment of television channels along their mutual borders. Such an understanding is necessary in order to prevent undue interference between television stations in the respective countries and in order to provide a fair, efficient and equitable assignment of television channels between the United States and the above countries. Accordingly, in Appendix D herein the Commission has included certain assignments for Canada and Mexico which might be allocated on the same basis as the over-all proposal if the borders between the countries did not exist.

6. As indicated above, the assignments set forth in Appendix D of the above notice were included in the proposal only for illustrative purposes and to show the effect on the above table of a reasonable number of assignments to Canada and Mexico. A series of conferences have been held with representatives of the Government of Mexico and the Dominion of Canada relating to the allocation of television channels along the United States-Mexican and the United States-Canadian borders. No formal agreements have been entered into but views are being exchanged with respect to these matters and it is expected that satisfactory understandings will be reached.

7. In preparing the table of television channel allocations set forth in Appendix C, the Commission proposes to alter existing television authorizations in 31 instances. The alterations with respect to Channel 9 in the city of Cleveland, Ohio, Channel 5 in the city of Syracuse, New York, and Channel 6 in the city of Rochester, New York, resulted from the Commission's efforts to arrive at an equitable distribution of television channels between the United States and the Dominion of Canada. The remaining 28 channel substitutions resulted from the Commission's efforts to reduce interference, make available a reasonable number of channels and to effect the maximum utilization of VHF television channels in the United States. The changes proposed by the Commission with respect to these 31 stations are set forth in the following paragraph.

8. The changes which the Commission proposes to make with respect to existing authorizations are set forth in the following table which contains the name of the licensee or permittee who presently holds a grant of television facilities, the city in which such facilities are located, the channel presently assigned to the licensee or permittee, and the channel which the Commission proposes to substitute for the existing channel:

[1] New Appendices A and B are self-contained documents and replace old Appendices A and B in their entirety.

9. Should the proposals set forth in Appendix C be adopted by the Commission, in whole or in part, it is hereby proposed to modify the licenses and construction permits held by the licensees and permittees listed in paragraph 8 above so as to substitute in their respective authorizations the proposed channels in place of their present existing assignments as set forth in paragraph 8 above. In the light of the information set forth in paragraphs 5, 6 and 7 herein, it is the judgment of the Commission that its actions will result in a better utilization of television channels in the United States, Mexico and the Dominion of Canada by increasing the service area of the stations already on the channels in question and reducing the interference which would be caused to new stations that will be added to the channels in question; will promote the public interest, convenience and necessity; and will more fully and completely carry out the provisions of the Communications Act of 1934, as amended. Accordingly, pursuant to the provisions of sections 303 (f) and 312 (b) of the Communications Act of 1934, as amended, the licensees and permittees listed in paragraph 8 above are directed to show cause in these proceedings and in accordance with the procedures hereinafter set forth why their licenses and permits should not be modified as set forth in paragraph 8 above in the event the Commission deletes from their respective cities the channels listed under the heading "Present Channel Assignment" and substitutes therefor the channels listed under the heading "Proposed Channel Assignment."

10. The most important single factor which induced the issuance by the Commission of its "freeze" order of September 30, 1948, was the desire to ascertain whether sufficient mileage spacing had been provided between assignments set forth in its table. On the basis of the data contained in the record of this proceeding the Commission is proposing the separations specified in the attached Appendix A. In the light of these separations the Commission proposes to take the following actions upon the expiration of the time specified in paragraph 12 herein for the filing of comments and oppositions thereto:

(a) The Commission will determine whether any issue has been raised which would prevent the lifting of the "freeze" with respect to channel assignments in Alaska, Hawaiian Islands, Puerto Rico and Virgin Islands. These Territories are sufficiently removed from the continental United States so as not to be involved in the separations problems of continental United States and present no assignment problem with any neighboring countries. Separations have been maintained within the Territories which are in accordance with the Commission's proposals in Appendix A. Accordingly, in the absence of any issue with respect to these separations, the Commission proposes to lift the "freeze" with respect to the above Territories without waiting to reach a final determination on all the assignments proposed in Appendix C.

(b) The Commission will determine whether any issue has been raised with respect to the Commission's proposed assignments in the UHF band. In the absence of such issue, and where serious procedural or practical objections do not exist, the Commission will consider lifting the "freeze" on applications which specifically request a UHF channel.

(c) The Commission will determine whether any issue has been raised with respect to applications by existing television licensees and permittees to increase power in accordance with the proposals set forth in Appendix A. In the absence of such issue the Commission will consider lifting the "freeze" so far as existing stations are concerned on a case-to-case basis where it appears that a grant of increased power not in excess of the maximum specified in Appendix A will not affect channel assignment proposals offered by the Commission or by interested parties and will not unduly restrict the Commission's flexibility in reaching final determinations with respect to assignments still in issue.

(d) Should the Commission take action in accordance with the views expressed in subparagraphs (a), (b), and (c) above, a reasonable period will be provided for the filing of appropriate applications.

11. Based on the record compiled in these proceedings, Appendices A and B reflect changes in the Commission's proposals from those set forth in Appendices A and B of July 11, 1949. As indicated in paragraphs 12 and 13 which follow, the hearing scheduled herein will be limited to proposals relating to Appendices C and D. Accordingly, persons who are of the opinion that the record does not substantiate the proposals set forth in Appendices A and B may file statements setting forth their objections not later than April 23, 1951. Such objections shall state with particularity the specific proposal to which objection is made and the volume and page number of the transcript or exhibits containing the evidence on which their objection is based.

12. (a) On or before April 23, 1951, any interested person who is of the opinion that the proposals herein with respect to Appendices C and D should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission written comments (including data, views or arguments) concerning said proposals. Interested persons favoring the proposals herein may file such written comments in support thereof. All written comments must be clear and specific as to the proposals made therein and must be accompanied by supporting engineering statements. Comments not accompanied by engineering statements and engineering statements which are not accompanied by comments of the interested parties will not be accepted. No comments or statements will be accepted after April 23, 1951, unless a later date is provided by Commission order.

(b) On or before May 8, 1951, interested persons desiring to submit written comments (including data, views or arguments) in opposition to comments or counterproposals filed with respect to the Commission's proposals herein may file such opposing comments which must be accompanied by supporting engineering statements. Oppositions to counterproposals will not be accepted by the Commission, if they advance new proposals nor will they be accepted after May 8, 1951, unless a later date is provided by Commission order.

(c) Comments which merely support the comments, counterproposals or oppositions previously filed by other interested parties pursuant to this notice will not be accepted.

(d) Comments and statements directed toward specific assignments in the Commission's proposed Table in Appendix C herein shall show not only the effect which the proposals in said comments and statements will have on the service in the particular communities involved but also the overall effect thereof with specific reference to the priorities set forth in paragraph II of Appendix A herein.

(e) A copy of this notice will be mailed to counsel for each party who appeared in Part II of the proceedings in the above-entitled matters, or to the party directly if not represented by counsel. All future notices mailed herein by the Commission will be sent only to persons who have filed comments, statements or oppositions pursuant to this paragraph. The notices will be sent to the attorney, except where a party is not represented by counsel. In such event, notices will be sent to the party. The name and post office address of each party and his attorney shall be set forth clearly on each comment filed as provided above.

(f) An original and 14 copies of all written comments and statements shall be filed with the Commission, as required by § 1.764 of the Commission's rules and regulations.

13. (a) Notice is hereby given that a hearing will be held in the above-entitled matters before the Commission en banc commencing on May 23, 1951, at 10:00 a. m. in Washington, D. C. (at a place to be designated by subsequent notice of the Commission), for the purpose of hearing testimony and receiving evidence regarding the Commission's proposals in Appendices C and D herein, and such other proposals as are duly and timely filed by interested persons with respect to Appendices C and D. Any interested person who has filed written comments with respect to Appendices C and D in accordance with the provisions of paragraph 12 herein may participate in said hearing.

(b) Persons who have failed to file timely written comments or statements as required by paragraph 12 herein will not be permitted to adduce testimony or to offer any exhibits in evidence at the hearing, nor will such persons be permitted to cross-examine any of the witnesses appearing at the hearing.

(c) In view of the comprehensive nature of the proceedings herein and the desirability of concluding the hearing as soon as possible, it is requested that parties incorporate as much evidence as is practicable in the exhibits which they plan to submit. In this connection participants will be required to submit at the hearing at least 20 copies of each proposed exhibit to the Commission. In addition, participants should plan, if possible, to have available at the hearing, 100 additional copies of each exhibit for distribution to interested persons. Each exhibit should contain on the face thereof the docket numbers of the instant proceeding which may be abbreviated as follows: "Docket 8736 et al."

(d) In appropriate instances the Commission will permit participants at the hearing to incorporate by reference portions of the records of prior rule-making hearings provided that notice of intention to make such offer at the hearing is set forth in the written comments filed by the offering party and that the docket number and transcript pages are specifically identified in said written comments. Parties may not incorporate by reference any comments or statements heretofore filed pursuant to the Commission's "Notice of Proposed Rule Making" (FCC 48-1569) issued May 6, 1948, or to the Commission's "Notice of Further Proposed Rule Making" (FCC 49-948) issued July 11, 1949.

14. Following the closing of the record, the Commission upon consideration of all proposals, counterproposals, and evidence in this proceeding will adopt such rules, regulations and standards, as will best serve the public interest, convenience or necessity.

15. Except where other provisions are made by the Commission pursuant to paragraph 10 herein, persons who are contemplating filing applications for new television broadcast stations, or filing amendments to pending applications for new television broadcast stations, are requested to postpone the filing of such applications or amendments pending a final determination on the rules, standards and assignments proposed in this proceeding. Upon the issuance of final rules, standards and assignments in this proceeding, the Commission will issue an announcement providing a reasonable period of time during which new applications may be filed and pending applications may be amended, in conformity with the new rules, standards and assignments. Applicants are requested to comply with this paragraph in order to eliminate unnecessary administrative effort and to save themselves the possibly needless expense of preparing and filing applications and amendments which may not be in conformity with the rules, standards and assignments as finally adopted.

16. Authority to issue the proposals herein is vested in the Commission by sections 4 (i), 301, 303 (b), (c), (d), (e), (f), (g), (h), (r), and 307 (b) of the Communications Act of 1934, as amended.

FEDERAL COMMUNICATIONS COMMISSION,[2]

[SEAL] T. J. SLOWIE,
Secretary.

Adopted: March 21, 1951.

Released: March 22, 1951.

APPENDIX A

The Commission proposes to amend its rules and regulations, and Standards of Good Engineering Practice Concerning Television Broadcast Stations so as to effectuate the following proposals:

I. NUMBER OF CHANNELS

A. *Distribution.* In addition to the 12 VHF six-megacycle channels (numbered 2 through 13) presently assigned for television broadcasting, the Commission proposes to add 65 or 70 [1] UHF 6-megacycle channels:

Channels in group	Frequency range [1]	Channel Nos.	Assignment
12	54-216 mc	2 through 13	Commercial, or non-commercial educational television.
52	470-782 or 500-812 mc	14 through 65	
13 or 18	782 or 812-890 mc	66 through 78 or 83	Flexibility channels.[1]

[1] See pars. 11A (1), IV and V.

B. *Utilization of entire UHF band.* In its Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to assign forty-two 6-megacycle channels (14 through 55) in the lower portion of the UHF band for commercial television broadcasting. The Commission proposed to assign 32 of the above UHF channels for use by metropolitan stations and the remaining 10 channels for use by community stations. During the hearings conducted by the Commission with respect to the General Issues in the pending television proceedings, testimony was presented which favored the allocation of the entire UHF band for commercial television broadcasting. Although some testimony was presented which favored the allocation of a portion of the UHF band at this time pending the acquisition of additional data, greater support was given to the proposal to assign television channels in the entire UHF band for immediate use. It was urged that a need existed for additional commercial television channels; that such an allocation would encourage developments in UHF equipment; and that due to problems not previously considered, i. e., oscillator radiation, intermodulation, image interference, etc., more channels were necessary to provide an adequate number of usable channels. Some testimony was presented to the effect that the allocation of the lower portion of the UHF band was preferable because better coverage and equipment performance could be expected there. On the other hand, there was testimony to the effect that differences would not be appreciable throughout the entire UHF band. In any event, the effect of such differences on the optimum utilization of the band are likely to be small. Accordingly, the Commission has concluded that allocation of the entire UHF band for television broadcasting on a regular basis would result in the maximum utilization of television channels in the United States and would be in the public interest.

C. *Intermixture of VHF and UHF channels.* The Commission's proposed table of July 11, 1949, was based to a considerable degree on the assignment of VHF and UHF channels in the same city.

[1] The Commission has not yet reached a determination concerning the proposal in these proceedings to allocate the band 470-500 mc. to multi-channel broad band common carrier mobile radio service in lieu of television broadcasting. A Report and Order with respect to this matter will be issued at a later date. If the Commission rejects the proposal, Channel 14 will begin at 470 mc. and there will be 18 flexibility channels beginning at 782 mc. If the Commission grants the proposal, Channel 14 will begin at 500 mc. and there will be 13 flexibility channels, beginning at 812 mc.

[2] Commissioner Walker not participating; statements of additional views of Commissioners Coy and Hennock and statements of dissent in part of Commissioners Webster, Jones and Sterling filed as part of original document.

During the hearing on the General Issues, it was urged by some witnesses that the elimination of intermixture would simplify receiver problems and would minimize the broadcasters' competitive problems. It was argued that intermixture would tend to deter the construction of UHF stations and that until a large number of VHF-UHF receivers were distributed, such UHF stations as were constructed would have difficulty in surviving. On the other hand, many witnesses favored intermixture on the ground that it was impracticable to avoid it; that UHF stations would be constructed in cities located within the service areas of VHF stations and television viewers would expect their sets to receive both signals; and that receiver manufacturers would be obliged to build combination VHF-UHF receivers for such areas.

It is reasonable to assume that economic problems will be faced by UHF broadcasters in areas where VHF broadcasting exists. Similar problems confronted the VHF broadcasters prior to increased receiver distribution in their respective areas. It is reasonable to assume that if the entire UHF band is allocated for regular television broadcasting, television receivers will be built to receive VHF and UHF signals. If intermixture were avoided, it would be necessary to limit many areas to one or two VHF stations even though UHF assignments were available for those areas and additional stations could be supported financially. Moreover, VHF stations are capable of providing a greater coverage than UHF stations. Hence, a more extensive television service is made available where some VHF assignments are made in as many communities as possible than where only VHF assignments are made in some communities and only UHF assignments are made in the other communities. The Commission has concluded that the adoption of an assignment table based on non-intermixture constitutes a short-term view of the problem and is inadvisable. Accordingly, the proposed table attached herein has been prepared on the basis of intermixture of VHF and UHF channels.

II. ASSIGNMENT PRINCIPLES

A. *Table of assignments.* (1) The television channels available for use in the various communities are set forth in the table in Appendix C.[1] In setting up this table, the Commission has endeavored to meet the twofold objective set forth in sections 1 and 307 (b) of the Communications Act of 1934, to provide television service, as far as possible, to all people of the United States and to provide a fair, efficient and equitable distribution of television broadcast stations to the several states and communities. The Commission has set forth below the principles, in terms of priority, which form the basis of the table of assignments. These priorities are as follows:

Priority No. 1: To provide at least one television service to all parts of the United States.

Priority No. 2: To provide each community with at least one television broadcast station.

Priority No. 3: To provide a choice of at least two television services to all parts of the United States.

Priority No. 4: To provide each community with at least two television broadcast stations.

Priority No. 5: Any channels which remain unassigned under the foregoing priorities will be assigned to the various communities depending on the size of the population of each community, the geographical location of such community, and the number of television services available to such community from television stations located in other communities.

B. *Changes in table.* (1) A channel assigned to a community in the Commission's Table of Television Assignments shall be available, without the necessity of rule making proceedings, to any other community located within 15 miles of the assigned community provided the minimum separations set forth in paragraphs E and G herein are maintained.[3]

(2) Upon adoption in the instant proceedings of the Table of Assignments, said table shall not be subject to amendment on petition for a period of one year from the effective date of the Commission's final order amending said table. Upon the expiration of said one year period the Commission will consider petitions filed during said period requesting changes in the table. Thereafter, where the Commission has conducted a rule making proceeding in which it amended or refused to amend said table, no petition concerning the amendment granted or denied may be filed within 1 year after the effective date of the Commission's final order amending or refusing to amend said table.[4]

(3) Except as provided for in paragraphs II A (1) and II B (1) above, no application for a television station in a community specified in the Commission's table will be accepted for filing if said application requests a channel which is not contained in the table. Persons desiring to apply for a channel not specified in the Table must first secure an amendment thereof through appropriate rule making proceedings. Petitions proposing changes in the table must show the extent to which changes conform to the priorities listed in subparagraph II A (1) above, based upon stations operating in accordance with the Table of Assignments and employing the maximum power specified in subparagraph D (2) herein.

C. *Grades of service.*[5] In its Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to classify television broadcast service into three grades of service. In the Commission's opinion, there is no need for more than two grades of service. Grade A service is so specified that a quality acceptable to the median observer is expected to be available for at least 90 percent of the time at the best 70 percent of receiver locations at the outer limits of this service. In the case of Grade B service the figures are 90 percent of the time and 50 percent of the locations.[6] The field strengths and interference ratios are as follows:

1. Required median field strengths in db above 1 uv/m:

Grade of service	Channels 2-6	Channels 7-13	Channels 14-83
A	68 db	71 db	74 db
B	47 db	56 db	64 db

2. Permissible co-channel ratios in db of median desired field strength to 10 percent undesired field strength:

Grade of service	Channels 2-13		Channels 14-83	
	Non-offset	Offset	Non-offset	Offset
A	31 db	34 db	42 db	36 db
B	45 db	28 db	45 db	28 db

[1] The Commission proposes the use of iso-service contours which express service in terms of the ratio between desired and undesired signal in decibels, or the minimum required signal levels in decibels above one microvolt per meter. This has been done in order to facilitate computation of service and interference field strengths. Likewise, the same terms may be carried over to the output of the transmitter, transmission line loss and antenna gain. This has the advantage of using the same unit throughout the service whether in the transmitting equipment or in the field and has the additional advantage that a decibel of power added at the transmitter results in a decibel of increased field strength. In order to place these matters on a related basis, the decibels with respect to transmitter power and antenna gain as well as field strength must be expressed as decibels with reference to some given level. Field strength is expressed either in decibels above an undesired signal or decibels above a reference level which has been chosen as one microvolt per meter. A convenient reference level of transmitter power is 1 kilowatt. The propagation charts attached to Appendix B and identified as "Appendix V, figures 1-4" are based upon the radiation in the equatorial plane of a half wave dipole antenna having an effective radiated power of one kilowatt. Antenna gain is expressed as the ratio in db of the maximum radiation from the antenna to the radiation in the equatorial plane of a half wave dipole with equal power input.

[2] Persons desiring to file an application for a community which is not listed in the table and which is not eligible for assignment pursuant to "II B" below, may file an application for one of the flexibility channels or a petition for rule making pursuant to "II B" below. Flexibility channels may not be applied for in any community for which any channel is provided in the table of assignments or which is eligible for such an assignment pursuant to "II B" below.

[3] In determining separations between cities for the purpose of this provision, the city mileage separations set forth in the publication of the U. S. Department of Commerce entitled "Airline Distances Between Cities in the United States" shall be utilized. Where cities are not listed in the above publication, separations shall be computed on the basis of the distance between the main post offices in the respective cities.

[4] In applying this provision, each area specified in the table shall be considered separately so that the provision is applicable only if the Commission's action related to an assignment for the area in question. For example, if the Commission denies a petition for rule making requesting that television channel X be removed from City B to City A, no petition for rule making to move a channel from City B to City A will be eligible for filing for one year, even though the request may be to remove Channel Y or Channel Z from City B. However, a petition may be filed before the expiration of one year to remove a channel from City C to City A.

[5] For the specialized case that exists in the case of adjacent channel interference, see par. II E (2) below.

3. Permissible adjacent channel ratios in db of median desired and undesired field strengths:

Grade of service	Channels 2–83
A	0 db
B	0 db

(4) a. *Prediction of service areas and interference.* Methods for describing service areas and interference are set forth in Appendix B. The methods therein described include the propagation of radio waves through the lower atmosphere only. These propagation charts are based on an extensive number of measurements made at various locations over a long period of time. It is recognized that these charts may have to be revised from time to time as more measurements are made, and interested persons are encouraged to make as many measurements as possible and submit them to the Commission. The Commission is satisfied that on the basis of the data presently available to it the data underlying the propagation charts are sufficient to afford an adequate statistical basis for describing field intensities under average conditions, but it is expected that there may be substantial variations in individual areas.

b. *Long distance skywave interference.* It is also realized that propagation to distances of the order of 500 to 1,500 miles via the sporadic E layer and to distances beyond via the F2 layer may occur in certain of the channels. However, since such interference may occur over extremely large distances, it is not possible to protect stations against such interference unless operation on such channels is limited to one or at the best a few stations. In order to provide stations for the various communities, the Commission has determined that the over-all public interest is better served by not protecting television broadcast stations against this type of interference.

D. *Classes of stations.* The Commission's Notice of Further Proposed Rule Making issued July 11, 1949, provided for three classes of stations, i. e., community, metropolitan and rural stations. During the hearings on the General Issues relatively little comment was offered concerning the proposed classifications. In reviewing this proposal, the Commission has concluded that it is desirable to reduce station classifications to a minimum and that more than one class of station is unnecessary if provision is made for appropriate power ranges for the various sizes of cities and rural areas. Accordingly, only one class of television broadcast station is proposed, with provision for minimum and maximum effective radiated powers in accordance with the respective tables set forth below:

(1) *Minimum power:*

Population of city (excludes adjacent metropolitan areas):	*Minimum effective radiated power* [1] *(in db above 1 kw.)*
1,000,000 and above	17 db/500 ft. ant.
250,000–1,000,000	10 db/500 ft.
50,000–250,000	3 db/500 ft.
Under 50,000	0 db/300 ft.

[1] Or equivalent, based on the same grade A service radius as with these values of effective radiated power and antenna height above average terrain. A chart showing this relationship is attached to Appendix B and identified as "Appendix IV." No minimum antenna height is specified. However, wherever feasible, high antennas should be used to provide improved service.

(2) *Maximum power.* The maximum effective radiated power to be authorized on the respective channels is set forth in the following table:

Channels:	*Maximum effective radiated power (in db above 1 kw.)*
2–6	20 db/500 ft. ant.
7–13	23 db/500 ft. ant.
14–83	23 db/500 ft. ant.

(3) Any station may be authorized on appropriate application to increase its power to the maximum set forth above without the necessity of a hearing so far as interference to other stations is concerned. The use of antenna heights greater than 500 feet above average terrain is encouraged as a means for improving the quality of service. If an antenna height greater than 500 feet is used, the effective radiated power shall be limited to that value which will avoid interference within the Grade A service radius of any other station, either existing or provided for in the Table of Assignments, on the basis of operation of such station with the maximum power and antenna height of 500 feet as set forth above. Where antenna heights of less than 500 feet are utilized, the effective radiated power shall not exceed that listed above.

E. *Station separations*—(1) *Co-channel separation.* The Table of Assignments contained in the Commission's Notice of Further Proposed Rule Making, issued July 11, 1949, had as its objective co-channel separation of 220 miles in the VHF band and 200 miles in the UHF band. At the hearing on the general issues, testimony was offered that these separations could be reduced considerably by utilizing offset carrier operation. Evidence was also offered that more television service could be made available to the country if the separation objective were reduced to 150 miles for VHF channels.

The Commission has carefully considered the above evidence and has concluded that some reduction in co-channel separation is possible because of the improvements which result from offset carrier operation. It is not deemed advisable to effectuate a reduction to 150-mile VHF separation as suggested at the hearing. In the first place, the evidence upon which the 150-mile separation is based is the theoretical computations of what coverage can be achieved. On the basis of the evidence in the record, it is clear that considerations of terrain and other propagation factors will materially affect many of the theoretical computations. In the second place, much of the propagation data—although the best available—upon which the Commission relies is necessarily quite meager. Postponing a decision in these proceedings would not materially aid this problem since it has been the Commission's experience that substantial amounts of propagation data do not become available until stations are authorized on a regular basis. Hence, the Commission is faced with the practical problem that if it postpones assigning stations until sufficient propagation data are available, such data may never become available, while on the other hand if stations are assigned before sufficient propagation data are assembled, more interference may result in actual operation than was anticipated. In the Commission's view, the best method of handling this problem is to assign stations as soon as a reasonably sufficient amount of data is accumulated but in doing so assignments should not be made on the barest minimum separation which exact calculations would indicate. Instead, a safety factor should be included. In this way, if as a result of actual experience more interference results than was indicated by the earlier calculations, the safety factor will prevent extensive damage to over-all service. If actual experience shows that the amount of interference is approximately that predicted by the calculations, then the rules and standards can be amended to reflect the new data. In the Commission's experience, it is much easier as a practical matter to reduce station separations which are somewhat larger than were originally thought to be necessary than it is to increase separations which are smaller than were originally thought to be necessary.

With the foregoing in mind, the Commission has provided for a minimum co-channel separation between cities of 180 miles on Channels 2-13 and 165 miles on Channels 14-83. In order to provide for flexibility in the location of transmitters and in order to give communities within 15 miles of the city in question a reasonable opportunity to utilize channels as set forth in paragraph II B1 above, minimum separation between transmitters on the same channel is provided for at 170 miles for Channels 2-13 and 155 miles for Channels 14-83.[7] These separations are based on offset-carrier operation by the stations.

(2) *Adjacent channel separation.* Under the present television standards, objectionable adjacent channel interference results when the ratio of the desired to the undesired signal falls below 6 db. The Commission's proposals of July 11, 1949 did not recommend any change in this ratio. Considerable data presented to the Commission indicate that this ratio is too conservative and that it could be 0 db or −6 db. In general, adjacent channel interference has not been of a serious nature and such problems as do exist can be solved to a very considerable extent by improvements in receiver design which are neither difficult nor costly. Experience has shown that many receivers are giving satisfactory adjacent channel performance in areas where interference is predicted under the present standards.

The Commission's proposals of July 11, 1949, provided for a normal adjacent

[7] In each case, the above figures are minimum separations. Greater separations are utilized in the sparsely settled areas of the country in order to secure a maximum amount of service. In addition, greater separations are also utilized in Gulf coast areas and in other areas where high levels of tropospheric propagation may be expected. This should be kept in mind by persons desiring to suggest changes in the Table of Assignments.

channel separation of 110 miles in the VHF band and 100 miles in the UHF band—one-half the distance provided for the normal co-channel separations. Since adjacent channel interference is so readily subject to being controlled by adequate design and production methods by manufacturers, the Commission believes that adjacent channel separations should be reduced, thus making possible a greater number of assignments. The Commission is of the opinion that these separations should be based upon receiver performance which may reasonably be expected of manufacturers and not on the characteristics of the poorer receivers. Separations have been based on the assumption of receivers having an adjacent channel rejection ratio of −6 db. Thus, a median field strength ratio of 0 db should provide service from one station or the other at each receiver location for at least 90 percent of the time, irrespective of signal fading. The table of assignments has been based upon an adjacent channel separation between cities of 70 miles for Channels 2–13 and 65 miles for Channels 14–83. The separations between transmitters are 60 miles for Channels 2–13 and 55 miles for Channels 14–83.[8]

(3) *Summary of co-channel and adjacent channel separation requirements:*

	Channels 2–13		Channels 14–83	
	Co-channel station separation	Adjacent channel station separation	Co-channel station separation	Adjacent channel station separation
Minimum separation city to city.	*Miles* 180	*Miles* 70	*Miles* 165	*Miles* 65
Minimum separation transmitter to transmitter	170	60	155	55

F. *Transmitter locations.* Transmitter locations shall be so chosen that the following median field intensities as calculated in accordance with the methods and procedures described in Appendix B are provided over the entire principal city to be served:

Channels 2–6	Channels 7–13	Channels 14–83
74 db	77 db	80 db

G. *Limitations on UHF assignments* [9]—(1) *Oscillator radiation*—(a) *VHF.* The Commission's proposed table of television channel assignments set forth in its Notice of Further Proposed Rule Making, issued on July 11, 1949, did not take into account the effects of receiver oscillator radiation on assignments in the VHF or UHF band. Evidence has been presented to the Commission concerning interference caused to receivers as a result of the use of a 21 mc. I. F. by manufacturers of receiving sets. In order to avoid such interference, Radio-Television Manufacturers Association has adopted as standard an I. F. of 41.25 mc. in the VHF and UHF bands. No oscillator radiation problems are involved for these VHF receivers so far as television stations operating in the VHF is concerned. Because of the large number of television receivers now in use employing the 21 mc. I. F., efforts have been made to minimize such interference without reducing the number of VHF assignments in the proposed table.

(b) *UHF.* There was general agreement at the above hearings that oscillator radiation is likely to be more severe in the UHF band than in the VHF band, due to the difficulty in suppressing such radiation in the higher frequencies. Further, because of the wide span of the UHF band it is not possible to place the oscillator outside the band and still employ an I. F. which is practical in the present state of the art.

Evidence was offered concerning a method of dealing with the oscillator radiation problem based on the "fold in" principle. It was proposed to divide the UHF band into four equal parts; to employ the lower and upper quarters for most assignments; to confine all oscillator radiation within the two center quarters; and to employ an I. F. of 111 mc. The Commission believes that the use of an I. F. of 111 mc. in television receivers is not feasible at this time. Existing tubes and those available in the foreseeable future will not permit adequate amplification with a reasonable number of I. F. stages. The use of the proposed I. F. will reduce adjacent channel selectivity. Further, setting up one-half of the UHF band as a repository for oscillator radiation would provide little incentive for receiver manufacturers to reduce such radiation. Accordingly, the "fold in" principle has not been adopted in preparing the proposed Table.

Although the Commission expects that continued improvements may eliminate the problem of oscillator radiation in the future, it does not appear practicable to expect such receivers in the near future.[10] Hence, the UHF table has taken into account the standard I. F. of 41.25 mc. adopted by the RTMA. Thus stations in the UHF which are 7 channels apart are required to have their transmitters separated by a minimum of 60 miles. This separation affords substantially the same protection as does the co-channel separation provided for above.

(2) *Intermodulation.* The Commission's proposed table of July 11, 1949, did not take into consideration the effects of intermodulation. Although interference resulting from intermodulation has not been a problem in the VHF band, it is generally agreed that intermodulation is likely to be a more serious problem in the UHF band. Various arrangements have been proposed for reducing intermodulation such as a staggered arrangement of channels, or by wide frequency separation. Testimony in the record indicates that a three or four channel separation would serve an adequate protection against intermodulation. The Commission has concluded that the best method of avoiding problems of intermodulation is to use a normal minimum separation of six channels in a city, thus allowing for a desirable safety factor. There is general agreement that a distance separation of 15 to 20 miles is sufficient to provide protection against intermodulation since sufficiently high field intensities from two or more stations would not normally exist at any point between stations so separated. Accordingly, in preparing the UHF assignments in the attached Table, stations closer than 20 miles have not been assigned channels less than six channels apart.

(3) *Image interference (picture and sound).* Image interference has raised no problems in the VHF band since a signal from another television station removed from the desired channel by twice the I. F. does not normally fall in another television channel. In the UHF band, however, where there is a large number of contiguous channels, image interference is expected to present interference problems. No allowance was made for this factor in the Commission's proposed table of July 11, 1949. The record indicates that image rejection of 30 to 40 db can be provided by UHF receivers of reasonably good design which employ a 41.25 I. F. There was general agreement that image interference should be avoided in making channel assignments. Accordingly, a minimum separation of 75 miles is provided between transmitters where UHF stations are separated by 15 channels to provide against picture image interference, and a minimum separation of 60 miles between transmitters where UHF stations are separated by 14 channels to provide protection against sound image interference. This separation provides substantially the same protection to the picture of a desired station as does the co-channel separation provided for above. A slightly smaller separation is provided for in the case of the sound image than the picture image because of the lesser interfering effect of the former.

(4) *I. F. beat.* It is recognized that when two stations in a city are separated by an I. F. it is possible that the two signals will combine to provide a beat signal which will be picked up by the I. F. Amplifier. Where a 41.25 mc. I. F. is in use, such signals may exist in channels which are separated by seven or eight channels from the desired station. The effect is similar to that of intermodulation. As indicated above the seven channel separation is taken care

[8] It is recognized that some existing operations do not comply with the minimum separations for co-channel or adjacent channel operation that are set forth above. It has not been possible to remove all of these cases without extensive dislocation. The Commission will study each such operation on a case-to-case basis in the hope that eventually they may all be brought up to the minimum separations.

[9] Certain separations between UHF stations are provided herein in order to afford protection against interference resulting from oscillator radiation, intermodulation, images and I. F. beats. It should be pointed out, however, that these separations do not provide for protection against interference of the above character which is caused by radio services operating outside of the television band.

[10] This same observation is also applicable to intermodulation, image interference and I. F. beat problems discussed below.

of by the separation which is used to avoid oscillator interference. Accordingly, stations in the UHF band which are separated by eight channels are required to have a minimum separation of 20 miles between transmitters.

(5) *Summary of minimum transmitter separations in the UHF.*

Channel No.	Adjacent channel (55 miles)	Oscillator (60 miles)	I. F. beat (20 miles)	Intermodulation (20 miles)	Image picture (75 miles)	Image sound (60 miles)	Cochannel (155 miles)

H. *Multiple interference.* In preparing the Table of Assignments, a study was made of several cases of multiple interference involving relatively uniform co-channel station separations in congested areas. This study based on information and data presently available, indicates that the grade A service areas obtained with the maximum powers as specified above are not infringed by combined interference from more than one signal when non-directional receiving antennas are assumed to be used. Moreover, if receiving antennas are assumed to have 6 db rejection in the directions of the undesired stations, the multiple interference under these conditions is not expected to exceed the single station case where no receiving antenna directivity is assumed. Thus, it appears that interference from more than one station may be accounted for satisfactorily by plotting a composite interference-limited contour on the basis of the most severe limitation in each direction due to any single interfering station. This approximation appears to be sufficiently accurate for the purpose of determining station separations and power limitations. Accordingly, it is proposed that interference from each station will be determined on an individual basis and that calculation of the effects of multiple interference will not be required.

I. *Offset carrier operation.* The Commission's proposals of July 11, 1949, did not provide for the use of offset carrier operation either in the VHF or UHF band. Testimony presented at the hearing on the General Issues in the proceedings herein substantially favored offset operation and tests have indicated that such operation resulted in an improvement of approximately 17 db over non-offset carrier operation. A survey conducted by the Joint Technical Advisory Committee of stations engaged in offset carrier operations indicates practically unanimous support therefor. Although a question has been raised concerning possible frequency stability of transmitters used in these operations, it appears that this problem is not serious and that frequency stability can be provided which will insure adequate and proper offset carrier operations. Accordingly the Commission has concluded that separations should be based upon stations employing offset carrier operation. When these rules are adopted as final, the Commission will specify the exact frequency to be utilized by each station for offset carrier operation. In the VHF band, stations will be offset from each other by plus or minus 10 kc and 1 kc. tolerance will be specified. Similar requirements will be applied to UHF stations, but the specific values will be determined at a later date.

III. DIRECTIONAL ANTENNAS [11]

The are two aspects to the questions which have been raised concerning the use of directional antennas. In the first place the Commission's rules, regulations and standards do not prohibit the use of directional antennas as such. If a channel is available in any particular community in the Commission's table, a directional antenna may be authorized upon an appropriate showing. Such authorizations have been granted in the past. It should be pointed out, however, that at the time of such grant, a channel was available in the existing Assignment Table. The second aspect of the problem concerning directional antennas arises when a request is made that another channel be added in a community by means of a directional antenna. This situation differs from the first one because in this instance no channel assignment is possible unless a directional antenna is employed, that is, the use of a directional antenna is compulsory as a matter of channel assignment. This question was considered by the Commission in 1945 when the first Assignment Table was adopted. At that time the use of directional antennas as a basis for making assignments in the table was rejected by the Commission when a proposal to that effect was offered by the Television Broadcasters Association. In its report of November 21, 1945, the Commission stated, among other things:

> • • • An examination of the T. B. A. proposal reveals that there are several disadvantages in attempting to accomplish this objective by the use of directional antennas. In the first place, the Commission desires to avoid as much as possible the resort to directional antennas for television. With the great increase in civil aviation as a result of the war, it is going to be increasingly difficult to find suitable antenna sites that do not constitute a hazard to air navigation. If directional antennas are used, there is much less flexibility in choosing antenna sites, thus increasing the possibility of conflict with air navigation requirements.

[11] A directional antenna is defined as an antenna having 3 db or more difference in effective radiated power in the azimuthal directions of minimum and maximum radiation.

Moreover, directional antennas will have to be located away from cities with the result that problems of shadows and multi-path distortion in rendering service to cities will be much greater than where the antenna is located in the city itself—in most instances antennas can be located in the city itself where no directional antenna is required.

In the second place, the directional antenna patterns proposed by T. B. A. result in many instances in highly artificial service areas with a good part of the station's signal strength being directed out to sea. Moreover, the service area of the stations using directional antennas would be no larger than that of a community station but such stations would be as expensive to construct and operate as metropolitan stations.

The Commission's proposed table of July 11, 1949, made no provision for the use of directional antennas except with respect to two existing stations. It was pointed out, however, that directional transmitting antennas may be useful in certain situations in order that a particular site may be utilized or over-all service improved. It was then concluded that directional transmitting antennas would be permitted in appropriate cases for use on channels contained in the Assignment Table, provided that this did not excuse compliance with the service area requirements or permit reduction of basic service areas. It was also indicated that nulls greater than —10 db (compared to the maximum value of radiation) may not be practicable because of reflections. During the hearings on the general issues, limited testimony was presented generally favoring the use of directional antennas principally for the purpose of improving service rather than reducing station separations. Some testimony was offered in favor of the use of directional antennas with nulls greater than —15 db.

The Commission is not satisfied that in the present state of the art, directional antennas are practicable with nulls greater than —10 db; the policy set forth in the Notice of July 11, 1949, is adhered to. If future available data indicate that the performance of directional transmitting antennas can be properly predicted, particularly in areas where reflections occur, their use of interference protection can be given further consideration.

As indicated, directional antennas may be employed for improving service or for the purpose of using a particular site; they may not be used for the purpose of reducing the minimum station separations set forth in paragraphs II E and G. Where a directional antenna is proposed, the effective radiated power in any direction shall be contained in the range permitted in paragraphs II D (1) and (2), provided that the difference between maximum and minimum radiation shall not exceed 10 db.

IV. STRATOVISION

The Commission's proposed table of July 11, 1949, did not provide channels for stations operating in accordance with the stratovision method of television broadcasting utilizing air-borne transmitters. The Commission afforded interested persons an opportunity of presenting evidence on this point. Only one party presented evidence in support of stratovision. From the evidence offered, it appears that five UHF channels would supply about 81 percent of the area of the United States with one signal. Two of the five channels would be used as guard bands. Consequently, in order to supply all areas of the United States with 4 services about 20 channels would be required. This figure does not include the channels which would have to be added in order to provide proper protection between stratovision stations and ground stations in the light of the separations required to avoid oscillator radiation, image interference, or I. F. beats. The studies presented at the hearing did not include these factors.

The Commission appreciates that stratovision, if feasible, would be a most useful instrument in providing service to the sparsely settled areas of the country. Indeed, many areas of the country can undoubtedly receive service only from wide area coverage stations, such as stratovision would provide. The Commission, however, does not believe that channels should be assigned to stratovision at this time. As can be seen from an examination of Appendix C, it is not possible to assign television channels to many important communities and other communities have an inadequate number of assignments. This situation occurs when relatively close separations are utilized based upon ground-located transmitters. With the much wider separations that air-borne transmitters would require, the problem of providing a fair, efficient, and equitable allocation of television facilities to the various communities would be aggravated. The demands for television service require that all available channels be assigned for proven ground-station operations, particularly when no substantial demand was shown for air-borne transmitters. However, as indicated above, proposed Channels 66 through 83 have not been assigned to particular communities but are flexibility channels, which may be used for various purposes, including further stratovision experimentation. The door remains open for further consideration of this proposal by the Commission if it can be shown that stratovision can operate successfully within the above flexibility channels, without causing interference to ground-based stations operating on Channels 14 through 65.

V. POLYCASTING

Evidence in support of this proposal was presented by one witness who advocated the principle of using a number of low-power transmitters on one or more channels in the UHF band instead of attempting to cover a large area with a centrally located high-power transmitter. He expressed the belief that his proposed system would result in improved service at lower cost and was the only feasible method whereby stations in the UHF band could serve large areas. It was contemplated, for example, that four transmitters could be located in as many directions to give service to a large city with the north and south transmitters operating on one frequency and the east and west transmitters operating on another frequency; by using directional receiving antennas and taking advantage of the wide variations in signal intensity over a small area there would be adequate rejection of the undesired co-channel signal. The use of FM was favored for polycasting to improve the ability to reject the undesired signal.

No evidence was presented concerning previous or existing operations carried on in accordance with the above proposals, and the Commission has no information that such operations have been conducted. It appears that the proposed system has never been field tested and hence an adequate determination as to its feasibility cannot be reached at the present time. To devise an assignment table at this time which would provide for polycasting in many areas would be impractical and unwarranted since such an undertaking would require prior knowledge of the number, location and power of the various stations in a city. Further, it would involve consideration of possible interference such as oscillator radiation, image interference and intermodulation not only between stations in a city but between stations in adjacent areas. Accordingly, the attached proposed table does not contain assignments of channels for stations to operate under the polycasting system on a commercial basis. Further experimentation concerning polycasting can be carried on in the flexibility channels.

VI. NON-COMMERCIAL EDUCATIONAL TELEVISION

The existing television channel Assignment Table adopted by the Commission in 1945 did not contain any reserved channels for the exclusive use of noncommercial educational television stations, and no changes in this respect were proposed by the Commission in its proposed table of July 11, 1949. However, in the Notice of Further Proposed Rule Making issued on the latter date the Commission pointed out that it had "received informal suggestions concerning the possible provision for non-commercial educational broadcast stations in the 470–890 mc. band." Interested parties were afforded the opportunity to file comments in the proceeding concerning these suggestions.

Prior to the hearing on this issue, a number of the parties supporting the reservation of channels for noncommercial educational purposes joined together to form the Joint Committee on Educational Television. This committee offered testimony in support of a request for reservation of channels in both the VHF and UHF portion of the spectrum.

In general, the need for non-commercial educational television stations was based upon the important contributions which noncommercial educational television stations can make in educating the people both in school—at all levels—and also the adult public. The need for such stations was justified upon the high quality type of programming which would be available on such stations—programming of an entirely different character from that available on most commercial stations.

The need for a reservation was based upon the fact that educational institutions of necessity proceed more slowly

in applying for broadcast stations than commercial stations. Hence, if there is no reservation, the available channels are all assigned to commercial interests long before the educational institutions are ready to apply for them.

Some opposition to the reservation was presented at the hearing. In general, none of the witnesses opposed the idea of noncommercial educational stations. On the contrary, there was general agreement that such stations would be desirable. Objection was made to the idea of reservation because as stated by some witnesses, the experience of educational institutions in the use of AM and FM radio does not furnish sufficient assurance that the educational institutions would make use of the television channels. However, there was no objection even by these witnesses to a certain form of reservation provided it was for a reasonably short time.

In the Commission's view, the need for non-commercial educational television stations has been amply demonstrated on this record. The Commission further believes that educational institutions of necessity need a longer period of time to get prepared for television than do the commercial interests. The only way this can be done is by reserving certain channels for the exclusive use of non-commercial educational stations. Obviously, the period of time during which such reservation should exist is very important. The period must be long enough to give educational institutions a reasonable opportunity to do the preparatory work that is necessary to get authorizations for stations. The period must not be so long that frequencies remain unused for excessively long periods of time. The Commission will survey the general situation from time to time in order to insure that these objectives are not lost sight of.

Accordingly, the Commission in its Table of Assignments has indicated the specific assignments which are proposed to be reserved for non-commercial educational stations.[12] Rules concerning eligibility and use of the stations will be substantially the same as those set forth in subpart C of Part III of the Commission's rules and regulations. The reservation of the non-commercial educational stations is not in a single block as in the case of FM since the assignment problems discussed above would sharply curtail the usefulness of a block assignment.

The following method has been employed in making reservations. In all communities having three or more assignments (whether VHF or UHF) one channel has been reserved for a non-commercial educational station. Where a community has fewer than three assignments, no reservation has been made except in those communities which are primarily educational centers, where reservations have been made even where only one or two channels are assigned.[13] As between VHF and UHF, UHF channel has been reserved where there are fewer than three VHF assignments, except for those communities which are primarily educational centers where a VHF channel has been reserved. Where three or more VHF channels are assigned to a community, a VHF channel has been reserved except in those communities where all VHF assignments have been taken up. In those cases, a UHF channel has been reserved.

It is recognized that in many communities the number of educational institutions exceed the reservation which is made. In such instances the various institutions concerned must enter into cooperative arrangements so as to make sure that the facilities are available to all on an equitable basis.

Appendix B—Prediction of Areas of Service and of Interference [1]

I. GRADES OF SERVICE

Television broadcast service is classified into two grades of service which are defined in the tables below:

A. *Required median field strengths in db above 1 uv/m:*

Grade of service	Channels 2–6	Channels 7–13	Channels 14–83
A	68 db	71 db	74 db
B	47 db	56 db	64 db

B. *Permissible co-channel ratios in db of median desired field strengths to 10 percent undesired field strengths:*

Grade of Service	Channels 2–13		Channels 14–83	
	Non-offset	Offset	Non-offset	Offset
A	51 db	34 db	43 db	36 db
B	45 db	28 db	45 db	28 db

C. *Permissible adjacent channel ratios in db of median desired to undesired field strengths:*

Grade of service	Channels 2–83
A	0 db
B	0 db

II. SPECIFICATIONS OF REQUIRED FIELD STRENGTHS

The required field strengths specified in section IA were determined in accordance with the following assumptions and procedure:

A. *Grade A service: Required field strengths, in db above 1 microvolt per meter.* (a) To overcome receiver noise:

	Channels 2-6	Channels 7-13	Channels 14-83
(1) Thermal noise (db)[1]	7	7	7
(2) Receiver noise figure (db)	12	12	17
(3) Peak vis. car./RMS noise (db)	30	30	30
(4) Trans. line loss (db)[2]	1	2	3
(5) Antenna eff. length (db)[3]	−3	6	9
(6) Local field strength (db)	47	57	63
(7) 70 percent terrain factor (db)[4]	4	4	4
(8) 90 percent time fading factor (db)	3	3	3
(9) Median field strength (db)[5]	54	64	74

(b) To overcome local noise and interference under urban conditions:

Median field strength (db)	68	71	74

(c) Required field strengths to overcome (a) or (b) whichever is the greater:

Median field strength (db)[6]	68	71	74

[1] Reference level db above 1 uv across 300 ohms impedance.

[2] Transmission line is assumed to consist of 50 feet of 300 ohm twinlead cable.

[3] The antenna is assumed to consist of a half-wave dipole for channels 2–13 and an antenna with 8 db gain for channels 14–83.

[4] The terrain correction factor for channels 2–13 is taken from the curve R(L) and the factor for channels 14–83 is taken from the curve r(L) of Figure 5 of proposed Appendix V, attached hereto.

[5] The median field strength is equivalent to the field F(50, 50) specified in section V–A herein and will provide grade A service under suburban or rural conditions where receiver noise provides the service limitation.

[6] It is realized that it may not be desirable nor practical in some heavily built-up areas to meet the assumptions of an outside antenna, and that inside antennas will be used. If it is assumed that the inside antenna will have an effective length equal to that of a half-wave dipole and that the transmission line loss is negligible, the instantaneous local field strength required will be 46, 55 and 65 db above one microvolt per meter, respectively, for channel groups 2–6, 7–13, and 14–83. However, the median field strengths required under these conditions cannot be stated with assurance, because the average terrain distributions which have been calculated from available measurement supply only exterior conditions in suburban and rural areas. If the range of signal variation in building interiors is comparable to the exterior range, the median signal levels specified to overcome local noise and interference in (b) will be adequate. Until reliable data are available to indicate otherwise, the specified median field strengths are considered adequate for urban service, other than in the principal city.

B. *Grade B service: Rural field strengths, in db above 1 microvolt per meter, required to overcome receiver noise:*

	Channels 2-6	Channels 7-13	Channels 14-83
(1) Thermal noise (db)	7	7	7
(2) Receiver noise figure (db)	12	12	17
(3) Peak vis. car./RMS noise (db)	30	30	30
(4) Trans. line loss (db)	1	2	3
(5) Antenna effective length (db)[1]	−2	0	3
(6) Local field intensity (db)	41	51	57
(7) 50 percent terrain factor (db)	0	0	0
(8) 90 percent time fading factor (db)[2]	6	5	5
(9) Median field intensity (db)	47	56	62

[1] Antennas with a 6 db gain compared to a dipole are assumed for channels 2–13, and an antenna gain of 15 db for channels 14–83.

[2] The time fading factors decrease with increasing frequency because the grade B service radii decrease.

[1] There are attached hereto six figures which constitute proposed amendments to the Standards of Good Engineering Practice Concerning TV Broadcast Stations. Proposed Appendix IV thereto is a family of curves entitled, "Minimum Effective Radiated Power versus Antenna Height above Average Terrain." Proposed Appendix V consists of five figures relating to radio propagation effects, specific references to which are made herein.

[12] Forty-six communities were considered to be primarily educational centers in accordance with the testimony presented by the Joint Committee on Educational Television. However, this enumeration is not binding and consideration will be given to any proposal filed pursuant to paragraphs 12 and 13 of the notice providing for additions to or deletions from the enumeration.

[13] The procedure set forth in paragraphs 12 and 13 of the notice is applicable to any specific assignment proposed to be reserved or to any request that a channel not proposed for reservation should be reserved.

III. SPECIFICATION OF PERMISSIBLE CO-CHANNEL INTERFERENCE RATIOS

The permissible interference ratios specified in section IB were determined in accordance with the following assumptions and procedure:

A. *Grade A service:*

	Channels 2-13		Channels 14-83	
	Non-offset	Offset	Non-offset	Offset
(1) Local desired/undesired ratio (db)	45	28	45	28
(2) 70 percent terrain factor (db)[1]	6	6	8	8
(3) 50 percent location d/u ratio (db)	51	34	53	36

B. *Grade B service:*

50 percent location d/u ratio (db)	45	28	45	28

[1] The terrain factor for channels 2-13 was taken from the curve r(L) and for channels 14-83 from the curve x(L) of Figure 5 of proposed Appendix V for 70 percent of the receiver locations.

IV. SPECIFICATION OF PERMISSIBLE ADJACENT CHANNEL RATIOS

The permissible adjacent channel ratios specified in Section IC were determined in accordance with the following assumptions and procedure:

A. *Grades A and B service:*

	Channels 2–83
Local desired/undesired ratio (db)	−6
90 percent time fading factor (db)	6
Time median desired/undesired ratio (db) [1]	0

[1] The median field strength ratio of 0 db is based upon an assumed receiver terminal ratio of −6 db. With an acceptable terminal ratio of −6 db, at least one service or the other is available at any particular receiving location at any particular time, provided that the field strengths are otherwise satisfactory for service. By specifying a permissible time median field strength ratio of 0 db, a particular receiving location is expected to have service available for at least 90 percent of the time from one station despite fading. Although this does not assure 70 percent of locations to each station at the grade A contour, owing to the terrain distribution the areas of actual service will overlap. Each station will on the average recover from the other station as many locations beyond the indicated 0 db contour as it loses to the other station within the 0 db contour.

V. PROPAGATION OF TELEVISION SIGNALS

For the purpose of predicting the propagation of television signals for the estimation of service and interference areas under the rules proposed in Part III of these proceedings, the following procedures have been observed:

A. *Prediction of service field strengths.* The minimum field strengths of the service field which will be available at any percentage of receiving locations for any percentage of the time may be described by the following relation:

$$F'(L,T)=P'+F(50,50)+R(L)+R(T) \quad (1),$$

where $F'(L,T)$ is the minimum field strength to be expected at the poorest location of the best L percent of locations for T percent of the time, expressed in decibels above 1 microvolt per meter, P' is the effective radiated power in db above 1 kilowatt, $F(50,50)$ is the minimum field strength in decibels above 1 microvolt per meter expected at 50 percent of the locations and 50 percent of the time for a radiated power of one kilowatt, $R(L)$ is the terrain distribution factor for L percent of locations, and $R(T)$ is the time distribution factor.

The effective radiated power, P', is expressed in decibels above 1 kilowatt radiated from a half-wave dipole and may be calculated by means of the following formula:

$$P'=10 \log_{10} P-P''+G \quad (2)$$

In the above, P denotes the actual transmitter power delivered to the transmission line expressed in kilowatts, P'' denotes the transmission line and antenna power loss expressed in decibels, and G denotes the gain of the transmitting antenna array in the direction of the receiving location expressed in decibels relative to that of a half-wave dipole.

Appropriate values of $F(50,50)$ are shown in figures 1 and 2 of proposed Appendix V, and appropriate values of $F(50,10)$ are shown in figures 3 and 4 thereof. Figures 1 and 3 are to be used for channels 2 through 6. Figures 2 and 4 are to be used for channels 7 through 83. The charts show the field strengths in db above one microvolt per meter for 1 kilowatt of effective radiated power to be expected at 50 percent of the receiving locations for 10 percent and 50 percent of the time, for antenna heights from 100 feet to 10,000 feet. The field strengths are based on an effective power of 1 kilowatt radiated from a half-wave dipole in free space, which produces an unattenuated field strength at 1 mile of about 103 db above 1 microvolt per meter (137.6 millivolts per meter). The antenna height to be used with these charts in any particular case is the equivalent height of the center of the radiating element above the average height of the profile between 2 and 10 miles from the transmitter along the desired radial.

The time distribution factor $R(T)$ for fields exceeded for 10 percent of the time, $R(T=10)$, is found by subtracting the value exceeded for 50 percent of the time $F(50,50)$ from the value exceeded for 10 percent of the time $F(50,10)$.

$$R(T=10)=F(50,10)-F(50,50) \quad (3)$$

No charts are included to show the service fields for 90 percent of the time, but these fields lie below the 50 percent curve by the same amounts that the 10 percent curves lie above the 50 percent fields. Thus, the time distribution factor $R(T=90)$ is numerically equal but opposite in sign to $R(T=10)$, and

$$F(50,90)=F(50,50)+R(T=90)$$
$$=F(50,50-[F(50,10)-F(50,50)] \quad (4)$$

In order to determine the field strengths to be expected for other percentages of time, T, use may be made of the relation: $R(T)=R(T=10)k(T)$. The value of $k(T)$ for any percentage of time T is given in figure 5 of proposed Appendix V. In order to determine the field strengths which will be exceeded at some percentage of the receiving locations other than 50 percent, use is also made of figure 5. For channels 2 through 13, the curve labelled $R(L)$ is to be used; for channels 14 through 83, the curve labelled $r(L)$ is to be used. The departure from the 50 percent value in db, shown on the left scale, corresponding to the desired percentage of locations on the bottom scale, is to be added to the field intensity in db above 1 microvolt per meter existing at 50 percent of locations.

For channels 2–13,

$$F(L,50)=F(50,50)+R(L) \quad (5)$$

For channels 14–83,

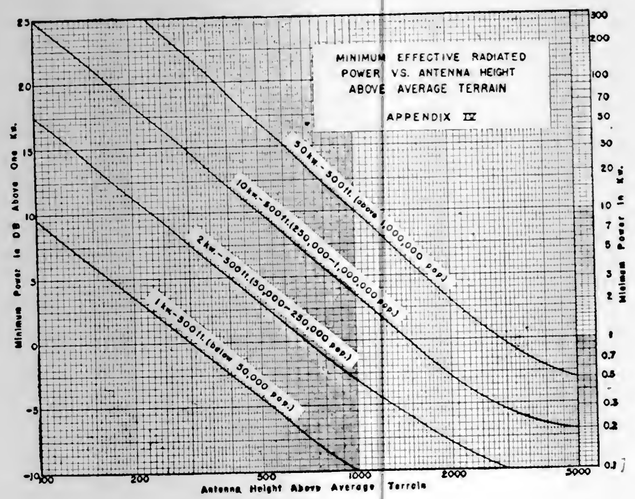
$$F(L,50)=F(50,50)+r(L) \quad (6)$$

Thus as shown in figure 5, the terrain factor for 70 percent of locations corresponds to −4 db for channels 2–13 and −6 db for channels 14–83, as used in section II above.

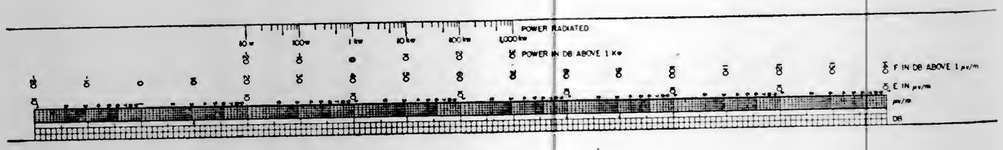
B. *Prediction of interference from one undesired station.* The percentage of receiving locations, L, at any given distance from a desired station and one undesired station at which an acceptable ratio, A, of desired-to-undesired signals is exceeded for at least 90 percent of the time may be determined from the following equation:

$$r(L)=A+P_u'-P_d'+F_u(50,50)-F_d(50,50)$$
$$+\sqrt{R_d^2(T=90)+R_u^2(T=90)} \quad (7)$$

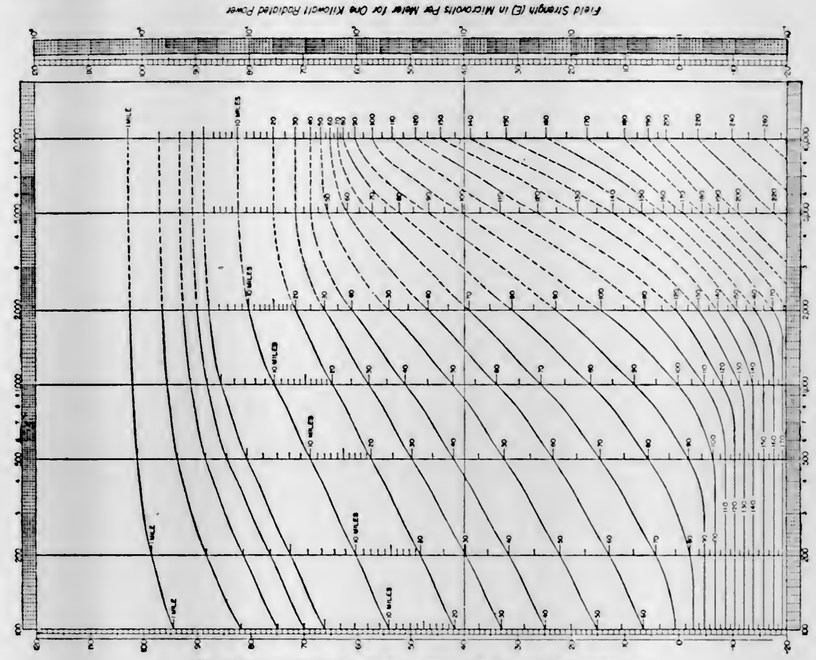
The subscript d denotes values applicable to the desired signal and the subscript u denotes values applicable to the undesired signal. As explained above, the effective radiated powers of the desired and undesired stations Pd' and P_u' are expressed in db above one kilowatt radiated from a half-wave dipole. $F_u(50,50)$ and $F_d(50,50)$ are taken from the appropriate curves of figures 1 or 2 of proposed Appendix V. $R_d(T=90)$ and $R_u(T=90)$ are the time distribution factors for 90 percent of the time for the desired and the undesired field strengths, respectively. These may be determined by subtracting the (50,10) field strength from the (50,50) field strength indicated for the proper distances on the appropriate curves of figures 1 through 4 of proposed Appendix V.



For channels 2 through 13, the percentage of locations at which the ratio A is exceeded may be read from the probability distribution, $r(L)$, as a function of L in figure 5 of proposed Appendix V. For channels 14–83, the function $x(L)$ is to be used.



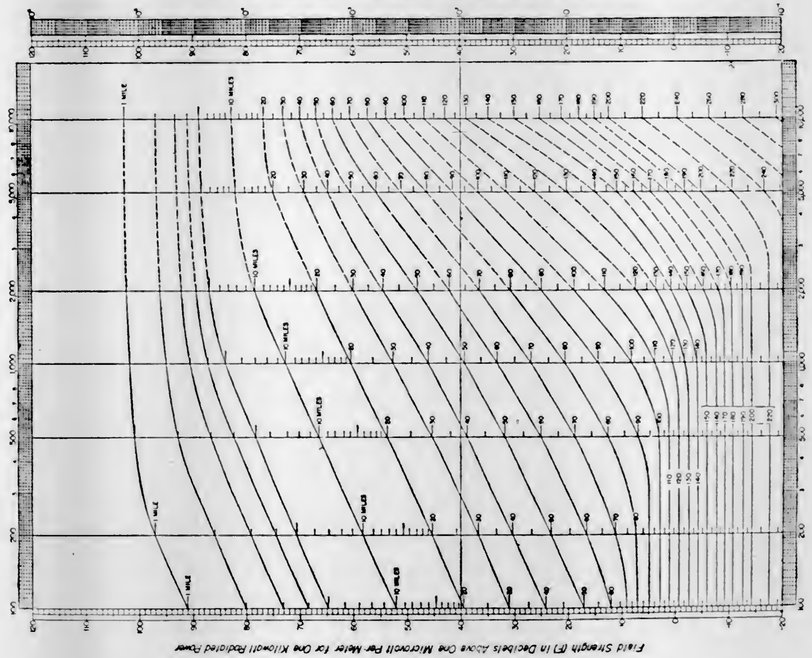
If the distance at which an acceptable ratio A is to be obtained at a given percentage of locations and for a given percentage of time T is to be determined rapidly, the solution using the above exact expression may be too laborious. A useful approximation is based on the fact that $R_d^2(T=10)+R_u^2(T=10)$ approaches $R_u(T=10)$ when $R_d(T=10)$ is much larger than $R_d(T=10)$. The approximation gives values which are low by less than 3 db when $R_u(T=10)=2.5\ R_d(T=10)$. This will always be the case in co-channel interference computations, and sometimes for adjacent channels, when considering service of the order of 90



percent of the time or 70 percent of the locations. This is tantamount to assuming for the purposes of rapid calculation that the desired signal is steady and equal to its median value, and that the undesired signal alone is variable.

This makes possible simple graphical methods of computing iso-service contours completely around the desired station. For example, at a point where $F_d(50,50)$ is A decibels greater than $F_u(50,10)$, the ratio A will be exceeded at 50 percent of locations for at least 90 percent of time. Thus, the charts for the desired signal $F(50,50)$ and the tropospheric charts $F(50,10)$ of figures 1–4 can be used to determine directly the service contours for 90 percent of the time, and 50 percent of the locations.

This approximate method can also be applied to the case where it is desired to locate the contour at which an acceptable ratio is exceeded for a percentage of the locations other than 50 percent, by subtracting from the ratio A in db the value of $r(L)$ or $x(L)$ from figure 5 corresponding to the percentage of locations for which it is desired to determine the service contour. For example, if it is desired to determine the contour at which the ratio A=28 db (25:1) will be exceeded at 70 percent of the locations for at least 90 percent of the time for channels 2–13, the value (−6) db should be subtracted from the 28 db ratio, giving an adjusted ratio of 34 db. The desired contour is found to exist at the locus of points for which $F_d(50,50)$ exceeds $F_u(50,10)$ by the adjusted ratio of 34 db, as taken from the appropriate figures of proposed Appendix V. For channels 14–83 the proper value of $x(L)$ should be used, in conjunction with figures 2 and 4 of proposed Appendix V. This procedure may be used with the definitions of service set forth in section IB, for which the ratios, adjusted for the required percentages of locations, are tabulated.



APPENDIX V

STATEMENT OF ORGANIZATION AND FUNCTIONS

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE AND OFFICE OF THE DIRECTOR OF CIVILIAN MARKSMANSHIP

The statement of organization and functions which appeared at 15 F. R. 535, February 1, 1950, is amended by changing subparagraphs (2) and (4) (xii) of paragraph (a), section 2, to read as follows:

SEC. 2. *Organization and functions of agencies dealing with the public*—(a) *The National Board for the Promotion of Rifle Practice and Office of the Director of Civilian Marksmanship.* * * *

(2) *Location.* The Offices of Executive Officer, National Board for the Promotion of Rifle Practice and Director of Civilian Marksmanship, are located in Rooms 727-738, Old Post Office Building, 12th and Pennsylvania Ave., N. W., Washington, D. C.

The mailing address of each is as follows:

National Board for the Promotion of Rifle Practice
Department of the Army
Washington 25, D. C.

Director of Civilian Marksmanship
Department of the Army
Washington 25, D. C.

* * * * *

(4) *Functions of Director of Civilian Marksmanship.* * * *

(xii) It has been the practice since 1925 to appoint the same officer both as Executive Office of the National Board and the Director of Civilian Marksmanship. Colonel James F. Strain, Infantry, is presently assigned to those duties.

[SEAL] EDWARD F. WITSELL,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 51-4159; Filed, Apr. 6, 1951; 8:49 a. m.]

STATEMENT OF ORGANIZATION AND FUNCTIONS

OFFICE OF THE SURGEON GENERAL

The statement of organization and functions which appeared at 15 F. R. 535, February 1, 1950, is amended by changing paragraph (g), section 2, covering the Office of the Surgeon General, to read as follows:

SEC. 2. *Organization and functions of agencies dealing with the public.* * * *

(g) *Office of the Surgeon General*—(1) *Mission.* Under the direction and control of Assistant Chief of Staff, G-4, to formulate medical and sanitary plans, policies, and procedures and provide and conduct programs to insure health of the Army.

(2) *Origin and development.* The first medical establishment in the United States Army was created by a resolution of Congress dated July 27, 1775. The Medical Department and the Office of The Surgeon General have had a continuous existence since 1818. Previous to that time Congress provided a medical organization for the Army only in time of war or emergency. The Medical Department was authorized and its organization initially prescribed by the act of July 28, 1866 (14 Stat. 334).

(i) *Military rank.* Medical officers received definite military rank in 1847. Shortly before the Mexican War The Surgeon General introduced a system of reporting cases and began a series of annual statistical reports. The Civil War produced field hospitals, a better managed medical supply, and a better method of evacuating casualties from the battlefield. The Spanish-American War was an object lesson in the importance of preventive medicine and in the utility of dentist and female nurses.

(ii) *World War I.* The unprecedented size of the Army, the remoteness of the battlefronts, injuries from gas warfare, and the necessity for exploiting new medical specialties combined to create new problems in World War I. To meet these problems, the Medical Department conducted mass training for officers and enlisted men, utilized motor transport in evacuating patients, appointed top-ranking experts in the various specialties as consultants, made extensive use of mental testing, and set aside certain hospitals for the treatment of particular diseases and injuries.

(iii) *World War II.* In World War II, many important changes in the organization and methods of the Medical Department were necessary to utilize the newer developments in medicine and to serve an army fighting a global war in every kind of natural environment. With a total strength of more than 600,000 (as compared to 340,000 in World War I), the Medical Department added to and broadened its services. Typical of this expansion were the vastly enlarged program of preventive medicine, the greater use of psychiatry to prevent as well as to cure mental disorders, and the new emphasis on reconditioning physical and mental casualties for military duty. For the first time, sulfa drugs, penicillin, and an extensive whole-blood and plasma treatment were employed in war medicine and surgery.

(iv) *Consultants.* Since VJ-day, two of the most important features of Medical Department policy have been the continuation of the use of distinguished civilian consultants on a part-time basis as advisers in professional care and medical instruction and the establishment of a program of postgraduate professional education in Army General hospitals and civilian institutions.

(3) *Legal basis.* (i) The authority for assignment of general powers and duties to The Surgeon General by this paragraph is section 206, Public Law 581, 81st Congress (Army Organization Act of 1950).

(ii) Section 307, Public Law 581, 81st Congress, changed the name of the Medical Department to the Army Medical Service, and prescribes its composition.

(4) *Dual responsibility.* The Surgeon General is the Chief of the Army Medical Service and the senior medical technical staff adviser of the Department of the Army. The Army Medical Service is comprised of the Medical Corps, the Dental Corps, the Veterinary Corps, the Army Nurse Corps, the Medical Service Corps, and the Women's Medical Specialist Corps.

(5) *Major functions*—(i) *Policy.* Formulates and recommends policies concerning physical, mental health, and psychological standards, including those for selection and induction of military personnel, and formulates policies for the health of the Army, care of the sick and wounded, evacuation, hospitalization, and reconditioning of military personnel, the veterinary service as it pertains to military animals, and the inspection of food of animal origin.

(ii) *Manpower.* Develops plans for the conservation of manpower through the prevention of disease and injury, including the pursuance of research and development in the field of prevention, diagnosis, treatment and rehabilitation of diseases, wounds, and injuries.

(iii) *Medical supplies.* Formulates policies, plans, and programs for research, development, design, and standardization of all items of medical equipment and supplies required by the Army; determines procurement policies and procedures; plans future requirements; and supervises storage, distribution, and maintenance of medical supplies and equipment in accordance with Department of the Army policies.

(iv) *Staff supervision.* Exercises technical staff supervision and performs such technical inspections as the Chief of Staff may prescribe to assure maximum efficiency and economy in utilization of the medical means available.

(v) *Command responsibility.* Commands and controls troop activities, including the training of Army Medical Service troops and the assignment of personnel and services in class II Army Medical Service installations and activities.

(vi) *Patients.* Controls the distribution of patients in class II Army Medical Service installations.

(vii) *Hospital funds.* Functions as custodian of the Central Hospital Funds, United States Army, and maintains technical supervision over the utilization of all hospital funds.

(viii) *Records and reports.* Administers an Army-wide system of individual medical records and medical statistical reporting.

(6) *Organization*—(i) *Medical Research and Development Board.* Plans, coordinates, administers, and supervises the Army Medical Service program of research and development and directs and supervises Army Medical Service research and development, both in governmental and civilian laboratories.

(ii) *Special Projects Office.* (a) Formulates applicable policies, plans, procedures, and coordinates the work of the various divisions concerned with medical problems associated with preventive and therapeutic measures in defense against atomic bombs, radiological defense and biological warfare, and special projects as they may arise.

(b) Maintains liaison with the Atomic Energy Commission, Armed Forces Special Weapons Project, and other Department of Defense agencies.

(iii) *Fiscal Office.* (a) Formulates and effectuates criteria for Army Medical Service budget preparation and performance.

(b) Prescribes and administers technical standards, fiscal methods, procedures, and operations to implement principles, concepts and plans relating to monetary, cost accounting, and property audit matters of the Army Medical Service.

(iv) *Administrative Office.* Supervises supply, equipment, and general office needs; supplies or procures drafting, duplicating, and printing services; reviews and processes publications; receives and distributes communications; and supervises record administration and the retirement of record in the office of The Surgeon General and at class II Army Medical Service installations and activities.

(v) *Technical Information Office.* Represents The Surgeon General in all matters of public information in accordance with Department of Army directives.

(vi) *Legal Office.* Serves as general counsel for The Surgeon General and the divisions of the Office of The Surgeon General.

(vii) *Management Improvement Office.* (a) Coordinates, reviews, and provides over-all planning of the management improvement program of The Surgeon General.

(b) Furnishes necessary coordination and guidance to the divisions of the Office of The Surgeon General on matters pertaining to management improvement.

(viii) *Personnel Division.* (a) Plans, initiates, develops, or implements action to secure procurement, classification, allotment, assignment, utilization, promotion, demotion, and separation of commissioned personnel of the Army Medical Service, including regular and Reserve components.

(b) Furnishes staff advice, makes recommendations, and initiates action for the establishment of policies on matters pertaining to classification and employment of warrant officers and enlisted personnel on duty with the Army Medical Service in all commands, including regular and Reserve components.

(c) Initiates action for the classification, assignment, replacement, and disposition of enlisted personnel and warrant officers on duty at class II Army Medical Service installations and table of organization units under the control of The Surgeon General, and determines policies to govern personnel of the Women's Army Corps on duty within the above-mentioned installations.

(d) Determines personnel requirements for the Office of The Surgeon General and for class II installations and activities, recommends authorizations for organizational elements and installations, and assures compliance with personnel authorization limitations.

(e) Formulates plans and policies for the execution of the Career Guidance Program.

(f) Plans and administers the civilian personnel program prescribed by the

Army, including recruitment and placement, classification and wage administration, personnel transactions, training, and personnel relations, and supervises the program in class II Army Medical Service installations and activities.

(ix) *Physical Standards Division.* (*a*) Formulates standards to be established by Army Regulations for admission into and continuance in the service of all Army personnel, including physical standards for cadets at the United States Military Academy.

(*b*) Reviews physical examinations, disposition boards' records forwarded to the Office of The Surgeon General, retiring boards' records, and other records and papers.

(*c*) Gives policy guidance and inspects the medical operations of enlisting installations, joint examining and induction stations, and separation points.

(x) *Education and Training Division.* (*a*) Provides programs and facilities to fulfill the Army Medical Service training missions, based upon current requirements for trained enlisted technicians and officer personnel during peace and in the event of mobilization.

(*b*) Plans and promulgates principles, doctrines, and programs for Army Medical Service training activities for regular and Reserve components.

(*c*) Insures preparation of training literature and audiovisual aids for which the Army Medical Service is responsible.

(*d*) Supervises the application and evaluates the progress of Army Medical Service training in civilian institutions and military installations under the command of The Surgeon General.

(*e*) Coordinates Army Medical Service training matter with military and civil agencies.

(*f*) Directs the Medical Affiliation Program.

(xi) *Resources Analysis Division.* (*a*) Assures that prospective programs and objectives of The Surgeon General are planned in the light of available resources in personnel and facilities and develops planning for the efficient use of resources so that optimum accomplishments of the mission of The Surgeon General will result.

(*b*) Estimates bed requirements and availabilities of major commands, develops plans for distribution of bed capacities in all hospitals in the continental United States, and recommends authorized patient capacities at individual installations.

(*c*) Estimates Army Medical Service personnel requirements and availabilities of major commands, develops plans for distribution of Army Medical Service personnel to major commands, and reviews requisitions for Army Medical Service personnel in light of planned distribution.

(*d*) Prepares basic estimates for and participates in planning pertaining to utilization of Army Medical Service resources in personnel and facilities.

(xii) *Preventive Medicine Division.* (*a*) Initiates and conducts epidemiological studies, analyzes and evaluates disease incidence data, investigates health hazards and sanitary defects in the Army, and initiates measures for their control or elimination.

(*b*) Furnishes information, material, and advice for the training and indoctrination of military personnel in disease prevention and environmental sanitation.

(*c*) Initiates and guides research in military preventive medicine in collaboration with the Medical Research and Development Board.

(*d*) Provides medical intelligence for the Army.

(*e*) Advises on nutritional problems as they effect the health of military personnel and civil populations under Army control.

(*f*) Advises on policies and plans for public health procedures, practices, and personnel in occupied territories.

(*g*) Plans and supervises the Army industrial medical program for all plants operated by the Army to assure elimination of industrial health hazards, improvement of working conditions in these plants, and development of improved industrial medical procedures, methods, and devices through the Army Industrial Hygiene Laboratory.

(xiii) *Medical Statistics Division.* (*a*) Devises and maintains a comprehensive program for the collection, compilation, and analysis of medical statistical data pertaining to the health of the Army and the operation of the Army Medical Service and to the physical examinations of registrants examined for induction into any of the Armed Forces.

(*b*) Prepares reports and analyses of Army health conditions and related matters and physical examination findings needed by the Army Medical Service and other officials and groups concerned with medical investigations and development.

(*c*) Advises The Surgeon General and the various elements of the Office of The Surgeon General on statistical matters.

(xiv) *Supply Division.* (*a*) Determines the medical supplies and equipment required for the planned troop strength and the medical programs of the Army, including prevention of disease among civilian population in theaters of operation, and for foreign military and civilian assistance programs.

(*b*) Supervises the procurement, storage, distribution, reconditioning, and disposition of medical supplies and equipment.

(*c*) In conjunction with the Surgeons General of the Navy and the Air Force, supervises the operations and the activities of the Armed Services Medical Procurement Agency, which are placed under the cognizance of the Army by the charter for the Armed Services Medical Procurement Agency.

(xv) *Medical Plans and Operations Division.* Performs primary staff and operating responsibility for the domestic and oversea medical service, for mobilization and related planning, and for other planning projects which do not fall within other divisions of The Surgeon General's Office. This includes:

(*a*) Custodianship of the Central Hospital Fund and supervision of subordinate funds.

(*b*) Operation and maintenance of assigned class II Army Medical Service installations and activities.

(*c*) Evacuation and hospitalization services.

(*d*) Medical facilities planning.

(*e*) Hospital management engineering.

(*f*) Development and preparation of organization and equipment authorization tables.

(xvi) *Medical Service Corps Division.* (*a*) Advises The Surgeon General on Medical Service Corps administrative matters; reviews reports; and analyzes special problems.

(*b*) Formulates Medical Service Corps policy and makes recommendations on table of organization requirements and distribution of Medical Service Corps officers.

(*c*) Advises on career management of Medical Service Corps officers.

(xvii) *Dental Division.* (*a*) Prepares plans and policies for and supervises the administration of the Dental Corps and its service, including plans with respect to personnel, equipment, supplies, and the professional procedures involved in dental treatment.

(*b*) Makes recommendations on matters relating to the dental health of the Army.

(xviii) *Women's Medical Specialist Corps Division.* (*a*) Formulates Women's Medical Specialist Corps policies and makes recommendations on table of organization requirements, distribution, procurement, promotion, separation, and training of Women's Medical Specialist Corps officers.

(*b*) Advises on Career Management Program for officers in the Women's Medical Specialist Corps.

(xix) *Veterinary Division.* (*a*) Exercises technical and administrative supervision of the Veterinary Corps and its service, including all professional activities.

(*b*) Maintains liaison with the civilian veterinary professions and veterinary activities of other Federal agencies.

(xx) *Professional Consultants Divisions.* Individual divisions comprised of specialists in medicine, surgery, physical medicine, neuropsychiatry, radiology, and medical laboratory service, respectively, are charged with adapting to the needs of the Army the best professional practice with respect to treatment in their fields. The divisions develop the policy and practice of the Army Medical Service in their specialties; prepare pertinent advice, instructions, and bulletins; make inspections; review reports and special problems; maintain liaison with civilian agencies; and advise on the recruitment, training, and assignment of properly qualified professional personnel.

(xxi) *Nursing Division.* Provides nursing service for military personnel; maintains general supervision of nursing activities; formulates and recommends professional standards; and recommends policies and programs on procurement, promotion, and separation of nurses, as well as on Army nursing in general.

(xxii) *Medical Department installations.* The following named Class II medical installations are under the direct command and supervision of the Surgeon General.

(*a*) Army Medical Center, Washington 12, D. C., which includes the following activities:

(*1*) Walter Reed General Hospital.

(2) Army Medical Department Research and Graduate School.

(3) Central Dental Laboratory.

(*4*) Army Prosthetics Research Laboratory.

(5) Atlas Project.

(6) Ocular Injury Research Project.

(*b*) Army and Navy General Hospital, Hot Springs, Arkansas.

(*c*) Fitzsimons General Hospital, Denver, Colorado, which includes the following units:

(*1*) Minimal Tuberculosis Research Unit.

(2) TB Nutrition and Metabolic Unit.

(*d*) Murphy General Hospital, Waltham, Massachusetts.

(*e*) Oliver General Hospital, Augusta, Georgia.

(*f*) Percy Jones General Hospital, Battle Creek, Michigan.

(*g*) Valley Forge General Hospital, Phoenixville, Pennsylvania.

(*h*) Army Medical Library, 7th & Independence Avenue, SW., Washington 25, D. C.

(*i*) Army Medical Library, Cleveland Branch, 11000 Euclid Ave., Cleveland, Ohio.

(*j*) Louisville Medical Depot, Louisville 1, Kentucky.

(*k*) St. Louis Medical Depot, 12th and Spruce Streets, St. Louis 2, Missouri.

(*l*) San Francisco Medical Depot, Building 590, Oakland Army Base, Oakland 14, California.

(xxiii) *Medical Department activities.* The following listed Class II medical activities are under direct command and administrative supervision of the Surgeon General but are Physically located at Class I or Class II installations under other commands:

(*a*) Armed Forces Institute of Pathology, 7th and Independence Ave., SW., Washington 25, D. C., including the following:

(*1*) Department of Pathology.

(2) Medical Illustration Service.

(3) American Registry of Pathology.

(*4*) Medical Museum.

(*b*) Army Industrial Hygiene Laboratory, Edgewood Arsenal, Maryland.

(*c*) Brooke Army Medical Center, Fort Sam Houston, Texas, which includes the following:

(*1*) Brooke General Hospital.

(2) Medical Field Service School.

(3) Fourth Army Area Laboratory.

(*4*) Central Dental Laboratory.

(5) Surgical Research Unit.

(*d*) Letterman General Hospital, San Francisco, California.

(*e*) Madigan General Hospital, Fort Lewis, Washington.

(*f*) Medical Detachment, U. S. Naval Hospital, Long Beach, California.

(*g*) Medical Detachment, U. S. Naval Hospital, Portsmouth, Virginia.

(*h*) Medical Detachment, U. S. Naval Hospital, St. Albans, Long Island, New York.

(*i*) Medical Detachment, U. S. Naval Hospital, Great Lakes, Illinois.

(*j*) Medical Department Field Research Laboratory, Fort Knox, Kentucky.

(*k*) Medical Nutrition Laboratory, 1849 W. Pershing Road, Chicago, Illinois.

(*l*) Traveling Veterinary Inspector, c/o Chicago Quartermaster Depot, 1819 Pershing Road, Chicago, Illinois.

(*m*) William Beaumont General Hospital, Fort Bliss, Texas.

(xxiv) *Armed Services Medical Procurement Agency.* The Armed Services Medical Procurement Agency, 84 Sands Street, Brooklyn 1, New York, is under the joint supervision of the Surgeons General of the Army, Navy, and Air Force. It is the joint procurement agency for procurement of medical supplies for the Army, Navy, and Air Force. Contracts are ordinarily entered into after receipt of bids from interested parties. An invitation to bid is extended to those on the Bidders List, who are in a position to supply the required items. Persons desiring to have their names placed on the Bidders List, or desiring further information, should direct their correspondence to the above agency.

(xxv) *Medical sections, general depots.* The following general depots have medical sections which are Class II activities under the technical supervision of, and have military personnel authorized by the Surgeon General:

(*a*) Atlanta General Depot, Atlanta, Georgia.

(*b*) Schenectady General Depot, Schenectady, New York.

[SEAL] EDWARD F. WITSELL,
Major General, U. S. Army,
The Adjutant General.

DEPARTMENT OF LABOR

Wage and Hour and Public Contracts Divisions

EMPLOYMENT OF HANDICAPPED CLIENTS BY SHELTERED WORKSHOPS

NOTICE OF ISSUANCE OF SPECIAL CERTIFICATES

Notice is hereby given that special certificates authorizing the employment of handicapped clients at hourly wage rates lower than the minimum wage rates applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, and section 1 (b) of the Walsh-Healey Public Contracts Act, as amended, have been issued to the sheltered workshops hereinafter mentioned, under section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U. S. C. 214; as amended 63 Stat. 910) and Part 525 of the regulations issued thereunder, as amended (29 CFR Part 525), and under sections 4 and 6 of the Walsh-Healey Public Contracts Act (secs. 4, 6, 49 Stat. 2038; 41 U. S. C. 38, 40) and Article 1102 of the regulations issued pursuant thereto (41 CFR, 201.1102).

The names and addresses of the sheltered workshops to which certificates were issued, wage rates, and the effective and expiration dates of the certificates are as follows:

Blind Work Association, Inc., 18 Court Street, Binghamton, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 70 cents per hour, whichever is higher, and a rate of not less than 40 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective April 1, 1951, and expires February 29, 1952.

Syracuse Association of Workers for the Blind, Inc., 425 James Street, Syracuse 3, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 30 cents per hour, whichever is higher, and a rate of not less than 15 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective April 1, 1951, and expires February 29, 1952.

Alabama Goodwill Industries, Inc., 1715 Avenue F. Ensley, Birmingham, Alabama; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 30 cents per hour, whichever is higher; certificate is effective September 1, 1950, and expires August 31, 1951.

Mobile Association for the Blind, 500 St. Michael Street, Mobile, Alabama; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than

30 cents per hour, whichever is higher; certificate is effective January 1, 1951 and expires December 31, 1951.

Volunteers of America, 1432 First Street, Detroit 26, Michigan; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 20 cents per hour, whichever is higher, and a rate of not less than 15 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective March 23, 1951 and expires February 29, 1952.

Center for Sightless, Inc., 330 Third Street, Elyria, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 10 cents per hour, whichever is higher, and a rate of not less than 5 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective April 1, 1951 and expires March 31, 1952.

Volunteers of America, 290 North Main St., Mansfield, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 40 cents per hour, whichever is higher, and a rate of not less than 20 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective March 27, 1951 and expires February 29, 1952.

Volunteers of America, 10–16 South St. Clair St., Toledo 4, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 40 cents per hour, whichever is higher, and a rate of not less than 25 cents for each new client during his initial 4-week evaluation period in the workshop; certificate is effective March 14, 1951 and expires February 29, 1952.

The Volunteers of America, Peoria Post, 823 South Jefferson Avenue, Peoria 6, Illinois; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 15 cents per hour, whichever is higher; certificate is effective March 15, 1951, and expires February 29, 1952.

Goodwill Industries of Duluth, 1732 West Superior Street, Duluth 2, Minnesota; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 50 cents per hour, whichever is higher; certificate is effective April 1, 1951, and expires March 31, 1952.

St. Cloud Goodwill Industries, 21 Fifth Avenue South, St. Cloud, Minnesota; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 40 cents per hour, whichever is higher; certificate is effective April 1, 1951, and expires March 31, 1952.

The Lighthouse for the Blind of New Orleans, 630 Camp Street, New Orleans, Louisiana; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 50 cents per hour, whichever is higher; certificate is effective April 1, 1951, and expires March 31, 1952.

Dallas County Association for the Blind, 4306 Capitol Avenue, Dallas, Texas; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 40 cents per hour, whichever is higher; certificate is effective March 19, 1951 and expires February 28, 1952.

Harris County Association for the Blind, 1658 Westheimer Road, Houston, Texas; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than 20 cents per hour, whichever is higher; certificate is effective April 1, 1951, and expires July 31, 1951.

The employment of handicapped clients in the above-mentioned sheltered workshops under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 525 of the regulations, as amended. These certificates have been issued on the applicants' representations that they are sheltered workshop as defined in the regulations and that special services are provided their handicapped clients. A sheltered workshop is defined as, "A charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, and to provide such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature."

These certificates may be cancelled in the manner provided by the regulations, as amended. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 29th day of March 1951.

RAYMOND G. GARCEAU,
Assistant Administrator.

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, King's I. C. C. Order 45]

NEW YORK CENTRAL RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Homer C. King, Agent, the New York Central Railroad Company, because of washout, is unable to transport traffic routed over and to points on its line between Oneonta, New York, and Kingston, New York: *It is ordered*, That:

(a) Rerouting traffic: The New York Central Railroad Company is hereby authorized and directed to reroute or divert traffic on its line, routed over its line between Oneonta and Kingston, New York, over any available route to expedite the movement; the billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad named, desiring to divert or reroute traffic over the line or lines of another carrier under this order, shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: The carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the division of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., April 2, 1951.

(g) Expiration date: This order shall expire at 11:59 p. m., April 30, 1951, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., April 2, 1951.

INTERSTATE COMMERCE COMMISSION,
HOMER C. KING,
Agent.

[4th Sec. Application 25973]

PAPER BOXES FROM DAIRYPAK, GA., TO ST. LOUIS, MO., AND ILLINOIS POINTS

APPLICATION FOR RELIEF

APRIL 4, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: D. Q. Marsh, Agent, for Missouri Pacific Railroad Company and other carriers, including carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1069, pursuant to fourth-section order No. 16101.

Commodities involved: Boxes, pulpboard, fibreboard, or strawboard, carloads.

From: Dairypak, Ga.

To: St. Louis, Mo., East St. Louis, Ill., and certain points in Illinois.

Grounds for relief: Circuitous routes and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL,
Secretary.

[4th Sec. Application 25974]

MOTOR-RAIL-MOTOR RATES; CHICAGO GREAT WESTERN RAILWAY

APPLICATION FOR RELIEF

APRIL 4, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: Middlewest Motor Freight Bureau, Agent, for Chicago Great Western Railway Company and Prucka Transportation, Inc.

Commodities involved: All commodities.

Between: Chicago, Ill., and Council Bluffs, Iowa.

Grounds for relief: Competition with motor carriers.

Schedules filed containing proposed rates: Middlewest Motor Freight Bureau, Agent, tariff I. C. C. No. 22, Supp. 29.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 25975]

SCRAP PAPER FROM SOUTHWEST TO BUENA VISTA, VA.

APPLICATION FOR RELIEF

APRIL 4, 1951.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: D. Q. Marsh, Agent, for carriers parties to his tariffs listed below.

Commodities involved: Scrap or waste paper, carloads.

From: Points in southwestern territory.

To: Buena Vista, Va.

Grounds for relief: Circuitous routes and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: D. Q. Marsh's tariffs I. C. C. No. 3919—Supp. 34, No. 3752—Supp. 559, No. 3908—Supp. 45, No. 3906—Supp. 42.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2515]

DELAWARE COACH COMPANY AND UNITED GAS IMPROVEMENT CO.

ORDER PERMITTING JOINT APPLICATION-DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 30th day of March A. D. 1951.

The United Gas Improvement Company ("UGI"), a registered holding company, and its wholly owned non-utility subsidiary company, Delaware Coach Company ("Delaware Coach"), having filed a joint application-declaration, as amended, pursuant to sections 6 (a), 7, 9 (a), 10, and 12 of the Public Utility Holding Company Act of 1935 ("act") and Rules U-42 and U-43, promulgated thereunder with respect to the following proposed transactions:
